PIONEER ANNOUNCER WILL FORSAKE MIKE

VOICE OF HAROLD W. ARLIN GAINED FAME AT KDKA

Promotion in Westinghouse Company Will Necessitate His Making Mansfield, Ohio, His Home

PITTSBURGH.—One of the best known voices in the world became silent, as far as the Radio audience is concerned, when Harold W. Arlin, pioneer announcer of the world and chief announcer of Westinghouse Station KDKA since its beginning in 1920, severs his connection with the station to take a position in the commercial world that will necessitate ending his residence in Pittsburgh.

Mr. Arlin remains with the Westinghouse company, however, as he has been appointed manager of personnel for the Westinghouse Electric Products company, at Mansfield, Ohio, and with his removal to the Ohio city has resigned his position as Chief Announcer of KDKA.

Popular All Over World

The hold Mr. Arlin has on the Radio audience is evidenced by the thousands of letters he has received from every section of the United States and from nearly every civilized country in the world. He is one of the incorporators and the first vice-president of the National Association, Radio Announcers of America.

One of the highlights of Mr. Arlin's Radio activities was the handling of the concerts from Wanamaker's in New York and Philadelphia which were transmitted to England by the Westinghouse international short wave relay system.

Mr. Arlin is a native of Missouri and is a graduate of the University of Kansas with the degree of bachelor of science in electrical engineering.

FUNDS ASKED FOR INSPECTION FIELD

Bureau of Budgets Recommends Sufficient Funds to Increase Force

WASHINGTON.—If the recommendation of the bureau of the budget is adopted by congress, sufficient funds will be provided for the Radio section to greatly increase its inspection field force. Such a step would result in greatly improved service to the public through the elimination of interference.

Officials of the budget bureau refuse to disclose the amount they have recommended for the Radio service. The opinion prevails, however, that the demands of the Radio bureau were given more consideration this year than at any previous time.

The budget bureau recommended an increase in the appropriation for the Radio service last year, but the recommendation was defeated in the house appropriation committee.

Pushing Cow Up-Hill Is Better Than Radio Drill

Strong Willed Bossey Provides Exercise and Plenty Laughs

SAN FRANCISCO.—At last something has been found which Radio cannot do. Health training exercises broadcast from KGO are good enough, as thousands of letters testify. But pushing a cow up-hill every morning before breakfast, causing joy in the entire neighborhood, is held to be more efficient than Radio physical drills.

Here is a letter sent to the studio manager of KGO. "I have tried all your exercises, but I like my own little work-out better. Every morning, before breakfast, I wrestle with a strong-willed, determined-eyed cow, pushing her up-hill against her wishes. I must say it puts your Radio exercises completely in the shade for efficiency.

"My cow exercises bring all the muscles of the body into play, and at the same time gives plenty of chance for muscles of the jaws. And the whole neighborhood gets the benefit of the 'laughing exercise,' which you recommend so highly.

Canadian Listeners Can Rent Telephone Poles for Aerials

WINNIPEG, Manitoba.—The owners of Radio receiving sets in Manitoba do not have to take a course in steeplejacking or hire a human fly to put up an aerial. The Manitoba Telephone System, operators of Station CKY, rents the use of its poles for the attachment of Radio antennas in cases where the poles are conveniently located. A small fee is charged for rental, labor and inspection.

Arlin Leaves KDKA

Harold W. Arlin before the microphone of the Westinghouse Station KDKA at Pittsburgh, which he will leave to take up new duties at Mansfield, Ohio.

Deny Broadcasting Stations All Higher Power Requests

WASHINGTON, D. C.—It is understood that the Radio section of the department of commerce is receiving a large number of requests from low-power broadcasting stations in class A for increased power. The department is turning down these requests, it is understood, as recommended by the recent Radio conference in which it was held that increased power should be treated as new stations.

COY MISS ON COVER GIVES BEAUTY HINTS

SOME folks have their good looks by a gift of nature. Others acquire them. We venture that the dainty little miss on our cover this week was just naturally endowed. But one would think it was acquired, to hear her talking to the listeners in over WMBB, Chicago, The call letters stand for the "World's Most Beautiful Ballroom" and that is what they call the Trianon, and beauty is the keynote and spirit of the place. Miss Beulah Clark, this week's cover girl, tells those who would like to know in the privacy of their own homes, by means of the Radio, just what to do to keep beautiful and how to do it. She arouses interest when she is heard and carries conviction when she is seen.

Canadian Railway Stations Are Heard in Los Angeles

MONTREAL, Canada.—Canadian Radio broadcasting stations have long ago established quite enviable reputations for sending their programs great distances, yet a new record has been established by CNRA and CRNV, the Atlantic and Pacific stations, respectively, of the Canadian National Railways, in simultaneously making known their presence in Southern California.. The unusual performance was described in a recent letter from Paul J. Potter of Los Angeles, 3,004 miles away from the most distant of the two plants.

Looking Ahead

What Does Jiggs Think of Mike When Jiggs Happens to Be a Movie Monk and Mike a microphone? See the answer in next week's Radio Digest. Special article with pictures tells how monkeys, sea lions, birds, dogs and other animals behave in the presence of the microphone and the effect on the listener.

Radio Pie and Wireless Spaghetti are among the new and practical by-products of kitchenette Radio. Ida Bailey Allen, the "Nation's Home-Maker," broadcasts recipes and gives wholesome advice to thousands of listeners who write to her and are helped by her kitchen suggestions. In the next Radio Digest.

Another One of Those Big Eastern Stations—WMCA—will entertain readers of the Radio Digest by proxy of a staff correspondent next week. There will also be an interesting account of how two Kansas City brothers got their start in college through the microphone of the Kansas City Star Radio station.

Radio Station KFOA Is One of the Pioneer Stations of the Great Northwest. It started back in 1922, at the Rhodes department store with 50 watts. It has kept pace with the times and last September marked its third step of progress when it went to 1,000 watts. Story of the rise of this remarkable station in next week's issue.

A. B. C. of Radio Fundamentals, as expounded by Milo Gurney, next week takes up the relationship between Radio and the two allies from which it borrows much—wire telephony and audio telephony. Mr. Gurney, being an old-timer in this field, and having followed it from its dot and dash infancy of 1906, is in a position to give our readers correct, concise, reliable information.

For the "Operating and Trouble Shooting" Series the staff has gone over the Thorola Islodyne and the results of its findings will be contained in next week's issue. These articles are not alone of value to the man who happens to own one of the sets mentioned, but contain much of value as to set design for the home builder.

AMRAD COMPANY IS BOUGHT BY CROSLEY

STATION WARC WILL AGAIN BROADCAST PROGRAMS

New Radio Receiver Is Designed for Factories of American Radio and Research Corporation

BOSTON.—Assets of the American Radio and Research corporation at Medford Hillside, which went into bankruptcy last April, have been purchased by Powel Crosley, Jr., nationally prominent Radio manufacturer of Cincinnati, it was announced recently by Harold J. Power, former president of the corporation, and before many weeks it is expected that listeners in will again hear Station WARC. A new 500-watt transmitter is near completion and it is planned to send its programs out from one or several of the Boston studios.

A newly organized Amrad Radio corporation will soon go into production, it was announced, with Mr. Power president and Mr. Crosley probably chairman of the board of directors. Mr. Power is credited with being the man responsible for the first programs over the air, back in 1915, when his station was operated under an experimental license with the call letters 1XE. Later, it became WGI, and its last call letters were WARC.

STATIONS STRIVE TO GET LICENSES

Prospective Broadcasters Making Every Effort for Wave Length —Door Has Closed

WASHINGTON, D. C.—Almost frantic efforts are being made by the owners of new stations already constructed or almost near completion to get wave lengths for them before the door is finally closed to new broadcasters.

In some cases, these newly constructed stations will be given wave lengths, according to officials of the department of commerce. It will depend entirely on the circumstances connected with each individual case.

Three stations are known by the department of commerce to be near completion and about ready to go on the air. One is in New York, another in Chicago, and the other in St. Louis. In the cases of the New York and Chicago stations, it is doubtful if they have much chance of getting a wave length at present. It is believed that the new St. Louis station may be given a wave length as soon as it is possible to do so.

In individual cases, according to commerce officials, much will depend on whether the station was warned in advance that it could not get a wave length. If the station was constructed in the face of such a warning, it may not receive very sympathetic consideration by the government.

Radio to Link British, U. S. Telephone Lines

Committee to Investigate Possibilities Following Experiments

LONDON.—With a view to linking up the American and British telephone systems by means of Radio telephony, further experiments will be made at an early date. For some time there has been regular transmission of Radio telephonic messages from America to England, and these have been received by the post office and by the International Western Electric company.

The success of the American experiments led the postmaster-general in 1923 to appoint a committee to investigate the possibility of transatlantic Radio telephony being established on a reliable commercial scale.

Cincinnati Organists Will Present Series of Concerts

CINCINNATI.—Radio listeners will have the opportunity to hear the outstanding organists of Cincinnati in recitals to be given through the Crosley WLW broadcasting station every Sunday afternoon, beginning at three o'clock.

The first recital was by Adolph H. Staderman, who was organist for the Cincinnati May festival for many years.

Programs are made up of a group of old favorite hymns and also the standard organ repertoire.

Among the organists who will participate in this service, are: Mrs. Lillian Tyler Plogstedt, John J. Fehring, C. Hugo Grimm, Leo Thuis, Mrs. Lillian Arkell Rixford, J. Alfred Schehl and others.

OVERSEAS TRYOUTS FOCUS DIALS

NEWS BRIEFS FROM THE BROADCASTERS

ART HICKMAN LEAVES KHJ FOR LURE OF FLORIDA

Victor Concerts Now on WJZ Chain—Old Fiddlers Meet at WOS—Paul Reese at KFI

Florida is even attracting southern Californians. Art Hickman's band, long a broadcasting event of KHJ, Los Angeles, is moving to that state. A very good orchestra, Don Clark's La Monica orchestra takes the place of the band. Don Clark the leader was formerly a saxophone soloist with Paul Whitman.

* *

A series of fine programs will be given this winter by the Victor Phonograph company over stations WJZ, WRC, WBZ, KDKA, and KFKX. These programs will include many celebrities.

* *

Station WOS, Jefferson City, Mo., fiddled out the old year and fiddled in the new when over 80 old-time fiddlers from the state of Missouri gathered before the microphone of this broadcaster. The best old-time fiddler was chosen by the fans listening in. Postcards, telegrams, and telephone calls determined the winner.

* *

Paul Reese, the popular announcer at KFI, Los Angeles, after an absence of several months, during which time he has been studying operatic roles, will return to his home station.

* *

The KGO Little Symphony orchestra, Sunday afternoon, January 10, will feature the Dvorak New World symphony. Arthur S. Garbett, musical interpretative writer, will give a short talk about Dvorak and his work before the playing of the symphony by the orchestra. Ruth Waterman, contralto, will be the guest artist assisting.

* *

The children had a special matinee recently at WOR Newark, when "Alice in Wonderland" was given. Only the most amusing scenes were played. The director of the Children's Radio theater, Clare Tree Major, gave the play in January because this is the birth month of Lewis Carroll.

* *

The Wanamaker series which was popular with fans last year has been resumed from WJZ, New York. The opening program presented the famous Russian string quartet and John Barnes Wells, tenor.

* *

On Saturday night, January 16, the Hernandez Brothers, artists of all stringed instruments plucked with the fingers, will broadcast their first concert to American listeners, from KGO, Oakland, beginning at 8:10 p. m., pacific time. The brothers are native Indians from Columbia, Central America, and play the music of their native land as only natives can.

* *

Robert Visconti's Hotel Gibson orchestra will be heard through WLW from 12:30 to 1 p. m. central time Tuesday and Fridays, and Monday, Wednesday and Thursday evenings from 7 to 8 p. m.

* *

Norman Brokenshire who has been heard lately from WRC, Washington, D. C., is back at WJZ, New York. He will take care of the microphone of the station which will use at times 50,000 watts.

* *

Old favorites are rapidly returning to the air and one of the recent "come back's" is the Sunday evening concert by Joseph Knecht's orchestra at WJZ.

* *

The Curb is the Limit club has reached its 100,000th member. Uncle Bob of KYW sent the 100,000th membership button to Joan Jule Kovacs, South Bend, Indiana. This club is to remind children to look both ways and count 10 before crossing streets.

* *

Vincent Lopez and his orchestra, who since 1923 have been one of the most popular dance organizations on the program of WEAF, is now broadcasting from a chain of eight stations direct from Casa Lopez (the house of Lopez), in New York city.

* *

Rudy Seiger, violinist-director of the Fairmount hotel orchestra, a daily feature of KPO, is again on the air. Mr. Seiger returns from a three months' European tour, during which he studied the new music and broadcasting conditions in European countries. He appeared this summer at WLS, Chicago; WEAF, New York; 2LO, London, and FL, Paris.

International Test Programs

COMPLETE, exclusive and special programs for the week of January 24 to 30, inclusive, for every European broadcasting station participating in the international tests, will appear in advance in Radio Digest, edition of January 23. Pictures and stories relating to European stations will appear as well in this special issue. Radio Digest staff correspondents in Great Britain and Continental Europe will give American listeners the best information obtainable anywhere on the international tests.

Wave lengths, hours, descriptions in detail of each number to be broadcast by European stations—all this and more will be found in the January 23 issue of Radio Digest. Be sure to reserve a copy at your newsstand. The special International Week issue will be in great demand.

TRULY SHATTUCK TELLS SECRETS

Truly Shattuck, one of the many musical comedy stars who have joined the ranks of Radio, recently told WLW listeners her secrets of beauty. Plastic surgery operations were a big help, she remarked, but proper diet and exercise are equally important. The picture above is mute testimony to the truth of her statements.

WLW Broadcasts Reports On Ohio River Conditions

CINCINNATI.—Through the efforts of Major W. W. Parker of the U. S. Engineers here, navigators, shippers, farmers and others for a stretch of 1,000 miles along the Ohio river, from Pittsburgh to Cairo, are receiving complete river information by Radio each morning.

At 10:45 a. m. central time, WLW broadcasts the official news of the weather, its prospects, the river and its stages, any unusual conditions or prospects in the tributaries of the Ohio, and whether the many dams on the thousand-mile stretch are up or down.

E. C. J. Sandback WGBU Director

BROOKLYN.—Edward C. J. Sandback of Brooklyn N. Y., has been appointed studio director and chief announcer at Station WGBU, Fulford-by-the-Sea, in place of "Bob" Nolan who has resigned on account of his health. It was announced recently by M. C. Tebbetts, president of the Fulford-by-the-Sea chamber of commerce, which operates the station.

KTNT Tower Tumbles

MUSCATINE, Ia.—KTNT, located here, but a few weeks on the air, had a bad stroke of beginner's luck when one of its towers, 133 feet high, collapsed and fell to the ground while being erected. A temporary wooden pole has enabled broadcasting to proceed, however.

Station Changes

Florida is booming in Radio stations as well as in real estate. The new voice is WDBO, Winter Park, Fla., 500 watts, 240 meters. The director is an old WSB man, Ed McConnell.

"The Voice of St. Louis" went on the air last week with the call KMOX. This station is more or less a community affair as 13 St. Louis organizations are contributing to its support. The station is located on the Hotel Mayfair at Kirkwood, Mo. The wave length is 261 meters.

The Haverford college new 1000-watt station is nearing completion and soon the call WABQ will be heard throughout the United States. This broadcaster is located in a suburb of Philadelphia.

Another familiar broadcaster is puzzling fans with a new call. KFDJ, Corvallis, Ore. went on the air recently with the call KOAC.

The new Baltimore station, WBAL, has changed its wave length. Dial 246 meters or 1220 kilocycles now for this broadcaster.

Loud Speaker Hook-Up

Dance music sufficiently loud to fill a good-size hall may be had by wiring several loud speakers together in series.

FANS ARE AWAITING FOREIGN PROGRAMS

INTERNATIONAL TESTS HOLD GREAT INTEREST

With Pacific Coast Stations Only Exception, U. S. Broadcasters Getting Excellent Cooperation

CHICAGO.—With the interest of the Radio audiences over Europe and the western hemisphere steadily increasing and the greatest cooperation in the history of the tests being enjoyed by the broadcasters in the different countries and by those in charge of the arrangements, the Fourth International Radio Broadcasting tests, during the week January 24-30, promise to be the biggest event that has been staged in the industry. Fans from more than 20 nations are clamouring for information concerning the tests and stations everywhere except on the Pacific coast are adopting an unselfish attitude, expressing their willingness to do what lies within their power to assure an overseas exchange of programs.

To Unite Radio Fans

The international Radio week will be the most extensive program of international cooperation yet staged and the good to result from it will do more toward drawing the Radio fans of the world together than any single thing that has been done so far, in the opinion of Powel Crosley, Jr., chairman of the executive commitee for the tests.

Foreign stations are arranging the most extensive programs they have put on the air and, undoubtedly, American and Canadian stations will extend themselves during the week. The complete programs of both the American and foreign stations will be carried in the Radio Digest in the issue of January 23. The call letters, wave lengths and other information to help the listener in will be given as well as pictures and feature articles relating to the European artists and stations.

Will Use High Power

Numerous stations this side of the Atlantic have signified their intention of increasing their power for the tests and practically every transmitter will be put in its best shape to get its greatest efficiency. Station OAK of Lima, Peru, is one of the latest foreign stations to announce their cooperation and will send on a wave length of 380 meters with increased power. Seven languages will be heard in the special addresses broadcast from Station KFUO, St. Louis, on Sunday, January 24, the opening day. Seven students of theology at Concordia seminary will broadcast the same message to the world.

Friday Night Is U. S. Special

During the week all broadcasting stations in the North American continent, including some South American stations, will be silent from 10 to 11 p. m., central standard time, to allow the European programs, which will be broadcast from 4 to 5 a. m., Greenwich time, to be received here without interference. This schedule will be followed during the week except on Friday night when for the first 15 minutes of the silent hour, the Atlantic coast stations will have the monopoly of the air, for the second 15 minutes the central western stations will broadcast, for the third quarter of the hour, the Rocky Mountain stations will be heard, and for the last 15 minutes of the specified time, the Pacific Coast stations will be sending out their programs.

Canada and Mexico Saturday

Saturday of the Radio week, January 30, the same domestic program will be carried out during the silent hour, except that during the first 15 minutes, the Canadian stations will have their chance, then the northern U. S. stations, next the southern U. S. stations, and during the last 15 minutes our Mexican neighbors will fill the air with their "hot tamale" messages.

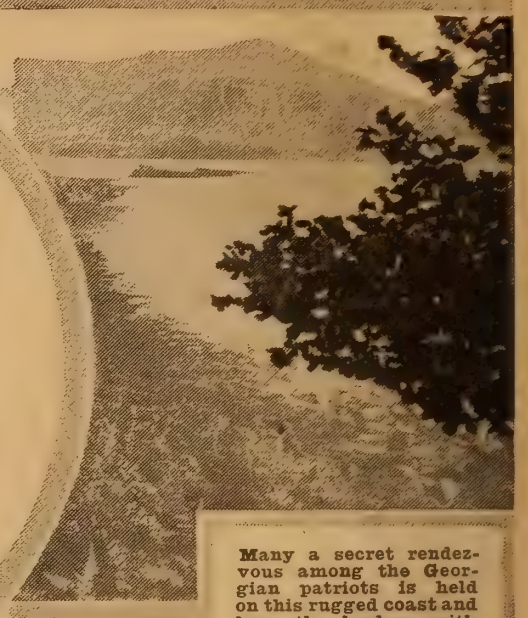
Pacific Coast Refuses Period

At this time, just prior to going to the press, there remains but one obstacle to perfect cooperation between the different sections of this country in the tests. The majority of the major stations of the Pacific coast have refused to keep off the air or participate in the test program for the interchange of entertainment, and, unless previous decisions are rescinded, will prevent the United States from giving their full cooperation to the other 25 to 30 nations who will take part in the tests. KGO, the General Electric company's station at San Francisco, have, however, signified their intention of remaining silent at the specified times during the week as requested by the International Radio Week committee.

Three-Word Radiogram Could Have Won War

This smiling "Molly Pitcher" of the Georgian rebellion helped fight for her country's freedom.

Government by Radio is conducted from Paris by President M. Jordiana (below) of Georgia republic.



Many a secret rendezvous among the Georgian patriots is held on this rugged coast and here the leaders with concealed sets hear from their chief in Paris.

Georgian warriors chased Russian Reds over this road.

AT LAST the hour had struck. The patriots of Georgia were marching to war for freedom from Red Russia. All the arduous months of rigid discipline and constant drilling in the hidden recesses of the Caucasian foothills had fulminated. They had come to the jump-off. And now it was war—war to freedom for the white race against the bronzed slavic.

The leaders were devoted and ready to die for their cause. They had rehearsed every attack, had forefended every imaginable contingency, and yet, they had missed one vital point, one modern weapon—

Through the night the armed units moved bravely and swiftly. They surrounded the garrisons of the hated Russians. Struggles were brief and invariably successful for the conquering heroes. But it was a far flung line. The detachments that held the bridgeheads to the main command of the Moscow hordes were out of constant touch. One small detachment was surprised by the enemy. A spark —three words to the next command—"blow up bridges" would have saved a nation—but—

Frederic M. Delano, Paris correspondent of Radio Digest, presents herewith an exclusive and vivid account of one of the most dramatic incidents of modern history.

BY FREDERIC M. DELANO

Pa.is Correspondent of Radio Digest

International Publication Rights Reserved
(Photos Copyrighted by F. E. Compton Co.)

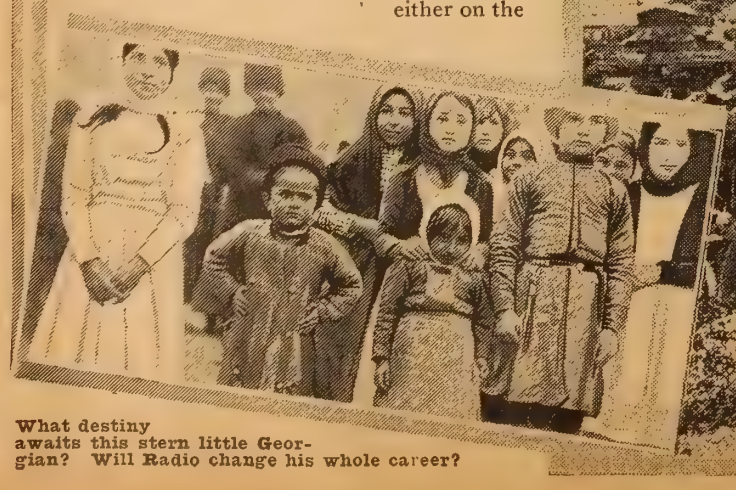
RADIO is playing a leading part in one of the strangest and most moving of national dramas of our time in the rugged foothills of the Caucasus, where the Georgians are awaiting their next opportunity to rise against the Russians.

In its main outlines, the story of this heroic struggle is well known. The three Caucasian republics, Armenia, Georgia and Adzerbadjin have for some years past been under the rule of Red Moscow. The Armenians, as is their nature, seek trade and profit where it is to be got without any burning desire to sacrifice either on the altar of freedom, so they give the Russians little trouble. The Mohammedans of Adzerbadjan look to Turkey for future aid and are content in the meantime to offer merely sullen acquiescence to the rule of the Moscow politicians. But the Georgians, white-skinned, proud mountaineers, are made of sterner stuff, and on several occasions they have risen and sought to drive out the oppressors.

The last big attempt was in the fall of last year. After serious fighting throughout the country, the rebellion was crushed. According to one of the most prominent of Georgian leaders in the field at that time "it was crushed through lack of Radio."

What he meant was this. The country is fairly big, with exceedingly difficult communications. The rising had, of course, to be prepared in profound secrecy and the guerilla nature of the fighting made open relations between the different districts difficult. "We lacked some means of general communication between our various columns. We lacked, for instance, some swift means of conveying an order to one local commander to blow up certain railway bridges on the main line the Russians had to use in order to bring up reinforcements. Had we had any Radio equipment, this would have been a (*Continued on page 28*)

Under the heel of the Moscow terrorist is this proud city of Tiflis (below), capital of the Georgian republic. But Radio keeps the spark of hope alive and some day the patriots may rise again.



What destiny awaits this stern little Georgian? Will Radio change his whole career?

Ohm Tells Wee Lo of Story Tellers' Hour

This is Val McLaughlin (above) the Lady with a Thousand Smiles who was first the Voice for the Little Listeners of WOC, Davenport, and more recently of WOAW, Omaha. In the circle above is Cousin Oswald of KHJ, Los Angeles. In the circle at the left is Big Brother Bob Emery of WEEI, Boston. Dream Daddy Harry E. Ehrhart (left), WLIT, Philadelphia, is one of the original Bed Time Story Tellers. At the bottom of the page is famous "Uncle Bob" of KYW, Chicago. Beside him are two of the millions of Little Listeners.

BY H. P. BROWN

THERE sat Ohm, the Big Radio Dog, broadcasting from Station USA during the regular Bed Time Story Hour, there he sat like a paper doll (because he had no thickness) on the Aerial with his ears pricked up like a tall M watching Something that crept slowly toward him from the Shadows of the dark buildings.

The Something that kept creeping along swinging its arms was the Sandman. It was early and the bag was full of sand so that he could hardly carry it. Ohm, the Big Radio Dog, jumped up on his hind feet that looked like an inverted A. Only a Radiolier could have seen him because it was just like looking at the edge of a piece of paper. He was afraid of the Sandman. He did not want to go to bed. But it was almost the end of the Bed Time Lullaby Hour and that is the time when most Radio Dogs (Big Ones by the name of Ohm) should be tucked into Bed.

And as the Sandman drew nearer, Ohm, the Big Radio Dog, grew so Nervous he almost slipped off the Aerial. Just then a Long Radio Wave—about a thousand Meters, I guess, came loping along like a measuring Worm. Ohm, the Big Radio Dog, called to it:

"Bow Wow! Heigh Ho!
On your back, may I go?"

Although he was in a Great Hurry the long, loping Radio Wave turned around to see if it was a real Radio Dog and not any other kind of a dog and he smilled and when he answered it was a hum like a Lullaby Song.

"On my back, Big Dog Ohm—
You'll slow me up where e'r I Roam
But where'll you go, China or Home?"

Ohm was fidgeting on the Wire as though it were red hot. He looked back at the Sandman who was getting nearer and he said:

"To China, if you please—
Get me there, quick as a sneeze!"

Well, would you believe it, as quick as a sneeze and about one millionth of a second quicker Ohm, the Big Radio Dog, broadcasting from USA was in China. Once more he found himself swinging on an aerial. This time it was stretched between two high bamboo poles. Below him was a red tile roof. And back of the roof he could look down into a garden with rose bushes in full bloom and a little stone fountain. He was still panting for it was a fast hop—about 186,000 miles a second—as he sat swinging on the aerial his long, flat paper-like tail twisted about the No. 14 strand wire. Over the house tops he could see the Ocean and the Sun was getting up from its morning's bath like the half of a great rose-red plate. He had passed it on the ocean after he had left the USA.

And as Ohm, the Big Radio Dog, broadcasting from USA at the regular Bed (*Continued on page 10*)

KPRC Helps Conquest of Texas Air Ranges

TEXAS IS the biggest brother in the big family Union. Every school child knows there is more air at large over the area between Amarillo and Brownsville and El Paso and Beaumont than over the entire German republic.

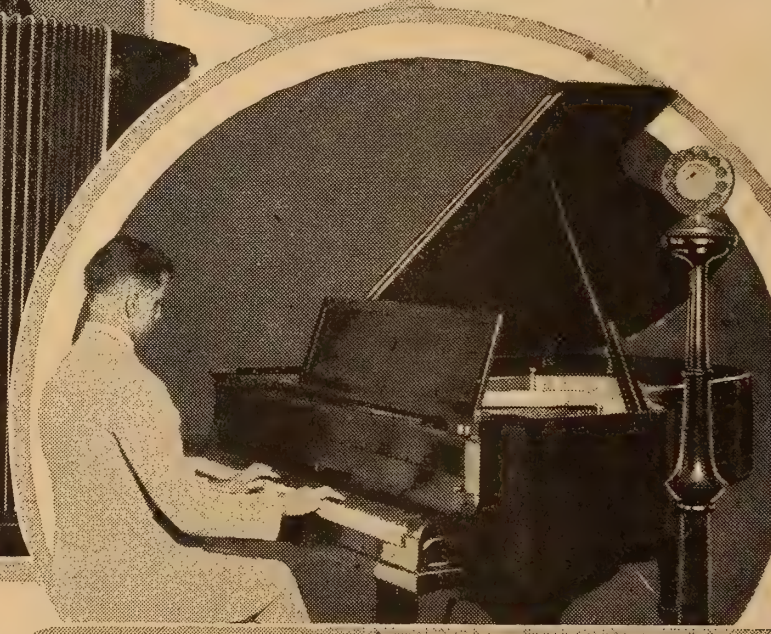
Yet it is scarcely true to declare that this vast etherial space over the Lone Star state is "at large." The fact is it is pretty well roped and tied according to the standards established by the fathers when barbwire was unknown and ranches were ordinarily defined by the surveyor's stakes.

Texas may be a big state but it is not gawky. And the big men (they also grow more six footers to the square mile than any other state in the Union) have the atmosphere pretty well corralled so far as Radio is concerned. The 262,896 square miles within its borders are charged with the finest kind of Radio entertainment. The lonely rancher far off the motor trails and the track of the Iron Horse can slip out of his saddle into an easy chair, flip a dial or two, and hitch his Pegasus before the Rice Hotel of Houston or the Paso del Norte at El Paso, go in and listen to the music.

W. P. Hobby, former governor of the state personally inaugurated KPRC at Houston. He tendered the institution to the service of the state on behalf of the Houston Post-Dispatch of which he is president. Houston needed a Radio station. It was the strategic point for one and on three weeks' notice G. E. Zimmerman, the present supervisor, had the parts assembled and put together ready for the first concert.

Of course there was a particular need for the rush order and the story of the occasion and the organization are told by the Texas correspondent of the Radio Digest, Mrs. Susan Haymes, as follows:

Here he is, girls, Alfred P. Daniel (top) the good-looking announcer at KPRC. On his lapel you see Edna Adams, "Sweetheart of the Air" and under his eye is charming Lois Lilley, assistant.



G. E. Zimmerman (left) is the capable supervisor who installed KPRC in the record time of three weeks. He is assisted by Harry Crossman (above) an expert operator.

"Hello folks, everywhere," were the first words spoken into the air from Station KPRC —Houston, Texas, "Kotton Port Rail Center," the broadcasting station of the Houston Post-Dispatch. At exactly 8 o'clock, central time, on the night of May 9, 1925, KPRC came into being. Its opening was coincident with the beginning of the world convention of Associated Advertising clubs which met in Houston, May 9 to 14. The usual formalities of opening addresses were interspersed with most out-of-the-ordinary talent, for KPRC was brought into existence quickly with a definite purpose—the Houston Post-Dispatch wanted to give to the nations the details of the entire convention program—and success of the very highest order prevailed.

The First Garrison band of Mexico—a messenger of good will, sent to the convention by President Calles of the Republic of Mexico, himself a Radio enthusiast—was the biggest musical event of KPRC's initial broadcast. The weather was admirable and the large outdoor promenade studio was christened with the selections "Over the Waves" and "La Golondrina," played as only native Mexicans can play the numbers so dear to their hearts.

Mayor Oscar F. Holcombe of the city of Houston, was first to apply the slogan of KPRC and briefly told of the fitness of the application to Houston as a port and rail center of prime importance.

Former governor of the state of Texas, W. P. Hobby, now president of the Houston Post-Dispatch, gave the dedicatory address in terms of unmistakable generosity, whereby KPRC entered the field of the air to enlarge the knowledge of her listeners and to widen the horizon of usefulness for the Houston Post-Dispatch.

The Royal Scotch Highlanders band of St. Petersburg, Fla., a bright light of the convention week, furnished a full score of entertainment numbers.

Judd Mortimer Lewis, the poet laureate of the south and children's story teller, gave the kiddies of all ages a much too short sample of some of the "Kiddies Hour" readings. "Uncle Judd's Kiddies Hour" is a daily 7 p. m. feature.

KPRC was built, housed, tested and put on the air in the record time of three weeks—every detail had been completed and all adjustments were made, that spelled absolute success for KPRC from the very beginning. The first program brought acknowledgments from the four corners of the continent. Edmonton, Alberta, Canada; St. Albans Bay, Vermont; Kingston, Jamaica, B. W. I., and Guatamala were among the first to wire of their reception.

KPRC is a standard 500-watt Western Electric, latest type 101-B transmitter complete, and operates on a wave length of 296.9. A valued appurtenance of the operating room is the quartz crystal oscillator, ground to maintain frequency, 1,010 kilocycles, at all times.

KPRC was installed by G. E. Zimmerman who is now supervisor. His Radio career has been wide and varied.

KPRC is admirably located in a suite of four rooms atop the Houston Post-Dispatch newspaper plant, far enough from the heart of a bustling city for ideal Radiocasting. The 135-foot steel towers may be seen from a great distance; at night a white light casts them in bold relief.

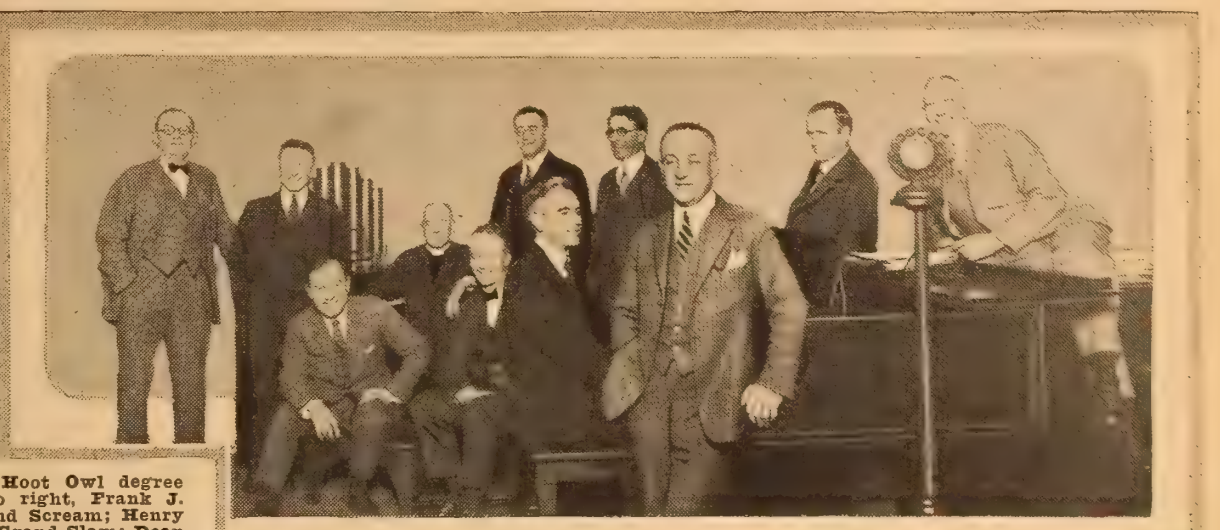
The studio construction embodys all the advanced principles in acoustics and arrangement. It is walled with celotex lumber, claimed perfect for broadcasting. Soft drapes in a subdued shade of Radio fleece attains a most attractive background. Heavily piled taupe rugs lessen the footfalls of enthusiastic fans who are cordially welcomed to KPRC. There is a friendly air about the studio, with its ample seating capacity, wide open windows and hospitable personnel.

Alfred P. Daniel is announcer and program director and is early being recognized for his clear-cut diction and enunciation. While still a young man, he is an old-timer in Radio. He has earned for this station an enviable position, due to his judgment and tact. He realizes the responsibility of his office, that the station is dedicated to service and the ideals of a great newspaper, and is guided by the further conviction that the privilege of broadcasting carries with it the duty of providing the vast unseen audience with programs that are really worth while hearing. (*Continued on page 10*)

Few artists, American born, have mastered the accordion as well as Miss Virginia Willrich (above, left) at KPRC and with Frank Tilton, the blind pianist, this station has two outstanding instrumentalists. Another big feature is the Sylvan Beach Orchestra (right) of the Port Houston Playground.

Hungari Hoot Owls Roost at KGW Portland

Ever see a singing owl? Behold, then, the young lady just above these lines, Miss Kathleen Duffy, sweet caroler of the KGW Hoot Owls.



At right is Hoot Owl degree team—left to right, Frank J. Sardam, Grand Scream; Henry W. Metzger, Grand Slam; Dean Collins, Grand Sonnet; Bishop W. T. Sumner, Grand Sermon; Alan (Punch) Green, Grand Songsmith; Barnett H. Goldstein, Grand Schmoos; Wm. Robinson Boone (seated at piano), Grand Skipano; R. G. Calvert, Grand Skidoo; Chas. F. Berg, Grand Screech; A. C. Dixon, Grand Scratch, and "Tige" Reynolds, Grand Sketch.

APEPPY New York newspaper man, feeling that the great metropolis could be trusted to continue without him, decided to go West. So he bought a ticket for Portland, Oregon. He never regretted his decision. He speedily found himself annexed to the Oregonian and since 1923 has been director of that newspaper's broadcasting station, KGW. Now R. V. (Dick) Haller—for 'tis none other than—wouldn't give one solitary hoot for all the effete in the Knickerbocker kingdom. No, he has other uses for his hoots. He is the Grand Gazaboo and Hootmeister Extraordinary of the Keep Growing Wiser Order of Hoot Owls.

This is one of the most prominent and exclusive (you have to qualify as a KGW listener before you can join) Radio clubs west of the Mississippi river. During a lucid interval the Grand Quillshover of the order was persuaded to disclose the secrets of the order in a special article which begins on this page.

Enigma, the Hoot Owl Mystery Maid, is unmasked and her face with the mask removed is shown to the right. However, her name was still a mystery at the time these lines were written, for that was one secret the Grand Quillshover guarded jealously up to the time of the Hungari.

Left to right, above, are, William and Dick. "William" is sometimes known as "Sweet William" but Dick's other name is Haller. Both are important in the process of joining the famous Hoot Owls congregation at KGW. "Enigma," right, unmasked. Do you know her name?

BY THE GRAND QUILLSHOVER

Secretary to the Grand Scream of the Hoot Owls

THE KGW, KEEP Growing Wiser Order of Hoot Owls' "Hungari"!!

These magic words create such a furore 'way out west in Portland, Oregan, that their first mention causes strong men to weep with joy and makes the youngest of infants stop their crying and laugh with little cooings of happiness. For do not the Hoot Owls, that fun radiating, gloom-chasing, sunshine-distributing group at KGW, the Oregonian at Portland, Oregon, accomplish just these very things when they get their microphone on the air at their annual Hungari given the first Friday of every New Year? Emphatically—they do!

The inception of the "KGW, KEEP GROWING WISER" order of Hoot Owls at the Oregonian station of Portland, was accomplished 'way back . . . . le' see, yes, guess it was too—'way back in the spring of 1923 A. D. My! how tempus sure does fleets. What's that? Why A. D. means "After Dick," of course. Alright, alright, I'll expoundulate. Yu'see A. D. means "After Dick," "After Dick," means "After Dick Haller," and all that means "After Dick Haller had taken charge of KGW, and had thought up his little scheme of having an order of Hoot Owls." Sabe?

Now, getting down to a serious definition of the purpose and aims of the KGW order of Hoot Owls, we find that this order was organized in the spring of 1923 by R. V. (Dick) Haller, director of KGW, for the express purpose of providing a galaxy of clean, whole-hearted fun for Radio listeners. With this one idea in mind, a group of men who could accomplish these ends were recruited from the business element of Portland; care being exercised in demanding that each member of the degree team be a jolly good fellow and a really good sport. Such a group of men was enrolled as the official degree team of the newly-formed Keep Growing Wiser order of Hoot Owls, and at their first conference (*Continued on page 26*)

Good for a dreamy ballad or those wicked blues, Helen Nordstrom Boohr (above), sings them all for the Hooters with Miss Ruth Mead assisting at the piano. And a nestful of Owlets (left) who help at KGW, Portland, Ore.

STATIONS' SIGNALS BIGGEST OBSTACLE

MOST OF INTERFERENCE DUE TO CONGESTION

Bureau of Standards Makes Public Analysis of Main Causes of Imperfect Reception

WASHINGTON.—The greatest obstacle to perfect Radio reception is broadcasting station interference, according to an analysis just made public by the bureau of standards. The second greatest obstacle is atmospheric interference, while fading is third.

The analysis of the bureau was of the results of a series of observations covering a period of one year, from August, 1922, to July, 1923. Cooperating with the bureau in the tests were 100 voluntary observers who made approximately 8,500 observations on the signals of KDKA, East Pittsburgh.

The analysis showed the following relative magnitude of obstacles to reception: No obstacles, 32.4 per cent; other broadcasting stations, 25.7 per cent; atmospherics, 15.7 per cent; fading, 12.2 per cent.

Since there has been a big increase in the number of broadcasting stations since the observations were taken, it is believed that station interference for 1925 would show a much higher percentage.

Distance Not a Gauge

A theory which is given credulence by the analysis is that signals from distant stations are often of greater intensity than signals from stations of similar power, but located comparatively near the observer.

The data in question showed that there is a sharp drop in the intensity of station signals for the first 75 miles. Between 75 and 125 miles there is a slight increase in signal strength, while between 125 and 175 miles there is another sharp drop. Between 175 and up to 450 miles there is a steady and gradual increase in signal strength.

The analysis shows that the strength of atmospherics for the period studied were greatest in September, and least in February. Fading was greatest in October and least in February.

CONTEST DECIDES SLOGAN FOR KFAB

"Home Sweet Home Station" Is Motto Selected by Lincoln, Neb., Broadcaster

LINCOLN, Neb.—"The Home Sweet Home Station" is the slogan selected as the winner from a total of 142,636 replies received to Station KFAB's request broadcast in connection with the station's first birthday party. Dick Stone of Gillette, Wyoming, submitted the winning slogan and was awarded the grand prize of the contest, a Buick Standard Six.

During the two weeks that followed the birthday program, 13,909 telegrams, 2,639 long distance telephone calls and 126,088 cards and letters were received at the station.

Send Aviation Talks

WHB, the Sweeney Automotive and Electrical school, has recently inaugurated a series of aviation talks. These are given every Thursday evening at 7:30, central time, and are given by Mr. Harry C. Wimer, who is well known in aeronautical circles and who is the chief instructor in the new aviation department in the Sweeney school.

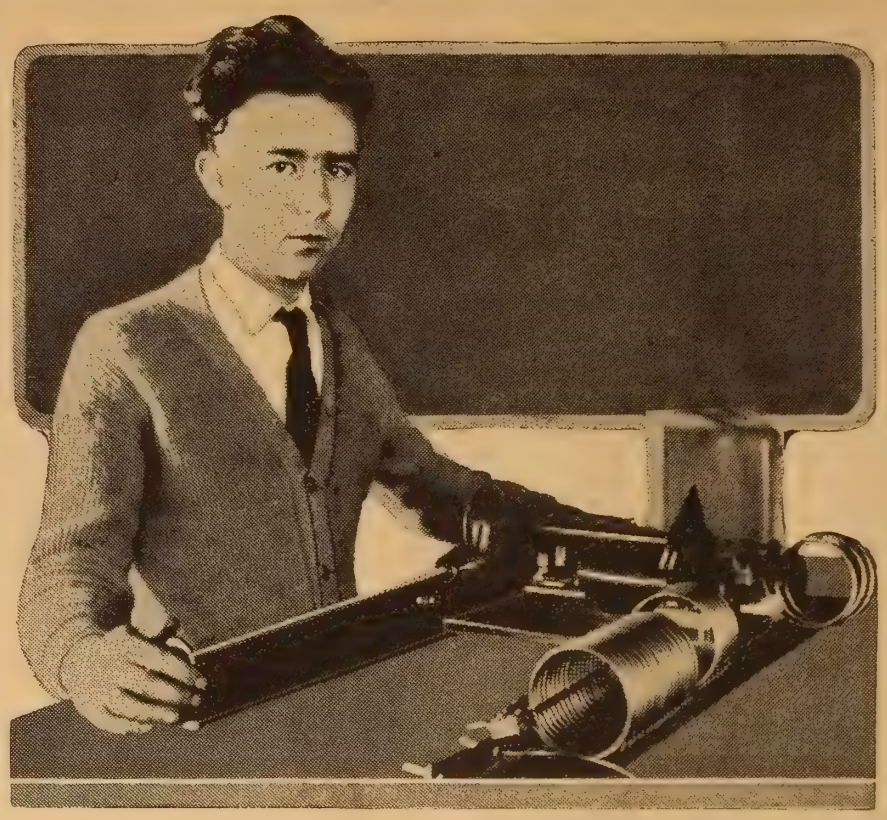
Butte Has Big Club

BUTTE, Mont.—Although not having a broadcaster in or near the city, Butte has one of the largest, if not the largest, Radio clubs in the United States.

FIVE WILL RESPOND TO NAME "EUGENE"

CINCINNATI, Ohio.—One can nearly always find "Eugene" at Station WKRC, here, and one will be lucky if five young men do not answer a call for him. The secret of this strange phenomena is that there are five "Eugenes" permanently located with the studio and on its programs. To avoid confusion they are known as "number one," "number two," and so on down the line. The five "Eugenes" on the studio payroll are: Eugene Mittendorf, studio director; Eugene Perazzo, musical director; Eugene Schmidt, tenor soloist; Eugene Wesselman and Eugene Huber, operators.

CLAIMS PRIVACY IN TRANSMISSION



Radio stations may become nearly as confidential as telephone lines if the projected invention shown above with its inventor, Winfield W. Salisbury, student at the University of Iowa, is successful. He has succeeded in oscillating the shortest known amateur waves. He uses a dial with 10,000 graduations, one of which will tune out his short waves.

NEW YORK AQUARIUM TO GIVE NEW SERIES

Miss Ida M. Mellen Will Talk Over Station WEAF

NEW YORK.—The New York aquarium announces that the long and popular series of Radio talks given from Station WEAF, on alternate Fridays since June 1925, by Miss Ida M. Mellen, assistant to the director of the aquarium, will be repeated during 1926, in response to many requests.

This time Miss Mellen will be heard on occasional Wednesday evenings in the New York Zoological society series, Station WJZ, beginning with two talks in February—one on the New York aquarium and its denizens, and one of goldfishes and the care of fishes in captivity. These will be followed by 10 other talks on fishes, succeeding subjects being whales and porpoises, sea birds at the aquarium, seals, etc.

British Notes

A novelty item soon to be broadcast from all British stations will afford amateur detectives a chance to shine. The plot is based on a murder supposed to occur in an apartment house in West London. Listeners will be asked to furnish the best explanation of the mystery, and to send their solutions to the British Broadcasting company. The fan whose attempt most closely approximates the actual solution, will win $500. All contestants must donate 25 cents to charity. The first broadcast deals with the murder and an arrest; the trial is to be broadcast five days later.

What does it feel like to drive a subway train? British listeners will shortly hear the experiences of a driver employed on the London Underground railway, and he will try to convey an impression of his daily life rushing to and fro in the bowels of the earth.

English stations heralded in the New Year with two hours of dance music. From midnight on December 31 to 2 a. m. on January 1, the dance music at the Albert hall, the largest hall in the country, was relayed to 2LO and 5XX.

The London county council is to follow the example of the House of Lords by installing earphones to improve the hearing in the council chamber. A phone will be provided for every member of the council, and a number of phones will be installed in the press gallery.

Is Northernmost Radio Station

OSLO.—The nothernmost Radio station (code) in the world at present, it is stated, is that at Longyear-city on the island of Spitzbergen. The station is situated on the shore of Advent Bay, its geographical position being 78 degrees 20 minutes north.

RADIO TELEPATHY TRY IS COMPLETE FAILURE

British Attempt to Send Thoughts Fails to Work Out

LONDON, Eng.—Mental telepathy by Radio which was tried out by the British Broadcasting company here, was a complete failure according to reports received after the test.

Eight subjects, men and women, were locked in a room and told to concentrate upon what subject the millions of fans throughout the country were thinking about. The announcer informed the "guessers" that the first subject was a letter of the alphabet. The letter happened to be "K."

One of those in the locked room guessed "K" as the letter after three trials. This was the nearest that anyone of them came to the solution.

Radio Brings Isolated Miners News of World

Sections Remote from Telegraph Kept Informed

SPOKANE, Wash.—Several hundred miners, situated in regions of Idaho remote from the railroads and the telegraph, some of them well up on snow-clad mountains, with the aid of the Radio are as intimately in touch with the news of the world as a man buying the latest edition of a newspaper on a city street, according to Stewart Campbell of Boise, state mine inspector.

"I obtained most of my immediate information about the ball games and other happenings for the last 18 days of a tour of Montana by Radio," said Mr. Campbell while a visitor at Spokane recently.

"The Bunker Hill & Sullivan has a large Radio at the scene of its operation in Deadwood basin, as well as many other mining companies.

"The Radio is a great thing for the isolated mining camps. It brings civilization right into them. The only thing disliked about it by some of the miners is that they can not contradict or get back at it if anything is said that they do not like to agree upon."

Approve N. S. W. Relay Scheme

WASHINGTON, D. C.—Definite approval has been given to the New South Wales State Radio scheme and inquiries are now being made as to a suitable site for the Sydney and relay stations, the first of which is expected to be at Newcastle. The cost of establishing the central station and six relay stations is estimated at more than $50,000, but for the present only one relay station is to be established.

With the ordinary receiver having three to five one-quarter ampere tubes, a 90 ampre-hour storage battery is all that is necessary.

TO SEEK WEATHER'S RELATION TO STATIC

STEWART-WARNER BEGINS TO OBSERVE BUGBEAR

Will Note Reception at Twenty Widely Scattered Posts—Fading Also Will Be Investigated

CHICAGO.—Investigation of "fading" on a scale never before attempted in the United States will be made in mid January at 20 observation stations, it was announced today by J. K. Smith of the Stewart-Warner corporation.

Hitherto such experiments have been carried on in isolated sections of the country between two or at most three stations. The results of such research have been negligible. There is still no explanation of why signals should be stronger in the winter, when static electricity leaps out of one's hair, or sparks out of the rug at one's feet, but weak in summer when there are apparently no static charges in the things about us, according to Mr. Smith.

Will Plot Radio Reception Against Weather

The Stewart-Warner observation posts will chart readings on selected distant stations every two minutes during the period of the tests. The results will be averaged and plotted on a map similar to that issued by the government weather bureau. It is the belief of the engineers conducting the tests that curves which will make possible a comparison of effects and a search for causes will result. If so, the experiment will be repeated at regular intervals throughout the winter.

"By a comparison of fading and the static curves with those of the U. S. weather map, it may be possible to determine the effect of weather on such phenomena," said Mr. Smith, "By plotting the curves of fading and static in tests on stations of varying wave length, some tangible progress may be made toward discovering what frequencies are best for broadcasting.

APPOINT JUDGES OF PLAY CONTEST

Silver Trophy to Accompany Cash Award to Be Called "Hoover Cup"

CHICAGO.—The machinery for conducting the nation-wide contest to secure the best Radio play and improve Radio programs to be held under the joint auspices of the Drama League of America and WLS, the Sears-Roebuck station, here, has been set in motion. Stuart Walker, playwright and producer, has been secured to act as chairman of the Radio play contest committee and Augustus Thomas, the playwright; George Arliss, the actor, and James O'Donnell Bennett, former dramatic critic, now feature writer on the Chicago Tribune, have been selected judges of the contest.

Mr. George Junkin, field secretary of the Drama League, has announced that the silver loving cup to be awarded in addition to the $500 first prize will be known as the "Hoover Cup," as the secretary of commerce has expressed a keen interest in the contest.

A prize of $200 will be given for the second best play submitted and $100 for the third. Any man, woman or child is eligible to compete. According to the rules of the contest, all manuscripts must be received on or before February 1, 1926. The manuscripts are to be sent to WLS, Hotel Sherman, Chicago.

KSD, St. Louis, is to have its own orchestra. This organization will be composed of members of the St. Louis Symphony orchestra and will give concerts every Monday night at 9 p. m. central time.

RADIO AIDS CASE OF SLEEPING SICKNESS

NEW YORK.—John F. Hill, who is broadcasting every Saturday evening from WEAF a series of suggestions for better eyesight, discovered an unusual case of double vision recently, when a young man walked into his office and expressed interest in his weekly Radio talk and asked to have his eyes examined for glasses.

Mr. Hill's examination disclosed the fact that the man's condition was not caused by eyestrain, and, therefore, directed the man to a medical specialist who found him to be suffering from sleeping sickness.

GALAXY OF STARS ENTERTAIN RADIO FANS THROUGH KFWB MICROPHONE

LIFE for the Radio artist is not a very dull affair. The group to the right is composed of some of those who broadcast through Station KFWB on the Warner Brothers movie lot at Hollywood. Standing, from left to right, Verna Kloess, concert pianist; Frank Stever, baritone; Margaret Lancaster, mezzo-soprano; Billie Dunn, studio accompanist; Bill Blake, lyric tenor; Charlie Wellman, announcer and manager; Ron Wilson, pianist; June Purcell, Radio's Sweetheart; Ben McGlashan, Big Brother of KFWB, and Lee Kent and her Tarapache. Seated, left to right, are Charles Beauchamp, dramatic tenor; LeRoy Kulberg and his uke; Ray Kellogg, violinist, and Bill Hatch, pianist.

"I have below me five stars that can be classed as a constellation," says Charlie Wellman, announcer and manager of KFWB, "But its a cinch I don't look down on them." Charlie is standing on one of the towers of the Warner Brothers station that was built within 28 days after Jack Warner decided the company should do a little broadcasting. The attractive quintet is composed of (from left to right) Verna Kloess, concert pianist; Lee Kent, who sings quaint songs and plays the terapache; Billie Dunn, studio accompanist; June Purcell, Radio's Sweetheart, and Margaret Lancaster, mezzo-soprano.

DRAWS $25 FINE FOR UNLICENSED SENDING

Dayton, Ohio, Man Caught Broadcasting Phonograph Records

WASHINGTON.—The attention of the department of commerce has been called to a case where punishment was meted out by court to the owner of a broadcasting station which was operated without a license.

The offender was Roger M. Daugherty of Dayton, Ohio, who broadcast phonograph records on 340 and 400 meters. He had been on the air about two years and Supervisor Edwards of Detroit and his entire staff had been trying to catch him. They finally located the transmitter and called on Daugherty.

The transmitter was cleverly concealed and it was only recently that Daugherty was caught in the act. Daugherty was fined $25 for the offense. The call signal of 8COF was used by Daughertv.

Texas Boy Scout Wins Pup For One-Tube DX Record

SAN ANTONIO, Texas.—Otto Glaeser, Jr., 16 years old, boy scout and Brackenridge high school student, tuned in 42 Radio stations in one hour—18 of them distant ones, with his one tube home-made regenerative receiver. This remarkable performance, which sets a record for this city, won for young Glaeser the September award of the Crosley Radio corporation of Cincinnati. His boy scout honor was his verification.

The award is a pedigreed German police puppy from the celebrated Champion Kora von Warnowtal of Green Fair Kennels, Greenwich, Conn. The puppy has been shipped.

The Crosley corporation is now conducting a second contest for one tube sets for the best record of distance which will continue until March.

This Would Insure Home Sweet Home

Germany Has List of Severe Regulations for Aerials

LONDON.—Detailed and severe regulations regarding the purchase of aerials have been introduced in Germany, and a further elaborate set of rules governs their use. Here is just one of the sixteen most important items in the rules:

The sag of the aerial wire is to be so adjusted that with contraction through cold and with additional loading by wind, snow and ice, there is a factor of safety of three.

The sag is to be calculated for the two following cases:

(a) Temperature 23 degress Fahrenheit with additional loading; (b) Temperature 4 degrees below zero Fahrenheit without additional loading. The additional loading is to be assumed to act in the direction of gravity, per meter, and equal to 180 d in grams per meter, where d is the external diameter in millimeters.

A German fan after reading the above should feel like "acting in the direction of gravity by jumping off the roof."

The introduction of these rules has caused German experts to prosecute researches toward the evolution of aerialless receivers.

Let's move to Germany!

Radio to Aid Aviation

BRUSSELS.—The Belgian government has just signed conventions with the British, French, Luxemburg and Dutch governments ensuring Radio being used as a help to aviation. Radio stations on air routes are divided into two classes: control stations and collaboration stations. The former will keep airplanes constantly informed as to direction of flight, while the latter will help the plane determine its position.

INDIAN ENTERTAINER GAINS NEW LAURELS

DENVER.—Chief Evergreen Tree, Pueblo Indian, an expert in the art of wild animal mimicry, today lays claim to new laurels via Radio via KOA. During a recent program the Indian gave a few imitations of wild animals and as a result was confronted with a complaint from Alma, Mich. The writer told him that when the pack of yelping coyotes broke loose over the Radio their pet cat departed and failed to return. "Pretty good," the Indian grunted, "Chief Evergreen Tree, he reason why cats leave home."

NUTTY CLUB SESSIONS GRANT ALL REQUESTS

WBBM Nonsense Starts Off Week With a Smile

CHICAGO.—Just a little fun and frolic to start the week with a great big smile was the idea that prompted those early hours of nonsense from WBBM, here. And it seems that late-hour listeners like their programs informal. The staff of WBBM, Chicago, works Sunday from twelve midnight until "when" and they are at it until every request is filled. That isn't so easy now since these run well over a thousand each session.

A Louisiana member suggests "a little nonsense now and then is relished by the best of men." A membership with Nutty club of WBBM, Chicago, which includes policemen, bootleggers, preachers and college professors, shows that a strong sense of humor is one of the attributes of the broadcast listener.

Improve Greatly Navy Radio Communication

Shore Stations Are Fast Installing Modern Tube Equipment

WASHINGTON, D. C.—Secretary Wilbur, discussing naval Radio activities during the past year in his annual report to the president, says that Radio communication has improved, especially in connection with aircraft and submarines.

"The Radio traffic stations of the shore system are being gradually improved," says Secretary Wilbur. "The obsolete spark apparatus and the obsolescent low-powered arcs are gradually being replaced with modern tube equipment as funds become available."

He continues, "the interest of the American Radio Relay league has been enlisted in naval high frequency (short wave) work. An official of the league was placed on active duty and detailed to the fleet to conduct extensive short wave tests afloat during the recent Hawaiian maneuvers and cruise to Australia and New Zealand. These tests have already given valuable results, and large amounts of traffic have been moved by means of this apparatus."

FEW BROADCASTERS SUBDUE HARMONICS

REQUEST INSTALLATION OF GOOD SUPPRESSORS

But 47 Stations Have Been Equipped with Apparatus to Prevent Sending Stray Offshoots

Noise, noise, noise! Broadcasting stations heterodyning with one another, radiating one or several harmonics, their harmonics heterodyning with one another. That's what the Radio supervisors and the department of commerce are seeking to eliminate by the limitation of broadcasters and the strict supervision and inspection of those stations allowed to broadcast.

As a part in this general scheme, broadcasters have been advised to equip themselves with "harmonic suppressors" of recommended type. Harmonic suppressors prevent stations from sending out stray offshots of their program on waves other than that for which they are licensed.

So much for explanation. Up to December 1, which is the date the last government report was made, only 47 of this country's 500 stations had so equipped themselves. Of course, there may be stations which do not radiate harmonics, or their harmonics may be so slight as not to require a suppressor. In that event, the Radio supervisors or listeners can hardly complain.

"Honor Roll" Is Listed

Nevertheless, the following "honor roll" lists broadcasting stations which, up to December 1, had been equipped with approved harmonic suppressing devices.

KDKA, East Pittsburgh; KFDM, Beaumont, Tex.; KFJF, Oklahoma, Okla.; KOB, State College, N. M.; KPRC, Houston, Tex.; KTHS, Hot Springs, Ark.; KWWG, Brownsville, Tex.; WAEX, Mount Clemens, Mich.; WAHG, Richmond Hill, N. Y.; WAPI, Auburn, Ala.; WBAL, Baltimore, Md.; WBAP, Fort Worth, Tex.; WBAX, Wilkes-Barre, Pa.; WBBR, Rossville, N. Y.; WBDC, Grand Rapids, Mich.; WCAE, Pittsburgh; WCAP, Washington, D. C.; WCAR, San Antonio, Tex.; WCAU, Philadelphia; WCX, Pontiac, Mich.; WEAF, New York; WEBK, Grand Rapids, Mich.; WFAA, Dallas, Tex.; WFDF, Flint, Mich.; WFI, Philadelphia; WGBS, New York, N. Y.; WGBU, Fulford-by-the-Sea, Fla.; WHAP, New York; WHAR, Atlantic City; WJAD, Waco, Tex.; WJR, Pontiac, Mich.; WKAR, East Lansing, Mich.; WLW, Harrison, Ohio; WLWL, New York; WOAI, San Antonio, Tex.; WOR, Newark; WPG, Atlantic City; WRC, Washington, D. C.; WRNY, New York; WRR, Dallas, Tex.; WRVA, Richmond, Va.; WSAI, Mason, Ohio; WSB, Atlanta; WSM, Nashville, Tenn.; WSMB, New Orleans; WTAM, Cleveland; WWJ, Detroit.

The above list and additional stations will be repeated from time to time.

London Festival Ends

LONDON, Eng.—The festival week of the British Broadcasting company, in celebration of its third birthday, has just concluded.

RELAY PROGRAM OF KFI ACROSS NATION

POSSIBLE FOR MORE THAN 6,000,000 TO HEAR

Six Stations Rebroadcast Program from Los Angeles in Preparation for International Tests

LOS ANGELES. — Transcontinental rebroadcasting of a Radio program that was relayed on short wave length to Europe and Australia, covering an area in which it might have been heard by an audience of between 6,000,000 and 7,000,000 persons, was accomplished recently by seven stations located at strategic points throughout the United States, with the aid of the high-powered European stations.

The program originated at Station KFI of this city and was picked up by KCA, Denver, and relayed to five other stations in the East and Middle West—KFKX, Hastings, Neb.; WOC, Davenport, Iowa; WGY, Schenectady, N. Y.; KMA, Shenandoah, Iowa, and WHAZ, Troy, N. Y.

Announcer Hears Voice

All six of the relaying stations were heard in certain localities, and in one instance a Los Angeles man tuned in on one of the eastern relays and, putting the loud speaker to the mouthpiece of a telephone, enabled the announcer at KFI to hear his own voice returning from the East.

The program continued for three hours without a break and operators of the Los Angeles station complimented the operators of the other six stations upon the skill with which they modulated the program as it was received and rebroadcast.

"OHM," THE RADIO DOG

(Continued from page 5)

Time Story Hour, sat on the wire smiling to himself very much satisfied over his success in escaping from the Sandman he heard some Mudder below calling Her Little One.

"Wake-y up, Wee Lo Foo
Sun is up, why aren't You?"

It was a sweet Oriental voice in the language of the Celestials. But Ohm, as he was Big Radio Dog (You must excuse me for telling you over and over again because it is necessary) understood Chinese just the same as he would if he had been born and brought up a Pekingese or a Chow. Here was a chance for a Jolly Surprise. He could hear the Mudder trying to get Wee Lo up like this:

"One, two, three
The Bumble Bee
Rooster Crows
And away we go!"

So Big Radio Dog Ohm ripples himself into the lead-in and trickles into Wee Lo Foo's house. Mudder Foo sat on the bed pulling Wee Lo to his feet in his dainty blue embroidered silk pajamas. It was time for the Daily Dozen and they usually took their Exercises by the Voice of the Exercise Man in the Radio. So Mudder Foo tuned in and had the Surprise of her life. This is what they heard:

"Bow Wow! How do you do!
I'm Ohm, who are You?"

Mudder Foo said, "Well, what in the world was that?" And Wee Lo almost jumped out of his skin as his slanty eyes popped wide open and he gripped his Mudder's hand.

"Don't you know me"? asked Ohm, astonished. "As I said before, I'm Ohm, the Big Radio Dog, Broadcasting During the Lullaby Hour for Bedtime Stories by Dream Daddy and Uncle Bob, and Uncle Walt and Uncle Dutch and Big Buddy and-and-and from Station USA and a lot more. I thought I'd drop in an s'prise You."

"I regret," said Mudder Woo, "that I must confess never to have had the pleasure, to my best recollection, of seeing you before." (You must always remember that Orientals are very polite when they are well brought up as was Mudder Woo).

"Oh, I beg that you will not let that worry you?" replied Ohm—he was such a Big Radio Dog—"because to tell the honest truth, hope to die cross my heart, nobody else has ever seen me. Big Radio Dogs like me are just to be heard, not seen because we are that different than little children who listen in. We are invisible because we are of two dimensions only."

"I'm so glad," smiled Wee Lo, "and who are all those people like Dleam Dladdy and Uncle Blob and—"

"Oh Wow! Who-ee Wow-wowow!" Big Ohm almost split himself for laughing.

"Please 'scuse me for laughing but your Oriental diction simply stirs my risibles beyond control. But I'll try not to be rude again.

"Only don't ask me to tell you who ALL of the Story Tellers are because USA now broadcasts from 550 stations and every station has one or two and sometimes more Voices who come through the air to homes where Little Children are, to tell them Stories while they are waiting for the Sandman. And, oh, the children love to hear them because they write such lovely letters and when the Voices who are the Uncles and the Dream Daddys and the Big Buddys hear from their Little Friends of the Air they are very happy.

"Sometimes they have Parties and the Children are invited to come and see the Voice. Oh, please forgive me for making out that they are just Men. There are lots of Aunties and Story Ladies, too, who tell the most wonderful stories. Sometimes they have me come to broadcast and I bark right out of the cabinet where the tubes are. Want to hear me bark? Bow Wow! That's the way I do it.

"Dear me! I hear Cousin Oswald at Los Angeles calling me right now. Or maybe it is Uncle Remus. No, it's Uncle John, now I know. And after that Val will be waiting for me.

"And I want to thank you Mudder Woo and you, Wee Lo Foo, for the lovely time I have had on this little visit. I just heard a long wave start out from Singapore which I will hop onto when it comes by. Come and see USA some time. Bye-bye."

So, with a flip like lightning, Ohm, the Big Radio Dog, broadcasting during the Bed Time Hour from Station USA flipped onto another thousand meter wave and was back Home before Dinner Concerts were over.

But this time he was ready for the Sandman. And the Sandman was ready for him.

KPRC OF TEXAS RANGES

(Continued from page 6)

Henry Crossland is chief operator and was formerly with WCM. Grimes Waller is also an operator and came to KPRC from the Dallas stations, WFAA and WRR.

Needless to say, none of these popular and good-looking young men are married. The writer has yet to find any Radio attaches who are! Thus the output of divinity, chocolate cakes and mash notes still continues.

Miss Lois Lilley is the efficient and decorative studio assistant. She welcomes guests to the studio and makes herself useful as well as ornamental.

It was the good fortune of the writer to be at KPRC for the weekly noonday concert of the "wonder boy"—Frank Tilton, blind pianist of the Houston Post-Dispatch. For more than an hour, he played number that had been requested. Totally blind, this talented young man, with his varied repertoire, his sunny disposition and good humor entered into the spirit of each selection.

KPRC's programs are fitted to the needs of the community it was built to serve; standard time signals from U. S. Naval Observatory at Washington; U. S. weather forecasts; bulletins of agriculture; road bulletins; news items; baseball results; music. On Sundays, Dr. A. Frank Smith, pastor, First Methodist church, conducts services which are broadcast from 10:45 to 12 noon, and also from 7:45 to 9 p. m. On Saturdays, at 7:30 p. m., Rev. Claude L. Jones, has the Universal Bible class.

KPRC has yet another slogan calling attention to its home town, Houston—an inland port, 50 miles from the Gulf of Mexico—"Where 17 Railroads Meet Forty Steamship Lines." KPRC is proud of being representative of the growing metropolis and, incidentally, Houston is mighty proud of KPRC!

ATWATER KENT RADIO

"What kind of company makes it?"

EVERY DAY, as the public gets wiser, do you not hear fewer and fewer customers ask, "What's the price of that radio?" and more and more customers ask "What kind of company makes it?"

If you are an Atwater Kent dealer, figuring where you stand at the beginning of this New Year, are you not firmer than ever in your conviction that the stability of your manufacturer is no mean asset?

* * * * *

The Atwater Kent dealer knows:

1 THAT behind the company with the strongest financial resources of any independent radio manufacturer stands the personal responsibility of a man who for twenty-five years has jealously guarded the quality of every product that bears his name.

2 THAT we have built the largest radio factory in the world, and are putting on a large addition this winter,* because we are thinking of tomorrow's market as well as today's.

3 THAT the merchant is backed by a policy that safeguards his profit, and is not tempted to throw his money away on job lots.

4 THAT he is handling the Radio which requires minimum service and is therefore insured against needless worry and expense.

5 THAT Atwater Kent owners are satisfied with their receiving sets and radio speakers and are always boosting them in making more sales.

6 THAT Atwater Kent is the make the greatest number of people intend to buy—or buy next, if they already have unsatisfactory sets. (Four surveys prove this.)

7 THAT the Atwater Kent sales campaign is supported by an unparalleled advertising campaign, reaching, in magazines and newspapers and on billboards, into every corner of the United States and Canada.

8 THAT the new series of concerts by the Atwater Kent Radio Artists—the world's best—specially benefit the Atwater Kent merchant, in increased sales.

* * * * *

Nineteen Twenty-five was a wonderful Atwater Kent year. We wish to thank every one of you who helped to make it so.

And please keep in mind that more than ever they'll be asking, "What kind of company makes it?" in 1926.

Hear the Atwater Kent Radio Artists every Sunday evening at 9:15 o'clock (Eastern Standard Time) through stations—

Send for illustrated booklet of Atwater Kent Radio

ATWATER KENT MFG. COMPANY
A. Atwater Kent, President
4708 Wissahickon Ave. · Philadelphia, Pa.

Radio Speaker Model L, $17 — Model 20 Compact, $80 — Radio Speaker Model H, $22

* This addition covers 153,000 square feet. When it is completed—probably in April—we shall have a fifteen acre factory. We are also using our old Germantown plant, which covers two acres.

HER TOPIC AT KDKA IS HOME ECONOMICS

Miss Marie Neff is the pretty young specialist heard over KDKA in charge of the home economics programs of the Stockman and Farmer studio.

BETTY CROCKER TO START NEW SCHOOL

WILL BROADCAST OPENING LESSON JANUARY 29

Housewives May Receive Scientific Training in Cookery and Home Making in Own Kitchens

By Betty Crocker

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WHT, WFI, KSD, KFI and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon investigations and work of herself and her assistants in model kitchens. —Editor's Note.

WE'RE GOING to have another Radio cooking school. The first lesson will be broadcast on January 29. As with our first school which closed in December, it will be necessary to register for this course. There is no fee or charge of any kind connected with it. The only qualifications necessary are a pencil and a paper and a will to learn. We are beginning now to take registrations for our second Radio cooking school, and will accept them up to and including letters postmarked January 23.

I have been enjoying a little Christmas vacation the last couple of weeks, but I am going to resume my regular Radio talks on Mondays, Wednesdays, and Fridays, from the stations listed above, on January 18. The first lesson of the cooking school, to be broadcast Friday, January 29, will be "Gold Medal Biscuits and Variations." Subsequent lessons in the school will be broadcast for five succeeding Fridays.

I am particularly anxious that all of my friends among the readers of the Radio Digest and those who listen to the stations from which my talks are given, who desire to enroll for the second cooking school, will please get their registrations in in time.

Many housewives regret the fact that they have not had the advantage of a scientific training in cooking and home making. Now, due to the Radio, they may receive such training across the sky, with their own kitchens as classrooms.

Besides the Radio talks, we will send printed recipe cards of all the recipes described in the lessons to those registered. In arranging this second school, I have tried to select subjects of interest to every housewife. The schedule of the lessons is as follows: January 29, "Gold Medal Biscuits and Variations"; February 5, "Luncheon Suggestions"; February 12, "A Gold Medal Pie"; February 19, "Foods That Satisfy"; February 26, "Salad Secrets"; March 5, "Unusual Desserts."

Besides these cooking school lessons and the talks which I broadcast every Monday and Wednesday, I am to have the privilege of visiting with you and offering you some of our kitchen tested recipes through the medium of the Radio Digest.

It might interest you to know that while all of these recipes are tested out in our model kitchens, many of them have been suggested by women all over the United States. Through our Radio talks and cooking school lessons, we have built up a national exchange of recipes and housekeeping suggestions. We are always glad to work these out and submit them for your approval in the most acceptable form. I feel sure that if Mrs. San Francisco has some particular dish which has found favor in her own community, there is no reason why Mrs. New York and Mrs. Chicago shouldn't enjoy it just as well, and vice versa.

We want to make these lessons and talks both interesting and valuable to you, and you can be sure that I will always appreciate any suggestions you care to send me.

SHORT WAVES

By Marcella

The editor moved me over to the women's page this week. He said I was mostly of interest to women, and that was where I belonged. Guess he's right, judging from the mail. All kinds of ladies are writing to learn about their favorites. Funny the men don't write about their beloved lady artists.

* *

Jack Little isn't little. He's average in height and build. Yes, that's his real name, although he divided it this last spring with a beautiful lady, who adds the prefix "Mrs." Now the two Littles are touring the stations together.

* *

The Hired Hand, of WBAP, Fort Worth Star-Telegram, is in double harness, he claims. But he sent me five pounds of wonderful Texas paper shell pecans to keep me quiet on the subject. Said he didn't want to break any fair lady's heart; that is, of course, if any lady happened to be admiring him.

* *

"The Merry Old Chief," formerly of WDAF, Kansas City Star, and now announcing at WJR, Jewett Radio, Detroit, is very likeable. He drives a flivver on rainy days and smokes a pipe. How to live long, in his creed, is to take a cold plunge every morning.

* *

Speaking of marriage, as some of us will, I learn that Miss Vee Lawnhurst, popular WEAF pianist, will say "I do" soon along with Sylvester E. Morris of New York city. After the nuptials the couple will be tuned in on Florida stations, for it's there they are bound.

* *

Don't you wish you were President Coolidge or someone important like that? Imagine, WRC at Washington has a special microphone stand exactly 47 inches in height for the exclusive use of our chief executive. And Mrs. Coolidge doesn't have to dust it, either.

* *

Radio artists and announcers have to adopt a peculiar schedule of hours. Imagine working from afternoon till midnight or two o'clock every day. The alarm clock is usually set for 10 o'clock in the morning. Thus they miss the Radio "getting-up" exercises, and must get their muscle limbering elsewhere. Credo Harris, of WHAS, Louisville, loves to hike. Jerry Sullivan, of WQJ, Chicago, is an equestrian, while the sport of Clyde Randall, WSMB, is motor boating. Golf claims many an otherwise perfect Radio entertainer.

* *

Phillips Carlin is a card. We like him as much as Graham McNamee at WEAF. Handsome, young, nice disposition and a good future describes him to a tee. No, we don't think he is married.

* *

Dropped in to visit Station WHT, Chicago, one night last week, and, just sort of blushingly, you know, I will break down and confess that I knew before I went that he would most likely be there. Anyway, as Flo Ziegfeld might say, he was amid some very pleasant surroundings.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls, and I'll do my best to answer it here. **MARCELLA.**

AUNT JANE IS BOTH PRETTY AND PETITE

Every afternoon, except Saturday and Sunday, you can hear "Aunt Jane," above, at WOC tell how to bake a cake or plant a flower garden.

WJZ PROVIDES TWO HOURS FOR WOMEN

DOUBLE SERVICE AIDS CITY AND FARM DWELLERS

New Experimental Station at Bound Brook, N. J., Has Both Morning and Afternoon Programs

NEW YORK.—The difference in schedules of daily routine followed by housewives of the city and those living out of town made the fact apparent that two women's hours were necessary, after the first test programs were completed at WJZ's new experimental station at Bound Brook, N. J.

The city woman, living in an apartment or small house, aided by electricity, gas and other modern conveniences, is generally through her housework and ready to listen to her Radio set by 10 o'clock. The afternoon is generally devoted to shopping, calling or a movie. The out-of-town woman, on the other hand, with a larger house to take care of and without the modern conveniences, is seldom free to devote herself to Radio until after lunch.

Add Women's Forum

In order that all could enjoy their service, Station WJZ has inaugurated a second women's hour, named "The Women's Forum," in addition to their morning program. The forum is a trifle more varied in its component parts than the women's hour. It is opened each day by Mrs. Julian Heath, the president of the National Housewives' league, who conducts a food forum. The balance of the program is changed each day, so that many topics of interest to the housewife are brought up. Decorating and wall papering, care and education of children, care of the complexion and beauty hints, styles and fashions and countless other subjects are treated by competent experts. Short periods are devoted to musical selections and the reading of poems.

Photogravures of Your Favorite Artists

GALLERY OF RADIO STARS

Suitable for Framing or Placing in Your Album

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest.

WOAW, Omaha, Nebr. (526), 6 p. m., orchestra; 7,

High Lights of the Week

MODERN jazz orchestra leaders who think that synchronizing their shoulders with the music is something new have a lot to learn from Uncle Jimmy Thompson who has been fiddlin' for more than sixty years. Although Uncle Jimmy is only 82, he plays 375 barn dance numbers which he dances as he plays. Radio has at last claimed this popular fiddler and he will appear every Saturday at WSM, Nashville. Intrepid hunters will prefer the travelog by Mary Hastings Bradley at WMAQ, Chicago.

The world's greatest lieder singer is the title given to Elena Gerhardt, who will sing these charming German folk songs Sunday evening at WTIC, Hartford. Roszi Varady, cellist, will assist. Paul Althouse, tenor, and Arthur Middleton, baritone, formerly of the Metropolitan opera company, are the Atwater Kent artists singing over the WEAF chain this Sunday. Detailed program appears on page 19.

The guest artist of the community program at WSAI, Cincinnati, Monday evening, is Grace Kerns, soprano soloist of St. Bartholomew's church of New York. Miss Kerns is one of the most famous of church soloists. Fans who are glad the Red Headed Music Maker is back in this country will be pleased to know that Wendell Hall sings from KFAB, Lincoln, Neb., this same evening.

An ex-service man who fought and was wounded in the battle of Argonne Forest is the new Tuesday feature of WBAL, Baltimore. He is John Wilbourn, popular as a ballad singer, and will give the dinner hour concert on this day. He has sung with the DeFeo opera company and the Washington Chamber Music society.

The zither is an old-fashioned musical instrument being revived by Radio. This queer instrument which sounds a little like the xylophone will come into its own Wednesday evening when the Cincinnati Zither players gather at WLW. Old fiddlers have been competing in Iowa, Kansas and other states in the Union. Now Arkansas schedules an old fiddlers' contest at KFMQ.

From eleven to three a gay party may be enjoyed by fans who cannot sleep Thursday night. Representatives of the theatrical press will meet in the grand ballroom of the Sherman House. Their witty speeches will be broadcast by WLS. Another late or early program may be enjoyed at WRR, Dallas. George Perfect and assisting musicians from the Melba theater will make the midnight hour a pleasant one.

Ye Old Tyme Village quartet whose singing of "Old King Cole," "Robin Adair," "Juanita," and many other favorites of long ago has made it famous, will entertain at CNRT, Friday. Patsy O'Shawghnessy Douglas, whistler, will be the soloist.

ELEPHANT HUNTER TO TALK AT WMAQ

Here is another reason why California successfully holds its own against Florida. Roberta Wood is a member of the Y. W. C. A. girls' class, which meets every Friday at KGO, Oakland. To the right is Nick Nichols, orchestra director, composer, violinist, baritone and WPG announcer.

Saturday, January 9

after-dinner hour; 9, Deluxe program; 10:30, Frank Hodek and his Nightingale orchestra; 11, Arthur Hays and his organ jubilee, Dr. Applesauce, announcing.

WOC, Davenport, Iowa (483.6), 5:45-6 p. m., chimes concert; 6:30-6:50, Sandman's bedtime stories, L. Emory Wass; 9-10, musical program, K. of C. minstrels, Kewanee, Illinois; 11-12, LeClaire hotel orchestra; Peter MacArthur, baritone.

Grimes; "Dis-

The modern jazz orchestra has nothing on Uncle Jimmy Thompson who can play 375 barn dances—and he dances each one of them as he plays. Uncle Jimmy is only 82 years old and his latest venture is to play for WSM, Nashville. He is shown, above, with his niece who will accompany him to WSM Saturday night. Evan Davies, left, is the funny man at WAHG, Richmond Hill, L. I. He may be called the long distance humorist of this station since his jokes were heard in Australia and Scotland the last time he entertained at WAHG.

"Wet towels, please!" Above, from left to right, are Peter MacArthur, announcer; Bernice Schultz, director of the Crescent orchestra; Edgar H. Twamley, studio director of WOC, Davenport, getting their heads together to work up keen little stories and musical numbers for the next Crescent orchestra's monthly continuity program. If you do not believe "Three Heads are Better Than One," these three prepared the Crescent programs for "A Chronology of American Music," and "His Masterpiece," given recently. WLW, Cincinnati, is not stumped by listeners' requests for poetry. Charles Meade, left, has all the best poems stored in his head. Test him out by requesting your favorite. Cornelia Dungan, right, is the story lady of WGES, Oak Park.

Monday, January 11

eases Common to Sorghums and Their Control," L. E. Melchers.

The Pacific Coast vs. European Tests

BY NOW, of course, the objections of the Pacific Radio Trade association to International Week silence periods, may have been answered, but at the time of going to press, this association was reported to have recommended that Pacific coast stations continue to broadcast from 8 to 9 p. m., pacific time, all nights set aside for the tests.

The Pacific Radio dealer organization was inspired by the selfish thought that if the Los Angeles, San Francisco and other coast stations remained silent, the Radio listeners located on the slope would hear nothing, not have a ghost of a show at hearing Europe, and as a result, would condemn their receivers.

Evidence does not sustain this thought. San Francisco and Los Angeles listeners, using in some cases as small as two tube receivers, heard European stations last year during the International Week tests. Portland, Oregon, listeners were equally successful. In addition, the coast fans heard Japanese, Chinese, Hawaiian, New Zealand and Australian broadcasters. This year many of the foreign broadcasters have increased their transmitting power beyond that used in previous tests.

Give the coast fans a chance to listen in, and we'll prove to the Pacific Radio Trade association that the Rocky Mountains do not bar European reception.

What is more, if but as few as three coast stations, after reading this editorial, still go ahead and broadcast to the world when the rest of the U. S., Canadian and Mexican stations remain quiet for the tests, the whole plan will be ruined. Eastern, central, western, southern and coast listeners will hear the Pacific coast broadcasters, and the Pacific coast broadcasters for the most part. It is doubtful if many listeners would be able to get through the west coast barrage.

At any rate, many a listener, tuning in what they thought would be a European station, will find only the Pacific coast and nothing more. This, perhaps, will be learned after the listener has sat patiently through a half hour of music. A wonderful advertisement for the coast stations!

Imagine how peevish you would become upon learning that YOUR European station was located on the Pacific slope. You'd probably arrange to spend your next vacation in California. You'd probably arrange to eat more California oranges, grape fruits and raisins.

You probably would NOT!

It Costs to Broadcast

BROADCASTERS with the idea foremost in their minds of serving the public to the best of their ability, have undertaken a man-size job. The good will and publicity obtained as a result of the broadcasting is worth it, perhaps, but the work and money necessary to accomplish the purpose as near perfect as possible, is tremendous.

Believe it or not? Here are a few figures taken from a report on the year of 1925, at WEAF, A. T. and T. station in New York city. WEAF may be considered as typical of other large stations.

The station was on the air approximately 245 hours each month, or an average slightly in excess of eight hours each day.

During ONE month 454 features consisting of either individuals or groups appeared before the WEAF microphone. Of this 454, almost 300 were classed as "regulars," that is, program features heard each week at a definite time, and over 150 were "occasional" program features.

The monthly average number of individual artists entertaining from WEAF was 1,015, or about 34 each day.

Doesn't that sound as if the larger broadcasters had plenty to do? We, the dial twisters, have a difficult time attempting to visualize the immense investment and heavy operating expenses necessary at the microphone end of the entertainment coming through our loud speakers, but perhaps these figures will reveal what is back of the polished panel.

Good broadcasters spend lots of money entertaining and serving the public, and it is our duty to support them with our good will.

RADIO INDI-GEST

You Mean "Hearing"

When the old set howls and the air gets blue
As you twist the dials for an hour or two,
And the cats all fight and the panthers yell
As you twist and turn and cuss like—well—
Then all of a sudden she gives a "plop"
And Havana, Cuba, comes in like a top,
Without a whistle and not a squeak,
And it's the best reception you've had in a week—
AIN'T IT A GRAND AND GLORIOUS FEELING?
Old King Tutt

Where Is My Lariat?

Dear Indi: Last night I let Lopin Larry ride the ether range with me and when I rounded up a good Chicago station, he leaned back in a puncher's reverie and said, "Las sumer when I tuk a lode a steers to Chicago I met a gurl who wanted a man frum the grate opun spacus that ansurd my discribshun, but I sed being spliced wid a city gurl wud be to expensiv fur a comon hand and she sed fur her argyment that out side uf bord and rume thats all ther is. An you no Night Hurd I beleeved her cause her close hardly showed any wear.

THE NIGHT HERD

She was only a cowboy's daughter but I'm sure she knew her ropes.

Milwaukee Again—Beer Up!

My dear Mr. Indisgust: The herein contained material is guaranteed to be manufactured in compliance with the Federal Child Labor Law.

Distilled

BY THE THIRD TROMBONE PLAYER

Wot a show was the Wisconsin Radio Exhibit! Readers of this colyum will pardon me for the late report but I was waiting for the Radio Cricket, "Dielectric," who writes them snappy critickcisms in the next colyum. I told the guy months ahead to be here to take in the show and I was down in the Milwaukee Road freight yards every night but he didn't show up.

Gus Schmalzhagen was there. You know Gus was the guy that used to run a filling station on Reed street. He got pinched for giving away a shot of high test with each 5 gals. low test gas. Now he's selling Super Six Radios. A lady bought one and when she got it home she found it was a Silent Six.

They had a broadcasting studio right on the stage. Izzy Einstein appeared in a swell program.

When I was mingling with the crowds being careful not to reveal my indentity because some of the boys might have high potential missives of displeasure in their pockets, a crazy man ran thru the crowds hollering, "A horse, a horse, my Radio for a horse!" A dick stopped him and said, "Why the horse?" The guy says, "I want to gallop to Zion City at a speed not exceeding 15 miles an hour and prove to Voliva out of my geography that the world is round!" The dick layed him out and as he dragged him away a bystander remarked, "That lad would come back on foot!"

One exhibitor was selling Radio dictionaries. I sent one to "Dielectric." He sent it back. Says there was too many misspelt words in it and besides he hunted all thru the A's looking for athema and it wasn't in and he knows darn well there is such a word as he used it himself in one of his critickcisms.

There was at least a dozen guys selling devices for increasing the range of a receiver. One guy claimed 50%, another 35% and one 15%. I bought them all and stuck them on my Globe Do-or-Die set. On tuning in I could get nothing but local, I went back and kicked to the guys and they said I increased the range so much that I was getting around the world with it and was getting stations from the place I started from.

"Oh, How I Miss You Tonight, Tra La"

Graham McNamee should cease to roam—
Cut out his tours and stay at home.
He's the best announcer on the air,
And gee, but we're lonesome when he's not there.

A. K.

NEWS GRIEFS FROM THE BROADCASTERS

By Eddie's Son

New York.—Listeners to Station WLWL were given a real treat the other night when the K. K. K. concert orchestra rendered a delightful program.

* * *

Miami Beach, Fla.—All Flordia has gone wild over the latest song broadcast from WMBF. The song is entitled, "Let's Wander Away to Cal-i-for-nigh-a" and was composed by a prominent Florida real estate man. Stations WGBU, WGHB and WJAX are also featuring the number nightly.

* * *

Zion City, Ill.—J. H. DePew made his last announcement for WCBD, here, tonight. He leaves tomorrow for Kansas City to assume his new duties as "Merry Old Chief" at WDAF. Jerry Sullivan of WQJ will succeed Mr. DePew at WCBD.

Add Talents of Dairy Maid

"Louise Maier is the 'Alamito girl' heard from WOAW every Wednesday at 1:10 p. m. She conducts this important health service very efficiently. Miss Maier has had considerable dairy experience."

—From WOAW Radio Bulletin, Omaha, Nebr.

?????? Give the calf more rope!

Giving Him the "Air"

Condensed

BY DIELECTRIC

One of the stations put on a special dance number, as announced, for the accommodation of a friend of the announcer who was giving a party. No doubt these dance programs are being used by many who previously depended upon a phonograph to supply the music. When you are in search of programs of popular dance music turn to WEBH, Chicago, while the Oriole orchestra is performing and see if they please you. Maybe I'm wrong.

Do you listen to ukes, and if you do, did you happen to tune in to WADC, Akron, Ohio, one evening recently as the Royal Hawaiian trio was doing its bit to entertain you? Never having had the experience of visiting the Hawaiian Islands, I cannot compare the work of this trio with native players, but surely the dreamy effect of plunking, gliding airs found skilled artists performing in the studio that evening. There is little variety to the melodies produced in that southern clime, yet they fascinate.

A solicitous correspondent to this paper suggested I be presented with a two tube super-het. Well, it so happens the set I use needs no improving. What IS needed is the annihilation of about three hundred puny, interfering stations, and the separation of the remainder, so a resident of a congested area is not faced with four or five stations trying to occupy the same position on the dials at one time. Did you step into Mexico while the department of education was broadcasting a talk in Spanish from CZE, Mexico City? Neither did I understand the address, but the Puccini number which followed anyone could appreciate. It was well rendered.

Station KTHS, Hot Springs, Ark., is to be congratulated for putting on the air an orchestra program which came through perfectly and left no wish that other numbers had been substituted for any one of them. As we sat back to recall the beauty of the final selection our reverie was broken with the stirring announcement of a bank robbery at Washington, Ark., and Dielectric turned from art to philosophy—why write?

If the broadcasting stations want to put something in the place of soprano solos to enrich their programs, let them secure a good instrumental trio or quartet. The very highest form of music is that known as chamber music and Station WSAI, Cincinnati, should be commended for the splendid concert arranged in their studio by a stringed quartet of more than average ability. The lady who announced each number was familiar with the music and aided to a more complete understanding by sharing her knowledge with the listeners in, which is indeed a desirable practice.

Jefferson City, Mo., is a city familiar to most Radio listeners however far away their homes, because WOS has broadcast to them for many months and the circumstances surrounding a certain inmate of the penal institution there was nation-wide news. In determining to review a program from this station I was actuated as much by pleasant memories of previous hearings as by duty to cover as many broadcasters as possible. So in listening to an orchestra playing there I was favorably inclined at the outset—and remained so while cold-bloodedly appraising their work. It is the wish to help studio directors that criticism is made, or to aid listeners choose programs, and not to vent spleen under a nom de plume.

My Experiments With Underground Antennas

Work of Station 3XR, Hyattsville, Md.

By Dr. J. Harris Rogers

WHILE many who have installed the system claim that static is entirely eliminated, I frankly acknowledge that such has not been my experience. Atmospheric disturbances are reduced, and sometimes to a very remarkable degree, depending largely upon the locality and the nature of the soil and the depth of the buried wires. The best results are obtained in moist earth, or when laid in

Dr. Rogers at the lead-in end of one of his static-free aerials. Note the hollow tile, through the center of which the underground aerial runs.

fresh water, or when buried to the depth of "water earth." Signal strength increases in proportion to the depth to which these are placed below the surface of the earth, and static correspondingly reduced.

Owing to the directive features, they should be laid in the direction of the sending station; and, consequently, to receive maximum signals from all points of the compass, three or four are necessary. For broadcast reception, 75 to 100 feet of perfectly insulated wire (ignition cable), buried, gives good reception; but better results are obtained with metallic covering—for example, small gas pipes, and still better when the insulated wire is run through the center of 5-inch terra cotta pipes (see photo).

Signals are stronger on elevated antennas, and more amplification is needed on the buried ones, but owing to the reduction of static, the latter is more efficient, especially in localities swept by electrical disturbances.

Very remarkable results are reported from various sections of the country, for both sending and receiving, some claiming that static is entirely eliminated.

Several lengthy papers prepared by Commander A. Hoyt Taylor and Lieutenant A. Crossley have appeared in the Proceedings of the Institute of Radio Engineers, and I herewith quote a few extracts.

"(a) The history of the Navy's connection with ground wire work, based on the Rogers system, has been briefly outlined.

"(b) It has been shown that it is possible to receive very efficiently signals from stations at any wave length, long or short, using submerged or subterranean wires, provided that one or two stages of amplification be used.

"(c) The directivity of the wires has been carefully examined and it has been proven that signals coming at right angles to a given wire pair are excluded, while signals coming parallel to the wire pair are received with maximum intensity.

"(d) The feasibility of utilizing this system with its highly directive and highly selective properties for distant control work has been demonstrated.

"(f) The importance of adequate insulation has been indicated.

"(g) The relative advantage of ground wire reception on short waves lies in the ability of the receiving operators to continue to copy messages through violent storms without danger to themselves and with little or no interruption of traffic. The very great advantage in the suppression of summer strays is noted on all waves but particularly on short ones. The manner of the suppression of strays seems to be not only a reduction in intensity all around, but a remarkable reduction in the frequency of the strays. Although the ground wire system appears in many respects to be aperiodic, the fact that an optimum length of wire exists for short waves, stands as a hitherto unexplained contradiction.

"(h) Reception in fresh water or wet soil is enormously superior to that of bare wires above or on the surface or in dry soil. As the wire is lowered into water or into wet ground, the signals increase, whereas the strays are reduced. How deep the wires may be buried with advantage is not yet known. . . .

"Summary.—After an historical review of the work of the United States Navy with underground and underwater receiving systems, the author gives data demonstrating the possibility of effective reception on such systems, particularly when using amplifiers.

"These systems are found to be directional toward waves traveling parallel to the length of the wire pair. This directional selectivity, which is marked, is applied in control stations for duplex working.

"For such underground systems, an optimum wire length for best reception is found to be roughly proportional to the wave length (for short waves) and independent of the direction of approach of the signal. The existence of this optimum length gives further utilizable selectivity. This length is independent of the nature of the surrounding medium and varies inversely as the capacity per unit length of the wire. The wire in question must be well insulated.

"Reception through violent storms, and suppression of summer strays (particularly at short wave lengths) are found.

"It is found that lowering such wire systems from above ground into wet soil or into water greatly increases the signal strength and diminishes strays.

"Transmission at short wave lengths, over considerable distances, using such systems has been found possible with low power sustained wave transmitters. . . .

"In previous papers, one of the writers has indicated some of the advantages of subterranean receiving system for remote control purposes. Those advantages may be briefly enumerated again here.

"First.—Ground wires have high degree of directivity which can be utilized for shutting out nearby interferences.

"Second.—For short waves they have an optimum wire length which may be utilized to obtain a far higher degree of selectivity than is possible with an ordinary antenna.

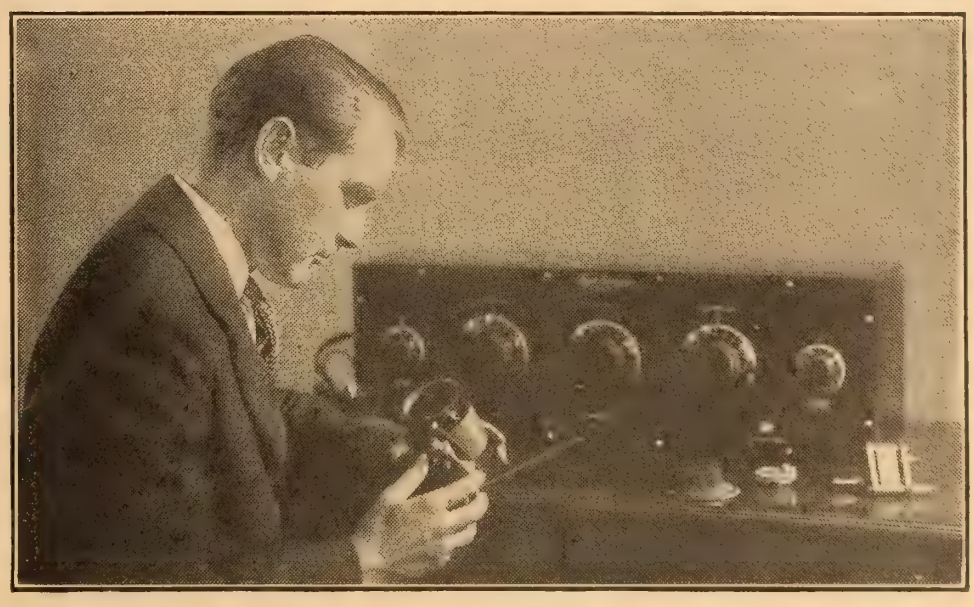
"Third.—Static is entirely eliminated, permitting successful operation without danger to the operators through heavy storms.

"Fourth.—All strays are greatly reduced if it is possible to obtain moist ground for the installation.

"Fifth.—The ground wires lend themselves readily, under proper conditions of installation, to the use of balanced or stray eliminating system. . . .

"The question is brought up concerning the efficiency of the system on short wave lengths when using high amplification. To this we may say that reception on short wave lengths by means of the underground system has never been affected by local static. This statement is based upon tests covering a period of two years, wherein the underground system for short wave lengths has been used through all atmospheric conditions, and at no time have

(Continued on page 24)



How I Earn $100.00 a Week as a Radio Expert

A year ago I was mighty blue and discouraged. It seemed to me that I would never be more than a low-paid bank clerk. Of course I had a small increase in salary every now and then, but I knew that pretty soon I would reach my limit and there would be no further advancement for me. What future had I to look forward to? Where would I be in five years? I became restless and discouraged and began to look around for some other opportunity.

It was then that I discovered that the demand is for **trained** men, that the opportunities are all for men who can do some one thing better than anything else. There were wonderful opportunities for men who were experts or specialists—but I was..... a clerk. How I regretted then that I hadn't prepared myself for some definite career!

I Wanted to Marry

The thing that made me more restless at that time than anything else was the fact that Marian and I were—that is, we wanted to be married. But we both knew that we couldn't possibly get along on my small salary. If only there was something I could do that would bring me a larger salary!

It was just about the time that everyone became so interested in radio. Our whole town became radio-mad, and of course what was happening in our town was happening all over the country—all over the world. I managed to save up enough to buy a receiving set and I was never quite so happy as when I was trying to tune in on stations.

The thing fascinated me. Playing with air waves! Bringing melodies and messages out of the sky! I was never so interested in anything before.

Marian was the first to sense the great opportunity. "Why don't you become a radio expert?" she said. "You like it, and I am sure there must be a big demand for men who understand it. It's a new field and there's plenty of room for wide-awake men."

"But—but I'm not trained!" The thought excited me. To be a radio expert! To find my future in this fascinating new field! "I don't know anything about it, Marian," I said. "I wish I did, though."

"Well, why don't you find out about it," she retorted. "You can't learn about radio just by listening in to the concerts. Why don't you take a course?"

But we found out that most courses were expensive or that they would interfere with my other work. We were about discouraged when I discovered that through the National Radio Institute it is possible to become a radio expert by studying right at home in spare time. I told Marian about it and she was elated. "Send off for information, at once—today!" she exclaimed.

Advances Quickly to $100 a Week

I did, and the following day received an important booklet, "Rich Rewards in Radio" telling all about radio opportunities and how to become an expert in any particular phase of the work.

Here was my opportunity at last!

I began to study in all my spare time. It was the most interesting and absorbing study I had ever made. The secret of the radio revealed to me! Day by day, I became more skilled and deft until I was able to take apart receiving sets and put them together again as though I were playing with a toy. It was fun! In a month I was able to take a position as lineman at a bigger salary than I was getting at the bank. This was wonderful experience for me, and I kept right on with my studies. It wasn't long before I qualified for a position as radio engineer at a salary of $100.00 a week! That is what I am earning now, though I expect to make more soon. It seems to me almost too good to be true, after all those years as a low-paid clerk in a bank. And Marian, who will soon be my bride, keeps saying, "I told you so!"

As a radio expert I can tell you that there is a tremendous demand for men who can build, sell and install radio sets, who can design, test, repair. Men are needed as engineers and executives, all over the world. The opportunities are limitless, and if you like radio there is no reason why you cannot qualify for one of these positions by studying in your spare time at home as I did.

The National Radio Institute offers an absolutely complete course which prepares you for the Government First Class Commercial License and for the bigger paying jobs in Radio. The Director, E. R. Haas, will be glad to send you all details of their marvelous new method of practical instruction, including information concerning the Free Employment Service which secures positions for National Radio Institute graduates. Everyone interested should have this information. **It's free,** and this coupon will bring it to you. I advise you to send it off today. Radio is a new and interesting field, and it offers you more money than you probably ever dreamed possible!

Important

Those who mail the coupon **at once** will also receive details of Special Short Time Reduced Rate. Do it now.

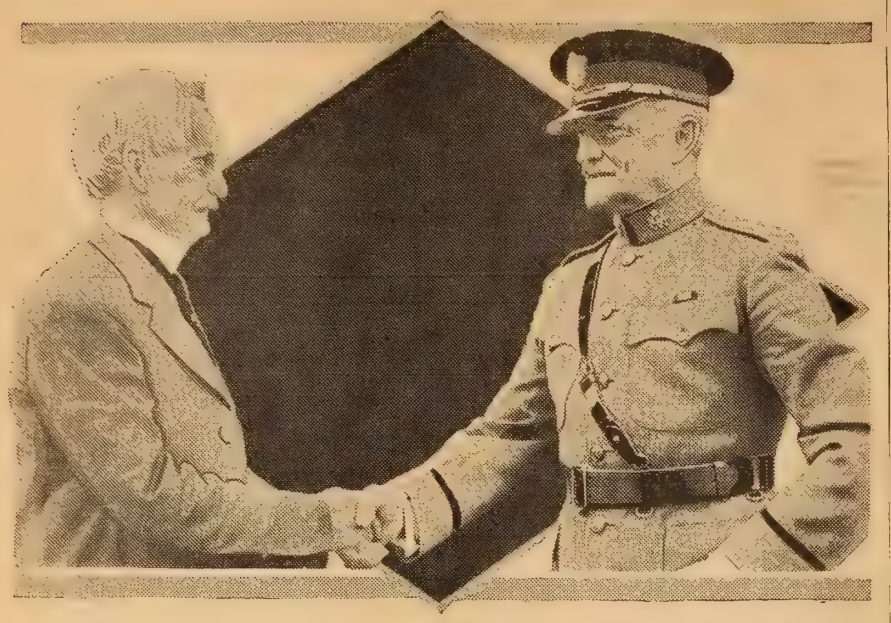
"BLACK JACK" VISITS DR. ROGERS



General Pershing congratulating Dr. Rogers, upon visiting his laboratory.

UNDERGROUND AERIALS

(Continued from page 23)

the operators been required to leave the instruments on account of the dangerous effect of local lightning storms.

"The foregoing statements have been verified at Norfolk, Great Lakes, and New Orleans, where many cases were recorded when the regular antenna had to be grounded to prevent damage to the set, and that during this time the underground system was used exclusively to handle all traffic. Stray elimination by the underground system on long wave lengths is not so pronounced as it is on short wave lengths, but by the use of the underground system in conjunction with the balanced system, this trouble is overcome.

"The underground system has excellent directional qualities. Using two wires in the direction of the transmitting station, the maximum signal is obtained; while using two wires which lie in a direction which is at right angles to the transmitting station, the minimum signal is obtained, and in many cases the signal is not heard. It is possible that the operator on watch can, at any time ascertain the approximate direction from which the signals are coming by means of using various combinations of wires. A good stand-by tune, by which the operator can hear all stations, is obtained by the use of two wires at right angles to each other, namely an east-and-south or east-and-north combination, and so on."

Transmission

After I demonstrated to the navy that signals from Europe were easily received and that transmission was practical for short distances with wires buried or laid in water. Lieutenant Crossley stated:

"(i) Preliminary experiments on transmission with subterranean wires have shown that transmission with low powers and continuous short waves is possible over considerable distances. The greatest communicating distance obtained was between Great Lakes and Chicago, a distance of 36 miles (58km.), with 0.8 of an ampere in the underground wires. Interesting possibilities are indicated by these transmission experiments. With specially insulated wires and amplifying receiving sets, much greater distances can undoubtedly be obtained."

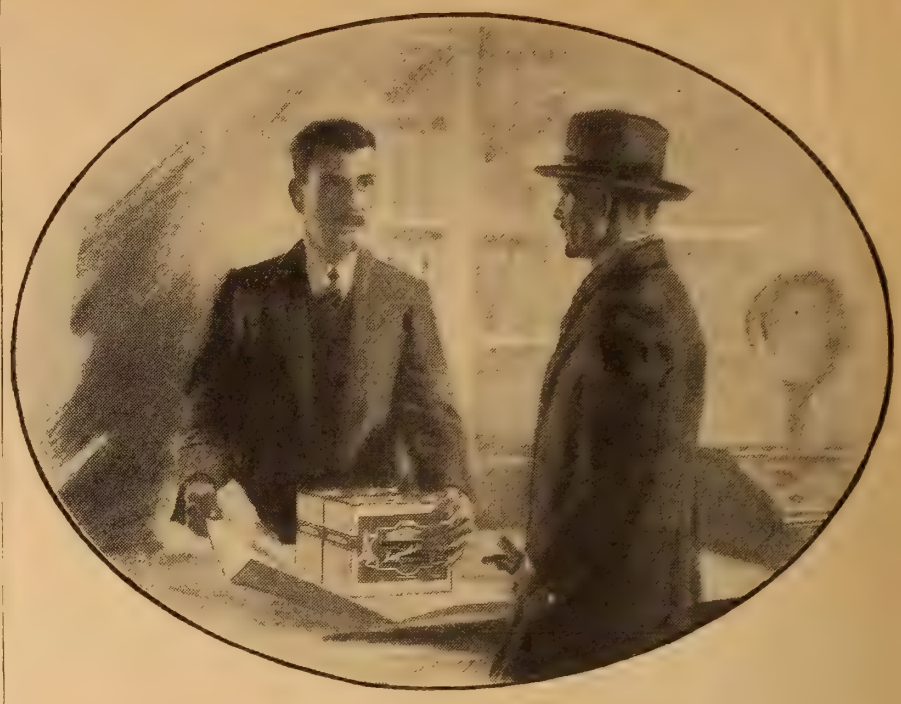
The most remarkable development in transmission was achieved during the latter part of the war, when the navy equipped submarines with specific devices according to my patent. With this device submarines were enabled to communicate with each other, whether afloat or submerged.

Just about a year ago I renewed my transmission tests, using three 50-watt tubes, and was enabled to transmit to practically all stations from Canada to South Florida, and from the Atlantic to the Pacific. The greatest distance reached was Toulon, France, station of J. M. Sarazes, F8SM. These tests demonstrated: (1) That fading is eliminated; (2) That while not conclusive, it appears that signal strength is as great during the day as night; (3) That there is no "skip distance"; (4) That communication is steady and reliable; (5) That owing to the directive character, greater distances can reliably be attained with minimum energy.

A hydrometer permits the operator to know the condition of charge that exists within the battery. A full charge will float the graduated tube high, and when the battery is discharged it will sink.

Bare copper wire of No. 18 gauge makes a good connector between instruments, and is sometimes preferable to the harder bus bar.

A loose contact or partly worn out "B" batteries frequently create disturbances that sound exactly like static.



"These Eveready Batteries are the correct size for your set. With average use they will last you a year or longer"

"YOU have been one of the many who use 'B' batteries that are too small in capacity for their receivers. That is not economical. It makes you buy 'B' batteries twice as often as necessary. Fit the right size Evereadys to your set and add a 'C' battery,* if you haven't one, and you'll get the maximum of service at the minimum of cost."

The life of your Eveready "B" Battery depends on its capacity in relation to your set and how much you listen in. We know, through investigation, that the average year-round use of a set is two hours a day. Taking that average we have proved over and over that on sets of one to three tubes the No. 772 Eveready "B" Battery used with a "C" battery will last a year or longer. On sets of four and five tubes, the larger heavy duty Eveready batteries used with a "C" battery will last eight months or more.

The secret of "B" battery satisfaction and economy is

—*With sets of from 1 to 3 tubes, use Eveready No. 772.*

—*With sets of 4 or more tubes, use either of the heavy duty batteries, No. 770 or the even longer-lived Eveready Layerbuilt, No. 486.*

We have prepared for your individual use a new booklet, "Choosing and Using the Right Radio Batteries," which we will be glad to send you upon request. This booklet also tells about the proper battery equipment for use with the new power tubes.

Manufactured and guaranteed by

includes complete list of broadcasting stations and general information and facts about our free service division. Our radio engineers will help you solve all your radio problems. Send your name and address on a card or in a letter. We will send catalog FREE.

OPERATING AND TROUBLE SHOOTING

OPERATING and Trouble Shooting, is a Radio Digest feature, the purpose of which is to give practical information on the operation, care and cure of simple troubles in every kind of receiver. Standard Radio receivers of wide distribution and use are studied from the standpoint of instructions for installing and connecting, tuning and operating, and remedying little difficulties. The suggestions below, if executed faithfully, will make winter broadcast listening yield all there is to yield to the reader and give your set a fair chance to show its worth.

For the Owner of an Apex Super Five Receiver

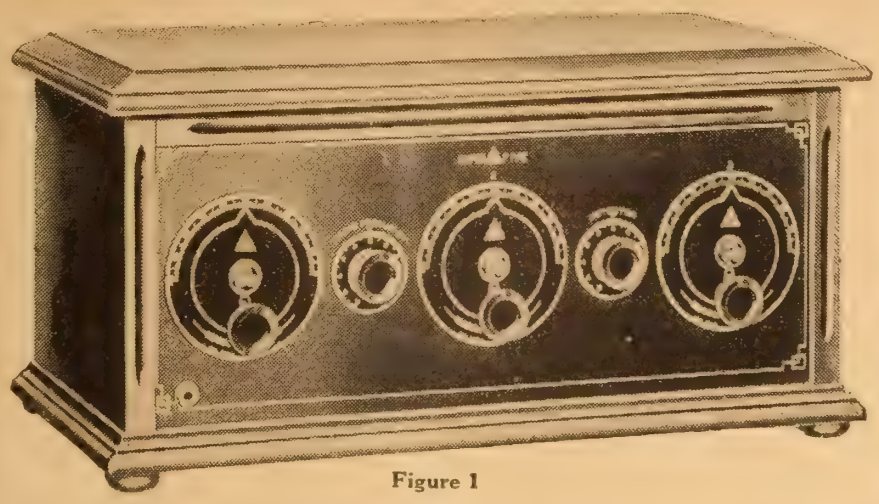

Figure 1

SUPER FIVE is a tuned radio frequency outfit that can well be classed with the "better" group of sets of this type. The designer was plainly both conscientious in his combining of symmetry and efficiency, and knew his business. Frankly, we liked this receiver exceptionally well. No attempt has been made to combine controls and tuning is done with three dials operating independently. The smaller dials are a sensitivity or regeneration control, and a rheostat for the two radio frequency tubes and the detector. This is not a particularly complicated arrangement and the user quickly learns the knack of tuning.

The antenna and ground system to be used with Super Five can be anywhere between 35 and 75 feet over all from actual ground connection to furthest end of straightaway wire. Since the average ground lead is about 10 feet, and the average lead-in is about 25 feet, it is recommended that the straightaway between insulators be 40 feet. This aerial installation should be well insulated, as high above surrounding buildings and trees as possible, and at right angles to street car lines, lighting and power lines, etc. The connection to ground should preferably be made to a water pipe with ground clamp. The surface of the pipe should be scraped clear of corrosion all around, for a length of about 2 inches and the clamp applied at this point. The wire from the ground binding post of the set is then secured to the clamp. Two binding posts are found at the rear left corner inside marked ANT. and GND.

A special means, exclusive to the Apex, is provided for making connections to the batteries. Within the set, just to the right of the ANT. and GND. binding posts is a peculiar looking little block with five springs secured around it. Through a large hole in the back of the cabinet you push a bakelite plug connected to a five wire cable and this plug fits down over the block to make all connections to the set simultaneously. This set was operated on both dry and wet B batteries, several B eliminators and two different A power units. There is nothing peculiar about its circuits that prevents it being used successfully with any of these devices.

If B batteries are used it will be found good policy to use two units of 45 volts each. Among the storage battery units, Prest-O-Lite, World and Hawley are suggested while of all the dry B types, the Eveready number 772 units will be most economical. To the negative terminal of one of the B batteries, connect the yellow covered wire in the cable. The plus terminal of this same B is to be connected by a short wire to the minus of the other B and also to the blue wire in the cable. The plus post of the second B gets the salmon colored covered lead.

The power supply to light the filaments of the tubes may be either a six volt storage battery or one of the A power units on the market. In either case there will be a plus and a minus terminal for the two remaining wires in the cable. The plus post of the battery will be identified by POS., a + sign or a daub of red paint. To this terminal connect the bright red wire of the cable. The second post of the storage battery is, of course, the negative and this gets the green covered wire. The terminals of an A power unit would be connected the same way. If storage batteries are used for both A and B supply, they can be charged without removing cable connections, provided plug is pulled from its pillar in the receiver, which can be done through the hole in the back.

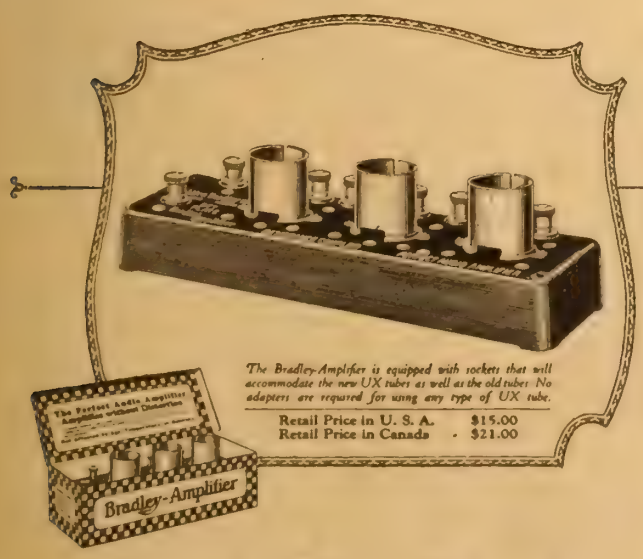
This set may be operated without a C battery as the two C battery binding posts are connected together at the factory. With B battery voltages of 90 or less, the C battery is not absolutely essential, although its use will improve the tone quality, noticeably. It will also decrease your B battery drain, which is equally important. The Eveready C unit is suggested with the "minus" and "plus 4½" posts connected to these corresponding posts within the set. Be sure to remove the wire connecting the C+ and C— binding posts before connecting the C battery. The use of this set without C battery is discouraged by the manufacturers.

The speaker binding posts are located on the base panel, inside, over toward the left and attention is called to the fact that one is plus and the other negative. The speaker terminals at the end of the twin conductor speaker cord are identical in appearance except that one has a red or green tracer thread woven into the insulation. This terminal must go to the + speaker binding post in the set.

Five tubes of the A type are to be used in Super Five. These can now be inserted in the sockets and, for first trial, no particular attention need be paid as to which goes in any particular socket. The filament switch is to be turned to the "On" position and the small dial marked "Detector" turned to the right. All tubes should light up and, with the "Detector" dial at about 80 we are ready to tune this set.

This set is provided with three vernier tuning dials and their settings will be rather close for any given station. Due to the influence of the antenna and ground,

(Continued on page 26)



The Bradley-Amplifier is equipped with sockets that will accommodate the new UX tubes as well as the old tubes. No adapters are required for using any type of UX tube.

A-B Allen-Bradley

The Heart of the Bradley-Amplifier

TUCKED away within the polished bakelite base of the Bradley-Amplifier are six inconspicuous, solid molded resistance units known as Bradleyunits.

The Bradleyunit is the heart of the Bradley-Amplifier because it alone can amplify the incoming tone frequencies without distortion. It replaces the ordinary bulky audio-frequency transformer and eliminates the most frequent cause of distortion in a radio receiver. The Bradleyunit cannot deteriorate or change with age.

Surprise Your Friends

With The Improved Tone Quality of Your Set

IT IS NOT ENOUGH that a good radio receiver is selective or is able to bring in distant stations. Quality of reproduction is now considered as important as selectivity and sensitivity.

Fortunately, the tone quality of your radio set can be quickly improved and perfected without disturbing the existing wiring of the set. All that is necessary is to replace your present audio-transformer amplifier with a Bradley-Amplifier. This compact unit employs no transformers and amplifies all tone frequencies with faithfulness and clarity, and without distortion.

It is a mark of distinction to have a radio receiver of fine tone quality and you will surprise your friends with the remarkable improvement in your set that follows the use of a Bradley-Amplifier. It is as easy to install as a B-Battery and usually can be installed within the receiver cabinet.

Be sure to try one, tonight.

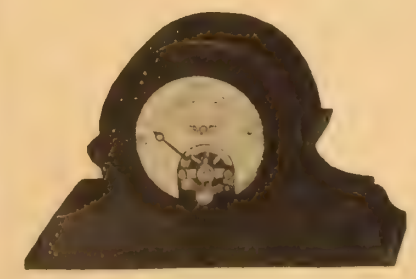
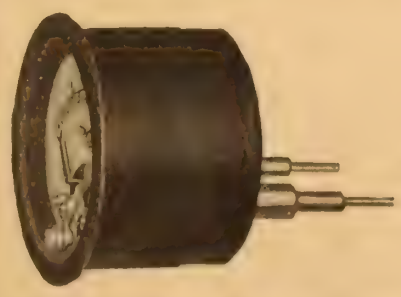
JEWELL

NEW



135-C Portable Voltmeter with cords, plug and adapter.

While designed for use with Radiolas Nos. 20, 25, 26 and 28, this Portable Voltmeter, double reading 7.5 and 150 volts, can be used with other sets for checking tubes and batteries.



135-A Voltmeter with special prods in rear.

135-A is for use with Radiolas Nos. 25 and 28. The prods fit into the jacks on the panels of the sets. 0-5 volts for control of tube filaments.

Send for Circular No. 739 describing these two new instruments; also Circular No. 735 describing the Jewell Junior Tube-Checker for checking tubes at home.

JEWELL ELECTRICAL INSTRUMENT CO.
1650 Walnut St., Chicago
"26 Years Making Good Instruments"

THE APEX SUPER FIVE

(Continued from page 25)

which varies with each installation, dial number 1 will be somewhat different throughout the scale, from the others, but dials 2 and 3 will be practically identical in their settings. There will be slight exceptions to this when adjusted for very maximum sensitivity and range but never more than 1 or 2 degrees difference.

The radio frequency control located between dials 1 and 2, is the vitally important adjustment on this set, as its proper adjustment, in conjunction with the tuning dials, will increase both the volume and selectivity. Super Five is so designed and constructed that it can be made to oscillate at all wave lengths below 500 meters on the average aerial, as any set of the tuned radio frequency type is most sensitive and selective when operated just below the oscillating point for any wave length. The radio frequency control can be left in such a position that set can be made to squeal at any point on the dial but this is to be avoided due to the disturbance caused in neighboring sets.

After a little practice in tuning, you will learn the approximately correct position of the radio frequency control for different positions of the dials and it should be kept at a point just below that at which thumps are heard when the three dials are brought to correct settings and resonance. The lower the wave lengths being tuned, the farther back must the radio frequency control be set. On different antennas, the radio frequency control takes different settings in its relation to dial settings and, if the antenna has extremely high resistance, the control may not bring receiver up to regeneration on the higher wave lengths. The setting of this control will also change slightly for different B voltages on the pink lead of the cable. If regeneration or squeal cannot be obtained at higher tuning dial settings, increase the voltage between the pink or salmon colored lead and the minus B. Any B voltage up to 135 volts may be used and the higher the voltage the greater the volume and, occasionally, the greater the range. On voltages over 90, a C battery of 6 volts should be used.

When receiver is operating, and tuned exactly to an out-of-town station, vary the blue lead on your B battery as some A tubes require a rather critical B voltage for best results as a detector. Good reception was obtained with voltages down to 16 on this lead but trying several tubes in this socket showed the average best voltage was close to 45. Burn your radio frequency and detector tubes as low as possible, as controlled by the small dial between tuning dials 2 and 3, without loss of signal strength, and try slight readjustments with a distant station tuned in. Once you have determined the lowest (most economical) setting of this control, with full volume, you can leave it there.

(The Thorola Islodyne, a receiver of wide distribution and usage, will be explained next issue in another "Operating and Trouble Shooting" article.—Editor's Note.)

Soldered joints in a receiver are better than loops over binding posts because they insure better and more lasting contacts.

KGW 'HOOT OWLS' HOOT

(Continued from page 7)

decided to hold meetings each Monday and Friday night from 11 o'clock to midnight. This custom was later revised to make the meetings come each Friday night from 10:30 to 12, midnight. This revised schedule has been strictly observed since its inauguration.

Now for the frolics, themselves!

Each Friday night, promptly at 10:30 and without warning, the KGW microphone is switched on the air and a squeaky, tinny, and extremely wierd conglomeration of noises pour out into the air. The wise, initiated listeners will immediately recognize this as originating from the Owlorgan, a form of calliope adopted by the degree team as their official musical instrument. Speaking of music, though, no Hoot Owl meeting is complete without seven or 'steen kinds, in varied and amusing forms. There's always a good, live, peppy jazz band around with a little scintilliating syncopation; solos by some good vocalist like "Enigma," the mysterious Hoot Owl Mystery Maid, or Helen Nordstrom Booher, snappy blues singer, or Kathleen Duffy, merry little Irish soprano; the Whiffledophus or, in everyday English, a marimba spanked by Julius Walter, KGW staff pianist; snappy Pantages headliners; or maybe blues songs by Grand Songsmith Alan (Punch) Green, who sings his own original numbers and tickles out an accompaniment on a ukulele that just delights in making music for Hoot Owl listeners. Then there's the educational

The New Radio Book HOW TO -

Operate Sets
Construct Parts
Improve Reception
Understand Radio
Assemble Circuits

FREE With One Year's Subscription to Radio Digest

THE greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest it supplies the demand for a book covering every phase of Radio from a simple explanation of Radio reception to a technical explanation of the different parts of a set which leads to the best reception possible. The sections on selecting and making sets develops the different types of sets and circuits with diagrams to explain same. "How to Operate" gives detailed information on the operation of all the well-known sets. The section of general information contains a complete Radio map and schedule and a section of workshop kinks which save time and money. Now is the time to take advantage of the exceptional offer as listed in the coupon for your convenience.

Straight Frequency Line Tuning with KARAS Orthometric Condensers

Specified for the Prize Winning "Straight-8" Super, described in this issue by Christen and Fournier.

Note the long eccentric plates

Made entirely of brass—plates patent leveled and securely bridged to insure permanent alignment. Every joint soldered. Grounded frame and rotor. Adjustable cone bearings. Spring copper pigtail.

How They SIMPLIFY the Tuning of Any Radio Set

Ordinary Condenser Arrangement of Wavelengths

Ordinary straight capacity condensers crowd 70 of the 100 wavelengths into the first 30 points of the dial.

Straight Wavelength Condenser Arrangement

With straight-line-wavelength condensers 57 of the 100 wavelengths are crowded into the first 30 points on the dial.

KARAS ORTHOMETRIC CONDENSER Arrangement of Wavelengths on Dial

Karas Orthometric Condensers insure absolutely equal dial separation of all wavelengths, 200 to 600 meters.

If your dealer hasn't secured a stock of Karas Condensers

ABC Radio Fundamentals for Everybody

Chapter I—Audio and Wire Telephony

By Milo Gurney

NEARLY three years ago, just another new "Whiz Bang" circuit pest darkened our editorial door, and before we could offer him the usual courtesy of being thrown out, he had sold us the idea that like Rome, his circuit had not been built in a day. We signed for three "how to make" articles—we published twenty-three. Eight thousand fans built it, and over twelve thousand fans inquired about it. Then he finally confessed.

All of which is but a preface toward re-introducing to you Milo Gurney—the Mystery Man—King Miloplex, familiarly known as King, which he admits is correct outside of his home. Mr. Gurney begins with this issue a series of fourteen articles upon "Radio Simplified," each interesting, instructive and replete with simple explanations which all may understand. You'll have to read this series. He's just as good as ever.

Milo Gurney

WHILE it has been the writer's pleasure to have compiled a great many articles of a technical or semi-technical nature, which made an appeal only to those interested in the construction of Radio receivers, or the principles involved in their design, he has for a considerable period been requested by literally thousands to answer questions concerning such articles, from the Radio fans of this and other countries. The majority of these have very definitely indicated that altogether too many of such constructors were securing but mediocre results from such receivers as they constructed, because of one of two apparent facts, viz, they were either denied an

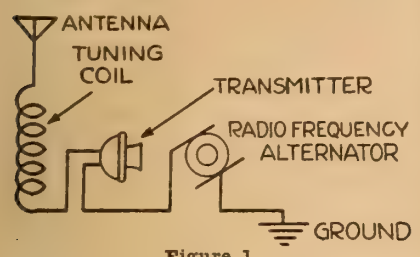

Figure 1

opportunity to study the theory and application of Radiophone telephony, in order that the associated apparatus comprising such receivers might be arranged and correlated in a manner to insure satisfactory results, or, not unlike the Arkansas traveler, who could not discover any logical reason for mending his leaking roof so long as it did not rain, they, too, cared little or nothing about giving any thought or study toward learning just why the wheels went 'round. Just so long as the receiver repeated sound, all was well, and the moment it failed to function, they could "let George fix it" through appealing to the technical editors of Radio magazines.

Obviously, this attitude was fundamentally wrong, and yet I am most grateful to the vast majority who made appeals for help to me, as it furnished, through their letters of inquiry, an opportunity to secure a most comprehensive study of that which the public desires in Radio receptors. They were of incalculable value toward more simplified design, together with a most interesting expose of the pitfalls which should be avoided when writing construction articles in order that the builders may be assured of greater satisfaction.

Radiophone telephony is, seriously, so truly marvelous as a means for the transference of intelligence that it is justly entitled to command a much clearer understanding of the simple formulas which govern its mode of transmission and reception. With this thought in mind, it will be the author's purpose in this series of articles to simplify the complex technicalities of Radio as the engineer approaches it, through explaining by the use of analogies which are within the experience of all laymen—each a counterpart of the public's every-day life, each detail surrounding the methods employed, and the appartus required, both for the transmitting station as well as the receiver; to attempt to lift the veil of uncanny mystery which appears so broad and overshadowing in its effect as to frighten the tyro into the belief that only from years of study and experience can one hope to comprehend, in even a small measure, just what it is all about.

Less than 18 years ago, following the invention of the Alexanderson alternator, an installation, using a part of the circuit shown in figure 1, this decided assistance toward greater achievements in the then comparatively new art or science of wireless transmission, both voice and music were transmitted a distance of 12 miles, and shortly thereafter to the then phenomenal distance of close to 200 miles, while today the transmission of both voice and music has been verified over a distance of 11,700 miles, or practically half way around the earth. This distance was so great that a considerable discussion has arisen within the engineering fraternity as to whether the reception from the broadcasting station was received from the East or West, because of the likelihood of error in the measurement of distances to the point of reception. This accomplishment is cited not only to indicate the vast strides toward perfection which have taken place, but to impress upon the reader's mind the importance of learning something relative to the whys and wherefors surrounding this agency which is commanding such universal attention.

Audio telephony, or the process whereby one person may carry on a conversation with another through the medium of the air, is in a large measure very closely related to the methods used not only in our everyday telephone conversations, but also in the transmission and reception of Radiophone telephony, each resembling the other with respect to the passage of energy from the transmitter, or speaker, to the receiver, or listener, which has at its inception been molded, or in the terminology of Radio been modulated, into the form of wave which the listener may identify and understand. This modulation is not visible, but a compounding which is readily recognized by the ear. In no sense could the ear distinguish the modulation of writing, which would, however, be the only means of recognition by the eye.

Figure 2 (page 28) shows the manner in which sound waves pass or travel from the speaker to the listener, the voice of the speaker causing the surrounding air to vibrate, and thereby starting the waves of compression and rarefaction which travel unchanged to the listener's ear,

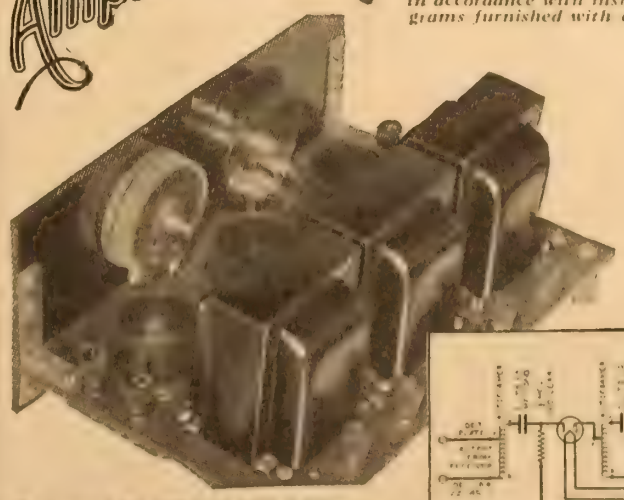
4 Big Improvements in Amplification!

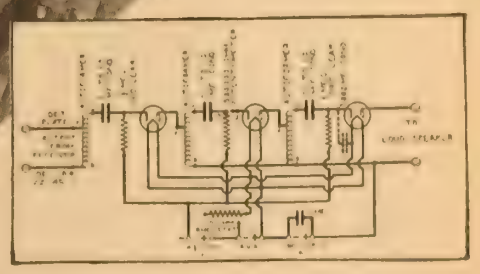
1 Full amplification of those bass notes hitherto largely "lost".
2 Greater clarity on all notes.
3 Improved reception of distant programs.
4 Better volume control.

A Thordarson Autoformer Amplifier built in accordance with instructions and diagrams furnished with each instrument.



fans!

Send for our new interesting bulletins on Autoformer amplification. They contain hook-ups and complete directions.



No note is too low—no note is too high—to be fully amplified by Thordarson Autoformers. Autoformers are *all frequency amplifiers*—they amplify with even magnitude ALL notes within range of the human ear. Developed, perfected and built only by Thordarson.

THIS latest Thordarson development—the Autoformer—utilizes for the benefit of your radio set, the same principle used in the line amplifiers adopted by the more recent high-powered broadcasting stations. The excellent tone quality of these stations—due to perfect amplification—offers proof of Autoformer effectiveness.

Autoformer amplification is for those who seek the finest reproduction of programs to be had. May be used with any set in place of regular audio transformer hook-up. Full directions, with diagrams, supplied with each instrument. Autoformers are $5 each.

HOW SOUND WAVES COMPRESS AIR

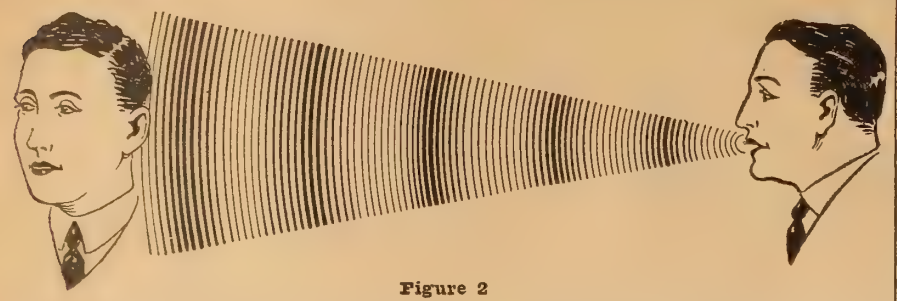

Figure 2

ABC'S OF RADIO SETS

(Continued from page 27)

where they in turn create rapidly varying vibrations upon the listener's ear drums in synchronism with the modulated sound wave received, which are shown as continually expanding spheres. The amplitude, or width of the band, is portrayed by the shaded portions in the drawing.

In wire telephony a like condition obtains, with the exception that the sound vibrations are carried through the wires electrically. In, or during, this procedure a continuous direct current of electricity is continually passing through the transmitter and receiver of the telephones being used, thus replacing the air medium as used in audio telephony or voice conversation. During this continual travel of direct current, so long as it is not modulated, both the transmitter of the telephone and the receiver will remain silent. When, however, a voice or other sound is made which strikes against the diaphragm of the transmitter, it in turn causes the diaphragm to vibrate and in doing so the resultant varied to-and-fro motion compresses also at varying degrees a mass of tiny carbon granules held within a container directly back of the transmitter diaphragm and through which the above-mentioned direct current of electricity is also traveling. This alternate varying compression of the granules increases or decreases the resistance of this mass, which in turn retards the free flow of the direct current and establishes a fluctuating or pulsating current which follows the connected wires of the two telephones unchanged, creating a varying pull and release upon the diaphragm of the receiver, which is an exact reproduction of the vibrations which were originally started at the transmitter, thus causing the listener to hear a repetition of the speaker's voice. The pulsating current thus created being and constituting the molding or modulation of the original sound, it is obvious that we have not changed the basic principles as used for person-to-person conversation, but have taken advantage of the wire and its associated electrical current as the medium for the transference of sound. It should be clearly understood that in wire telephony it is an electric current rather than the sound itself which flows through the wires, and it is this current, modulated to our requirements, actuating purely mechanical devices, which are capable of reproducing the wave form of the sound in the manner shown through figures 1 and 2.

While wire telephony has become so common that it is now not even given passing notice, but is accepted as a medium which has always been existent, I would be unfair did I not mention that to this day vast armies of scientists are continually employed for the sole purpose of continually bettering the results of voice communication by telephone, and it would not be surprising, because of this intensive study, to read an announcement, within a very short time, to the effect that overseas telephony is now available to those desiring to take advantage of it.

(In next week's article Mr. Gurney will take up the inter-relation of Radio to the fundamentals of voice communication, explaining in his interesting manner the mystery which surrounds this latest of scientific wonders.—Editor's note.)

RADIO RULES GEORGIA

(Continued from page 4)

simple matter. We had the local Russian garrisons bottled up; the passes are few and, passing over the topmost heights of the wild Caucasus, are easy to defend, provided one can prevent the Russians using the railway line.

"It so happened that the party to whom we had, in September, 1924, confided the all important task of blowing up these bridges, failed in its attempt and was surprised and dispersed by a Red detachment. There was another of our forces within striking distance, but we who led the movement were not able to warn it in time. They got our order to march on the bridges just too late; when they got there they found the Russians had rushed armored trains and troop convoys to the place and held it in such strength that with the means at our disposal an attack was hopeless.

Bridge Lost the War

"That lost us the war. Otherwise, we could have stood our ground till our brethren from Adzerbadjan, who were being secretly armed and equipped by the Turks, could have joined up with us."

The lesson has not been lost, and when next the fiery cross is sent round the Caucasus valleys to summon the Georgians to arms, Radio will not be wanting.

In the meantime Radio is already there, keeping the spirits of the people tense, helping to prepare for the next rising, a powerful, invisible enemy of Russian rule, present everywhere, seen nowhere.

The Georgian Provisional government, with the president, M. Jordiana, at its head, took refuge in Paris, where it still exists and, thanks to Radio, keeps in constant touch with its people.

Unlike many others, the Georgian government, in its hurried and enforced exit from its native land, was able to take with it abundant sinews of war. These shiploads of wealth were duly saved; cash, manganese, gold and silver ware, the treasure of the Georgian churches. The cash supplied the means for the September rising. The manganese was sold here in Constantinople, and with part of the proceeds, in the beginning of 1925, a powerful Radio transmission set was bought, with a large number of receiving sets.

These were packed in forty cases and smuggled across the frontier on donkeys' and mules' backs with the connivance of the Turkish officials. The station works "somewhere" in the lonely hills, in a place known to but a few of the leaders, and carefully watched over by faithful picked tribesmen so that no Russian ever gets near it.

Leaders Own Receivers

Receiving sets are owned by the principal leaders in their mountain fastnesses, and two of them are in the city of Batoum, carefully concealed. In some ways one of these is the most important, for it supplies a daily news service to Georgia's only free newspaper. This sheet, depending entirely on this clandestine Radio for its news, is published daily in secret, and, despite all attempts of the "Cheka," the Russian secret political police, to check it, is distributed throughout the country, and can be bought by those in the know, under the very nose of the Russian policemen in the streets of Batoum.

Thus does Radio keep alive the flame of independence and patriotism throughout Georgia,

The headquarters of the Georgian movement are, as stated, in Paris, where by a curious anomaly, since France has recognized the Soviet government, the members of the Georgian Provisional government are still on the regular diplomatic list. But it would obviously be a breach of diplomatic etiquette on the part of France to allow one of her sending stations to be used for the purposes of the Georgian leaders, so the actual transmission is done via Constantinople.

Up till now the transmission station used has been that of Osmanie, just outside of Constantinople. This station is shortly to be renovated and will be greatly increased in efficiency. The new station will have two alternators of 25 kilowatts each.

The transmission station in Georgia, the purpose of which is to keep the members of the Georgian government in Paris informed of everything that goes on in the country, is of 30 kilowatts.

Paris Hears from Georgia

Constantinople relays the messages received, which are eventually picked up in Paris. A special code is used, so that the messages are not easily decipherable.

The Russians have long suspected the existence of this secret Radio organization and have made the most strenuous efforts to locate it, but so far in vain. They have tried to counteract its effect by broadcasting Red propaganda from their Tiflis station, but this has been singularly ineffective, for the good reason that almost the only people in Georgia who have receiving sets are the leaders of the independence movement who are, of course, quite impervious to the Tiflis propaganda.

The code messages received by the Georgian central station are, if they are meant for publication to the people, relayed "in clear" to the secret receiving stations.

To Keep Your Cabinet New

Modern Radio cabinets are made with the same care and finish as fine furniture, and just as much pains should be used in cleaning and polishing them, if their original beauty is to be preserved. It is only necessary to follow a few simple rules in order to keep cabinets in the best of condition, according to experts of the Crosley cabinet factory.

Before polishing a cabinet, the dust should first be wiped off with a piece of cheesecloth. A mixture of equal parts of benzine and parafin oil should then be applied, with a clean piece of cheesecloth. Finally, all traces of the oil should be thoroughly polished away. Regular rubbing with oil in this way will not only preserve the finish of the cabinet, but actually improve it in the course of time.

Scratches accidentally made through the finish, in such a way as to expose the natural color of the wood, may be covered up by the use of a little mahogany or walnut stain (according to the finish of the cabinet). After the scratched or rubbed part has been stained, a thin coat of shellac should be applied to it. This should be allowed to dry thoroughly, and another thin coat of shellac applied. After the second coat has thoroughly dried, the whole cabinet should be carefully polished, as outlined above.

Straight-8: Outside Aerial Tuned R.F. Super

Part IV—Adjusting and Operating

By A. Christen and Jacques Fournier

MANY readers who have built superheterodynes before are apt to go into the operation of Straight-8 with too much confidence for best results. As was stated at the beginning of the series, this receiver is peculiar in many ways and there are several important points to adjust before the maximum can be gotten out of it. First of all, however, we will get this outfit hooked up with its accessories and then the symptoms observed will direct the corrective measures.

Considering the set from the front, the antenna lead-in connects to the first binding post at the left, while the connection from ground goes to the second post. The positive terminal of a 6-volt storage battery is then connected to the third binding post, its negative terminal to the fourth. Now insert all tubes in their sockets, eight "A" tubes being used. Turn all rheostats over toward the right and note whether all tubes light up and whether rheostats give proper control of brilliancy. The rheostat at the left end should vary the brightness of tube 2, that in the center should vary tubes 3, 4, and 5, while that at the right should control tube 6.

Connecting Batteries

Then connect the negative post of a B battery unit to the fifth binding post and its plus 45 to the sixth. Its plus should also be connected to the negative of another B unit and the plus 45 of this second B goes to the seventh post. An Eveready 4½-volt C battery is then placed to the right of socket 7 and the first Meloformer, with its minus post toward the rear. The flexible lead from the F terminal of the Meloformer goes to minus while the plus 4½ clip goes to the flexible lead connected to the front left post of socket 7. The flexible wire mentioned at the end of operation 15 goes to the minus terminal of a C battery of either 4½, 7½ or 9 volts while the plus end of this C goes to the flexible wire of operation 16. There is room for these last named C units under the sub base just to right of bracket.

A loud speaker can now be plugged into either jack in lower left corner and tuning tried. The rheostat at left is turned practically all the way to right, as is that at the center. The rheostat at the right is turned to point about straight upward. The potentiometer at right is turned to point straight upward also. On the original model the dials are found to be in resonance about 10 figures apart. When that at the left reads 30, the other reads 40 at maximum tuning of a station. Yours will vary from this slightly but not much.

Corrective Measures

At this point there may be any one of four things wrong. The left potentiometer may be advanced too far to the right, the right potentiometer may be too far over, the left and center rheostats may not be far enough over, or the feedback within the set may be reversed. Try different settings of the rheostats and even the position where tube is full on. The right potentiometer, if turned too far to right, will develop a loud roar in the speaker, as, in that position, it permits the three intermediate tubes to go into oscillation. A setting just to left of the roar or loud hiss point is that of maximum sensitivity.

You can readily determine whether the feedback around tube number 2 is correct by dampening the forefinger and touching the grid post of socket 2. There should be a "pluck" in the speaker as your finger touches and, more important, another when the finger is removed. If, with the left rheostat turned clear to right, this cannot be heard it will be necessary to reverse the connections of coil L5. These connections were covered by operation 19 so refer to that and connect the leads from socket 2 and the Victoreen coil just the opposite, as regards inner and outer end, to description. It all depends on how you wound and mounted this coil.

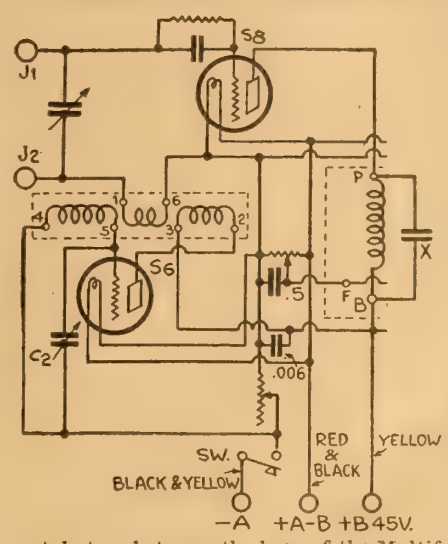
With tube 2 oscillating well, we can now proceed to the next point. Due to the fact that 2 is oscillating and tube 1 is a sensitive R.F. amplifier, you may find at first that it is difficult to keep 1 from oscillating or being too regenerative. When the left potentiometer is clear around at left, it should stop this, with increase of regeneration and sensitivity as it is turned to right. Should this potentiometer not afford sufficient control, three remedies are possible. As mounted beneath the baseboard, the 25-turn primary is ¼ inch from the double coil. By altering your mounting arrangement, and bending the bracket slightly, you can move this coil further away from the double coil. Of course you are limited as to how far you can separate them but when experimenting with this point we found a distance of 1⅛ inches could be secured.

A further corrective measure is to cut down the number of turns on the single 25-turn coil to about 20, by removing turns from the inside. This will also have the effect of making the tuning sharper. If this method does not appeal to you, or you find the tuning plenty sharp already, disconnect the + terminal of the first Victoreen unit (that under socket 2) from the B+90 wire to which it is now soldered, and put in another binding post at rear edge of sub base for this + terminal of the Victoreen. From the B battery run a wire to this post giving 67 volts; that is, connect the wire to the 22½-volt clip on the second B battery unit which gives 67 volts between that point and minus on the first B unit.

The chief point about this set is its selectivity and, as you now have it, there should be sharpness of tuning sufficient to suit anyone. Either of the first two oscillation control measures mentioned above, namely separating the coils or removing turns, will help, but, for selectivity, the better corrective measure is to either separate the coils on the sub base further or remove turns from the 10-turn antenna coil. Try cutting these out, from the center, two at a time but do not go any further than taking off 4 turns.

Various values of C battery may well be tried in the tuned R.F. stage which is tube 1. This is the C battery connected to the center terminal of left potentiometer and to left variable condenser rotor. You will get harmonics on very nearby stations; that is unavoidable when within 10 or 12 miles of them. However, if you are out in the great open spaces instead of the Rogers Park or Edgewater districts of Chicago, these will not be found. Don't be afraid to experiment with this outfit, it has in its circuit and principle the last word known at this time in the way of both range and selectivity on a super. Due, though, to variations in tubes, your winding and mounting of the coils, your location and antenna intallation, we cannot give you every exact detail for perfection. We have endeavored, in this chapter, to cover the remedies for the only two possible sources of "grief" we could find or think of but you may be able to improve your own assembly a great deal by some simple little change that did not happen to be necessary on ours.

IMPORTANT GRAND PRIX SUPER CORRECTION



IMMEDIATELY upon completion of the articles relative to Grand Prix eight tube super-heterodyne we began receiving reports that it was O. K. in every respect except selectivity. At first we thought it might be that a few had built without sufficient care or had substituted parts, as the original was exceptionally sharp. The set as built by Mr. McDonald has been checked time and again against the diagrams and articles and the fault has finally come to light.

If you will refer to figure 7, in the November 7 issue, you will note that the plate of the first tube connects to the first P terminal of the Multiformer unit and the first B connects to plus 45. No other connections are shown to those terminals. There should have been a fixed condenser of .0005 mfd. capacity connected across P and B to sharply tune this first coil. It is in McDonald's set, but up between the base of the Multiformer and the under side of the sub base or shelf, didn't show in the photographs and is easily overlooked in actual study of the set itself.

The technical editor and Mr. McDonald offer their sincere apologies for the worry and difficulties this may have caused you. We are all human, though, and will err at times. Part of figure 7 is shown here with the missing capacity connected in as condenser X.

KGW 'HOOT OWLS' HOOT

(Continued from page 26)

department which, headed by Professor Sedative P. Seidletz of Grand Scream, presents some humorous little skit each week. Besides, there's patter and jokes and whatnots to intersperse musical offerings, thus making up a highly versatile and diversified program.

Webster's unabridged doesn't offer any definition of the word, but an interview with the chief of Hoot Owls, Charles F. Berg, the Grand Screech, brought out the fact that a Hungari is nothing more or less than a celebration of each birthday of the Hoot Owl order. Friday, January 8, was observed as the end of their third year of existence, and in view of the fact that they're still alive and kicking BIG, there were plenty doin's at the big banquet and model Hoot Owl frolic held at the Multnomah hotel.

Places for about several hundred and forty 'leven guests were provided for in the main ballroom, but every plate was applied for before the slower ones even awoke to the fact that there was to be a Hungari. Those that couldn't get to go, though, tuned their sets to KGW and heard the whole business—from the drinking of Owl soup to the patter and comical sayings by the Grand Scream, Frank Sardam.

Nightingale

THE UTMOST IN RADIO

DISTANCE, volume, purity of tone—all are at your command in unstinted measure when you make the Nightingale Six, the companion of your evening hours.

With the golden tube contacts, straight line wave condensers and other special features of the Guthrie Sunghird Line, the Nightingale Six represents supreme radio value housed in cabinets of strikingly rich and appropriate design and finish.

Two stages of tuned radio frequency amplification, detector and three stages of transformer coupled audio frequency amplification afford a volume three times greater than can be secured with a five tube set.

Complete manufacture in our own shops give us control over every feature that is vital to your satisfaction. See the Nightingale dealer for any one of our several cabinet models or write to

THE GUTHRIE COMPANY, Guthrie, Ohio
Builders of the famous Sunghird Line

22½ Volt un-acid everlasting rechargeable **"B" STORAGE BATTERY** **$2.95** Includes Chemical

45 volts, $5.25; 90 volts, $10.00; 112½ volts, $12.50; 135 volts, $14.75; 157½ volts, $18.80. Trial. Do not wear out your battery. Get the battery that has been proved by thousands. Recharged at any garage. Will not injure any set. Can be used in connection with any battery charger. Will operate on 6-volt, 12-volt, 24-volt and 32-volt systems. Any special detector plate voltage. Tested and approved by leading authorities such as Popular Radio laboratories. Over 3 years sold on a positive guaranteed tape 30 day trial offer with cash refund if not thoroughly satisfied. Further guaranteed 2 years. Knock-down kits at great savings. Complete "Hawley" B battery charger, $2.75. Sample cell, 35c. Order direct—send no money—simply pay the express man cost on delivery. Or write for our free literature, testimonials and guarantee. Same Day Shipment. E. Hawley Smith, 317 Washington Ave., Danbury, Conn.

Gets Everything But Noise!

Read this convincing letter from a man who has "listened and marveled":

"Kane Antennae Co., 76 Dantest, Montreal, Can., Nov. 25, 1925.
Gentlemen:
I am using a Freed Eismann NR 5 Neutrodyne, and there is no comparison in the present reception of the set with the Kane Antennae as with the old 75 feet single wire. **It has eliminated all power induction and cuts out static, oscillating sets,** and stations are coming in 100% clearer and clearer than before. I am getting low wave stations which I could not get before on account of power-house motor transformers running daily. People are inquiring every day about this outfit and many of them are going on the roof to copy it.
Yours very truly, JOS. RICHARD."

Most outside aerials are not over-particular about the variety of noises they send down to your set with the electric waves. But now you do not **have** to put up with those all-too-audible noises. The KANE ANTENNAE entirely eliminates all power noises, such as leaky transformers, motor buzz, Delco Plant, etc. Dr Gehrig of Oakland, Cal., says it has improved his reception fully 40%. Power leaks cause more trouble than all other forms of radio interference. Get rid of them NOW by ordering a KANE ANTENNAE.

Get Facts Now About the Kane Antennae!

We will send you working drawing with instructions for erecting this wonderful Antennae for a dollar bill (a check will do). If, after looking over the drawing, you decide you would rather have a factory built Antennae, than build one yourself, we will take back the drawing and allow you full purchase price on an order for an Antennae.

The Special Kane Antennae for Radiola Super-Het's ..... $ 6.50
The Regular Kane Antennae for all other sets that use a ground connection 13.00
Working drawing with instructions for erecting 1.00
(Stamps not accepted)

Postpaid to any part of the United States or sent C. O. D. when 25% of price accompanies order.

THE KANE ANTENNAE CO.
Dept. 823-T, 3343 W. Monroe St. Chicago, Ill.

Questions and Answers

Oscillation Control for Walters Set

HMB, Toronto. Can.

We have had the pleasure of building the five tube receiver described by Mr. Walters in your issues of April 25, May 2 and May 9, and it is the best we have tackled yet out of a great many. We have sold two of them and customers would not trade for any other. We have an order for two, for the Toronto fire department, but before building them want to know if there is some way of preventing this set from going into oscillation so readily, so control will be not quite so delicate.

A.—You will note from study of the circuit that the two R.F. plate returns come together, after passing through their individual primaries, and before going to the plus 90 binding post. Between the point where they join, and the point where they connect with the audio returns and the plus 90 binding post, insert a C-R-L variable resistance of 200,000 ohms. This is made by Central Radio Laboratories of Milwaukee, Wis. With the R.F. tubes turned up bright you can bring the set up to maximum regeneration at any wave length.

Grand Prix Audio Transformers

RTL, Buffalo, N. Y.

In the list of parts required for Grand Prix you call for two Precise transformers but do not state their ratio. I purchased two No. 480 audio transformers, the ratio of each being 5 to 1. Kindly advise if this set needs two 5 to 1 transformers or if one should be 2½ to 1. Also where should each be mounted in the set.

A.—The Precise No. 480 audio transformers were to be a 5 to 1, to be placed at right end under shelf and a 2½ to 1, to be placed between sockets 6 and 7. Credit us with an over-sight as we were so careful to get the circuit and wiring and placing of holes correct that it didn't occur that the placing of transformers might not be clear.

Fireside Data

HRN, Washington, D. C.

Please inform me at once of the values of the bypass and fixed condensers as shown by number in your Fireside receiver.

A.—We must advise that you plainly have not read the series on this set as the placing of all condensers was given. However, as given in the diagram, they are as follows: C-5 is .001 mfd., C-6 is 0.5 mfd., C-7 is 0.5 mfd., C-8 is 0.5 mfd., C-9 is 0.5 mfd. and C-10 is 1.0 mfd.

Traveler Panel Layout

GAR, Sandusky, Ohio.

In the doughnut coil set described by John G. Ryan there are two Cutler-Hammer rheostats, one of 15 ohms, the other 30 ohms. Can find no statement as to their position, that is, which goes at left and which at right.

In trying to put on the Dialog dials, I find the center dial interferes with the rheostats. What is the matter? The dials sent by Walnart are slightly over 4 inches in diameter. Are these the ones specified?

A.—We are at a loss to understand how the dials on the variable condensers in this receiver could in any manner interfere with the operation of the rheostat knobs. We have checked figure 3, the panel layout drawing, against the set itself and can find nothing wrong.

DIRECTIONS FOR REQUESTING INFORMATION

The Questions and Answers department offers service to Radio Digest subscribers without charge and, to those not subscribers, the same service with a charge of 50c for each letter requiring up to three answers or diagrams. We feel that this policy is necessary for the protection and best interests of our regular readers, as the volume of correspondence to this department has increased to such an extent that it is almost impossible to give our subscribers' letters adequate attention nor a complete answer. To those who have long been newsstand readers this may, at first, seem an injustice but a little thought on the matter will show that this is the only possible solution of what has been, to the technical department, a very perplexing and difficult problem. We ask that the following suggestions be read carefully before writing:

1—Search carefully the back issues which you have, as the point in question has probably been covered several times before.

2—The book, "Radio Receivers," given free with each yearly subscription (when received by Radio Digest direct with full remittance of $5), contains the answers to the majority of the questions asked. If you have this book, go through it thoroughly and it is probable that you will find the solution of your problem.

3—Letters for this department should be kept separate from all correspondence to other departments and on other subjects.

4—Questions should be written on one side of paper only and each sheet should bear the sender's name and address. All letters should be accompanied by a self-addressed stamped envelope of standard business size.

5—Unsigned (or anonymous) letters cannot be answered, either in Radio Digest or by letter, nor can those without address.

6—No comparative statements on advertised apparatus will be given except as to efficiency in some particular circuit.

7—Drawing diagrams on a separate sheet of paper will save time and enable us to give all questions more attention.

8—Write each question as a separate paragraph.

9—Keep a copy of your letter and diagrams, to which we can refer without re-drawing.

10—The names and addresses of the writers of letters published will not be released except with the writer's permission.

11—We want to be of assistance to you in your difficulties, but are sometimes limited because of the length and time required for the proper consideration of the questions asked. Therefore, please make your letters brief.

Radiophone Broadcasting Stations

Corrected Every Week—Part III

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

United States (Cont'd)

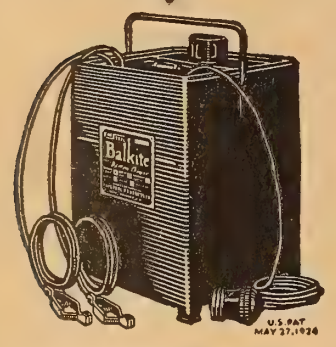
WJN, Newark, N. J. 252 meters. 150 watts. Radio Shop of Newark, Inc. Announcer, W. A. Bingenheimer. Slogan, "The Voice of Newark." Tues, Wed, Fri, Sat, Sun, 6-6:30 pm, 8:30-12, dance music. Eastern.

WNOX, Knoxville, Tenn. 268 meters. 500 watts. People's Telephone & Telegraph Co.

(Note—The fourth part of the directory will appear next week.)

Simplify and improve radio reception with Balkite Radio Power Units

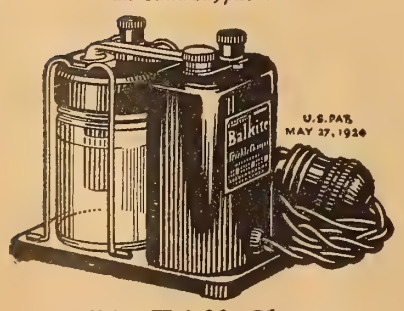
FOR THE "A" CIRCUIT



Balkite *Battery Charger*

This popular battery charger is entirely noiseless and can be used while the radio set is in operation. If your battery should be low you merely turn on the charger and operate the set. Charging rate 2.5 amperes. Operates from 110-120 AC 60 cycle current. Special model for 50 cycles. Also for 25-40 cycles with 1.5 ampere charging rate.

Price $19.50
West of Rockies, $20
In Canada, $27.50



Balkite *Trickle Charger*

May be connected to any 6 volt radio "A" battery of 30 ampere hour capacity or more and left permanently on charge. Used in this manner it converts your "A" battery into a permanent "A" power unit that operates from the light socket and automatically furnishes full current to the "A" circuit at all times.

With any smaller battery (4 volt or small 6 volt) this charger may be used as an intermittent charger of the usual type. Can also be used as a trickle charger if a resistance is added to cut down the charging rate.

When used as a trickle charger, as an added convenience, some owners add a switch which cuts out the charger during operation. Switches of this type also turn on Balkite "B" when the set is turned on, thus providing an entirely automatic current supply for both circuits.

Size 5½ in. long, 2¾ in. wide, 5 in. high. May be put in the usual dry cell compartment. Charging rate .4 to .5 amperes. Current consumption 1/10¢ per hour. Operates from 110-120 AC 60 cycle current. Special model for 50 cycles.

Price $10
West of Rockies, $10.50
In Canada, $15

Balkite Radio Power Units simplify and improve radio reception. They reduce the amount of attention you must give your set. With their use your current supply is always exactly what is required for each circuit.

The popular Balkite Battery Charger is entirely noiseless. It can be used while the set is in operation.

The Balkite Trickle Charger converts your "A" battery into a permanent "A" power unit that supplies full "A" current at all times from the light socket.

Balkite "B" eliminates "B" batteries entirely and supplies plate current from the light socket. Balkite "B" for sets of 6 tubes or less. Balkite "B" II for sets of 6 tubes or more.

An ideal installation is a Trickle Charger and "A" battery, and Balkite "B." This enables you to operate your set entirely from the light socket.

Noiseless—No bulbs—Permanent

All Balkite Radio Power Units are based on the same principle. All are entirely noiseless in operation. They have no moving parts, no bulbs, and nothing to adjust, break or get out of order. They cannot deteriorate through use or disuse—each is a permanent piece of equipment with nothing to wear out or replace. They require no other attention than the infrequent addition of water. They do not interfere with your set or your neighbor's. Their current consumption is remarkably low. They require no changes or additions to your set. *At your dealer's.*

Manufactured by

FANSTEEL PRODUCTS COMPANY, Inc., *North Chicago, Illinois*

FAN STEEL

Balkite *Radio Power Units*

FOR THE "B" CIRCUIT

Balkite "B"

Eliminates "B" batteries. Supplies plate current from the light socket. Operates with either storage battery or dry cell tubes. Keeps "B" circuit always operating at maximum efficiency, for with its use the plate current supply is never low. Requires no changes or additions to your set. No bulbs—nothing to replace. Requires no attention other than adding water twice a year.

A new model, designed to serve any set requiring not more than 20 milliamperes at 90 volts—practically all sets of 5 tubes or less, and most 6 tube sets. Size 8¼ in. long, 8 in. high, 3¼ in. wide. Occupies about same space as 45 volt dry "B" battery. Operates from 110-120 AC 60 cycle current. Special model for 50 cycles.

Price $35
In Canada, $49.50

Balkite "B" II

The most outstanding development in radio last season. Same as the new Balkite "B" but will fit any set including those of 8 tubes or more. Current capacity 40 milliamperes at 90 volts. Size 9 in. high, 6¼ in. wide, 7½ in. deep. Operates from 110-120 AC 60 cycle current. Special model for 50 cycles.

Price $55
In Canada, $75

The Gould Unipower, manufactured by the Gould Storage Battery Company, is equipped with a special Balkite Radio Power Unit

BALKITE BATTERY CHARGER · BALKITE TRICKLE CHARGER · BALKITE "B" · BALKITE "B" II

ALL BALKITE RADIO POWER UNITS ARE TESTED AND LISTED RMA AS STANDARD BY THE UNDERWRITERS' LABORATORIES

IT MUST BE DONE TO GET MONEY TO CLEAR AIR

Radio Inspectors and Government Laboratory Lack Funds Because Law Makers Are Ignorant

WASHINGTON.—Financial recognition by congress of the importance of the Radio industry to the American people would result in improved service and save the public thousands of dollars.

Money is badly needed by two branches of the government which are engaged in Radio activities of benefit to the public. These are the Radio inspection service of the department of commerce and the Radio laboratory of the bureau of standards.

What an Inspector Does

The public is more familiar with the work of the Radio inspection service. Summed up, it is the duty of Radio inspectors to examine and license operators and stations, inspect the Radio equipment of ships, check up on all stations to see that they operate on the wave lengths assigned them, and to investigate cases of interference of Radio and other sources.

Since the advent of broadcasting, the duties of the Radio inspectors have multiplied tenfold. Originally intended only for the inspection of ship and commercial Radio equipment, the additional burden of looking after broadcasting stations and thousands of interference complaints has made it necessary for most of the inspectors to work from 12 to 18 hours a day.

Need Larger Force, Hence More Money

In spite of the overtime services of the inspectors (for which, incidentally, they are not paid extra) many of the reports of interference are not investigated because the time cannot be found.

The one remedy for this situation is well known to officials at Washington. It is to increase the inspection force to such proportions that satisfactory service can be rendered to the entire country. But to do this would call for money and there is where congress enters into the picture.

Congress Oversteps Budget Bureau

For the fiscal year 1927 (which begins July 1, 1926) the budget bureau recommends an appropriation of $354,000, which is an increase of approximately $125,000 over the appropriation for the fiscal year of 1926. Generally, the recommendations of the budget bureau are heeded by the house appropriations committee and passed through congress.

One of the few exceptions in recent years applied to Radio. Last year the budget bureau recommended $220,525 for the Radio inspection service, and shortly thereafter recommended a supplemental appropriation of around $100,000. The first recommendation was approved. Chairman Martin Madden (Illinois) of the house appropriations committee was responsible for the defeat of the second recommendation.

Madden Cause of Poor Conditions

Mr. Madden's opposition to the second recommendation was based on the theory that Radio inspectors should not poke their noses into the business of street railway and electrical companies which create interference with their equipment. Mr. Madden was ignorant of the fact that these industries are doing their best to cooperate with Radio inspectors to eliminate interference.

What Bureau of Standards Does

The work of the Radio laboratory of the bureau of standards is also of great importance to the public, although less is known of it. There are several highly important Radio investigations which should be made immediately by the Radio laboratory but which cannot be attempted until more money is available.

For instance, methods and apparatus should be developed for measuring high frequencies. At present, no one knows how to measure these short waves. Also, the laboratory should go to work on the measurement of receiving sets and on methods and apparatus for the measurement of the power of transmitters.

Money Might Solve Fading and Static

One of the present undertakings of the Radio laboratory is an investigation of the causes of static and fading. This and other equally important investigations are moving very slowly because of lack of money.

The recommended appropriation for the Radio laboratory for the fiscal year 1927 is around $50,000. To do justice to several investigations which should be started immediately, the Radio laboratory should have at least $200,000.

The only thing fans can do about it is to write their senators and representatives in congress immediately, expressing their wishes in the matter.

That is up to each individual listener.

GIRL ON OUR COVER IS SINGER AT WEAF

"WHERE IS the Child?" That question doubtless will be asked many times when Radio Digest readers first behold the Madonna-like picture on our cover this week. The soulful eyes, the oval face, the black wavy hair and the suggestion of a halo in the dainty bit of silken cord with which it is tied may very well have been the subject for the brush of a Leonardo da Vinci, Titian, Murillo or Rembrandt.

However, the lady is not an artist's model. She is herself an artist in the musical world. Her name is Miss Joan Ruth and she is a member of the Metropolitan Opera company. She was born in Boston and made her debut in the Wagnerian Opera company at the age of 19. She has a coloratura soprano voice and has been heard over the WEAF chain many times.

Irish Free State Station to Be Broadcasting by Easter

DUBLIN.—At last there is to be some real broadcasting from the Irish Free State and, in fact, the Free State government has been advertising for a station director, musical director and engineer for the new Dublin broadcasting station.

Some have made so bold as to state that the station will actually be sending out preliminary test programs within a couple of weeks.

It is entirely possible that Dublin will be on the air around about next Easter.

Offer Prize on Best Plans to Help Radio

German Paper Gives 200 Marks to Stimulate Research

BERLIN, Germany.—The German Radio paper, "Radio Unschau," published by Bechhold in Frankfort, is offering a prize of 200 gold marks for the best solution of the following problems.

1. An apparatus for making audible sounds not usually perceptible, such as pulse and heart beats, cell growth in plants, etc.

2. A practical and simple way of measuring directly capacities and inductances.

3. An appliance for measuring infinitesimal lengths, breadths and weights, down to the thousandth parts of millimeters and milligrams.

Solutions, which should be accompanied by illustrative drawings or photographs, should reach the editor before February 15. There are no restrictions placed on competitors.

Combine for Elimination of Electric Line Interference

SPOKANE, Wash.—Representatives of the Washington Water Power company at Spokane, Wash., and the Radio Listeners' association conferred recently to form plans to reduce to the greatest minimum any interference that may be caused from the company's electric lines. Both the company and the association will maintain interference experts and cooperate to clear the air. Much of the interference that has been laid to high power lines was admitted by both sides to be due to the lack of knowledge of the listener.

Looking Ahead

Distinguished Radio Artists and Famous Notables Booked for Appearance at the microphones of leading European stations, will be shown in pictures, and a forecast of what they are to do will be shown in a double feature page in the Radio Digest of next week.

Sitting on Top of the World comes just about being true for the Pike's Peak Broadcasting company which sends an expedition to the lofty summit to see the old year out and welcome the new year in. When you listen to KFXF you are "sittin' high and pretty." Pictures and story next week.

Guns and Gas Almost Stripped the Life Clean Out of Zingaro, a Pennsylvania anthracite miner. So he left the black pits of the underground, packed up his portable typewriter and his Radio set and boarded a rambling box car for Montana, to live in the open. Read what happened to him in the next Radio Digest.

Milo Gurney's A. B. C. Radio Fundamentals will next take up the actual media used to transmit intelligence, voice and music through the air and ground. Learn of the mysteries of the carrier wave and modulation.

Setting up and Operating the Stewart-Warner Receiver is next in the "Operating and Trouble Shooting" series. The discussion of this handsome, metal panel outfit of the tuned radio frequency type should prove of interest to all.

The Unitrola Phonograph Set progresses through the stage of panel drilling and assembly in Carl Patterson's second article. This set is different in use, design and results. With the make of parts named and exact dimensions given, no one should have trouble in constructing it.

NEWS BRIEFS FROM THE BROADCASTERS

MASS. TECH. RADIO DINNER ON AIR OVER RCA CHAIN

Pan-American Musicale Saturday at WRC—Helen Jane Upperman Returns to Sing at WSAI

On Tuesday, January 19, a Radio dinner by the Massachusetts Institute of Technology will be held at Boston, where important proceedings concerning the future of Radio will be revealed. This meeting of interest to fans will be broadcast by the RCA chain of stations, consisting of WJZ, WRC, KDKA, WBZ, KFKX, and WGY.

* * *

Pan-American musicales are popular with fans of both Americas who are able to hear WRC, Washington. The next program scheduled by the Pan-American union will be held Saturday, January 16. Franklin Adams, counselor of the union, is the director. Alfredo Oswald, Brazillan pianist, and Clara Mena Sanchez, Mexican soprano, are two of the artists starred.

* *

Helen Jane Upperman, who gained her start toward fame as a coloratura soprano through Radio, returns to her home station, WSAI, Cincinnati, to broadcast a recital Monday night at 10 p. m., central time. This young singer was singing over WSAI when the famous New York composer, Frank LaForge, heard her. Since then Miss Upperman has been studying with Mr. LaForge. She plans to study in Europe next year.

* *

Yale university contributes a fine organ concert to the Sunday 5 p. m., eastern time, programs of WTIC, Hartford. Prof. Harry Benjamin Jepson, organist, is the professor of applied music at this university. He is unquestionably one of the leading organists of the country.

* *

Ricketty-Racketty Minstrelsy, from KGO, Tuesday night, January 19, is aimed to make Radio listeners get a laugh or two out of the air, following a program of classical music. Mischa Gluschkin and his orchestra, and Elsa Behlow Trautner, soprano, will furnish the music.

* *

The literary courses given by Prof. Robert Emmons Rogers at WBZ, Springfield, have been interesting because they deal with modern tendencies. Tuesday's talk is entitled "The New Biography; the Realistic Treatment of Great Men."

* *

Comedy drama, "A Scrap of Paper," written by J. Palgrave Simpson, will be broadcast by the KGO players, Thursday night, January 21, under the direction of Wilda Wilson Church. Twelve characters in the play will appear before the microphone.

* *

The Radio audiences of thirteen stations located in important centers throughout the country will hear again the famous Goodrich Silvertown Cord orchestra which is under the direction of Joseph Knecht. During the past few months, the Goodrich Silvertown orchestra has made a tour of the country in order that the Radio audience might become better and personally acquainted with it. Their concerts will be heard at 10 p. m. eastern time, Thursday, through WEAF, WJAR, WEEI, WCAE, WFI, WGN, WWJ, WCCO, WOC, WSAI, WGR, WTAG, KSD, and WDAC.

* *

"Scotch" will be on tap as the source of Scotland music from the Hotel Gibson when Robert Visconti plays a special program with his orchestra Wednesday, January 20.

* *

Cosmo Hamilton, the noted author and playwright who recently stirred the literary and theatrical worlds with the statement that Radio would soon supplant literature and the theaters, is broadcasting a series of Radio novels through WJZ, New York, every Saturday night at 7:45 p. m. eastern time. Cosmo Hamilton maintains, and, furthermore, demonstrates at every broadcasting that a full novel can be condensed into the short space of fifteen minutes without losing any of its interest.

* *

The latest dramatic feature of the northwest was the 4-act drama "Within the Law," given at KJR, Seattle, by the Howard Neill players.

* *

A typical example of the use of "change of pace" in presenting a Radio program is shown by the Landay Revelers in their entertainment from WJZ, New York, 8 p. m. eastern time, Monday nights. These boys have a knack of lifting the spirits of their listeners into a carefree state with a few popular or jazz selections and then suddenly turning and pulling on their heart-strings with a sentimental ballad.

SEE FACE OVER TELEPHONE WIRE

WILL REWARD BEST OVERSEA RECEPTION

RADIO DIGEST CONTEST TO DECIDE DX CHAMPION

Pacific Coast Stations to Cooperate and Trials Promise to Be Greatest in History

Just a few more days now—only until Sunday night, January 24—and the International Radio Week transatlantic broadcasting tests will be on the air! With this good news comes more. Radio Digest announces a prize award of $100 in gold for the best reports of European station reception by American or Canadian listeners.

Complete details of the contest will appear in next issue of Radio Digest. The contest is free and open to all and closes at midnight Thursday, February 4. In the event of a tie, prizes in all respects identical with those tied for, will be awarded each tying contestant.

Other prize awards have been announced and are given below.

The Pacific coast broadcasters will remain quiet. The Pacific Radio Trade association has withdrawn its objections to the trials.

The stage is set for a most wonderful week for people who like to twist the dials slowly for the studios thousands of miles away.

Pacific Coast Joins

At the time of going to press, 15 of the larger Pacific coast stations had agreed to keep off the air during the tests from 8 to 9 p. m. pacific time, which is 9 to 10 p. m. mountain time, 10 to 11 p. m. central and 11 to 12 p. m. eastern time. Full cooperation, it is believed, will be given by the other western stations since the misunderstandings have been eliminated.

KGO, Oakland, Calif., KGW, Portland, Ore., KFI, Los Angeles, KLS, Oakland, Calif., KWSC, Pullman, Wash., and KFWB, Hollywood, are among the larger stations which have guaranteed complete cooperation. As a result of much work and intensive pleading with the few recalcitrant stations, full success of the 1926 tests are now in sight.

Many Awards Offered

Silver cups, Radio receivers, gold medals and many other items of monetary and intrinsic value, have been announced by various organizations interested in International Radio week.

A silver cup will be awarded by the Freed-Eisemann Radio corporation to the listener logging the most overseas stations during the tests. Logs should be mailed daily, being postmarked before noon of the day following reception, to Arthur Lynch, Garden City, N. Y.

A second silver cup will be awarded by the Freed-Eisemann Radio corporation to the listener using one of their sets who is first to log an overseas station during the tests. Telegrams should be sent to Arthur Lynch, Garden City, N. Y. prepaid.

The Radio World's Fair and the Chicago Radio Show managements have also come forward with prize offers in the form of gold medals, two for fans in the area included in a 250 mile radius around New York, and two for fans in the similar Chicago area. These medals will go to the listeners in each area who send to the Radio show headquarters, 1475 Broadway, New York city, the best reports of their success in reception of the overseas programs. One medal in each area will be for fans using factory built sets and the other will be for home built sets.

In each of the contests mentioned above, the same condition holds, that in event of a tie, an identical prize with that tied for, will be awarded to each tying contestant.

All ready? Dust off the condenser plates. Get the aerial in good condition and don't forget to look over the ground connection. While you're at it inspect the batteries—or the eliminator—for you can't get Europe without current, and then—

Let's listen!

CAN CHECK ON YOUR CHARLESTON CHAMP

CHICAGO,—Plans are being arranged by the officials of WMBB whereby the returns of the national Charleston contest, to be held February 8 and 9, are to be broadcast from WMBB. The programs will be picked up by receivers, tuned to 250 meters, installed in the ballrooms throughout the country having contestants entered in the national contest. Dancers in the various cities may keep in touch with the success of their representative dancers.

LIBERTY BELL IS HEARD OVER AIR

TOO BAD the WEAF chain didn't pick up the Liberty Bell and broadcast it on New Year's Eve. WIP, Gimbel Brothers, originated the scheme, invited other broadcasters to participate, and finally, after none accepted, carried out the project alone. The audience would have been greatly increased, when Mrs. W. Freeland Kendrick, above, wife of the mayor of Philadelphia, tapped the bell, had some of the chain, relay or other broadcasters helped carry the peal of American independence to every state in the Union. Let us hope that sometime this year, the 150th anniversary of our independence, the famous old bell will be heard over more microphones.

Sport Broadcasts

This week of January 16 to 22, has many sports events on the broadcast schedule. Hockey looms second to basketball as a microphone athletic feature, while an ice skating race claims third honor. The week's basketball schedule is:

Saturday, January 16

KOAC (280.2) Oregon Aggies vs. Gonzaga, 7:15 p. m. pacific time.

KFMQ (340.7) Arkansas U. vs. Southern Methodist U., 7:30 p. m. central time.

WSUI (483.6) Indiana U. vs. Iowa State U., 7:30 p. m., central time.

Thursday, January 21

KFKU (275) Kansas U. vs. Oklahoma U., 7:30 p. m. central time.

* *

Tuesday, January 19, is the date of the Boston Bruins vs. Montreal hockey game at Boston. The game, called at 8 p. m. eastern time, will be broadcast via Westinghouse Station WBZ.

* *

Monday, January 18, from 8-10 p. m. eastern time, the Metropolitan indoor ice skating championship races will be broadcast from Madison Square Garden through WNYC, New York, N. Y.

German Barristers Unite to Study Legal Phases of Radio

BERLIN, Germany.—The rapid development of Radio has led to the discovery that it has a legal side, and questions connected with it are increasingly coming into the courts. At a meeting of German lawyers interested in Radio, it was stated by the chairman that "the ignorance of Radio matters displayed at times by judges is appalling," and it is resolved to form a Radio Legal association for the purpose of studying the legal aspect of Radio and of helping with proper advice contestants before the courts and the courts themselves.

International Test Programs

COMPLETE, exclusive and special programs for the week of January 24 to 30, inclusive, for every European broadcasting station participating in the international tests, will appear in advance in the next week's issue of Radio Digest. Pictures and stories relating to European stations will appear as well in this special issue. Radio Digest staff correspondents in Great Britain and Continental Europe will give American listeners the best information obtainable anywhere on the international tests.

Wave lengths, hours, descriptions in detail of each number to be broadcast by European stations—all this and more will be found in the next issue of Radio Digest. Be sure to reserve a copy at your newsstand. The special International Week issue will be in great demand.

PROVES RADIOTELEVISION IS BUT STEP FROM ACTUALITY

Edmond Belin, French Scientist and Inventor, Astounds Watchers as Image of Man Ten Miles Away Is Seen on Screen

BY F. M. DELANO

PARIS, France.—Television, the seeing of distant things and persons by wire, and Radiotelevision, the same without the use of wires, is about to become a practical invention instead of an inventors incompleted dream. For years Edmond Belin, French scientist and inventor, has been perfecting, improving, thinking—and at last he is almost ready to give his device to the public as a finished product, foolproof, and ready for every day usage.

Mr. Belin's experiments came to public notice and acclaim just recently when he invited journalists and the French Photographic society to witness a television trial. It was successfully held between this city and his Malmaison laboratory, 10 miles distant.

See Aide 10 Miles Away

The inventor rang his assistant there on the telephone, fitted, of course, with the Belin device. The assistant, Louis Lumiere, answered and as he did so, his smiling aide's face became visible on a small screen attached to the instrument at Mr. Belin's end of the wire. There the scientists and newspaper men were gathered. They gasped in amazement at the demonstration.

Principles of Radio will be employed in the final public adaption of the device, Mr. Belin said. Only a few difficulties of Radio electricity must be overcome, he continued, before the television attachment can be placed on the market or applied to existing telephone systems.

The final step, from wire television to Radiotelevision—without any conducting wires—will be just as easy, although perhaps not so private in nature, according to the inventor. The Radio device is almost perfected now.

Belin Describes Invention

"Here is a description of the device," Mr. Belin said, as he stood before the apparatus. "Twenty silvered facets are mounted on a vertical steel disc revolving at the tremendous speed of 4,000 revolutions a minute. These revolve before the luminous ray of a small but powerful arc light in front of which is placed the person, thing or photograph whose image is to be transmitted.

"The facets, by the intermediary of a tiny hole, transmit the decomposed image point by point. In other words, the image is broken up into tiny points of light at the rate of 250,000 each second. These light dots are transmitted to a screen by a series of mirrors—25,000 dots every tenth of a second—and register so rapidly that the first are retained on the retina of the human eye while the last are being shown. It is similar to motion pictures where 10 photographs per second give the illusion of movement.

Long Distance Radio Movies Next

"I will overcome the last remaining obstacles within a fortnight. I can transmit the figure or face of a person speaking to London, as there is no limit by distance once the principle is established.

"Before the end of 1926 I expect to perfect the invention so that a person speaking may send his likeness around the world by Radiotelephony. Eventually we shall have long distance movies, with everyone possessing a screen at home.

Reeves Hears Argument on Alleged Monopoly of Radio

WASHINGTON, D. C.—Argument was heard in connection with the complaint alleging a Radio monopoly, on January 11 in New York city, before Examiner Reeves of the Federal Trade commission.

During the early days of the taking of testimony in New York by the commission in its case against the Radio corporation and others, counsel for the defendants made a motion that the case be dismissed. At that time Examiner Reeves announced that he would place the motion before the full commission.

The commission has instructed Mr. Reeves to rule on the motion himself and in accordance with this, he is hearing further argument.

International Radio Hope for World Peace

Here they are, listeners, some of the folk you will be trying to hear speak and sing across the Atlantic and the American continent during the week of January 24-30. Have this page before you when you are trying to catch 2LO, London, England, because four of the quintet at the left are regular staff members of that station and are expected to have a part on the overseas program. They are known to European listeners as (left to right) Miss Sophie Dixon, J. Jefferies, Rex Palmer, Arthur Burrows and Captain C. Lewis. (Mr. Burrows is now director of the International de Radiophonie at Geneva). Keystone View Photo

Below is a scene in the Radio Paris, Paris, France. The lady is Mme. Georgette LeBlanc, former wife of Maurice Maeterlinck, who charmed the famous author with her voice. Jaques Catelain is pointing at the microphone. Robert Tabuis is beside Mme. LeBlanc and then Marcel L'Herbier.

ONE of the most important peace conferences in the history of the world will be held during the week from January 24 to January 30.

It will be a wide-open meeting. There will be no secret bargainings, no whispering behind soundproof doors, no petty dickerings between ambitious statesmen for personal gain. The citizens of the world will sit at the universal table. Master of Ceremonies International Broadcast will conduct the conversations—the most of which will be set to music.

The week of international broadcasting will be one of many such events in the years to come. The peoples of all nations will have an opportunity to hear and understand their neighbors across the international boundaries. All the world courts and leagues of nations will fade into insignificance compared with the intimate personal knowledge that the plain everyday citizen will have of his neighbor of another government.

Music and courteous felicitations will pave the way for kindly and respectful feelings. Armaments, disarmaments and military activities will be taboo at the international Radio table.

To those who have followed the series of articles written by Fred Smith, former director of Station WLW at Cincinnati, as they have been published in Radio Digest, describing conditions as he found them during a tour of the Radio stations in European nations, the international broadcasting week will come as a natural sequence.

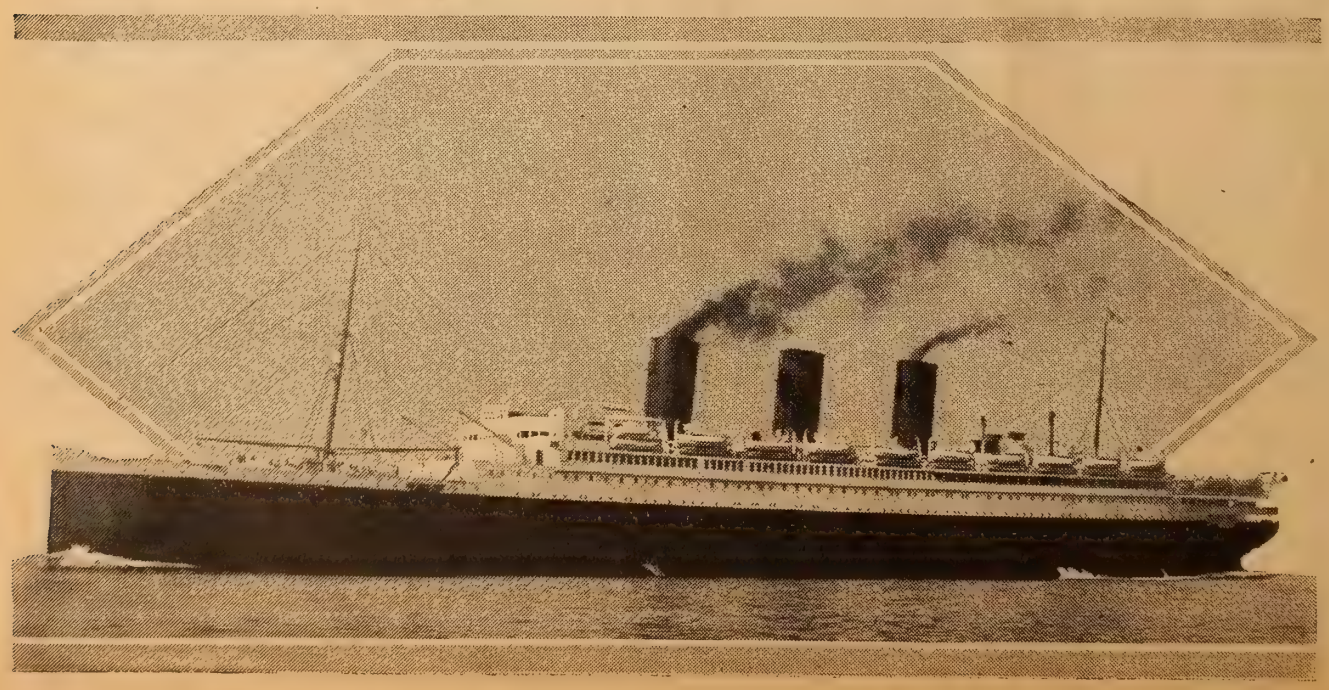
In America we have become nationally organized by good will and mutual understanding. In Europe a similar union between Radio broadcasting interests has been established in the International de Radiophonie bureau at Geneva, Switzerland. Arthur Burrows, former comptroller of the British Broadcasting company, is the director general. Concerning the phase of a better international understanding through the medium of the Radio, Mr. Smith wrote:

"The bureau is working with clear vision toward a beautiful future for Radio in Europe, and probably the world entire. Mr. Burrows expressed to me most earnestly the hope that the Office International de Radiophonie would, before long, have the pleasure and privilege of freely exchanging views with an organized body representative of the great American movement.

"The Radio bureau at Geneva does not have as one of its purposes the definite effort of human intelligence to bring about a closer understanding among the nations of the earth; it is purely and simply the expression of a practical need among the broadcasters of Europe to settle such questions as the allocation of wave lengths. Nevertheless, an examination of the work it has already accomplished and a study of its plans for the future will reveal at once the natural tendency of the influence of such an institution to be directly in line with a fulfillment of the idea to quicken the understanding among European nations, and bring them into more harmonious relationships.

"Radio broadcasting with at least one international language already accepted—music—tears down boundary lines, or rather ignores and passes them over. The German programs feature the music of Puccini, Verdi, Saint-Saens and other Latins, while from Rome are heard echoes of Beethoven and Wagner, and from Spain comes a festival of Bohemian music.

"But the bureau at Geneva is planning to go much further than all this. It means to serve practically the artistic needs of its members. One of the definite jobs of the bureau is to go about finding ways and (*Continued on page 21*)



Mid-ocean tests will be made aboard the liner France (left) during the international broadcasting week by Eric H. Palmer of the Freed-Eisemann Radio corporation. Mr. Palmer has conducted similar tests of reception in his "globe-trotting."

Children Hear Monks and Dogs on the Air

"Well," said Jiggs (below) when he was handed the microphone, "the widow Jocko and I were not making love. 'Twas just a little friendly discussion as to the mistakes of our ancestors that puts us monks in cages nowadays." At right is Big Brother Bob of WEEI, Boston, and his Big Radio Dog. The dog is making his bow-wow for the children's hour.

WITH MOTION pictures, zoos in the city parks and practical facts about natural history in the schools, children are becoming almost too sophisticated for such stories as the Three Bears and Peter Rabbit.

"Purely imaginary," says Willie, with a yawn, when mother starts the pretty little tale of Goldilocks. "I grant you that bears growl and they live in the woods. They might even take up an abode in an abandoned hunter's cabin furnished in a meager way with chairs and beds. But when it comes to cooking and passing remarks such as, 'Who's been sitting in my chair?' and all that rot, I simply cannot believe it. In the first place bears lack the vocal equipment to articulate words devised by the genus homo. It's absurd, I might almost add presumptious, for a presumably intelligent parent to even attempt to foist such nonsense onto the credulity of a trusting child—"

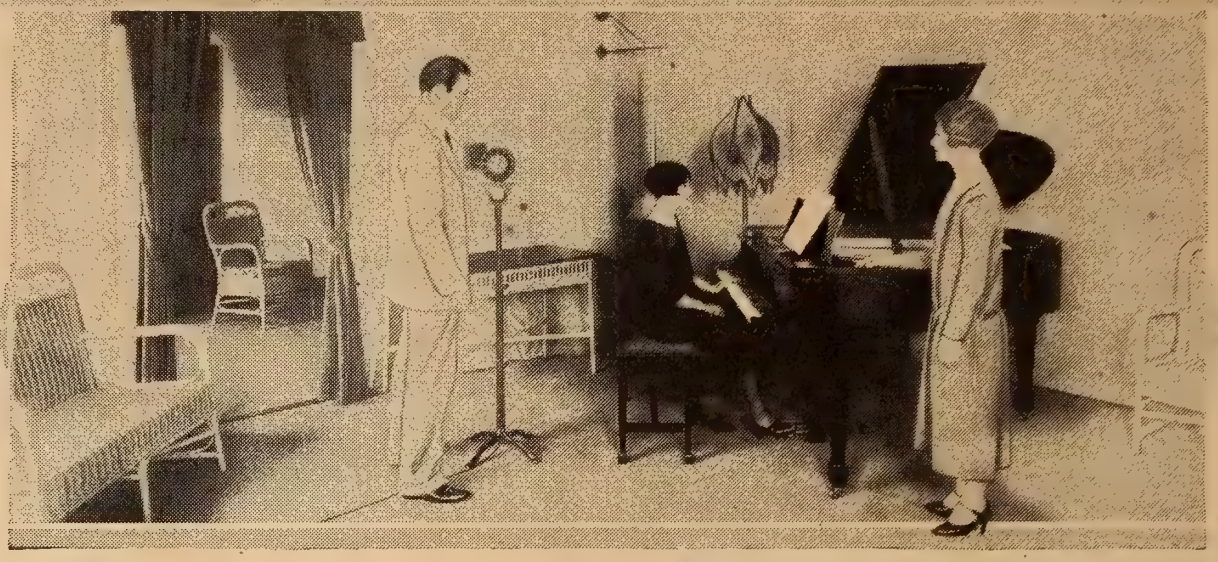
Something should be done about it. These childish illusions which have endured for generations must be preserved by some means or other. Perhaps Radio will solve the problem.

At lower left is arbor in English garden where a pair of nightingales were enticed into singing into a microphone. In the center below are three young elephants at Luna Park, New York, who can tune in a receiving set. Inspired by a basket of fish, two sea lions of the New York zoo chortled a merry ha ha song into the mike by their pool.

As a suggestion would it not be a sure way to interest Willie if he could actually hear real honest-to-goodness bears growling while the good story lady tells the tale? Steps in this direction have already been taken.

At Universal City, California, they have a zoo where the jungle chatter is especially animated. The least little incident starts off a veritable cascade of animal palaver that winds up with every beast trying to make himself heard at the same time. Whoever started the rumor that animals are dumb should pay a visit here. You take Jiggs, always in trouble with his family or some other monk's family. If Maggie happens to be busy with the little Jiggses at one side of the cage, Jiggs, likely as not, may be chinning with Mrs. Jocko, widow of that old cocoanut milk soak who passed out three months ago. Well, the Bambam monks in the next cage tune in, get excited, and jabber their opinions to every other creature within hearing until the tale, greatly exaggerated, reaches Leo, the lion. Then the whole zoo is in (*Continued on page 26*)

KFOA, Seattle, Toastmaster of Northwest



A milliammeter attached to the microphone stand insures proper modulation in broadcasting. At the stand is W. K. Bert (above). With him are Miss Alma Daley, soprano, and Miss Velma Case, accompanist.

PREEMINENT, on the high point at the extreme northwest section of the country, Radio Station KFOA of Seattle stands like a patriarch looking down the ether vista across the mountain tops and through the valleys of a vast domain.

It was planted there when Radio broadcasting was young, back in 1922. C. B. Williams, wide-awake advertising manager of the Rhodes department store, read of the remarkable experiments and discoveries of Radio telephony in the east and argued that "what is good for easterners is just as good for the people of Seattle and the Pacific northwest." In May of that year the first program was broadcast from the Rhodes store and the station was given the call letters KDZE.

Appreciation was instantly manifested. Letters of acknowledgment overwhelmed the little 50-watt station. Carl E. Haymond was appointed director. In a few months it was obvious the time had come for expansion and in July of 1924 the station was on the air with 500 watts. This, too, became inadequate and the following March operations ceased until a new 1,000-watt station could be installed. It had now taken on the title KFOA. The one kilowatt station was introduced last September.

KFOA is conspicuous in many ways. It is more than a mere entertainer. It is sort of a toastmaster at a general assembly of Rotarians, Kiwanians, Lions, chambers of commerce and educational institutions. It broadcasts their luncheon speeches. It carries on for Babbitt through the air. Anything for a bigger and greater northwest reaches the multitude through the big Rhodes store Radio.

It also is a Samaritan, going to the bedsides of the broken-down heroes who have made the Pacific northwest what it is today with special programs for their benefit.

In this way through its sincerity of service the station has surrounded itself with a substantial clientele. KFOA prestige is unquestioned because it is endorsed by and identified with the most influential households throughout the territory. This has reflected favorably toward the store which founded and sponsors it.

Many of the larger Radio stations have found it an advantage to be identified with the press and KFOA has its tie-up with the Seattle Times. The "Afternoons at Home," under the auspices of the Times are almost as popular as their Wm. F. Hoffman Concert orchestra programs, which come later and are hugely enjoyed. The Rhodes store also presents the Hoffman orchestra as a dinner hour feature. The Eddie Harkness Dance orchestra from the Olympic hotel adds to the merriment.

One of the occasional musical treats is provided by the Seattle Saxophone band, under the leadership of Gene Paul. Mr. Paul believes that the saxophone has a higher destiny than the syncopated rhythm of the "jazz." His band dwells only in the atmosphere of the classics and has attracted wide attention because of that as well as for the excellence of its technique.

According to the latest information, Mr. C. B. Williams is now the station director and Miss Mary Gordon arranges the programs. W. K. Bert is the director-announcer for the Times programs and the Times studio. His efforts have injected a great deal of tone and spirit into the KFOA offerings for the younger generation. Among the favorite artists are Miss Alma Daley, soprano; Miss Betty Brandeberry, violin; Miss Velma Case and Miss Fidelia Burgess, pianists. KFOA microphone stands are equipped with milliammeters which register a check on the intensity of the vibration and warn the broadcaster whether to modulate or accentuate—an original idea. Paul B. Gale is the engineer.

The Rhodes store station also has been favored for the trans-continental hook-ups in important national broadcasting, including the current Atwater Kent programs from New York, the auction bridge series and presidential speeches.

If greatness comes through the degree of service rendered, then KFOA is well located and well deserving of its high esteem. It is a veritable watch-tower keeping a vigilant eye on the world and bringing to the people it serves the good things of the earth that may be conveyed by the ear. And when the great international tests come within the next few days KFOA will be one of the foremost to help bring the voice of Europe to western America.

Saxophones are entitled to a higher sphere than jazz and syncopation declare Gene Paul (right) and his Seattle Saxophone band. Hence they play only the classical airs for Rhodes store station, KFOA. Miss Betty Brandeberry (below) with her violin and Miss Fidelia Burgess are favorite artists here.

Listeners of KFOA will be interested to see the heart (above) which pumps the energy that brings them the voice of Seattle.

Soldier Sentiment Wins Love for WMCA

One of the Thursday evening treats over WMCA is the voice of Miss Kay Macrae (above). Louise Bave (in circle) selected by Toscannini for her wonderful voice, and Arthur L. Lee, managing director of the Hotel McAlpin programs.

From Paris, Texas, to Broadway, New York, was the route taken by the exceptional voice of Miss Lois Mayer (below). She is a favorite with WMCA listeners and sings in several languages.

RETURNING officers of the A. E. F. who stopped off in New York for a few days before continuing to the home town and the business of John Citizen, had a favorite rendezvous at the Hotel McAlpin.

During those surging days, up to and shortly after the "Big Parade" down Fifth avenue with General Pershing at the head on a prancing steed, this famous hotel might have been mistaken for a field marshal's headquarters. Many a brilliant party was held there with the bright lights glinting from gold and silver emblems and the polished sheen of military boots. All tears were wiped away. Only merriment and happiness reigned at glad reunions between the welcoming loved ones who had come from distant states to the water's edge and the victorious heroes.

On swept the endless throngs through the marbled walls and the glitter of myriad lights. Pent up yearnings through long months of stress and strain found their first relief within these portals.

Somehow all of this overflow of throbbing hearts, this pageant of brawny shoulders and flashing arms, smiles and kisses seemed to leave an impression on the shining walls, the portieres, the brass and wood of this mammoth tryst.

Under the cold external walls there appeared to be a tender warmth. These countless tumults of emotion had seemed to leave a tremor of feeling in the inanimate things. And as the smart uniforms slowly disappeared from the array of the procession that moves on and on through the doors that never close, it seemed that invisible fingers stretched forth to beckon and recall.

And even before this momentous episode had dissolved into history the invisible fingers did go forth to touch and recall the days that had been. They stretched forth to the very hearthstone where John Citizen had gathered his loved ones about him. They found him from the borders of the Dominion to the banks of the Rio Grande.

* * *

On Washington's birthday, 1920, two skeleton towers in Hoboken, N. J., wafted to the ether lanes the first program to be broadcast from Radio Station WMAC, located on the roof of the Hotel McAlpin, New York.

Lieutenant Americaine, late of the Lost Battalion, now rendering service in the engineering department of the Pennsylvania railroad at Philadelphia, made with his own hands the intricate receiving set he had presented his bride for Christmas. With two head phones they sat in their kitchenette apartment and listened for the new station, WMCA, coming over 341 meters from the hotel where they had met after a year and a half of absence the year before.

They heard the voice of Snedden Weir, program director, come drifting down to them from the distant night and it all came back to them—the scenes, the dance, the music that had been the sweetest ever heard. And they were happy.

Instantly the voice of this famous hotel became popular throughout its wide range. Launched on 500 watts it performed miraculously. It was but a step to the Roaring Forties where the new sensations of Broadway were singing and playing their various ways into favor of the fickle public. Would Radio enhance or deter the

Samuel Siegel (above) makes mandolin playing a fine art and brings it to WMCA audiences after 20 years' absence. At right, Mme. Clara Novello Davies, leader of the Artists' choir at McAlpin.

"That Girl Quartet," nationally known, was organized and directed by Miss Harriette Keyes (right) one of the featured artists of WMCA. Benar Barzelay (right) famous Polish violinist heard from WMCA.

KALININ TELLS THE RUSSIANS HOW

M. I. KALININ, chairman of the All-Russian Council of Soviets, or the equivalent of the American president, is an ardent believer in broadcasting and tells the Russian council and citizens what is what by means of this modern invention. The above scene is from the council chambers where speech amplifiers carry his voice to remote corners. Important political speeches and sessions are broadcast to the public. Russia is doing its best to keep up with the times.

SPORT ANNOUNCERS TELL OF BIG THRILL

DESCRIBE FOOTBALL GAME WITH GREATEST APPEAL

Radio Voices Name Contests Which Gave Them Biggest Personal Reaction During Season

Did it ever occur to you while you were listening to the play-by-play accounts of the football games last season over the various stations that the announcers might have had personal reactions while watching the games which they did not put on the air in giving an unbiased and uprejudiced account of the play? If it did, you will probably be interested in the answers some of the leading sports announcers of the country who were recently asked which of all games they had seen during the season just closed was the most interesting and thrilling.

Favors Yale-Princeton Game

Graham McNamee of Station WEAF without hesitation said, "The Princeton-Yale game was the best game I saw this year and was glorious from start to finish. That 81-yard run of Slagle's through the entire Yale team was the biggest surprise of the season and had a lot to do with putting the 'skids' under the Yale machinery."

Phillips Carlin, colleague of McNamee, agreed with McNamee to a degree but said "There is no doubt that the Yale-Princeton game was the best played of those which we saw this season and also in many respects the biggest surprise. However, the Army-Navy game was in a class by itself, due to the spectacle of the cadets and the middies and the fine cheering and enthusiasm which the other games did not have."

Likes Darthmouth-Chicago

H. A. "Shorty" Hall of Station WGN, Chicago, said, "The Dartmouth-Chicago game stands out alone in my opinion because of the amount of spectacular football that was brought into the contest. The great work of Oberlander and Lane stood out as the greatest playing I witnessed during the season and I never saw anything better than that great line battle between Henderson of Chicago and Deal of Dartmouth. Tulane, though, gave me the biggest surprise when they came up and defeated Northwestern by bringing a team that would give any team in the Big Ten a great game."

Radio Safeguards Newspapers

DENVER.—Radio is now being employed as an emergency standby in the intermountain territory to guard against interruption of news service to newspaper editors during blizzards and washouts, following plans completed with KOA.

RADIO IS DANGEROUS TO SIAMESE QUEENS

SINGAPORE.—A curious story is running the rounds here regarding the recent change of queens in Siam. It will be recollected that a short time ago, the king of Siam deposed and divorced his queen as being "unfitted for her royal duties" and took onto himself a new queen from whom, with eminently satisfactory speed, he has received the present of an heir to the throne.

The story goes that the poor deposed queen sought to enliven the dullness of court life by devotion to Radio. She had an excellent reception post, which enabled her to pick up quite a number of stations nightly.

The Siamese, however, notwithstanding the fact that their monarch is enlightened, having been educated in Europe, looked upon this practice of listening into mysterious sounds from the skies with deep suspicion, and attributed her failure to provide her royal husband with an heir to her nightly consorting with these invisible spirits from the ether.

The new queen-consort, it is stated, has been enjoined on no account to have anything to do with Radio, and the only set in the palace has been packed up and taken away by the deposed queen.

Bridge Is Played on Trains With Instructions by Radio

CINCINNATI.—The popularity of the instructive Radio Auction Bridge games broadcast by WSAI during the past few months has extended far beyond the limits of the United States, according to letters and telegrams received by the stations broadcasting this feature.

The latest innovation which has come to the attention of WSAI is the playing of bridge accompanied by the Radio instructions on the fast trains of the Canadian National Railways. Thousands of letters received daily by WSAI, asking for reprints of games broadcast, indicate in an unmistakable manner that these games are recognized as one of the Radio features of the year.

Wilmington, N. C., Puts on Program at Station WRVA

WILMINGTON, N. C.—The Wilmington Radio club recently conducted an interesting program over Station WRVA, the new Edgeworth Tobacco company station, Richmond, Va. The program included an address by Hon. Walter H. Blair, mayor of Wilmington, selections by the choir of the First Presbyterian church, numbers by the Choir String quartet, the Carolinians orchestra, a talk by Louis T. Moore, secretary of the chamber of commerce, and other artists. The First Presbyterian church was founded in 1817.

Station KOA Famed as Detective Bureau

Locates Eleven Missing Persons by Means of Broadcasts

DENVER.—Records of a Radio detective bureau, maintained by KOA, Denver station of the General Electric company, disclose that 11 missing persons—three of them runaway youths who decided to make their own way in the world—have recently been located or restored to their families through the far reaching influences of Radio.

Most recent of KOA's human recoveries was an aged minister and prohibition worker of Indiana, who was identified in a Denver hospital. A fall on the sidewalk caused complete loss of memory. He was identified by descriptions transmitted through the air.

Ether waves are brought into play on an average of 20 times a month at KOA, for the purpose of running down persons who have abandoned home climes or are sought by police. The microphones at the Rocky Mountain broadcaster have been used 16 times in the last month for the apprehension of criminals ranging from a Wyoming arch-murderer and a band of North Dakota bank robbers to a wide variety of petty crooks.

FORD QUARTET PLAYS OLD-FASHIONED MUSIC

Old-Time Instruments Produce Tunes of Former Years

NEW YORK.—A quartet of instruments considered by the younger folks to be "old-timers," but familiar to those who dance the Virginia reel, the plain quadrille, two-step and other so-called old-fashioned steps, was heard during the program by Henry Ford's Old-Fashioned Dance orchestra playing on the main floor of the Ford exhibition at Broadway and 54th street, New York, and broadcasting through WEAF and thirteen other stations on Tuesday evening, January 12.

A cymbalum, dulcimer, sousaphone and violin comprise the instrumentation of the orchestra, these instruments being selected by Mr. Ford after lengthy experiments with various instruments for an ideal small dance orchestra.

While the violin and sousaphone are used in many modern dance orchestras, the cymbalum and dulcimer are considered quite antique. The former is a Hungarian stringed instrument, much like an open piano and is played with padded sticks. The dulcimer is much like the cymbalum, although much lighter in tonal quality and smaller in musical range.

Indians Like Band Music

GALLUP, N. M.—Navajo Indians are partial to band music, is the finding of Mike Kirk, a trader of the Manuelito trading post near the Navajo Indian reservation in the northwestern part of New Mexico.

"Navajo Indians have just been enjoying your 'midnight' program," Mr. Kirk has written to Station KDKA, Pittsburgh, "and especially did they like the Westinghouse band."

The Indians travel for many miles to hear Radio band concerts.

NINE STATIONS SEND FROM SCHENECTADY

GENERAL ELECTRIC CO. IS MAKING EXPERIMENTS

Corps of Workers Cover Country to Report Reception of Output of Transmitters

SCHENECTADY, N. Y.—Those who grope among the air channels at night have found an increasing number of Radio stations signing "General Electric company, Schenectady". There are now nine transmitters applying electrical impulses on nine different wave lengths from Schenectady, and during some periods seven transmitters may be on the air at the same time. Not all however broadcasting, some are transmitting code—but each is on its own wave length.

Eight Experimental Stations

Within three miles of Schenectady the General Electric company has constructed a gigantic transmitter developmental station. On the plot of many acres eight transmitters have been erected. Each transmitter has its independent antenna system and these systems, as well as the transmitters, are constantly undergoing changes as information on operation and reception is received.

The men at the transmitters are doing only part of the work, for development would be impossible without reports on reception of the output of these stations. The entire country, as a result, becomes a laboratory and the interested Radio experimenter is invited to become a volunteer co-worker. The General Electric company is greatly indebted to these listeners who have thus far reported on various tests, notably the 50-kilowatt broadcast tests and the programs broadcast alternately from vertical and horizontal antennas on super-power.

Experts Cover Country

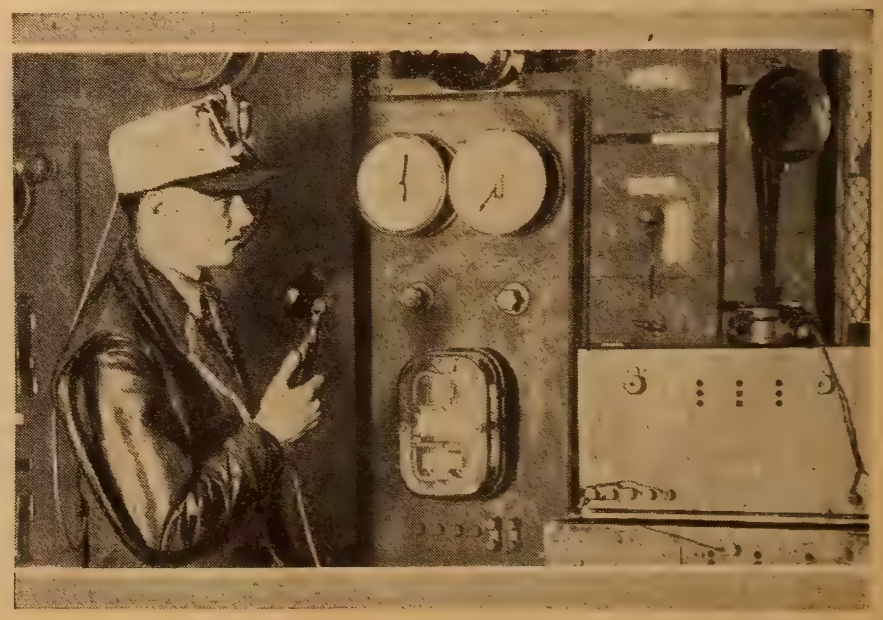
Reports from volunteer listeners are supplemented by observations made by a corps of field engineers who are detailed to various parts of the country. For example, engineers are traveling about with truck equipped with measuring instruments by means of which the characteristics of the radiated energy may be accurately set forth. Men are also detailed on ocean voyages for the express purpose of measuring the South Schenectady signals under varying conditions of weather and astmosphere.

Investigations at the South Schenectady station include the short and long wave lengths, code and broadcast signals with various degrees of power input and a wide variety of antenna structures. Engineers are painstakingly recording data on transmission during daylight and dark, in rain, snow or fog.

What Can Be Heard

At the present time the following stations may be heard on the air with broadcast programs from the studio of WGY: 2XAG, 379.5 meters; 2XK, 109 meters; 2XAF, 41.88 meters. Telegraph or continuous wave signals are put out from 2XAZ, 214 meters; 2XAC, 80 meters; 2XAD, 21 meters; 2XAW, 15 meters. 2XAH operating on 1560 meters is now undergoing changes in design, but has been on the air for weeks and will be heard again in a short time.

UNDERGROUND RADIO AIDS MINERS



THE apparatus shown is a special mine Radiophone sending and receiving set developed by the bureau of mines as an emergency means of communication with entombed miners. It is supplementary to the regulation mine telephone system and is designed to replace the latter when accidents put the wire telephone out of commission. It is of low power and cannot interfere with listeners in.

RADIO BILL HEARING SET FOR JANUARY 18

ALL INTERESTED WILL BE ABLE TO GIVE VIEWS

House Merchant Marine and Fisheries Committee to Hear Proposed Measure by Rep. W. H. White

WASHINGTON.—A tentative date of January 18 has been set by the house merchant marine and fisheries committee for hearings on the White Radio bill. Extensive hearings are planned and all those interested will be given an opportunity to express their views.

It has not yet been decided whether Secretary Herbert Hoover will appear before the committee to testify in regard to the Radio bill. The secretary has been asked by the committee for his views but it is not known whether he will appear personally or whether he will forward a written statement.

Howell Introduces Bill

Senator Howell, of Nebraska, has introduced a bill in the upper house "reaffirming the use of the ether for Radio communication, or, otherwise, to be the inalienable possession of the people of the United States and their government, and for other purposes." The bill has been referred to the senate committee on interstate commerce.

A similar bill was introduced at the last session of congress by Senator Howell. It was passed by the senate, but when the house took up the Radio bill, that section declaring ether free as contained in the senator's bill was incorporated, and the whole reported out by the house committee but no final action was ever taken on it.

FRENCH GOVERNMENT PLACES TAX ON SETS

Action Seems to Indicate State Monopoly of Radio

PARIS.—The question uppermost in the minds of 700,000 French listeners for the past three years—"Will there be a state monopoly of broadcasting?"—has been settled, the state virtually accepting the trust through its recent declaration of taxes on receiving sets.

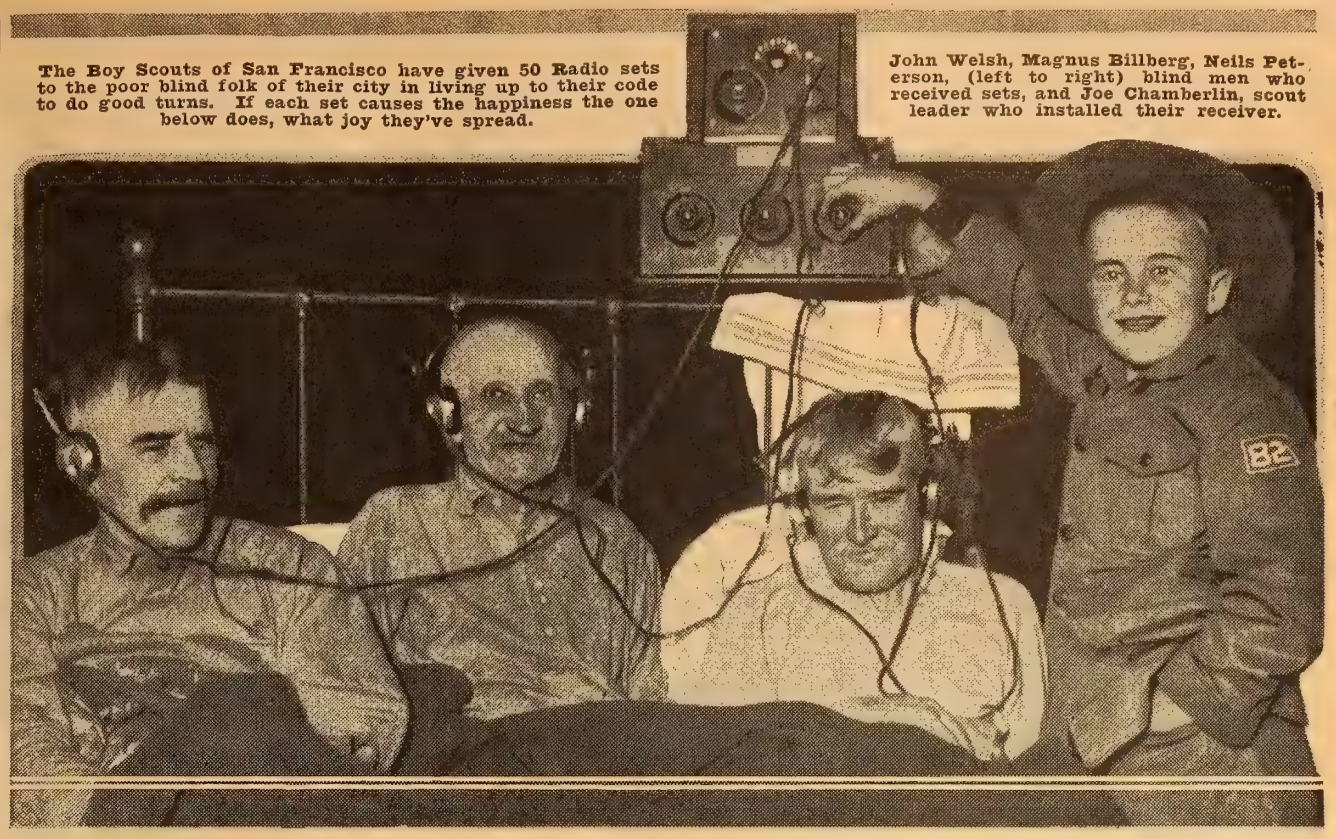
The new taxes on receivers are: 60 francs (about $2.50) for the first year, and 50 francs for the succeeding years on all tube sets; and 20 francs for the first year and 15 for the succeeding years on crystal sets.

There is a drastic provision that listeners must pay 10 times the amount due if they are found to be evaders.

"OVER THE WIADUCT DOWN BY THE WINIGAR WORKS"

The Boy Scouts of San Francisco have given 50 Radio sets to the poor blind folk of their city in living up to their code to do good turns. If each set causes the happiness the one below does, what joy they've spread.

John Welsh, Magnus Billberg, Neils Peterson, (left to right) blind men who received sets, and Joe Chamberlin, scout leader who installed their receiver.



OVER the wiaduct down by the winigar woiks in San Francisco, live three blind men in an abandoned horse car. By day they ply their various arts of intriguing stray coins from passing pedestrains. One sells lead pencils, another plays a wheezy organ and the third uses his voice to advertise a newsstand located some distance from the more prosperous marts of trade.

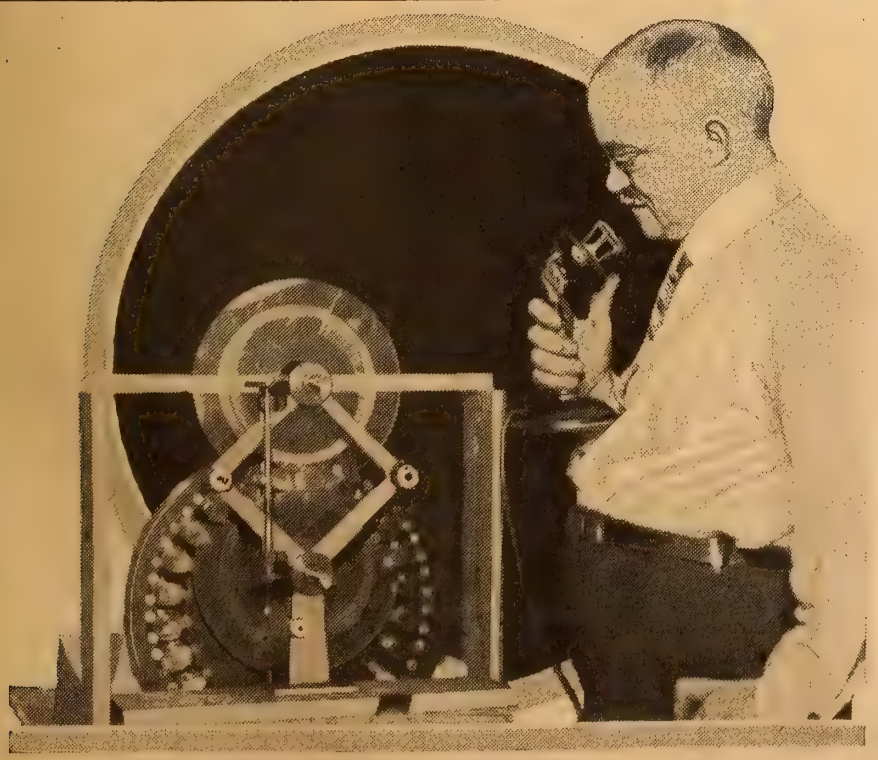
Some days are fair, others are not. But fair or foul, the three cronies find their way back to the abandoned horse car. A brigade of Boy Scouts set out a few weeks ago, to find wherewith and whereupon to bestow the daily kindly deed required by the Boy Scout code. The three blind men were discovered huddled together in the car by Scout Leader Joe Chamberlin.

They were found to be quite normal beneath their shirts and not at all like the original carborundum gent of the "winigar woiks" song. The boys brought in an old iron bed and a few kitchen utensils. By degrees they got the three old fellows organized on a housekeeping basis. Then as a final act of mercy and kindness, the scouts installed a Radio set at the head of the three-in-one bed. The horse car has become a palace car and one pal minds the dials, while the other two by turn are lulled to peaceful sleep. Many hours of the old men's lives are brightened.

WMBB Orchestra Solves Big Broadcasting Problem

CHICAGO.—According to the reports from observing listeners, WMBB is one Radio station which has solved the problem of broadcasting an orchestra properly. J. B. Lampe, the director, has placed the musicians of Dell Lampe's Trianon orchestra in such a position that each instrument not only maintains its proper balance in the orchestra on the air, but also produces its own share of the music for the dancing.

RADIO MOVIES IN TWELVE MONTHS



C. FRANCIS JENKINS, inventor of Radio vision and Radio movies, believes that experiments along the line of his invention during 1926, will progress to such an extent as to permit actual service before another twelve months have past.

"As to the outlook," says Mr. Jenkins, "I can only say that the groping progress which always attends revolutionary research has so far advanced as to lead us to expect that Radio vision will be put into useful service before another twelve months have passed."

In recent tests of Mr. Jenkins' invention, a moving picture and a verbal description of the picture were received at the same time. The pictures and words were transmitted on the same wave length and were separated on the receiving end, different electrical capacities being used in conducting the words to the loud speaker and the pictures to the picture cabinet. He is shown above with his invention.

CREATE OFFICE TO GIVE FARMERS AID

Department of Agriculture Will Keep Bureau to Send News to Rurals Through Ether

WASHINGTON.—With the appointment of Samuel Pickard, director of the Radio broadcasting station of the Kansas Agricultural college, to the newly-created position of "chief of the Radio service" of the United States department of agriculture, Radio now assumes a status along with newspapers and government bulletins as one of the major mediums for distributing agricultural information. Mr. Pickard will be under N. A. Crawford, director of information.

Farmers will be able, through the use of head phones, to receive instructions and helpful suggestions for successful farming fresh from the department of agriculture at Washington. Weather forecasts and market reports will be broadcast through a large chain of private stations and, in addition, the various bureaus of the department will prepare and broadcast popular talks relating to agricultural subjects.

Musical Background to Accompany 'Notices'

KFWB Adopts Screen Method for Poems of Publicity

HOLLYWOOD, Calif.—The latest thing—painless announcements! Most stations have a great many announcements of one kind or another to make, which have to be read yet tend to drive the station's audience away. Charlie Wellman, manager of KFWB, Hollywood, has borrowed a leaf from the pianologue and now renders his announcements about the firemen's ball and similar divertisements with a musical background furnished by Ray Bailey's trio.

Ray Bailey's trio is one of movieland's famous orchestras that furnishes emotional music for the taking of our best screen dramas. The difference between playing for the screen and for the microphone, according to Ray Bailey, is that on the sets the actors do the "emoting," while on the air the audience is supposed to do the job.

At any rate, instead of tiresome announcements from KFWB, we are now to get poems of publicity, Charlie Wellman and Ray Bailey collaborating.

Many letters have shown approval of the innovation.

MUSIC GIVEN MOST TIME ON WRC MIKE

CLASSICS HOLD LEAD OVER POPULAR PROGRAMS

Seventy-Two and One-Half Per Cent of Broadcasting Devoted to Playing of Music

WASHINGTON, D. C.—Music, with the classics holding a slight lead over jazz numbers, still constitutes the major portion of the broadcast entertainment from Station WRC, Washington, according to a check made on the station's broadcasting for one week.

Approximately 72½ per cent of the station's time during the week was devoted to broadcasting music, while the remainder was shared by talks, church services, travelogues and time signals.

290 Different Selections 301 Times

In all, 290 different musical selections were played 301 times from WRC in the 42¼ hours that the transmitter was in operation. Of the total number of selections, 172 were classical and 129 popular.

Despite the complaint that too many of the classical numbers are played and sung too much on the air, only one of the non-jazz compositions, "O Sole Mio" was heard more than once during the week. "My Heart at Thy Sweet Voice," "The Rosary" and Massenet's "Elegie," generally considered among the most overworked compositions, checked in only once each in the seven days.

How Time Was Used

Of the popular dance numbers several were played as many as three times, including "Want a Little Lovin'," "Cecelia," "Brown Eyes Why Are You Blue," "Remember," and "The Vagabond King."

Although WRC is silent on Monday, Wednesday and Friday evenings and all day Sunday, the weeks total of 42¼ hours is the average broadcasting time of the station. Of this total, music occupied 30 hours and 40 minutes; 29 talks were delivered, consuming seven hours and 35 minutes; Christmas services occupied three hours; a travelogue consumed 30 minutes and the remaining half-hour was devoted to broadcasting time signals.

South Dakota Club in Drive

MITCHELL, S. D.—The Sunshine State Radio club has been organized here and is engaged in an effort to enroll all broadcast listeners in South Dakota. F. J. Purdy of Mitchell, S. D., is president. Broadcasters are not eligible for membership.

'KILOCYCLES' ARE IT SAYS GOVERNMENT

'KILO' LIKED BETTER THAN METER WAVE LENGTH

Bureau of Standards Issues Table to Help in the Conversion of Radio Frequencies

WASHINGTON, D. C.—There is increasing tendency in Radio to express radio frequencies in kilocycles, rather than wave lengths in meters. "Kilo" means a thousand, and "cycle" means one complete alternation. The number of kilocycles indicates the number of thousands of times that the rapidly alternating current in the antenna, transmitting set, or receiving set repeats its flow in either direction in one second.

The bureau of standards has just issued a "Kilocycle Meter Conversion Table" in chart form. The table is printed on a single sheet of cardboard and can be posted in a convenient place for ready reference.

The table gives accurate values of kilocycles corresponding to any number of meters, and vice versa. The table gives values for every 10 kilocycles or meters, and is entirely reversible; that is, for example, 50 kilocycles is 5,996 meters and also 50 meters is 5,996 kilocycles. The range of the table is from 10 to 10,000 kc (10,000 to 10 m) and this can be extended in either direction by changing the decimal point.

Editor's Note.—Beginning next issue Radio Digest will give the kilocycles frequency of each station listed in the advance programs. This will be in addition to the wave length in meters listing. The meters listing will be followed by the kilocycles listing, thus:
"KDKA (309.1m-970kc) . . ."

WLS Now Broadcasts Symphony Orchestra

Engage Chicago Little Symphony to Give Nine Concerts

CHICAGO.—WLS, the Sears-Roebuck station, has engaged the Chicago Little Symphony orchestra for a series of concerts, in addition to those given from this station during the past several weeks.

The new contract of WLS with the Chicago Little Symphony orchestra, which is the original little symphony organization in this city, calls for nine performances from WLS between January 1 and March 19, 1926. The schedule calls for four concerts in January, three in February and two in March. More concerts may be added later.

Believing the Radio public would enjoy really good music by one of the best musical organizations in the United States, effort was put forth to secure the Little Symphony orchestra. With the cooperation of Director George Dasch and Business Manager Karl Schulte, the orchestra was induced to give Radio a tryout. This proved successful in the minds of the men who compose the musical organization.

500 FARMERS ENROLL IN BROADCAST SCHOOL

WCCO Short Course Attracts Northwest Farm Interest

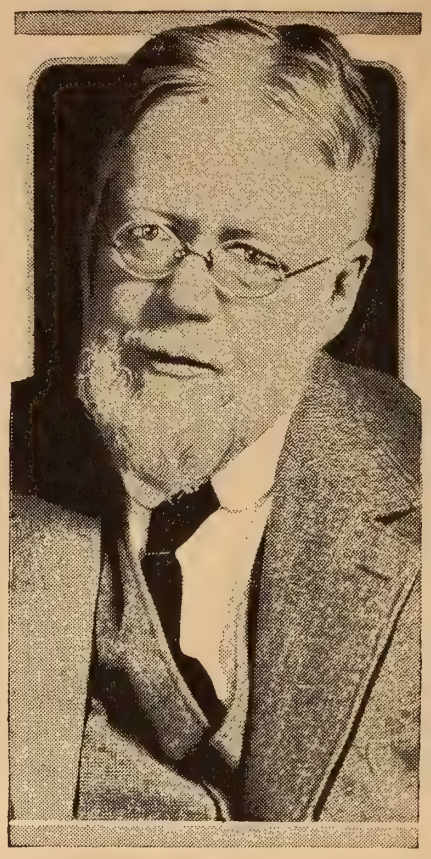
MINNEAPOLIS.—Approximately 500 farmers in Minnesota and other northwestern states have enrolled for membership in the agricultural short course which the Minnesota Farm school is broadcasting from the Gold Medal Station, WCCO, Minneapolis-St. Paul, at 7:45 p. m. central time, Monday and Friday evenings.

The first six weeks of the course, during October and November, were devoted to classes in poultry and dairying. The next six weeks were devoted to classes in swine-raising and bee-keeping. Lessons in gardening and flower growing are now being broadcast.

Hockey Contests Have Firm Hold Upon Radio Audiences

NEW YORK.—Hockey has taken a firm hold on the Radio audience. Station WJY, here, broadcast another game from the Madison Square Garden last Thursday evening, January 7. This time the contest was between the Boston Bruins and the New York team, the Americans. Major J. Andrew White, who was at the microphone, states that the play was the fastest he has ever seen and he feels that until airplane polo is established this game will hold the record for producing thrills.

SUES CORPORATIONS FOR SIXTY MILLIONS



PROFESSOR Reginald A. Fessenden, shown above, of Newton, Mass., nationally known as an inventor, recently filed a suit of $60,000,000 against eight prominent Radio corporations, charging that an unlawful combination on their part had been a restraint of trade and had lessened the value of his inventions. Professor Fessenden further alleged that they had combined to refrain from competition in purchasing patents, and applications for patents, inventions, devices, etc. He was formerly employed by Thomas Edison and is known chiefly as the inventor of the submarine signal.

Station Changes

"Experimental" licenses have been issued to the four following stations: KMMJ, Clay Center, Nebr., 229 meters, 500 watts; KFXR, Oklahoma City, Okla., 214 meters, 15 watts; WAGM, Royal Oak, Mich., 225 meters, 50 watts; WDAH, El Paso, Texas, 268 meters, 50 watts.

One Chicago station, WJJD, has increased antenna imput to 1,000 watts. It is rumored that WSBC, Chicago, will also go up to 1,000 watts. The University of Oklahoma broadcaster, WNAD, reopened last week with 500 watts power.

Canadian changes consist of one addition, a 10-watt station, CFDC, at Vancouver, B. C., and one delete, CHCM, at Calgary, Alta.

All Stations to Get Temporary Permits

Will Leave Way Clear to Act on Radio Bill

WASHINGTON, D. C.—As the broadcast stations licenses expire, the Radio section of the department of commerce is simply issuing temporary permits which have no definite time to run. This means, that within the course of three months, all of the broadcasting stations in the country will be working on temporary permits.

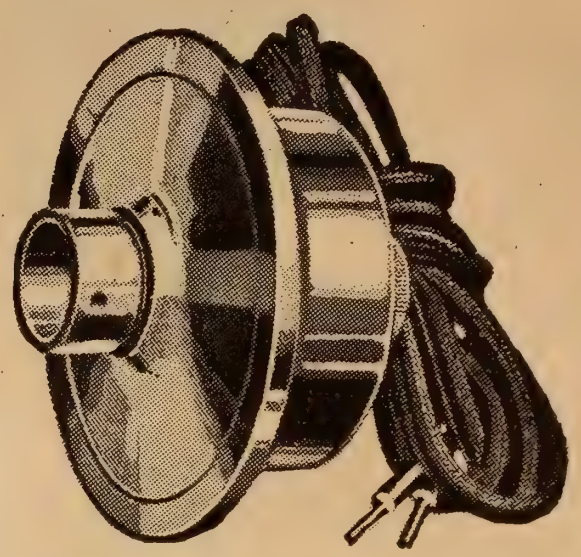
While officials of the department of commerce are not disposed to discuss this situation, it is believed that this is being done so that when a Radio bill is passed by congress, the department will be able to put it immediately into effect, if any changes are made as to permits in the new law.

The Northernmost Station Again

OTTAWA.—Canadians protest against the statement that Longyear-City on the island of Spitzbergen is the northernmost Radio telegraph station in the world, and claim that honor for a Canadian-owned station at Aklavik, which is only some 70 miles from the polar pack-ice ring. This station, it is stated, has been repeatedly heard with great distinctness as much as 2,000 miles away.

Big Price Reduction

FULTONE LOUD SPEAKER FOR YOUR PHONOGRAPH



Fits Any Make Now Only $3.00

Fultone

QUICK NUT LOAF AID TO BUSY HOUSEWIFE

HOLDS BOTH CONVENIENCE AND BREAD VARIETY

Betty Crocker Gives Recipe for Making Delicious Loaf for Baking Powder Bread

By Betty Crocker

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WHT, WFI, KSD, KFI and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon investigations and work of herself and her assistants in model kitchens. —Editor's Note.

OUR daily bread continues to be one of the important functions of the household, even though the baking of much of that bread has been taken out of the home. In the history of the world, bread has always been the important factor, and in the centuries that have passed, the lady was the loaf giver.

The great lady of yesterday was a busy person. She literally distributed the bread to the family, including the servants and retainers. Bread was not available in those days as it is now. Few homes possessed ovens 200 years ago, and so the castle or the master's house operated the bakery. The lady of today is still the loaf giver, but the conditions under which the loaf is prepared are vastly different.

Quick Breads American Idea

In foreign lands practically all of the bread is made of yeast, with different kinds of flour and meals, according to the products grown in each particular locality. Baking powder and quick breads are quite typical of America, but are scarcely ever found in other countries.

A baking powder bread such as nut bread is much more quickly made than yeast bread. Although it does not take the place of yeast bread in our three meals a day, it is a great convenience and helps to secure variety.

Nut Bread Recipe

Here is the recipe for nut bread:

Two cups Gold Medal flour, two cups Graham or Whole Wheat flour, four teaspoonsful baking powder, one teaspoonful salt, one cup sugar, one egg, two cups milk, and one cup nuts.

Method: Sift the flour once before measuring. Mix and sift dry ingredients. The bran which sifts out of the graham flour should be put back into the mixture. Add the milk gradually. Add the well beaten egg and mix thoroughly. Add the chopped nuts which have been dredged with part of the flour. Pour into well-greased loaf pan. Let stand 20 minutes. Bake one hour in a moderate oven, 350° Fahrenheit.

You will notice that the bran from the mixture is put back into the mixture. Some cooks make the mistake of sifting the graham flour and then throwing away the bran that is left in the sifter. The bran is the part of the graham flour that you particularly want.

The flour should be sifted always, but not with the idea of removing the bran. There are several reasons why we sift flour. First of all, to lighten up the mixture, as flour always packs down in the bin. If the flour is not sifted before measuring, it will be impossible to secure an accurate measurement. Other reasons for the sifting process are to incorporate more air into the flour and to raise the temperature of the flour to that of the room.

Why Let Bread Stand 20 Minutes?

Perhaps you wonder why nut bread must stand 20 minutes before baking. That is because the dough is rather stiff, heavy and in a thick loaf. We should have a good formation of gas from the baking powder before the mixture is put into the oven to bake, in order to have a light loaf.

You cannot expect to get good results if you do not measure accurately. Use the standard half pint measuring cup and standard measuring spoons. The flour should be sifted once before measuring and all measurements should be **level.**

Stale nut bread is delicious when toasted for afternoon tea as it is delicate and crisp. When served with marmalade or jam, it is quite a treat. Any kind of nuts may be used, except that black walnuts are rather strong for nut bread. English walnuts or hickory nuts are probably best. If you wish, you may use raisins in place of the nuts, or perhaps a mixture of half raisins and half nuts.

HELPS WOMEN FROM STATION WGY

Miss Jessie Lane, shown above before the desk microphone of Station WGY, has won a host of followers among the housewives of the country through her interesting and instructive talks, including recipes, which she gives every Monday afternoon over the General Electric transmitter at Schenectady, N. Y.

SHORT WAVES

By Marcella

Nate Caldwell, alias the "Joy Digger," ex-WBBM (Chicago) and now at the new KMOX (St. Louis), is a personal friend of Marcella's, although I hasten to add that our friendship is purely platonic. He's blonde, good looking and single. Went to Dartmouth college, and learned how to sing and entertain with a ukulele. His parental home is Chicago, where his father is a doctor. A year or so ago his favorite pastime was "skip-hiking," burdened only with toothbrush and safety razor. By the latter means he covered much ground and appeared at many stations. But still he's single, and only 24 years old.

* *

Correll and Gosden come in for next number of letters of inquiry this week, Here are the important facts. WGN uses them a lot nowadays, although they have made their usual hit from many other microphones. Both are single. Correll is about six inches shorter than Gosden, who also has an edge in having curly hair. But then Correll can play the violin, so that should make up for that. He started broadcasting at the age of five minutes, about, one day at Peoria, Ill., while Gosden started the same way at Hatteras, N. C., population—599 after he left. And sh-h-h girls, BOTH are extremely sentimental! So much for Gladyce.

* *

Paging Malie and Stept? does ANYONE know where they are and all about them? Write me, please!

* *

Beg your pardon. I flattered Jack Little. "Little" Jack Little is really little, and 25 years old exactly. If every broadcasting artist were as popular as Jack, I'd sure have to increase the size of my weekly contribution. Of course, he's most popular with Mrs.. Jack Little, and we don't think there's a chance for the rest of us. He was married, Elizabeth Ann, just last summer, or was it spring?

* *

Adams Colhoun, the likeable announcer for WFAA, Dallas, is probably married, but I'm not sure. He's one of the few I haven't been able to meet yet, but sometime I'm going to take a train right down and shake his hand. Like him, don't you? My reason for thinking he's married is that he sounds so mellow, wise and thoughtful. Bachelors are seldom that!

* *

"Bob" Emery was married this last summer. His wife has seen his star rise and is still watching its ascension, for she was secretary to him at old WGI, Melford Hillside, Mass., and later at WEEI, Boston, when Bob went there. These ukulele ditty songsters certainly flutter the hearts of the likes of us.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls, and I'll do my best to answer it here. MARCELLA.

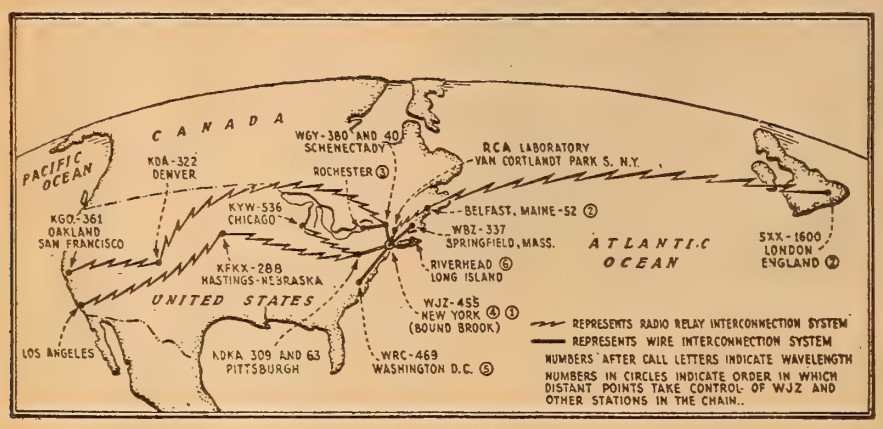
CHIMES OF LONDON RING OVER AMERICA

NEW WORLD AND EUROPE EXCHANGE PROGRAMS

R. C. A. Stations Link United States for International Broadcasts to Celebrate New Year

NEW YORK.—The chimes of London, tolled by unseen hands thousands of miles away, resounded in millions of homes in the United States on New Year's Day. In return, a large part of the civilized world was thrilled by a special New Year's Day gala program rendered by great operatic stars and broadcast by high power from the experimental station of the Radio Corporation of America at Bound Brook, N. J., in cooperation with the group of coast-to-coast broadcasting stations maintained by the General Electric company and the Westinghouse Electric & Manufacturing company.



The British Broadcasting company cooperated with the American stations in the most elaborate demonstration of world-wide broadcasting ever before attempted. The Old World inaugurated the New Year's Day celebration by Radio by pealing forth a greeting to the United States from the chimes in the tower of the Parliament building in London. The New World then broadcast a program, transmitted with sufficient power to be heard clear across the seas. The British Broadcasting company intercepted the American program and rebroadcast it over the chain of stations in England. In like manner, the program was rebroadcast in Germany.

Immediately preceding the special musical program broadcast from the United States, an official spokesman from America greeted the leading countries of the world by Radio. To overcome the barriers of language, a linguist repeated the greetings in French, German, Italian, Spanish, Polish, Swedish, Japanese, etc.

To demonstrate the extent to which Radio has become the art of instantaneous communication, Mr. Kent Cooper, general manager of the Associated Press, broadcast some brief news dispatches from the leading capitals of Europe. These press dispatches were transmitted to the New York office of the Associated Press by the world-wide wireless system of the Radio Corporation of America.

Because of the importance of the event, which represents one of a series of high-power broadcasting experiments now being conducted by the Radio Corporation of America, through the experimental Bound Brook station, 2XAR, and the remarkable program which was assembled for the occasion, the group of broadcasting stations maintained by the R.C.A. and its associated companies were interconnected from coast to coast, either by wire or by Radio.

Listening Posts Collect Data

Official "listening posts" on land and sea were established to gather exact engineering data on reception conditions throughout the world. The information thus collected in London, Paris, Berlin, Rome, Warsaw, Stavanger, Honolulu, Tokyo and other points is expected to be of the greatest importance in determining some of the problems of Radio transmission. In the United States, data was gathered by over 10,000 designated listeners in practically every city and town in the country.

HOT AIR PIPES TAKE AIR MUSIC ALL OVER

CINCINNATI.—A house full of music with the furnace and heat pipes directing the sound waves through the registers of every room has been brought about by Joe Best, an employe of the Crosley Radio corporation here. Taking his set down to the cellar, he placed the loud speaker in the cold air vent and then tuned in. Shortly every room was filled with music and, according to Mr. Best, there was absolutely no directional effect noticeable.

NO. 24 WIRE AND COLLODION OKEH

Bureau of Standards Soon to Issue New Paper on "Low Loss" Coils

WASHINGTON.—The bureau of standards has just completed an investigation on radio frequency resistance and inductance of certain "low loss" coils within the range of broadcast frequencies. A published paper containing the data will soon be available at the government printing office, Washington, D. C.

"The coils were of different shapes and wound with different kinds of wire," the paper will state. "Of the coils measured, the loose basket weave coil and the single-layer coil have the lowest radio frequency resistance. Number 24 double cotton covered wire is a suitable size of conductor, though numbers 32-38 Litz have somewhat less resistance. This holds for the entire broadcast range of frequencies and for all the shapes of coils measured.

"Collodion was found to be a suitable binder for holding the turns of certain shapes of coils together. There was noticeable reduction of resistance by spacing the turns of an ordinary single-layer coil."

If You Tune in Radio-Milan Let Them Know by Letter

ROME.—Radio-Milan station is making daily tests from 9:30 p. m. to midnight (3:41 to 6:11 p. m., eastern time) on a 337-meter wave length, using 1,200 watts. The request is made that listeners in picking these messages up communicate the fact, with observations on clearness, etc., by post card addressed to Radio-Milan, 23 Corso Italia, Milan, Italy.

Many Thousand Fans Visit Studios of KTHS

All the World Comes to See National Park Studio

HOT SPRINGS NATIONAL PARK, Ark.—That all the world comes to Hot Springs is strikingly illustrated from the guest register book kept in the studio of Station KTHS, New Arlington hotel, here, according to an analysis made by G. C. Arnoux, director, which shows that in the last 90 days more than 2,000 guests visited the Radio room on the twelfth floor of the hotel, coming from 37 states and eight foreign countries.

Visitors were registered from far away South Africa, France, Spain, Italy, England, Ecuador, New Brunswick and Winnipeg, Canada and Honduras.

The actual total of tourists visiting the Radio department, however, in the 90-day period is considerably more than the 2,000 names on the register, as it is estimated less than half the visitors take time to sign the book. Every variety of occupation from farmer to major general of the army and rear admiral of the navy is shown on the register.

Visitors May Watch Stars Before KMOX Microphone

ST. LOUIS.—"The Rendezvous" is a feature of the Station KMOX studios in the Mayfair hotel, St. Louis, which has met with instant favor. Every day during program hours visitors drop in for the features they prefer. The rendezvous is a large reception room looking into the studios through plate glass giving a view of the artists before the microphone. The daily organ recital from 12 to 1 p. m. central time is in great favor. This is by Arthur L. Utt, studio organist using the Kilgen organ, who gives a second program each evening from 6 to 7 p. m.

Tower

REG. U.S. PAT. OFF.

Develops New Diaphragm-

TOWER Speakers, now better than ever, are exclusively equipped with the wonderful new double Diaphragm.

Over fifty years ago Alexander Graham Bell invented the telephone receiver with its all-metal Diaphragm. This Diaphragm was for *telephone* reproduction. Since the inception of Broadcasting, this same general type has also been utilized —perforce—for *radio* reproduction.

But now, thanks to Dr. Herman Fisher, the eminent Russian Scientist and acoustical expert of the Tower Co., a distinctly new type of Diaphragm —revolutionary in principle and unparalleled in performance—has been developed.

This new Diaphragm is virtually a composite of two different materials of varying thicknesses. One portion is metal—to bring out high notes; the other portion is a special impregnated parchment for low notes. The metal, being harder, is better able to reproduce the thin, rapid vibrations while the parchment re-acts to the slower vibrations which produce the deep bass notes.

Thus, in Tower Speakers, *perfect* tone quality is obtained over the *entire* musical register—in accordance with the basic laws of sound reproduction.

Tower Speakers on Sale from Coast to Coast

TOWER MFG. CORPORATION
Boston, Mass.

We will pay $500 cash and make 1000 additional awards for a name best describing the wonderful new Diaphragm used exclusively in Tower Speakers. Send in your suggestions—on U. S. Post Cards—before February 15th.

Only Tower Speakers equipped with this New Diaphragm

WTAM, Cleveland, Ohio (389.4), 12:15-1:15 p. m., Austin Wylie's Golden Pheasant orchestra; 6-7, Carl Rupp and his Hotel Hollenden orchestra; 8-8:45, Guy Lombardo and his Royal Canadians; 8:45-9, popular music; 9-12, Coo Coo club.

WWJ, Detroit, Mich. (352.7), 9:30 a. m., tonight's dinner; special talk by the woman's editor; 12:05 p. m., Jules Klein's Hotel Statler orchestra; 3, Detroit News orchestra.

Central Time Stations

CKY, Winnipeg, Can. (384.4), 8 p. m., "Contemporary Book Reviews," University lecture, Prof. W. T. Allison; 9, concert, J. A. Banfield company.

KFAB, Lincoln, Nebr. (340.7), 8:30-10:30 p. m., Schmoller & Mueller musicale.

KFMQ, Fayetteville, Ark. (299.8), 7:30 p. m., basketball game, U. of Arkansas vs. Southern Methodist university.

Although Myra Lee has left the legitimate stage for the silent drama, she has found a way to bring her sweet soprano voice into the homes of her public. She broadcasts regularly from KNX, Hollywood. Many fans will remember her last season as the leading lady with Guy Bates Post.

High Lights of the Week

SATURDAY at midnight, the Alabama minstrels, said to be the greatest aggregation of entertainers ever roped, thrown and tied in a single round-up will face the microphone at WAHG for two hours of fun. In the olio will be found the Cotton Pickers quartet, Alabama Pete, the only dancer in the world who executes a triple buck, and others. This show carries the endorsement of pulpit, press and public. One night only. The frolic at KPO this same evening celebrates this station's third birthday.

Florence Austral, soprano, and Cecilia Hansen, violinist, are the Atwater Kent stars, scheduled for this Sunday over the WEAF chain. Mozart's opera "The Magic Flute," will be the feature Sunday at KGO, Oakland. Arthur S. Garbett will talk about this great musician and the KGO Little Symphony orchestra will play the opera.

Ice skating by Radio is the latest sport event of the winter season. The Metropolitan indoor ice skating championship races will be broadcast Monday by WNYC, from Madison Square Garden. WSM, Nashville, will give a special Robert E. Lee program, commemorating this great general of the South.

The Massachusetts Institute of Technology associated clubs are giving a special Radio dinner Tuesday. This meeting will be broadcast by WJZ, WRC, WGY, KDKA, KYW, and KFKX, besides the home station, WBZ. KOA will also attempt to rebroadcast the meeting. Oklahoma cowboys will invade WHB, Kansas City, with a peppy band which will keep fans from thinking any serious thoughts for an hour or two.

Laura C. Gaudet, the little French-Canadian pianist, who won great favor last spring with her series of recitals, will begin her second series of programs Wednesday evening. Miss Gaudet was crowned laureat of the Quebec City Academy of Music in 1922. She also studied two years in Paris and Rome.

The Swiss Singing society, a renowned musical organization of the Pacific coast will be heard from KPO, San Francisco, Thursday night. Sixty voices will take to the ether from this station.

"To Be or Not To Be?" these immortal words will find their way into the ether Friday night, when the famous WGY players put on "Hamlet." At KGO, the Oakland station of the General Electric company, a Scotch program of the prohibition kind will consist of songs and poems of Scotland. Even the old-time bagpiper will play.

KFNF, Shenandoah, Iowa (266), 7 p. m., Scotch trio; 11, old time fiddling.

KFVE, University City, Mo. (240), 9:15 p. m., amusement review, Romaine Fielding; Gene Witacker's orchestra.

KLDS, Independence, Mo. (441), 8 p. m., Ararat temple chanters.

KMA, Shenandoah, Iowa (252), 11:30-12:30 p. m., noonday rural program; domestic science talk, June B. Case; music; news; talk, Earl E. May; 6-7, Pollyanna stories, Mrs. Nickols; music; news; popular program; 9-11, pipe organ recital, William Howie; talk, Mrs. Ida B. Wise.

KMMJ, Clay Center, Nebr. (228.9), 1 p. m., Snoddy's orchestra and local talent; 1:30, factory and office program.

KPRC, Houston, Tex. (296.9), 12 n., Jack Willrich's orchestra; Virginia Willrich, piano accordionist; 7:30 p. m., Bible class, Rev. Claude L. Jonas; 8, Frank Tilton, blind wonder boy pianist; 8, Mrs. E. P. McClanahan; 8:30, Frank Tilton; 11, midnight concert.

KSD, St. Louis, Mo. (545.1), 7 p. m., Grand Central theater; 8:30, St. Louis Symphony orchestra.

KTHS, Hot Springs National Park, Ark. (374.8), 9-9:25 p. m., baritone solos, Louis Davis, Princess King, accompanist; 9:25-9:30, bedside story, Phanton Voice, Medical Intelligence bureau; 9:30-10:15, New Arlington hotel dance frolic; 10:15-10:45, Ruth Nininger, violinist; 10:45-11, dance tunes.

KYW, Chicago, Ill. (535.4), 11:35 a. m., table talk, Mrs. Anna J. Peterson; 12:05-1 p. m., noonday concert, Commonwealth Edison company; 1-2, Congress hotel, Coon-Sanders Original Nighthawks; 4, frolic; 7:05, children's bedtime story, Uncle Bob; 6, dinner music, KDKA; 7:30-8:30, home-lovers' hour; 8:30-11, Congress classic; 11:30-1 a. m., Congress carnival; 1-2, Insomnia club, Coon-Sanders Original Nighthawks.

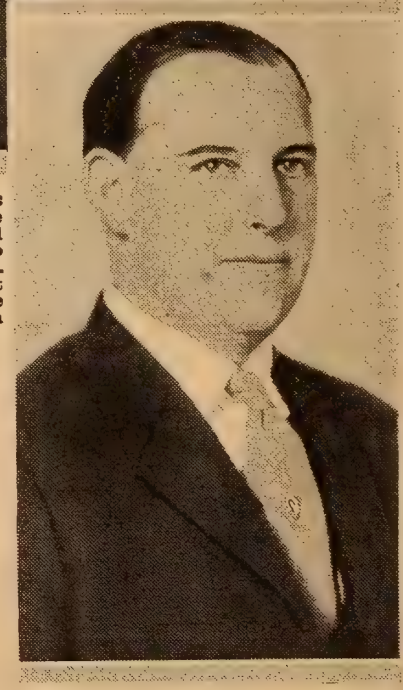
WAMD, Minneapolis, Minn. A dainty little lady is Petrinella Trimbur (left) but she can play the organ so well that she has given the noonday concerts on Tuesdays at WLW, Cincinnati, for over a year.

There is real harmony at WBBM Thursdays from 8 to 10 p. m. central time when these two girls above, Marion Hadley, violinist, and her sister, Edna, pianist, get together to broadcast from the Stewart-Warner studio. If you are getting thin or putting on weight by tuning in for KGO, Oakland, you are listening to the instructions given by Hugh Barrett Dobbs, right.



Sunday, January 17

11 10 9 8
WLW (422.3) Popular program.

The sheik of the ukulele is the title given LeRoy Kullberg at KFWB, Hollywood. He is popular with the ladies whether he is seen or unseen.

The Williamson Brothers, Harold and Leo, above, have grown up with Radio. Look at the handsome young men they have become. These wandering minstrels of the air can never be found at the same station very long. The last station they visited was WOAW. No wonder Roxy's gang is popular. Here is Beatrice Belkin, left, whose colorature soprano voice is a regular feature of the group when broadcasting over the WEAF chain.

Monday, silent night for: CHIC, CNRA, CNRC, CNRE, CNRM, CNRO, CNRR, CNRT, CNRV, CNRW, KFDM, KFEQ, KFMQ, KFMX, KFWA, KHJ, KLDS, KYW, PWX, WBBM, WBCN, WCAD, WCBD, WEAO, WEBH, WEBJ, WEBW, WENR, WGBS, WGES, WGN, WHAS, WHT, WIBO, WIP, WJAZ, WJJD, WKAQ, WLIB, WLS, WMAQ, WMBB, WOAI, WOC, WOK, WORD, WQJ, WRC, WREO.

The Atwater Kent artists to broadcast this Sunday are Cecilia Hansen, violinist, left, and Florence Austral, soprano, right. These two musicians are well known both in New York and other large American cities. "Turkey in the Straw" has lately been revived by radio and holds as high a place on the air as "Sweet Georgia Brown." Humphrey Bate and his barn dance orchestra, below, have become popular at WSM, Nashville. Tennessee fans practice the barn dance instead of the Charleston.

Monday, January 18

Gas company; 12:05 p. m., concert; 1, luncheon concert, Congress hotel; 6, dinner musical, KDKA, 7:05, bedtime story, Walter Wilson.

KFVE, University City, Mo. (240), 9:15 p. m., amusement review, Romaine Fielding; Mae Miller, soprano; Mrs. Gertrude Watson, accompanist.

KLDS, Independence, Mo. (441), 6:30 a. m., morning devotional service.

KMA, Shenandoah, Iowa (252), 11:30-12:30 p. m., noonday rural program; seed talk, Earl E. May; music; talk, G. H. Van Houten; 6-7, How do you do Boys; Grady and Doc., Auntie Blossom and the Slumber boat; 9-11, Council Bluffs entertainers.

KMMJ, Clay Center, Nebr. (228.9), p. m., local home talent; 1:30, factory and office program.

KPRC, Houston, Tex. (296.8), 12 m., Frank Tilton, pianist.

KSAC, Manhattan, Kan. (340.7), 9-9:25 a. m., music; inspirational talks, agricultural primer, calisthenics; 9:55-10:25, readings, question box, planning today's meals; 12:35-1:05 p. m., readings, question box; "Furnace Heating," Walter G. Ward; "Long vs Short Cane Systems of Grape Pruning," W. R. Martin; 4:30-5, lessons in color design; 6:30-7:30, travelog; vocational education, Extension credit course; "Next Steps in Rural Community Development," Walter H. Burr; "Great Physicists' Contribution to Modern Life," E. K. Chapin.

KSD, St. Louis, Mo. (545.1), 7 p. m., "Fur Hour," Elmer Lutz, tenor; 7:30, Ladies' quartet; 8:30, commerce hour; John Halk, violinist.

KSO, Clarinda, Iowa (241.8), 7-7:30 p. m., farm talks; 7:30-9, orchestra, Ralph Yehle, director.

KTHS, Hot Springs National Park, Ark. (374.8), 12:30-1:30 p. m., Farmers Radio chautauqua; 9-9:30, New Arlington hotel grand ensemble; 9:30-10:30, Eastman hotel orchestra; 10:30-11, Lon Chassy, violinist.

KYW, Chicago, Ill. (536), 6:30-7 a. m., morning exercises, Paul A. Leonhard; 7:30, morning family worship, Y. M. C. A; 11:15, talk, John C. Cutting; 11:35, table talk, Mrs. Anna J. Peterson, Peoples Gas company; 1, nooday concert, luncheon concert, Congress hotel; 6, dinner music, KDKA; 7:05, bedtime story, Walter Wilson; 9, music hour; 10-12:30, midnight revue, Hearst square; 10, Paul Ash McVickers theater; 10:40-11:10, Coon-Sanders original Nighthawks; 12, Henri A. Keates, organlogue; 1 a. m., Insomnia club, Coon-Sanders Original Nighthawks.

WAMD, Minneapolis, Minn. (243.8), 12 n., musical program: Ella Sundstrom Pendleton, soprano, L. V. Koos, accompanist; Ted Johnson, violinist, Oscar Westlund, accompanist; Charles Sandberg, baritone; 7:05 p. m., talk; 7:10, Minneapolis public school hour, T. P. Giddings, director; Jefferson junior high school orchestra, operetta, Nell Wesely, director; 11, Skyrocket frolic, George Osborn's Hotel Radisson Skyrockets.

WBBM, Chicago, Ill. (226), 4-6 p. m., Valentino inn orchestra; artists; 8-10, Tip trio; Moulin Rouge orchestra; artists.

WBCN, Chicago, Ill. (266), 10-10:30 a. m., Penny Wise, "The Shopper's Ready Helper," shopping talk; 5-5:15 p. m., police bulletins; 7-8, Fireside hour, WBCN hobby club; George R. Cleveland, "Big Boy" Yagle, pianist; Will Rossiter, "The Daddy of the Song Publishers," tenor and songwriter; Harold Johnson, boy xylophonist; 10-12 m., request program; Midway dancing gardens orchestra; Eddie Matts and Billy Donovan, tenor and pianist; West End Harmony boys, instrumental duo; Ed. Dempsey, "The Silken-Voiced Tenor," Alice McMahon, contralto; "The Boy" Yagle, pianologist.

WCCO, Minneapolis-St. Paul, Minn. (416.4), 10:45 a. m., "Pour into the Crust and Bake," Betty Crocker; 12 m., Dick Long's Dayton trio; 2 p. m., women's hour; 2:30, Dick Long's Nankin cafe orchestra; 4, readers' club, Mrs. Walter Stevens; 5:30, Court of Gold Medal; 6:15, Biley's St. Paul hotel concert orchestra; 8, health talk, Minnesota State Medical association, Olmstead County Medical society; 8:15, Minnesota Post, American legion; 11, Arnold Frank's St. Paul hotel orchestra.

WDAF, Kansas City, Mo. (365.6), 10:45-11 a. m., Betty Crocker in home service talk; 6-7, The Tell-Me-a-Story lady; address; The Trianon ensemble; 8-9:30, around the town with WDAF; 11:45-1, The Plantation players; Eddie Kuhn's orchestra.

WDOD, Chattanooga, Tenn. (256), 6:30-7 p. m., organ music, Tivoli theater; 7-8, Hotel Patten orchestra; 8:15, special features and program; 11, popular requests.

WEBH, Chicago, Ill. (370.2), 11:30-12 m., woman's half hour; 3-4 p. m., features; 7-8, Oriole orchestra; Pauline Sachs, soprano; Eleanor Kaplan, violinist; 9-10, Oriole orchestra; WEBH Light Opera company; 11-11:15, Oriole orchestra; 11:15-12:30, Irene Beasley, Jack Penewell, Fred Paimiter.

WENR, Chicago, Ill. (266), 6-7 p. m., dinner concert; Rauland-Lyric trio; Eric Sagerquist; violinist, soprano solos; 8-10, popular program; All-American Pioneers; Harmony four; George Moran and Bill Alt, Hawaiian guitar selections; Jack Todd, baritone; 12-2 a. m., Frank Westphal and his All-American Pioneers; Rita McFawn and Mary Bleber; violin solos; Jim Beaumont, banjoist; Art Bilquist, popular songs.

WFAA, Dallas, Texas (475.9), 12:30-1 p. m., Dr. Horace M. Whaling, Sunday school lesson; music; 3:30-4, Sears-Roebuck agricultural foundation homemakers' program; 4:30-5, woman's hour, literary review; 6:30-7:30, Alfonso Trent's orchestra; 7-10, varied program.

WGES, Oak Park, Ill. (250), 5-7 p. m., Lydia Werner, soprano; John Brown, pianist; Katherine Gray, contralto; Edwin Kemp, tenor; Tiffin theater organ and orchestra; 8-9, Thomas Pappas, accordion; Tiffin theater organ and orchestra; John Stamford, tenor; McDevitt sisters, vocal duo; 11-1 a. m., Remington Welch, organist; Parish and Ward; Sandy McTavish, Scotch comedian; Bebb and Cameron, duettists; Thomas Pappas, accordionist.

WGN, Chicago, Ill. (302.8), 11-11:30 a. m., household hints; 11:30-12, fashion discussion; 12-12:40, public service period; 12:40-2:30, luncheon concert, Drake concert ensemble and Blackstone string quintet; 2:30-3, Lyon and Healy artist series; 3-3:25, public service period; 3:25-3:30, Port O'Missing men; 3:30-4:15, tea time music, Marshall Field's tea room orchestra; 4:30-5, organ recital, Edward Benedict; 5:30-5:57, Skeezix time; 6:30-7, dinner concert, Drake concert ensemble and Blackstone string quintet; 8-9, music hour, Drake concert ensemble and vocal artists; 9-10, Ford program, WEAF; 10-11, dance program.

WHAD, Milwaukee, Wis. (275), 11 a. m., pianolog, Andy Hertel; 4 p. m., Ira Schnell, baritone; 6-7, Arthur Richter, organist; 7, Bill Jubie's Radio Cartoon game; 8:30-10, Wisconsin theater revue; 35-piece Wisconsin theater concert orchestra; Dexter's Wisconsin roof orchestra.

WHAS, Louisville, Ky. (399.8), 1-2 p. m., Royal Peacock orchestra; 3-3:30, Mrs. Myrtle Fulks Zahn, Jr., organist; 4-5, musical selections, Harry S. Currie, director; editorials; 7:30-9, glee club, Ashbury college civil service talk, O. A. Beckman.

WHB, Kansas City, Mo. (365.6), 2-3 p. m., Sweeney Radio trio; 7-8, Sweeney Radio orchestra.

WHO, Des Moines, Iowa (526), 7:30-9 p. m., Helen Smith, whistler; Alex Lindbloom, violinist; Stewart Watson, baritone; Vernon Sheffield, pianist; Myrtle Williams, soprano; 11-12, Bankers Life Corn Sugar orchestra.

WHT, Chicago, Ill. (399.8), 10 a. m., Jean Sargent's program, woman's club, Jelke Good Luck girl, studio features; 10:45, Betty Crocker home service; 11, special studio features; 12 n., Al Carney's complimentary organ hour; 1-2 p. m., special studio program, Gray-

Peace and Universal Language

THE great moment is soon to be! Our friends in Europe beginning Sunday, January 24, will attempt to make themselves heard on this continent by means of Radio broadcasting. It has been done before, true, but this year the project will be eminently more successful.

Conditions are better. Stations in the United States, Canada and Mexico are almost universally agreeing to keep silent as asked by the International Radio Week committee. Even the Pacific coast broadcasters have, according to last reports, finally agreed not to ruin selfishly the sport of many nations. Greater power will be used by the many more European stations than participated last year. Several score of English, French, German, Spanish and Italian broadcasters are now capable of being heard in America when American stations using the same wave lengths remain silent. A year ago, the number of European stations able to cross the ocean satisfactorily was limited to less than half a score.

What will international broadcasting, when realized as an everyday occurrence, mean to the world? To answer this effectively and have the prediction carry truth and weight, takes considerable thought.

One idea we have is that the exchange of programs and thoughts across the international boundry lines some time in the future is going to be the strongest force for world peace we have ever known. Most wars are caused by misunderstandings. Often these are so slight as to be classed ridiculous. If we, therefore, understand our cousins and friends of other countries—know his problems and his mode of living—we are going to be less inclined to start killing and maiming him and his brother citizens.

What we do not understand, we fear.

The child fears the dark because it cannot comprehend its meaning. Savage tribes are frightened to hysterics by an eclipse of the sun.

When we understand, we do not fear, be the object darkness, eclipses or other nations.

Another thought is that of a universal language. What will it be? Can French fill the requirements? It is the language of diplomats of all civilized countries. Will the public learn to use the language of France?

No, we believe that French can never become the tongue of the world. More than likely it will be English, for the United States, England and Canada are broadcasting nightly to the world. They are broadcasting with so many more powerful stations than the rest of the world put together. Six to seven hundred broadcasters are operated by English speaking nations. Not over one hundred broadcasting stations are operated by all the other nations of the world.

English is destined, as long as this superior leadership continues, to become the broadcast tongue of the world. It will be through the medium of English that mutual understandings of peoples of other lands will be created. English may change slightly in the transfusion, but not much. English is already a melting pot language.

We are cognizant that while English is spoken daily by 160 millions of people, Chinese is the only language of over 400 millions, but we are hopeful. If it is possible, by international Radio broadcasting, to permeate English through the ears of Germany, Russia, France, Spain, Italy, Portugal, Sweden, Norway, Croatia, Bohemia, Czecho-Slovakia, Bulgaria, Holland, Poland and Greece—seventeen nations—then 470 millions of people would comprehend our language.

If China, India and Japan knew our tongue, 550 million could be added to the total. The immense total population of these three Asiatic countries gives birth to the idea that perhaps it wouldn't be a bad scheme for the English nations to erect relay or originating broadcasting stations in those countries and further the use of English.

Yes, the international broadcasts, once and still somewhat of a stunt and novelty, are going to be a most commonplace happening, and their ability to bring about world peace and a universal language is very promising.

RADIO INDI-GEST

When Waves Roll In

(With Apologies)

There's a glorious, tickly feelin',
Kinda vergin' on divine,
When the new set's all connected
And you've strung the long clothes line.

There's a thrill no other instrument
Can ever make you feel,
When you turn the knobs expectantly
And hear a howl and squeal.

But the joy supreme is findin'—
Let no artist dare to scorn—
That the waves are in the ether,
And there's music in the horn.

WILL I?

Should Teach the Horses

Dear Indi: So WCAU, Philadelphia, is going to broadcast horseback riding lessons? That should be made a feature of the International transmission tests. Build up foreign friendships. The Prince of Wales ought to fall for that.

IDA HOE.

Well, there are two sides to the question and it's pretty hard to stick to either one, so why not be considerate? You know the Prince is under trying circumstances.

And the Show Starts Right Away

Dear Indi: Here it is again! Bet you're thankful—WHAT—you don't know what I'm talking about? Canyuimajun that? Why the All-Star-American program, of course. It's designed especially for internationally-inclined stations to shoot across the ocean for the benefit of our cousins overseas. Show 'em what a swell country we have. Read it and vote the straight All-Star-American ticket:

I.
Address, "How to Buy a Pardon or Parole"
.....Gov. Len Small of Illinois
II.
Duet, "Miserere" from "Il Trovatore"
.....Nicky Arnstein and Fanny Brice
III.
Lecture, "How to Hold the Gun When Shooting Husbands".....W. C. T. U.
IV.
Lobby solo, "The Flying Dutchman".....Edward Bok
Accompanied at the money box by Senator Norris
V.
Close Harmony, a duet.....
.....Al Smith and Wm. Randolph Hearst
VI.
"Come Over and Play in Our Yard," mixed chorus
.....League of Nations
VII.
Talk, "What the Farmer Doesn't Want"
.....Pres. Cal Coolidge
VIII.
"Remember," solo.....Dicky Loeb
Accompanied by Nathan Leopold, in Joliet costumes
IX.
"Never Cripple, Always Kill Pedestrians So They Can't Sue".....Am. Automobile Assn. & Yellow Cab Co.
X.
"But You Gotta Know How," drinking song.....
District 13, Chief Prohibition Agent, Ed Yellowley
XI.
Booster Talk, "Chicago Autos, Gunmen, Poison Liquor etc., Kill More People Annually than the population of Florida Taken from the Florida Ads".....
.....Chicago Assn. of Commerce
XII.
Hymn, "Higher, Oh Raise Me".....
.....U. S. Assn. Skirt Manufacturers
Finale
"My Country Tis of Thee".....
.....by the Mixed Assortment Above

AN ILL NOISE ANN

Why not add, "Wings of the Mourning," from Schillings, by the Army Court Martial ensemble?

NIGHT

Thrilled am I to thus speak out into the night,
O silence infinite . . . . . mysterious night!
Over ethereal paths of celestial pageantry
Vibrating in a mystic lovely unknown light
The dim light cast by nocturnal skies
O'er dreamy worlds amidst the silence deep
Messages on the wings of thought flying
Piercing the darkness and the shades of sleep.

I am living o'er a century this hour
While slowly the wheels of silence wind
Where currents of life vibrate o'er the spheres;
Thoughts terrestrial hold me and I find
Myself in cosmic consciousness
Beyond the mortal edge in unknown lands;
O silence infinite . . . . . mysterious night!
God watches over all He understands.

RHEA SHELDON.

Just a Little Justice

Dear Indi: I see in last week's issue that Betty Crocker is going to give a talk on "Biscuits and Variations." What I want to know is, will the law protect me if I make my wife wear ear muffs during the program. She knows too much about variations from biscuits now. Her biscuits always vary—from bad to worse.

PTOMAINE

We're not so sure about the law, but almost any twelve men who have been through that stage of indigestion will. Take a chance, it's worth it.

The Finale

Condensed

BY DIELECTRIC

Station WMC, Memphis, Tenn., incorporates in the dance programs broadcast from their studio most of the modern numbers to be heard these days, and judging from the announcer's statements between selections a great many folk listen to them. This station does acknowledge telegraphic bouquets but consumes less time in doing so than most any station I know of. That is an example to follow.

Tuning in Station WEAO, station of the University of Ohio, an evening's pleasure was well-nigh complete. The directors of that station have been successful in controlling their modulation so as to transmit features with a great deal of fidelity. On the particular evening in mind a concert comprising selections played on the University's chimes made one loath to pass on. Granting the possibility of these being somewhat superior, their tone as received in my set was beautiful. We must not overlook the skill of the player.

The oratorio of the Messiah was broadcast by numerous stations with more or less effectiveness. Repetition, rather prolific in this work, does not become boresome where the choruses are well trained by directors who introduce a variety of phrasing. Such was the noticeable case of the production sung at WOC, Davenport, recently. The listeners' satisfaction was the more complete due to the accompaniment provided by the Palmer little symphony orchestra (another little symphony organization). Applause is due the soloists of the evening also.

Station WHO, Des Moines, arranged programs of Christmas music which were very pleasing and no doubt enjoyed by an extensive audience. The mere fact that the writer of this column was pleased signifies little, of course, so it behooves you who listened to their music to write the station expressing satisfaction—if that was felt—or adverse criticism, if you can specify the faults you consider existed. Criticism is always invaluable, where it is constructive, and especially so to Dielectric, who appreciates your comments on his efforts to properly evaluate (after years of musical experience and criticism) that which is heard by him. After all, critics differ even in their appraisal of outstanding artists. We are all human, you know.

Certainly all lovers of symphony music feel indebted to the sponsors of the broadcasting of the New York Philharmonic society's concerts, one of which was performed a short time ago and known as one of the students' series. While this was performed in Carnegie's hall, New York, and broadcast through Station WJZ, with the great power used by this station, no one could sense the artificial mediums making possible such music in our homes. Here is a body of musicians schooled in the classics and directed by leaders with international reputations.

Listeners in on the Atlantic coast boast now and then of their success in pulling in one of the California broadcasters, but the number is rather limited, comparatively speaking. To facilitate a larger audience getting Pacific programs, KFI, Los Angeles, arranged to have five broadcasting stations scattered across the country rebroadcast on a certain evening. My personal experience with this test was to find KFKX, Hastings; WOC, Davenport, and WHO, Des Moines, producing the best results. WGY, Schenectady, was foggy and of course faded miserably. Making a comparison with KFI itself during the singing by a coloratura soprano, KFKX and WOC most nearly approached the original.

ABC Radio Fundamentals for Everybody

Chapter II—Inter-Relation of Radio to Audio Telephony

By Milo Gurney

IN ORDER to complete our understanding of the close relationship existing between wire telephony and audio telephony, we have only to associate the fact that voice telephony uses air as the medium and wire telephony uses wire. Wire telephony has been shown to be identical with audio telephony, with the exception that an electric current, rather than the sound itself, was flowing through the connecting wires. This current in turn actuates purely mechanical devices capable of reproducing the wave form of the sound in the receiver.

Recognizing Air Surges

Of even greater interest to the reader is a more careful study of figure 1, shown in last week's article. In that drawing, it is evident that even an experienced eye could not judge or comprehend it as other than an artist's conception of varying air surges. Likewise, it is also apparent that the radiating spheres possess no intelligent meaning to the eye. Were it possible to convert this picture of air surges into vibrations the ear would, in turn, readily recognize them. Hence, as

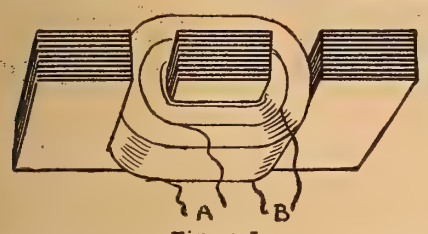

Figure 5

an object is identified through the application of definite, unchangeable optical laws, in like manner is a succession of moulded air surges identified through the basic vibratory laws.

In modern telephone practice, refinements of both the means for signaling and transmission are continually taking place. However, such improvements have not, or cannot, alter the fundamental laws governing telephony in any particular.

A Connecting Circuit

Some few of my readers will dispute figure 3 as not correct because it does not solve the problem of duplex or two-way conversations. Figure 4 (page 24) is therefore given as typical of the circuit used for duplex telephony. It comprises two of the circuits shown in figure 3 and a third, or connecting circuit, between them. With this arrangement, the receivers are connected together, the transmitters at either end of the line comprising individual circuits. As no physical or mechanical connection exists between any two of the three, then, to all intents and purposes, the completed circuit becomes an actual wireless circuit. We may, with all fair-

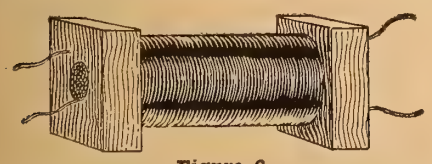

Figure 6

ness, consider the two outer circuits as broadcast transmitters, the central circuit comprising two receivers. The writer is of the belief that had this phenomena of voice transmission been properly exploited at its inception, as a discovery in wireless telephony, it would have created a furore not unlike that which Radio profited by.

Let us now return to figure 4 and trace this most interesting circuit, which makes possible two-way or duplex telephony. In figure 5 is shown the two windings comprising an audio frequency transformer as used in Radio receivers. These windings are placed over one another and separated with a compound which thoroughly insulates each winding from the other. The laminated core upon which the windings are pictured as mounted, having no bearing upon our present discussion, will not be considered, while figure 6 is included to show the type of audio transformer use in wire telephony, and which is termed an induction coil.

It will be noted that the circuits at either end of figure 4 are but duplicates of figure 3 with the receiver omitted, while the center circuit of figure 4 has, in effect, taken the receiver from the circuit show in figure 3 and inserted them in this circuit and in series with one of the windings of each of the coupling transformers. Going a step farther, we also note that in place of the receiver which was originally a part of figure 3, we have substituted the remaining winding of each of the transformers.

Gap Must Be Bridged

In order to make myself more clear, may I call your attention to the fact that neither of the three circuits have any mechanical or conductive connection each to the other, as we may ignore the vertical lines shown in figure 4. They merely represent the laminated core used in the transformers. It then follows, as pre-

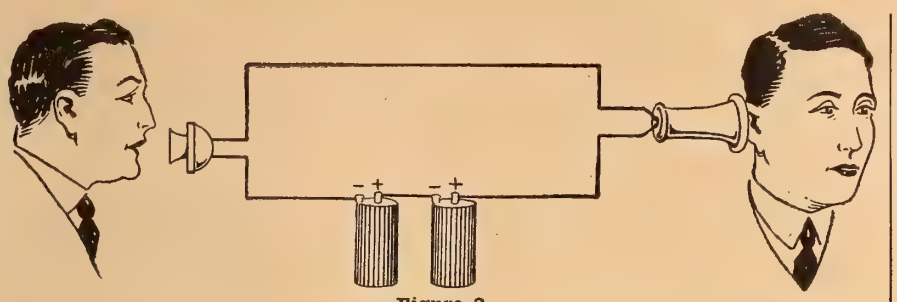

Figure 3

viously stated, that in order for communication to be established, the gap or distance between the windings of each transformer must be jumped or bridged through the medium of the air or some agency undiscernible and closely related to it.

Hence duplex telephony is virtually but another form of wireless communication with which the public has not been concerned because of its having become one of life's necessities.

Radio More Complex

While the relation of wire to audio telephony is comparatively easily understood, the relation which Radio bears to each is somewhat more complex, except as we reverse the process of explanation. In doing so, I shall offer a discussion of the medium which Radio uses to span great areas or distances, which in this instance is light or the electromagnetic wave.

The nature of light has created much speculation. Physically, it appears as a ripple in a substance called ether. But this is of doubtful existence. Yet, admitting this uncertainty, the substance is of value toward the explanation of light waves. That light waves resemble sound waves, as ever expanding spheres, is readily recognized if we but visualize that the light from an ordinary lamp will shine equally in all directions, as will a sound wave, from a given source, penetrate equally over a like area.

While each is capable of being directed,

(Continued on page 24)

No More "B" Batteries on Your Radio

At last, a practical reliable "B" battery eliminator for your radio. Does away with "B" batteries; no charging; no replacing. Always 100% efficiency in "B" current. The most revolutionary development in radio.

U.S. PAT. MAY 27, 1924

Genuine Fansteel
Balkite "B" Eliminator
Sent for Only
$1.00 *Down*

The Balkite "B" is connected to your radio just like "B" batteries and attached to an ordinary electric light socket. Replaces "B" batteries entirely and furnishes "B" current direct from regular house lighting current. Always gives current equal to four new and fresh 22½ Volt dry "B" batteries. For sets of five tubes or less. Simplifies radio receiving. More convenient, more economical and more efficient than dry or wet "B" batteries. Operates storage battery or dry cell tubes and gives tubes longer life. Entirely noiseless. Creates no disturbance in reception. Has no bulbs, nothing to break, wear out, replace or get out of order. Requires no change in your set, no extras to buy. Operates from 110-120 AC, 60 cycle current. Measures 8 3-16 inches by 8 inches by 3¼ inches. Current costs only 1-20 of a cent per hour.

$5.00 a Month, if satisfied after trial

Only $1.00 with the coupon below brings the Balkite "B" to your home on trial. Try it out thoroughly before you pay another penny. See how it improves reception. See how much more convenient than using batteries. Judge for yourself how it will save you money and make your radio set more enjoyable. Then, if not satisfied, send it back at our expense and we'll refund your $1.00 plus all transportation charges. If you decide to keep the Balkite "B," start paying only $5.00 a month until you have paid the total price of only $35.00. That's the price others ask for spot cash. We give you the lowest cash price on easy monthly payments you will never feel.

Send Coupon

Don't miss this opportunity to get the genuine Balkite "B" at the rock-bottom cash price on easy monthly payments. Send coupon now while this offer lasts. **Order by No. Y-8578A, $1.00 with coupon; $5.00 a month; total price $35.00.**

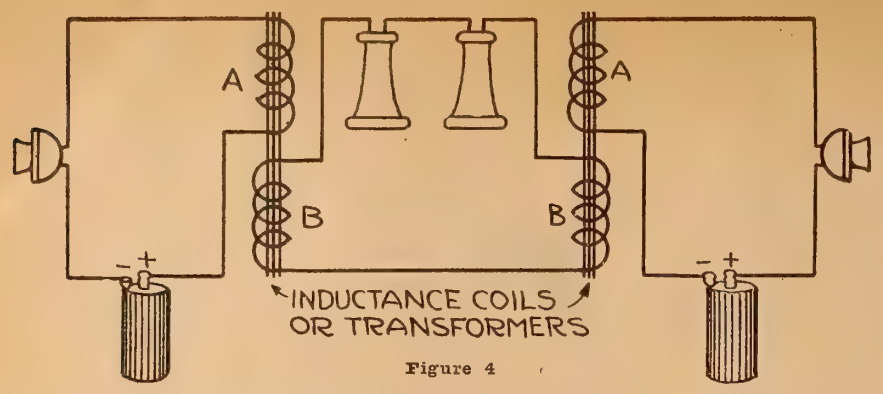

Figure 4

A B C'S OF RADIO SETS

(Continued from page 23)

through the application of mechanical means, and the resemblance is complete, yet each differs in the disturbance created. As has been previously explained, sound waves comprise spheres of condensation and expansion. On the other hand, light waves can be shown to be spheres of electric or electromagnetic forces.

Light and Radio Have Same Speed

Light travels 186,000 miles a second, or 300,000 kilometers, but of greater interest is the somewhat startling fact that Radio waves travel at a like velocity. Light waves of varying colors are produced wherever electrical charges vibrate, examples being the X-Ray, violet, green and red, some of which are decernable to the naked eye. All may be photographed.

As it is evident that this particular portion of my explanation relative to Radio waves being comparable to light waves will carry on into my next article, it appears as expedient that I, at this point, answer the one question most often asked by the novice. "What is meant by the term 'wave lengths,' and what is meant by the term 'meter?'" In order to answer this compound question, it seems essential that I answer it backwards.

Definition of Wave Lengths

The definition of the word "meter" has not changed a ten-thousandth part of an inch since each of us went to school. Without reference to the French metric system of measurements, of which it is a part, one may define it as equal to 39.37-inches. This of itself is meaningless as an explanation of what is meant when a station advises that it broadcasts upon a given wave length, which, for illustrative purposes, we will assume is 360 meters. May we then go a step further through determining the number of inches equaling 360 meters. This is but a problem in multiplication. The results shows that 360 meters is equal to 1,181.1 feet. Unlike the electric current used in wire telephony, that used for broadcasting is alternating in character, rather than continuous. These reversals of current flow are, however, so rapid that they appear as continuous. With each reversal a wave is released, similar in anology to the ripple which follows along a rope which is swung at one end, the other end being fastened to some object. These ripples as they follow each other are known as crests, and the time interval between each crest determines its wave or crest length. The composite answer is that a station broadcasting upon a wave length of 360 meters has so timed each impulse from its transmission as to allow each succeeding wave or impulse to travel 1,181.1 feet before the next impulse is released. In other words, the time interval is that period of time which is consumed for each wave to travel the above mentioned distance.

Simple, is it not? Yet how perplexing until explained, which reminds me of the little school boy who complained that his teacher didn't know anything, because she was continually asking him questions.

Next week, Mr. Gurney will continue his interesting discussion of the relation between Radio and its associates, audio and wire telephony.—Editor's Note.

TESTS WILL AID PEACE

(Continued from page 4)

means to furnish a telephone service from one country to another, and from all countries to each other.

"'For example,' said Mr. Burrows, 'if London wants a Bohemian program, the directors of programs in England do not have to try to arrange it and furnish it to their public—we simply hook up a line with Bohemia and give the English public a real Bohemian program with all native color direct.'"

And, of course, the same idea would work out just as well with Germany where the Radio broadcasting is restricted quite particularly to the opera and classical music in general. The Germans have been working industriously to develop equipment capable of receiving American programs. They expect to accomplish this result during the international broadcasting week.

Is it not conceivable that all the nations which participated in the world war might have found a way out of the conflagration if the millions of citizenry could have established an international comraderie through the Radio in the preceding years?

International interest in Radio would lead to a desire to understand the languages of other countries. Such languages could be taught over the Radio as they are now being taught in America. A better understanding of the languages would lead to a better understanding of the nations the languages represent because the listener would be interested in broadcasts coming from that country and such broadcasts naturally would present the viewpoint of that nation. An understanding of the language would lead to an interest in the literature and periodicals of a foreign country. All peoples would feel more neighborly, regardless of race, creed or nation.

Little has been said as to how the Asiatic countries will figure in this historic week of international broadcasting. Japan and China apparently will be in a position to listen to Europe with one ear as the waves sweep around the Indian sea and the Himalayas and to America with the other ear as the ether waves come singing over the Pacific. Whether they will attempt any broadcasting themselves for distant nations had not been announced at the time of this writing.

Radio Digest has received programs from Austria, Belgium, Denmark, England, Esthonia, Finland, France, Germany, Holland, Hungary, Italy, Jugo-Slavia, Norway, Russia, Spain, Sweden and Switzerland for the big international week. Other countries will be heard from west and south before January 24.

Long and loud may the great DX fraternity prosper! Now comes the time when George K. Babbit of Guthrie, Okla., U. S. A.; John Torro of Effingham, England; Gustav Schmalz of Koenigswusterhausen, Germany; Alphonse Beauvais of Chaumont, France, and all the other distance rangers may roam around the dials and bring in the same station with a common sympathy and delight for each other. And a blooper! Say let one of those birds start a squeal and all the nations would rise together and march shoulder to shoulder for a common—er, extermination!

British Notes

Important experiments have been made at 2LO with a form of "bottled Radio." The apparatus used was the telegraphone, which is a development of the old cylindrical phonograph record. It was used for recording part of the broadcast performance from an airplane, and will be brought into requisition in connection with the public speeches of eminent persons in cases where the installation of a "mike" is undesirable. While listeners may be prevented from hearing speeches at the moment of delivery, there will be no reason why they should not receive them a few hours afterwards when the station is not occupied.

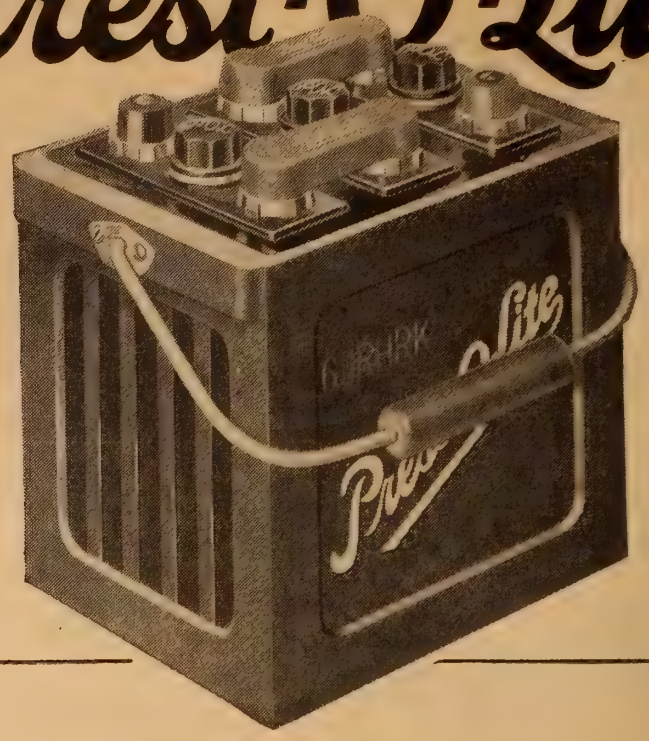
One evening, this month, a shorthand demonstration will be given from 2LO, London, of words spoken at different rates. Lord Riddell, president of the Shorthand Fellowship and proprietor of the News of the World, a famous London paper, will speak at speeds, first of 100 then 150, and third, 200 words a minute. Shorthand experts will try to "take him down."

Oscillators are the chief subject of British complaints, and opinion is unanimous that some form of deterrent must be made use of before the nuisance can be entirely eradicated. Willful oscillators, it is urged, must be punished in a form fitting to their offense.

Roxy's Lair Disclosed

NEW YORK.—For the benefit of those who have not been able to trace S. L. Rothafel, "Roxy" of Radio fame, to his lair, it is announced that he has taken permanent quarters at Steinway hall, 113 West 57th street, room 605, New York, where he holds his rehearsals for the concerts at WEAF.

Prest-O-Lite



There are many improvements in the new

Prest-O-Lite Battery

IN THIS new battery you'll find all the good points and high quality that have made Prest-O-Lite an unfailing aid to better radio. And in addition there are many important refinements and improvements that make it the most attractive, most convenient battery you can buy.

This new battery has a beautiful stippled finish hard rubber case that blends with any furnishings. The case is molded in one piece, giving sturdy, leak-proof strength.

To make the battery convenient to carry, the handle has been given a comfortable rubber grip.

The oversize terminal nuts on the binding posts are easy to turn and insure perfect contacts.

Novel rubber insulators completely cover the tops and sides of the cell connectors, preserving the original fine finished appearance at all times and giving protection against accidental short circuits.

No effort has been spared to make this a battery you will be proud to own. Yet, like the rest of the Prest-O-Lite line, it is priced to offer you the biggest value of the day. Ask your dealer to show you this battery and the Prest-O-Lite Chart that helps you select the right battery for your set. Or write Indianapolis for a copy of our interesting handbook on radio storage batteries and how to charge them.

OPERATING AND TROUBLE SHOOTING

OPERATING and Trouble Shooting, is a Radio Digest feature, the purpose of which is to give practical information on the operation, care and cure of simple troubles in every kind of receiver. Standard Radio receivers of wide distribution and use are studied from the standpoint of instructions for installing and connecting, tuning and operating, and remedying little difficulties. The suggestions below, if executed faithfully, will make winter broadcast listening yield all there is to yield to the reader and give your set a fair chance to show its worth.

For the Owner of a Thorola Islodyne Receiver

THIS set is most unusual in many ways. In appearance, the front panel differs radically from any other receiver available, due to the attractive wood covering over most of the front panel. In efficiency, the effect of the doughnut coils used is most noticeable in that this set really tunes sharp and confines local stations to a very few degrees on the dials. Operation is easily mastered and the controls have been reduced to the lowest possible minimum in a set of this type.

Islodyne comes sturdily packed against breakage and marring of the cabinet and is best removed from the container by placing carton on its side, opening the flaps at top and bottom and pushing through. Attempts to lift it out or drop it out were not very successful. The lint from the corrugated board may be removed with a soft cloth and at the same time the whole cabinet might well be gone over to restore the polish. There is no compartment for the batteries and space should be provided in the cabinet or table on which the set is placed, for them. A Belden battery cable affords a convenient means of making connections and was used by the writer when testing this set.

While there is an excellent diagram provided which shows clearly the proper battery connections, it may be a good idea to go over these for the benefit of those who may purchase from some one an Islodyne from which diagram card has been removed. There are three possible antenna connection posts; beginning at the left they are antenna long, antenna medium and antenna short. The choosing of the proper one for your installation is a matter of selectivity. If the antenna proper and the lead-in have a combined length of 105 to 125 feet, the "Antenna Long" binding post should give best results. Total lengths between 75 and 105 feet will probably call for the "Antenna Medium" post, while overall lengths of 40 to 75 feet should work better on the antenna short terminal.

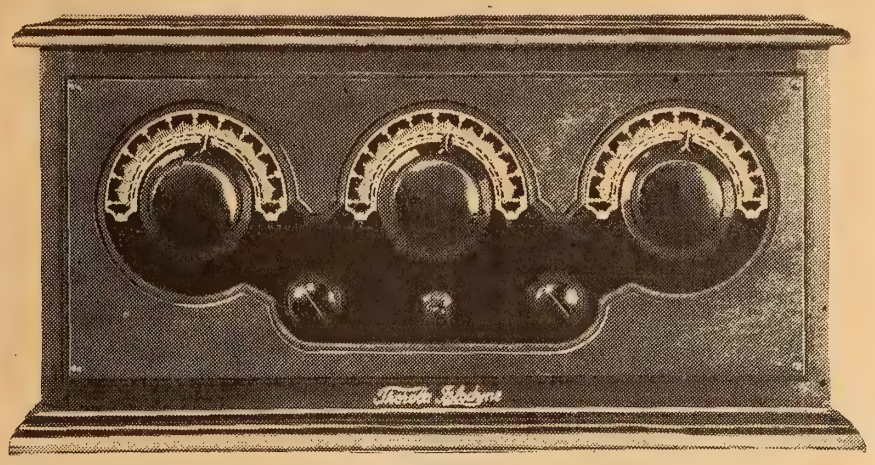

Figure 1

Try connecting your antenna on first one and then the other of these until adjustment is reached that gives you the desired compromise between selectivity and volume on distant stations. This is a compromise on any receiver which may or may not have been settled by the maker before shipping the set. This choice, as provided in the Islodyne, seems to be the better way as all locations differ. No matter what the characteristics of your antenna, the long antenna connection will give the greatest selectivity, with medium next and the short connection the least. On the other hand, the short connection will give greater volume on long distance.

Ground Connections

The fourth terminal from the left is for the ground wire which can be attached to either the cold water pipe or, in rural districts, a long rod can be driven into the ground 4 to 10 feet. This should, if possible, be placed in a spot where the earth is always moist. If attaching to a water pipe, carefully scrape, file or sandpaper the nearest portion of the pipe, for a length of about three inches. A ground clamp, as carried by Radio and electrical stores, is much to be preferred and costs but little. Otherwise, remove the insulation from the last two feet of the wire and scrape it bright, then wrap this portion around the pipe pushing the turns closely together. Over this wrap a layer or two of tinfoil and then cover well with what is called "electrician's" or "bicycle" tape.

Connections for the speaker come next and are in the form of small cord tip jacks. It will be noted that, on most speakers, the cord terminates in two leads one of which is marked with a red tracer thread. The unmarked cord tip is to be plugged into the first of the two jacks while the marked one goes into the second. This makes quite a lot of difference in most speakers and if improperly done the speaker will sound badly choked and will rattle. If cord tips are not marked with tracer thread, some reversing will be necessary to determine which way sounds best.

Connecting the Batteries

Before connecting the batteries be sure that the storage battery is fully charged as indicated on a hydrometer. One of the caps on the battery must be unscrewed and the tip of the hydrometer inserted in the liquid. The bulb is then squeezed and released which will draw up electrolyte into the large glass portion of this device. Within the hydrometer is a float on which there is a scale reading from 1,100 to 1,400. This float is read by noting the point on the scale opposite the surface of the liquid. The scale reading should be 1,210 or better. When between 1,280 and 1,310 battery is fully charged.

The first three terminals for batteries are for the B battery supply and are labelled B+90, B+45 and B—. This B power supply may take the form of dry cell B units as made by Eveready, may be of the storage battery type as constructed by Prest-O-Lite, World or Hawley, or may be one of the B eliminators on the market which supply direct current in the correct voltages when connected to the electric light socket. If a B eliminator is used, the binding posts will be found to carry practically the same identifications as those on the set although they may read B+100, B+50 and B—.

If batteries are used, either dry or wet, it will be found they come in 45-volt units and two will be required. The minus terminal on one of them is to be connected to the third from the last post in the set which is labelled B—. The other terminal on this battery is then to be connected to the B+45 post in the set and to the minus terminal of the second B battery. The remaining plus terminal on the second battery goes to the B+90 post in the set.

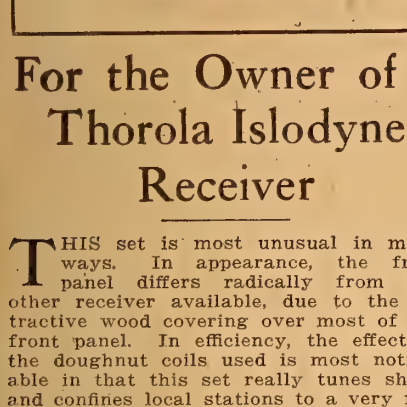
The last two posts in the set are for connection to the storage battery, usually called the "A" battery. One terminal of this battery will be found marked POS., + or painted red. This must be connected to the next to the last binding post while the second terminal of the storage battery connects to the last post on the set.

Tuning Controls

The three large knobs provided with pointers, which revolve over engraved scales, are the actual tuning controls. The center one, and that to the right, which we will call numbers 2 and 3, will be found to read practically the same on any station. Dial number 1 will probably read somewhat lower due to the effect of the antenna. Since every antenna installation varies it would be impossible for any manufacturer to alter this point. Below the dials there are two knobs and one switch. The switch is used to turn the current on and off. One must get in the habit of snapping this to the left when through with the set. If a B eliminator is used instead of B batteries, the switch controlling the house current should also be turned off.

The knob to the left controls the brilliancy of the first three tubes; the two which amplify the signals while still at radio frequencies, and the detector. This knob must be turned to the right to light the tubes and is used as a volume control on local stations or exceptionally loud distant programs. It also permits control over any tendency toward oscilla-

(Continued on page 26)



Old Tubes Made Good As New

THIS latest Laboratory product will recondition any old, run-down, even worthless tubes, as long as the filament still lights. Makes them as good as new in a few minutes' time. Costs but few cents more than new tubes! Simple, efficient, practical. Big money-saver. Operates on either A. C. or D. C.—110-120 Volts. Model No. 20 for UV-201A (C-301A, etc.) and all similar types. Model No. 10 for UV-199 (C-299, etc.) and all similar types. (Model No. 5, a combination of the other two models, handling both types, large or small tubes, $5.50.) Bound to do the work on our

Money-Back Guarantee

Money cheerfully refunded if desired results fail. But we are sure you will find the Mack Reconditioner pays for itself in one evening. Many making good money restoring friends' and neighbors' old tubes. You cannot lose! Act quick on this special short-time introductory price. Figure 2

THOROLA ISLODYNE

(Continued from page 25)

tion on the lower wave lengths, 0 to 30 on the dials, which would evidence itself by squeals, howls and distortion. Turning it to the left clarifies the program.

The other knob is called a "distance amplifier control" and adjustment is necessary only on distant stations. By turning it to the right, the volume on weak or far-away stations can be built up. When receiving local and nearby programs, and also distant stations found between 0 and 30 on the dials, this knob should be kept turned to the left. Much of the really exceptional volume on out-of-town stations possible with this set is due to proper use of this knob to the right, and this innovation is both new and exclusive with the Islodyne.

Method of Tuning

It is suggested, to start, that the first dial be placed at 28 and then a hand placed on each of the other two so they can be revolved together. Revolve them slowly, and together, between 30 and 40. If no program is heard, turn the left knob slightly toward the right and try it again. If again there is no result, reset dial 1 at 30 and revolve the other two between 30 and 42. This should be tried several times, moving dial 1 two degrees each time. At some setting of the left knob and dial 1, a program will be encountered when revolving dials 2 and 3. Slight readjustment of all three dials and the knob will quickly bring the station in with maximum volume and clearness.

It is good practice to jot down the settings of the three dials for about seven stations, well distributed over the dials, and then make a chart, such as that reproduced here. Wave lengths are evenly spaced along one edge and dial settings from 1 to 100 along an adjacent edge. The little crosses for the settings of dial 3 can then be connected and will make a curve as shown. Do the same with the crosses for dial 2 settings and those of dial 1. If dials 2 and 3 run exactly together throughout the scale, only one curve for both of them is necessary.

As in any receiver of the tuned radio frequency type, it is a good policy to switch tubes around in their sockets when tuned in on a distant station, as nearly always there is one that makes a better detector than the rest and two that are superior as radio frequency amplifiers.

(The Stewart-Warner receiver will be studied next week.—Editor's Note.)

ANIMALS HEARD ON AIR

(Continued from page 5)

the tale, greatly exaggerated, reaches Leo, the lion. Then the whole zoo is in an uproar—and over nothing at all!

Carl Laemmle, pater familias to the Universal institution in general, got the idea the children would like to listen in on some of this jungle pow-wow. So he had a microphone brought up for the animals to make their Radio debut. Jiggs started it off and Leo ended it. The children pronounced it a great success.

It was over a year ago that the golden notes of the English nightingale were wafted into a concealed microphone and broadcast to Radio listeners throughout the British Isles and even so far as the continent. A pair of the nightingales had taken up their residence in a small arbor in the garden of Colonel and Mrs. Harrisons' estate near London. Cables were laid through the vines and a microphone ambushed among the leaves. Miss Beatrice Harrison, having previously discovered that the birds found inspiration in her 'cello, carried the instrument out to a convenient place and began to play. Seemingly flattered by such an unusual accompaniment the nightingales fluttered near and took up the song, their tiny throats fairly bursting with throbbing melody.

Off through the cables and the tubes and the antenna their voices were instantly radiated for a thousand or more miles round about bringing intense joy to children and their elders in the more crowded districts of the city where nightingales are unknown.

We are enraptured with the songs of the birds but few persons would care to compliment the sea lions for their vocal accomplishments. Imagine a sea lion duet! They are like some Radio sets—plenty of volume but low grade quality. However, in the New York zoological park, a microphone was placed at the edge of the pool where the sea lions live. To a sea lion volume is the essence of quality in itself and the sea lion that can croak and bark the loudest gets the prima dona role. So the prima dona and the runner up put on a duet that almost knocked everything but the crystal sets out of business for miles around.

Dogs on numerous occasions have had their turn at broadcasting. One of the most intelligent dog Radio artists naturally lives in Boston. His name is Pep. And the hundreds of thousands of children who spend the story hour with Big Brother Bob Emery are acquainted with Pep's cheerful ejaculations at appropriate times. Pep is the original "Big Radio Dog." He enjoys the WEEI story hour as much as anybody and seems to fully comprehend what is expected of him. When he addresses the microphone he puts his paws on Brother Bob's shoulders and his jaws come about level with the aperture. If he were to stand up straight on his hind legs Big Brother Bob would come about to Pep's collar buckle.

Maude, Julie and Trixie, three music loving young elephants at Luna Park, New York, prefer to do their broadcasting in the old-fashioned way without the aid of Radio transmission but when it comes to listening in just hand them a good superhet and they will tickle the dials with the sensitive tips of their trunks until they get what they want through the loud speaker. Then they will sit back on some old tubs and listen with the keenest pleasure. They are particularly fond of band music and sway their bodies when the rhythm isn't too fast.

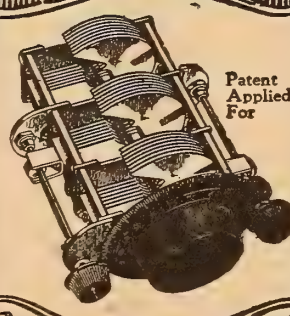
Some smart uncle or aunt or big brother will get the animals together one of these days and put on a regular air circus. Peter Rabbit may be lost in the broadcast shuffle but the Three Bears ought to be able to do their stuff with a little assistance and then happy days will come for our over-sophisticated youngsters.

Long Waves Are Better

LONDON.—Experience so far in rebroadcasting, on high power, messages received on short wave lengths, has not been entirely satisfactory here. Shorter waves have proved inconsistent, and show more erratic characteristics than the longer wave transmissions. The results of recent tests show that during daylight the short wave transmission, however, is much to be preferred.

Rule Against Battery Charger

ZANESVILLE, Ohio.—The city council here has passed an ordinance making it a violation of law to operate a battery charger of the vibrator type between the hours of six o'clock in the evening and five o'clock the next morning. This ordinance was passed to prevent any interference from that source. A fine is imposed if there is a violation.



Patent Applied For

Controls Five Tubes With One Dial

If you want to build the best tuned radio-frequency set you ever heard, and with only a one dial control, or if you want to convert your old three dial set into a one-knob control, use a

ARBORPHONE
—the Incomparable

WHEN you can tune in KFI, Los Angeles, 467 meters, at exactly the time WCAP, Washington, 468.5 meters, is broadcasting, then switch to WCAP—and get either station, clear, strong and without interference—well, that is real radio performance.

Arborphone does that for many owners (letters on file). For signal strength, for pure, clear reception and for sensitive tuning, Arborphone will equal any set, surpass most of them.

European stations will be heard by many Arborphone owners during International Test Week. Splendid prizes offered for exceptional performance records. How many stations will you get?

Get a copy of our new radio book—your's for the asking—full of interesting radio facts. Ask your dealer about Arborphone—the finest value in radio.

Unitrola: Single Dial Phonograph Receiver

Part I—A Five Tube Set on a 12-Inch Panel

By Carl Patterson

FOR some reason known only to herself, Dame Nature gave us only two hands. Of course in Adam, the original model, she didn't have a Radio enthusiast and possibly the fact that his ancestors might wish to twist dials didn't occur to her. At any rate, two is all most of us have, yet just now there are more three-dial receivers being tuned nightly than any other kind. Personally, I do not like moving two dials just two degrees at a time and then jockeying the third; it takes too long to run the scale looking for stations that may still be on at two a. m., and one can miss them anyhow. This set I am about to describe, originally had two dials, and, personally, I thought it was about all that one could want, but not Mrs. C. P.

Only One Dial

The two dials ran almost together but on the lower waves they began to spread a little—"not so good." The set was, accordingly, redesigned and rebuilt. Incidentally, there were a few suggestions made that it might just as well go in the phonograph since we use a phonograph speaker unit anyway. There being only one dial, this was a perfectly feasible suggestion, and the resulting design, while it looks far from the customary shape of a Radio receiver, is an unexcelled 5-tube performer and is out of sight when not in use. Although a Radio bug, I'll admit there is little of beauty in most home built sets.

There are few phonographs of either the console or upright variety that this set will not go in. Of course many consoles have a lid over the record compartment which lifts upward and the panel of a set for that type would have to be horizontal. On the other hand, there are just as many consoles in which a door opens at the front admitting one to the record compartment, and all uprights have that kind of door on the record space. The panel of this set is but 12 inches wide and all phonographs are that wide. In depth, Unitrola is 16 inches and most talking machines are closer to 20 inches inside depth. The height is the usual 7 inches; I couldn't go any further from regulation style and had to have something standard.

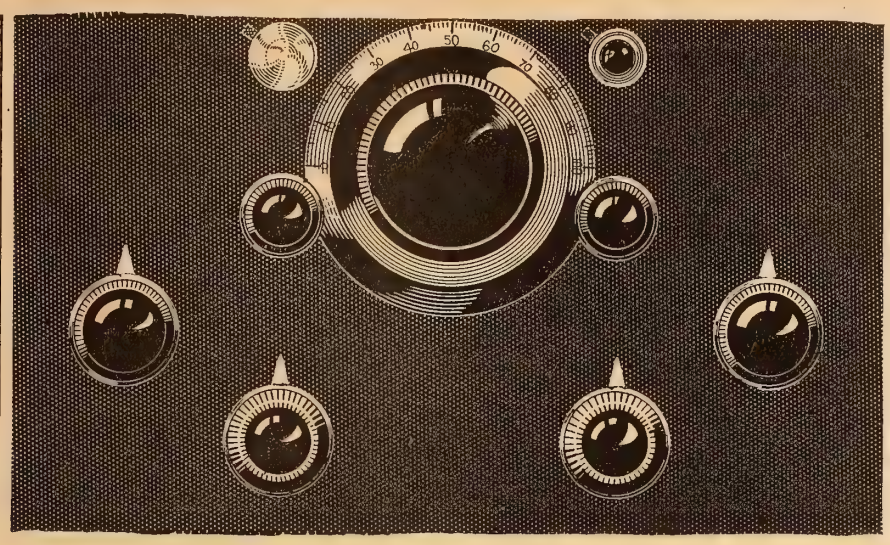

Figure 1

Panel at an Angle

Since this receiver is to be operated in a position below table height, the panel is tipped back 30 degrees. When one is sitting or standing in front of Unitrola, tuning can be done most easily because of this slant. The single dial control is, of course, a pleasant innovation, but here is another. Due to the set being down inside the record compartment, it is comparatively dark, so a light, run from the battery, is placed on the panel close to the dial markings. It draws but little current and will not materially hasten the discharge of the battery. Across the dial from it is a pilot switch as the set being unobtrusively placed in the phonograph, it is surprisingly easy to walk off and leave the tubes burning.

The United Scientific Laboratory multiple condenser is a thing of beauty both mechanically and electrically. Study of it brings to mind the words "Packard assembly." The plates are all of brass, well aligned and sturdily held together. The compensating arrangement for two of the sections is most unusual in that the two knobs do not affect the rotor. The large knob of course turns all three rotors simultaneously but each of the smaller ones swings a stator. The rear stator has no adjustment. The center stator is pivoted at the right side and the left knob, by means of a cam, swings this stator up into deeper mesh with the center rotor in whatever position it may be. The front stator is pivoted at the left side and the right compensator knob swings this stator up or down. Thus the small differences in capacities, wiring, etc., are taken care of very nicely.

Bodine coils are a new type of inductance that are both logical and technically correct. They are a cross between a binocular and a D-coil that results in a compact field and little tendency toward interaction between secondaries. For this set their physical compactness is ideal and parts can be placed fairly close without loss or oscillation. They mount easily and are low in cost, both points to be considered carefully. See that you get type T-35 which is the correct size for the .00035 units in the multiple condenser.

The new Amsco sockets are designed to take the tubes, now being sold by nearly all dealers, with the new UX base. Other sockets can of course be used but these are easily mounted by one machine screw, make very fine contact with the tube pins and should give very low losses. The contacts are as far apart as they could possibly be and genuine bakelite has been used for the main supporting block. If you are using tubes made by R. C. A. or Cunningham, you will find that from now on, dealers will have the new base tubes.

(Continued on page 28)

Look for the distinctive Belden Striped Carton. Furnished in maroon cotton or braided with brown or green Rayon (artificial silk).

A Good Loop is Easy to Build if You Use Belden Loop Wire

WHEN you build your new loop antenna, obtain maximum efficiency by using the special loop wire prepared by Belden engineers for standard loops. The Belden loop wire is made of sixty strands of No. 38 copper wire combined with five strands of No. 36 copper wire which has been treated to prevent stretching. All strands are insulated with a double wrap of cotton or with a Rayon braid. This unique construction provides a non-kinking, non-stretching, non-sagging conductor that will make a splendid loop, and one that will keep taut.

Ask your dealer for Belden loop wire!

Belden Litz Wire is a special high-frequency conductor, ranging from 20 to 48 strands of Beldenamel. Furnished in 100-ft. spools for winding high-frequency coils and apparatus.

1926 Catalog of Everything New in RADIO at a Big Saving in Price

The World's Largest Exclusive Radio Mail Order House Will Send You This Wonderful Book FREE

64 illustrated pages containing thousands of bargains in radio sets, semi-finished sets and radio kits of all styles, sizes and approved circuits. Beautiful models of the very latest designs and types. Elaborate console models with **loud speakers built right into** cabinets of genuine mahogany and walnut. **ALL SETS GUARANTEED.**

Our line includes all popular sets, such as **Superheterodyne, Neutrodyne, Ultradyne, Reinartz, Regenerative,** Radio Frequency, Browning-Drake, Reflex and all other latest circuits. Kits, sets and parts manufactured by all well known manufacturers, such as: **Frost, Howard, Baldwin, Brandes, Western Electric, Columbia** and others.

Our Guarantee
Every article exactly as represented. Every article is tested before shipping. Complete satisfaction or money cheerfully refunded.

Includes complete list of broadcasting stations and general information and facts about our free service division. Our radio engineers will help you solve all your radio problems. Send your name and address on a card or in a letter. We will send catalog FREE.

UNITROLA: SINGLE DIAL

(Continued from page 27)

While everyone does not, possibly, prefer the plate resistance method of controlling oscillations at the lower wave lengths, it has always given me sets that equal anything else in the tuned radio frequency class, so I have put a C-R-L unit of 200,000 ohms in the common plate return of the two R.F. tubes and, by it, one can bring the circuits up to oscillation at any wave length. Some may claim that the efficiency is thus cut down at the lower end of the scale by insertion of resistance but surely it is not cut down any more than if one applied only 67 volts on the plates and this method has the advantage that regeneration can be secured at the upper end of the scale. Few tuned R.F. sets are efficient above 450 meters as regards range or, if they are, the rheostats must usually be turned down to prevent oscillation below 300 meters.

Thordarson Transformers Used

Following the detector in Unitrola there are two stages of transformer coupled audio frequency amplification and the volume on anything within range will comfortably fill a good size room. Thordarson transformers are used and the amplification over the entire musical scale is nearly even. They were the first to bring out this type of transformer with large primary and low ratio and, while their unit may be equalled by a very few and usually at a higher price, the results are not surpassed. The amplification per stage is far greater than most experimenters are used to and on locals it would be far too great for comfort or the ability of a speaker to handle if means of control were not provided. Accordingly, another C-R-L resistor is placed across one of the audio amplifier grid circuits and gives smooth, even control from whisper to roar. I first saw this system on one of Jacques Fournier's Fireside receivers and liked it so well I put it on Unitrola's predecessor.

These audio frequency amplifiers are lighted through Amperites as elimination of panel adjustments is always desirable and particularly so on this set with its 12-inch by 7-inch panel. Audio frequency tubes are not critical as regards filament lighting and you need have no fear that you are losing anything in either clearness or volume by not putting in a rheostat for these tubes.

It was soon found that the dial light was not needed during the day as the light from the windows illuminates the dial plentifully. Having both the Dialite and the Pilot switch, a combination was soon worked out by which the Dialite could be turned on or off irrespective of the current to the filaments and the Pilot switch is used not only to indicate whether the tubes are lighted but also to turn them on or off. A quarter turn of the hood on the Carter Dialite puts it on at night and off when set is used during the day.

As to results with this set, I have seen but one receiver of the tuned R.F. type to compare with it and that is the highest priced neutrodyne on the market. On a 60-foot antenna, with, of course, a well made ground, it steps out of Chicago's congested North Side, through WEBH, WQJ, WIBO, WBBM, et al, and brings us the Hired Hand from Fort Worth, the Dixola novelty orchestra from New Orleans, Goldie and Dusty from New York and the stations lining the shores of the Great Lakes. No, we do not "do the Coast" every night. Those much sought entertainers, KFI and KGO, come through with commendable frequency but are not nightly playmates. Probably those living out on farms or in smaller cities throughout Iowa, Wisconsin and Indiana, where aerial traffic is not quite so thick, could use a slightly longer antenna and bring in the coast regularly.

(In next week's issue Mr. Patterson will go into the drilling and assembly of panel and baseboard and the bending of the special brackets out of the aluminum.—Editor's Note.)

The New Radio Book HOW TO-

Operate Sets
Construct Parts
Improve Reception
Understand Radio
Assemble Circuits

FREE With One Year's Subscription to Radio Digest

THE greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest it supplies the demand for a book covering every phase of Radio from a simple explanation of Radio reception to a technical explanation of the different parts of a set which leads to the best reception possible. The sections on selecting and making sets develops the different types of sets and circuits with diagrams to explain same. "How to Operate" gives detailed information on the operation of all the well-known sets. The section of general information contains a complete Radio map and schedule and a section of workshop kinks which save time and money. Now is the time to take advantage of the exceptional offer as listed in the coupon for your convenience.

Reader Shows Novel Use of Table

Evening at Home Made Up for Easy Reference

One of the most valuable features of Radio Digest, I think, is the "Evening at Home with the Listener In" table. I have found it very useful in operating my set. However, I find it difficult to follow with the eye clear across the line of days to the day on which I am listening, and so have devised the following scheme to assist me in using the list:

Although only the top part of the list is shown in the illustration, I cut a strip of stiff cardboard the length of the full table, and as wide as the first four columns, which include the call, location, meters, and the Saturday list of hours. I then carefully clip the list out of the issue, and cut it in eight strips, as shown. Seven of these strips are the days, of course, and the eighth includes the call, location, and meters. The last mentioned strip I paste flush with the left edge of the cardboard, putting paste all over the back of the clipped strip before mounting. Then I put a square of paste at the point marked "paste here only" in the drawing, and being careful that the hours calendar properly with the stations they are meant for, I stick the top edge of the Saturday column on this spot of paste. Over this same spot paste is again applied, and Sunday's column is pasted in place right over Saturday. The same method is continued until all seven of the hours columns are mounted in order one on top of the other.

The result is a cardboard strip about twelve inches long and a little less than two inches wide, with top mounted and hinged "pages" for each day of the week showing the evening hours stations can be found broadcasting.

The mounted table is very simple to make and I find it much more convenient to handle. I keep the latest table prepared in this form at all times beside my receiver.—A. R. Poirier, Providence, R. I.

WORKSHOP KINKS EARN A DOLLAR—

THERE are many little kinks worked out at home that would aid your fellow Radio worker if only he knew about them. There are new hook-ups, new ways of making parts and various unique ways of operating sets that are discovered every day. Radio Digest is very much interested in obtaining such material. Send them in with full details, including stamped envelope, so rejected copy may be returned. The work must be entirely original, not copied.

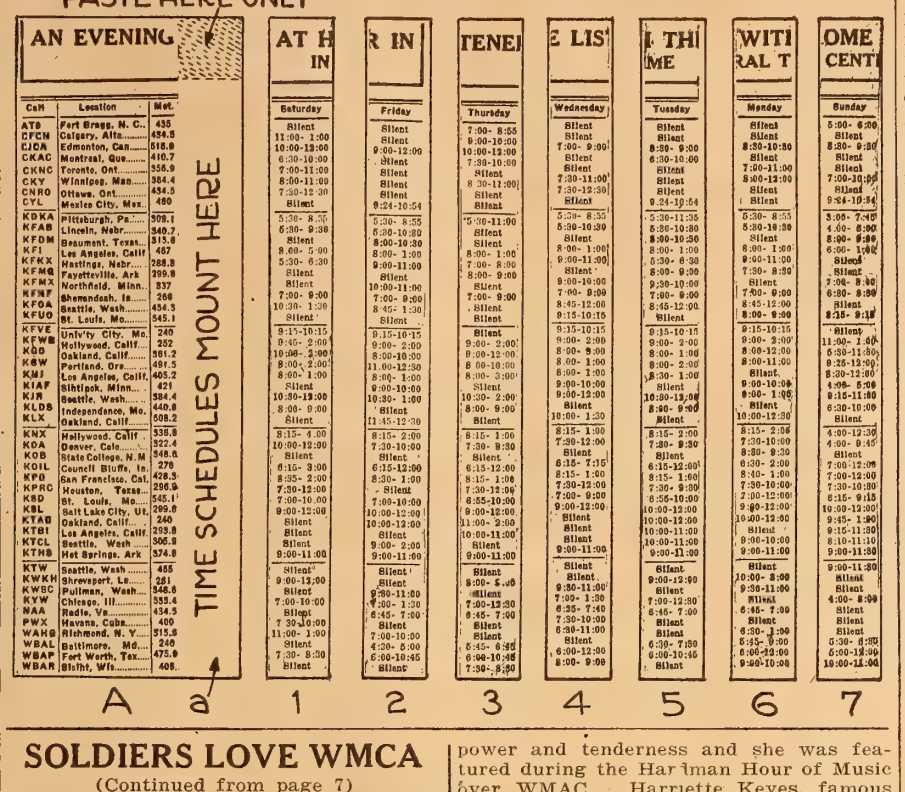
HOW TO CUT AND MAKE MOUNTING



SOLDIERS LOVE WMCA

(Continued from page 7)

success of these productions? Many deep and ponderous councils floundered through the problem. But finally Radio won. The productions were heard on the air and the box office found no reason to complain.

Today Mr. Weir is able to present each Thursday, over WMCA, the principals and chorus of the leading Broadway shows at a midnight special studio performance.

Many celebrities have been heard over the WMCA microphone. One of the more recent artists to make history there was Samuel Siegel, world famous mandolinist, who surrendered all that he had achieved with this small instrument twenty years ago, because he could not persuade the world to regard the mandolin seriously. He alone had brought it to the heights of artistic success. Wherever he appeared he was acclaimed but there it ended. The world at large, not having heard the master, smiled at the mandolin as a college serenader's toy. For twenty years, Siegel put his mandolin aside nor could he be persuaded to play it again until recently.

Then friends induced him to bring it to Radio Station WMAC. He played. A flood of letters indicated that he was still the master and he himself was satisfied because now he hopes through the Radio to reach millions and prove to the world that the mandolin is capable of the finest artistic achievement.

Miss Lois Mayer of Paris, Texas, was discovered to have a voice of extraordinary power and tenderness and she was featured during the Harriman Hour of Music over WMAC. Harriette Keyes, famous on the Victor records and on the stage the country over, was annexed as one of the regular stars at the MsAlpin studios. Louise Bave, who at the age of 19, made her debut at La Scala in Milan, under Toscannini was brought by Arthur L. Lee, managing director of the McAlpin, to the WMCA station as a regular feature.

Miss Bave is the girl with the three octave voice taking high G, with ease and clearness. She can sing with the coloratura range most effectively having the depth and warmth necessary for lyric roles.

Benar Barzelay, Polish violinist, who has played at the command of royalty in five European countries, was presented to the audiences of the McAlpin Radio station. Of course, the big features are Ernie Golden's orchestra and Olcott Vail's String Ensemble and the Symphony orchestra.

One of the oldest, WMCA has continued to grow in prestige and stands among the first of the leading Radio broadcasting stations of the United States—and the United States has a long march in the lead of every other country in the world in its popular Radio transmission.

New Belgium Station On Air

BRUSSELS, Belgium.—The province of Liege, which complained of not hearing the Radio-Belgique transmission from Brussels, now has no less than three stations of its own. The opening of Radio-Wallonie was reported recently. Its wave length has been definitely fixed at 285 meters. The newcomers are Radio-Central, 205 meters, and Seraing-Radio, 195 meters.

15,000 Study Spanish

DENVER. — Thousands of broadcast listeners comprising what is believed one of the largest educational classes ever organized, are now studying Spanish every Monday evening over KOA, Denver station of the General Electric company. More than 15,000 persons, representing all nationalities and walks of life thus far have been registered for this course.

Hawaii Heard Every Night

CHICAGO.—Hawaii has been reached regularly each week for the past two months, according to the Stewart-Warner studio of Station WBBM here. Communications received by the station indicate that WBBM is being heard consistently in the islands in the Pacific ocean since winter weather has set in.

Short waves travel farther than long waves and require less power to cover the same distance than the longer waves.

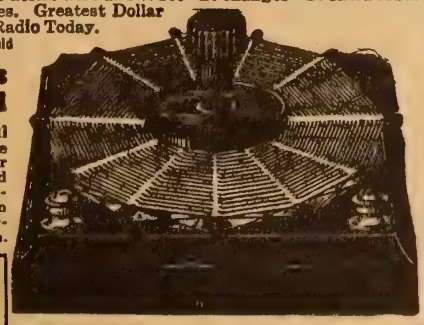
Fred W. Stein.

Steinite Low Loss
Interference Eliminator
No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The *Steinite Interference Eliminator* shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.
Over 150,000 Sold

Improved Results with Tube or Crystal

Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. Money-Back Guarantee.



Mfrs. Famous 1,500 Mi. Steinite 1-Tube Set, $6; Long Distance Crystal Set, $6; Steinite Crystal 50¢ — Three for $1.

Steinite 5-Tube Set $29.75

$2.75 C.O.D. World Storage "B" Battery

12 Cells, 24 Volt units. Equipped with **Solid Rubber Case**, an insurance against acid and leakage. Extra heavy glass jars. Heavy rugged plates. Built with the same care and precision as the famous World Radio "A" Batteries.

Lasts Indefinitely—Pays for Itself

Economy and performance unheard of before! Recharged at a negligible cost. Delivers unfailing power that is clear, pure and quiet. Tube plate (B) voltage is best served by storage battery power. It is, above all, constant, unvarying, dependable and efficient. Radio tubes are far too critical to subject them to power less efficient than that coming from a good storage "B" battery. Your set demands the best!

Tested and Approved by Leading Authorities

The following qualified institutions of merit have tested and approved World Storage "B" Batteries: Radio News Laboratories, Popular Science Institute of Standards, Popular Radio Laboratories, Radio Broadcast Laboratories, Radio Age Laboratories, Lefax, Inc., and others equally important. You can depend on a tried and proven article when you decide on a World Storage "B" Battery. Thousands in use. Order yours today!

SEND NO MONEY

Just state number of batteries wanted and we will ship day order is received. **Extra Offer:** 4 batteries in series (96 volts), $10.50. Pay expressman after examining batteries. 5 percent discount for cash with order. Save 60 percent—get a tried and proven battery of merit, by mailing your order in NOW!

WORLD BATTERY COMPANY

Questions and Answers

Charging A Battery with Generator

EW, Lancaster, Mo.

Can I use the generator off of an automobile to charge a 100-ampere hour Radio A battery? Can I remove the generator and connect it by belt to a small gas engine to do this?

If so, how many hours would it take to fully charge the battery? Would I need to put the car's ammeter in the line when I charged the battery?

A.—It is entirely feasible for you to charge your 100-ampere hour storage battery by connecting it to a 6-volt generator. If the car which you have uses a 6-volt generator, you will then find that the car starting battery is also 6 volts.

It will then only be necessary for you to disconnect the starting battery, take it out of the car and replace it with the battery you use for Radio.

Start your engine and allow it to run fast enough that it is showing by the dash ammeter it is charging. This can be done during daylight hours with the car standing still.

We believe that there is an ammeter on your car which shows the rate depending on speed of engine of charge. It is only necessary for you to divide 100 by this rate to determine the number of hours necessary to run before the battery is fully charged. If no ammeter is on the car, you may then secure a hydrometer for testing the battery's specific gravity. When the specific gravity reaches between 1275 and 1300, the battery will be charged and ready for use.

How to Make Tuning Chart

WEM, Sharpsburg, Ga.

In looking back over your Radio Digest dated November 21, 1925, I found something that I would like for you to furnish me if possible. On pages 27 and 28 is an explanation of how to set your dials to pick up different stations. I have an Atwater Kent five tube set and I am unable to get different stations. If you will furnish me with a chart showing how to get different stations, I will pay you what you ask.

A.—The chart shown in our November 21 issue of Radio Digest we felt was self explanatory. However we are pleased to inform you further about it.

The process which you should follow is to first draw the chart without any of the station notations, on the left of it is indicated the dial readings, while the base line indicates the wave length in meters.

Proceed to tune your receiver, and as you secure a station, note the dial setting, also the wave length of that station. Then place a dot at the intersection of these two values. Once you have secured the location thus for several stations, a line joining the dots can be drawn and others can be found automatically on this line.

Please understand that this is merely a guide, and is of no assistance in assisting you to use your receiver to separate or secure stations beyond the possibilities of your receiver. It is primarily a handy chart for easily determining at a glance the approximate dial setting for a given wave length.

Electric Pad Interference

LHL, Big Timber, Mont.

As a regular subscriber of your valuable paper, I wish to ask if there is not some way in which I can eliminate the interference caused in my set by an electric heating pad used about 100 feet away from my location by an invalid. He uses the pad all day and night, and the prospects are that he will continue to use it for some time. Cannot the thermostat be grounded in some fashion?

A.—Place two heavy fixed condensers, say one or two microfarads, in series across the line just ahead of the pad. Attach a wire to the wire connecting the two condensers, and run this wire to a good ground connection. This may stop the interference. See Radio Digest issues of August 1 and 8 for a complete treatise on the causes and cure of Radio inductive interference.

Radiophone Broadcasting Stations

Corrected Every Week—Part IV

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

United States (Cont'd)

Photogravures of Your Favorite Artists

GALLERY OF RADIO STARS

Suitable for Framing or Placing in Your Album

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest.

UNIVERSITY SERIES REOPENS OVER KDKA

ENROLLMENT IN CLASSES LARGE DURING WINTER

Courses in Public Speaking and Science Subjects Will Be Offered Radio Audience

PITTSBURGH.—The winter Radio session of the University of Pittsburgh studio of the Westinghouse station KDKA recently opened with a greatly increased enrollment and a greater interest manifested in this form of Radio endeavor.

The two new series of talks are given Tuesday evenings on "Public Speaking" and Wednesday evenings which are reserved for scientific discourses. The Radio campus of the University of Pittsburgh now extends over four continents, and while no credit is given for the courses, the correspondence records indicate that thousands of the Radio audience are supplanting the Radio talks by study and reading, many taking advantage of the publications which are issued in connection with the ether courses.

Information Available

The broadcasts are sent out over station KDKA from 8:15 to 8:30 p. m., eastern time, on Monday, Tuesday, Wednesday and Friday evenings. Monthly programs and other information regarding the courses are distributed by the Radio manager, University of Pittsburgh.

The series on public speaking is being broadcast as follows: Tuesday, January 26, "Methods of Preparation"; Tuesday, February 2, "Effective Speech Style"; Tuesday, February 9, "Conversational Delivery."

"Chemistry and Human Progress" is the general subject of the new science series and will be given as follows: Wednesday, January 27, "Dyes as a Civilizing Factor," A. Lowy; Wednesday, February 3, "Explosives and Human Progress," Gebhard Stegeman; Wednesday, February 10, "Speeding Up That Process" (chemical catalysts), C. J. Engelder; Wednesday, February 17, "Where Will Chemistry Lead Us?" A. Silverman.

Start Two New Courses in Appreciation of Literature

BOSTON.—With the completion of the two courses in the psychology of understanding people and backgrounds of English literature, Westinghouse Station WBZ, is now broadcasting two new educational courses under the auspices of the university extension division of the Massachusetts department of education. The new courses consist of a series of lectures broadcast weekly on Tuesday and Friday evenings at 7:30 o'clock, eastern time.

The individual topics for the coming lecture follows: Jauary 26, The new satire: humorous criticism of American life in drama, in fiction and the magazines. February 2, Amy Lowell, 1874-1925; an appreciation and estimate. February 9, Epic moved and tabloid novel; the case of each. February 16, Colyumnists anl literature; the contribution of living newspaper poets and humorists. February 23, The "Great American Novel"; the most distinguished aspirants for the crown.

Appreciation in music is the subject of the course broadcast on Friday evenings by John O'Shea, teacher, critic and director of music of the Boston school department.

WTIC Begins Second Part Wesleyan Professor Series

HARTFORD, Conn.—On January 20, WTIC began the second half of its series of talks by Wesleyan professors. All of the future talks are to be given at 9 p. m., eastern time. In this series, the various phases of taxation, public speaking, poetry, drama and governments are discussed,

The idea of broadcasting educational talks has been received kindly and WTIC's "Air College" has become very popular. The talks to be given in the second course are as follows:

Jan. 27, "Mathematics—What's It For?" Prof. B. H. Camp; Feb. 3, "Life Insurance: The High Spots," Prof. B. H. Camp; Feb. 11, 7:35 p. m., "United States Form of Government," Prof. L. W. Lancaster; Feb. 17, "The Governments of Great Britain and France," Prof. L. W. Lancaster; Feb. 24, "The Governments of Germany, Russia and the Newer States," Prof. L. W. Lancaster; March 3, "The Why of Income Tax," Prof. K. M. Williamson; March 10, "Cooperation—Its Place in Agriculture," Prof. Fossum; March 24, "Life in an English University," Prof. W. E. Peck; March 31, "Public Speaking for the Business Man," Prof. W. E. Peck; April 7, "The Western Reserve of Connecticut," Prof. W. E. Peck; April 14, "Latin—Then and Now," Prof. K. P. Harrington; April 21, "Modern American Poetry," Prof. Snow; April 28, "Modern English Drama," Prof. H. E. Woodbridge; May 5, "The French Mind as Seen Through French Literature," Prof. T. W. Bussom; May 12, "Automobile Fuels," Prof. C. R. Hoover.

WHAT IS OUR COVER MISS THINKING OF?

DID you wonder what the demure little lady on the Radio Digest cover might be thinking of as she gazes so wistfully into the distance?

First let us present you to Miss Candace Holmes, dramatic soprano of Radio Station WBZ, Springfield, Mass. It may be of interest to you to know that WBZ is one of the best heard stations by our cousins across the sea. And as the time approaches for the thrilling tests and the long call from America to European shores, it is quite reasonable to suppose that Miss Holmes imagines she sees the chalk cliffs of the English coast. Beyond is the home of a baron or a prince or maybe just a nice English boy listening in at some five, six or eight "valve" set. And she is singing, and he hears her and he wonders, wonders—

Well, who can guess the thoughts of a maid when she is dreamily gazing into the distance, as does our Miss Candace Holmes on the cover that you have in your hand?

ANNOUNCER READS GOSPEL IN PULPIT

Milton J. Cross, of Station WJZ, Almost Gives Call Letters Upon Finishing Scriptures

NEW YORK.—Honors of all kinds are heaped upon the heads of the nations' announcers, but Milton J. Cross, WJZ's singing announcer, appears to have been the only one to have been asked to take an active part in a church service.

Dr. Karl Reiland, the rector of St. George's church, whose vespers Station WJZ, here, broadcasts every Sunday afternoon, has always held the broadcasters in high esteem, and often offers prayers for their welfare. Recently the Rev. Dr. Reiland asked Milton J. Cross to come to the pulpit and read the gospel, which invitation was accepted, and the announcer read the scripture not only to the Radio audience but to the congregation assembled in the church.

When questioned about the unique experience, Mr. Cross replied: "Oh, it was'nt so hard, but when I was through I almost slipped and said, 'this is Station WJZ.'"

WJZ Has 14-Hour Schedule

NEW YORK.—The high power station of WJZ here is operating almost continuously from 10 o'clock in the morning until midnight daily, according to the latest schedule of programs released.

Looking Ahead

Through the little door to the orchestra pit in a Naples theater a small Italian boy squeezed himself to a place where he could listen and learn. The little door led to a great future and the fame of N. De Rubertis, leader of the Kansas City Little Symphony orchestra, heard over WDAF each week. Read about it in the next Radio Digest.

"Toot! Too-oo-oot! . . . Waugh-ee-e! Oink! Oink. Hee! Haw! Haw! Haw!" When these sounds come over the air from WFDM, Beaumont, Tex., it's the real thing. Among the regular properties at this station are a genuine locomotive, a live pig and a Missouri mockingbird. Pictures and story next week.

Agricultural science by air for progressive farmers who cannot leave their farms is one of the features of the Michigan Agricultural college station, WKAR, at Lansing, Mich. This state Radio station also performs other valuable service for its citizens. Details with pictures in the next Radio Digest.

"A Voice in the Radio Assembly of Cities and States" is the mission set for WBAL by President Herbert A. Wagner of the light and power company which sponsors this recently arrived representative from Baltimore. It may be young, but it has a lusty voice. A page of exceptionally interesting pictures of artists appearing at WBAL in next Saturday's Radio Digest.

Milo Gurney, known as "King Miloplex," a recognized authority on Radio, will continue his interesting series on the A B C Fundamentals for Everybody by describing how the sound reaches the receiver and will give a simple explanation of tuning in in Radio Digest next week.

The Day-Fan 5-tube, single control receiver will be the next feature of the Radio Digest's operating and trouble shooting series. The home builders and even owners of other sets may profit by reading the article next week.

Carl Patterson will give the instructions for wiring the Unitrola, single dial receiver for your phonograph cabinet, in next week's issue of the Radio Digest. This little 12" by 16" 5-tube receiver has struck a popular note.

NEWS BRIEFS FROM THE BROADCASTERS

SOUSA, BAND LEADER, TO BROADCAST FROM KGW

"The Federal Eagle" Week's Drama at KGO—U. S. Navy Band Returns to WRC

John Phillip Sousa, world-famous band director and musician, broadcast a 15-minute talk from KGW, Oregon, recently. Sousa and his band played a short engagement in Portland and during his sojourn in the City of Roses kindly consented to give a brief talk to the KGW Radio audiencee.

* *

"The Federal Eagle," a drama written for the stage by Katherine Browning Miller, Berkeley, California, playwright, will be broadcast by the KGO players, Thursday evening, January 28, under the direction of Wilda Wilson Church. Nine characters will appear before the microphone in the story; and music will be played by the Arion trio.

* *

The January Navy night, a regular Radio feature of WJZ, New York, and WRC, Washington, will be broadcast January 23 from Washington. The music for this program will be furnished by the United States Navy band, Lieut. Charles Benter directing. The Navy band is now in the Capital for the winter, following its successful tour of the South and West during the fall months.

* *

Saturday, January 23, marks the beginning of the Philharmonic concerts for children from WJZ, New York, and WRC, Washington. These programs will be more or less educational.

* *

"Newport" Carl Bamberger, pianist, gives a pianologue through the Crosley WLW broadcasting station every Wednesday evening at 11:40 p. m. central time.

* *

Samuel R. Guard, lay pastor of the "Little Brown Church in the Vale" which broadcasts every Sunday evening from WLS, Chicago, will give an interesting series of sermons dealing with "Jesus, the Real Man." He will use as a basis for his texts "The Man Nobody Knows," written by Bruce Barton.

* *

The best points of interest in American cities are described in graphic manner by W. H. (Billy) Spears, internationally-known travel authority, who is heard Wednesday evening at 8:15 p. m. central time, from the Stewart-Warner station, WBBM, Chicago. "What to See" is the title of his weekly excursions to the various cities of the United States.

* *

June Lee, comedienne of the air, has migrated to New York city and her peppy blues singing may now be heard from WOR, Newark. She is known in the east as "The Vagabond Singer" because her voice has been heard from so many microphones. Middle-westerners remember her at WQJ.

* *

Blanche Elizabeth Wade, who has been broadcasting a series of children's stories concerning the adventures of Sir Hobgoblin for some time past from WEAF, New York, has recently extended her Radio audience. Her Friday evening stories are now heard by the Radio audiences of WEAF, WJAR, WOO, WCAE, WGR, and WEAR from 7:30 to 7:45 p. m. eastern time.

* *

Wednesday night has become Rochester night for WGY. At 6:45 p. m. eastern time the Eastman theater orchestra of Rochester will give a program and at 8:05 o'clock a special program by the combined musical clubs of the University of Rochester will be broadcast from that city in cooperation with Station WHAM.

* *

In order to provide the Radio audience with a greater knowledge of music, the Conservatory of Music, will soon broadcast a series of descriptive talks upon the various phases of music on Tuesday evenings, at 7 o'clock, central time, through the Crosley WLW station in Cincinnati.

* *

Semi-classical music composed when the world's greatest musicians were in their gayest moods will make WSAI a pleasant station to dial for Wednesday evenings at 9 p. m. central time. The Cincinnati Symphony orchestra contributes the artists who will play these popular selections under the supervision of Robert M. Visconti. The popular Blue Grass tenor is the soloist.

* *

By tuning in for WEAF, WCAP, WJAR, WWJ, WEEI or WGR Friday nights at 9 p. m., eastern time, the Radio fan may become an accomplished harmonica player. These lessons are given during the closing five minutes of the Hohner Harmony hour.

$100.00 TO CHAMPION LISTENERS

ALL IS READY FOR OVERSEA RADIO TRIALS

Cuba, Canada, Mexico and United States Silent One Hour Each Night

Test for North America

Last Two Days of Week Will Have Hour Set Aside for Stations on This Continent

Every broadcaster in Cuba, Mexico, Canada and the United States will be silent for a full hour on January 24, and daily for four days thereafter, according to officials of the fourth annual International Radio Week committee, while three-fourths of the broadcasters in the United States, Canada, Mexico and Cuba will be silent in the same hour on the last two days of the week when broadcasters in North America conduct the first North American distance test.

The test hour each night will begin at 11 o'clock eastern time (or 10 central, 9 mountain and 8 p. m. pacific time), the first test hour being on Sunday, January 24. In the hour preceding this, broadcasters in the United States, Canada, Cuba and Mexico will transmit special programs for the benefit of Radio listeners in foreign countries, extra power being used in many cases. Announcers at American stations will give their call letters in several foreign languages in this first period, 10 to 11 o'clock, eastern time, and listeners will soon grow familiar with the languages used, so that on the entry of the American silence the voices of foreign announcers who will come on the air in special programs for American fans will have a familiar ring.

How Week Is to Be Divided

On the first night of the tests, Sunday, January 24, British broadcasters will fill the air. Some of the foremost Radio stars of England are scheduled to appear before the microphone in special programs. When it is understood that 11 o'clock in New York is only 8 o'clock in California, it is 4 o'clock the following morning in London and 5 a. m. at Berlin, then American listeners will realize that the foreign stars are inconveniencing themselves considerably in an effort to entertain Yankee listeners.

On the second night of the tests, Monday, January 25, stations scattered throughout Continental Europe will be heard, while on the three following nights both English and Continental stations will be on the air.

Stations OAX of Lima, Peru, and LOX and LOW of Buenos Aires, Argentina, South America, will also be on the air in the International tests, and will broadcast during the first five nights.

How Fans Must Report Programs

In view of the late hour at which the broadcasters will face the microphones overseas, the Radio Week committee has arranged to receive from the broadcasters overseas who are active, complete logs of their programs. Reception of programs to be wired to Radio Digest or the committee for official verification.

These confirmation programs, as they are styled, will be prepared and edited by the committee and published after the tests are completed. They will also be available after the tests for checking claims of distant reception by Radio fans.

Fans who wish some official recognition of their feats in logging overseas broadcasts should take especial pains to see that their letters outlining the stations heard give the particular number listened to, as well as the exact minute of the reception. The second important point is the enclosure of a return addressed envelope, properly stamped.

Special Continental Tests Friday

On Friday and Saturday of International Radio Week the plan of broadcasting will be varied. During the customary silent hour, instead of hearing the voices of English, French, German or other foreign announcers, the listeners will have an opportunity of hearing stations on the North American continent that have perhaps never come into the listener's set before.

Beginning promptly at 11 p. m. eastern (10 central, 9 mountain, 8 pacific) time on Friday night, January 29, all broadcasters in the United States, Cuba, Mexico and Canada will shut down as usual, except the broadcasters in the Atlantic and eastern time zones. These stations will have the air free for them for fifteen minutes. During this quarter hour it is expected that many Pacific coast listeners will log eastern stations for the first time.

Following the first fifteen-minute period, the eastern stations will shut down, and the broadcasters of the central time zone will occupy the air. At promptly 11:30 p. m. eastern (10:30 central, 9:30 mountain, 8:30 pacific) time, the central time stations will shut down and the mountain time stations will take the air. At 11:45 p. m. eastern (10:45 central, 9:45 mountain, 8:45 pacific) time, the mountain time stations will sign off and Pacific coast broadcasters will take up the programs, occupying the air exclusively for the remaining fifteen minutes of the silent period.

On Saturday, January 30, at the customary silent hour, Canadian stations will have the air free in an all-Canadian period, broadcasting from 11 to 11:15 p. m. eastern (10-10:15 central, 9-9:15 mountain, 8-8:15 pacific) time. The broadcasters in the northern half of the United States will come on the air during the second fifteen minutes of the hour, while broadcasters in the southern half of the United States will occupy the air during the third quarter of the hour. The fourth quarter of the hour everyone will be silent except broadcasters in Cuba and Mexico, where special programs have been arranged for Canadian listeners.

Will Resume Programs

Each night, after the conclusion of the International test period, broadcasters regularly scheduled to operate will come on the air in their regular programs, picking up the schedule at 12 midnight, eastern (11 central, 10 mountain or 9 pacific) time.

In view of the fact that many broadcasters in widely separated sections of the country operate on the same wave length, it is more than possible that fans will find it possible to adjust their sets in advance, counting on the wave length adjustment to bring in the desired distant station the minute the local broadcaster on the same wave has become silent.

Special programs are being arranged by the stations who will participate in the North American tests.

Further world-wide communication records were made during the past year by Westinghouse broadcasting stations when KDKA's programs were relayed in South Africa and Australia and heard in Japan.

Special International Tests
TABLE OF CONTENTS

TO AID American and Canadian fans interested in receiving the test programs during International Radio Week, which is from Sunday, January 24, to Saturday, January 30, inclusive, the following special table of contents is given so that any particular data may be found:

Summary of International Radio Week, what it is and all about it, Page 3, first column
$100 Radio Digest Gold Award, for best foreign reception, Page 3, fourth column

London Fails to Get Excited, but cooperation is given.....Page 8, first column
Calendar of the Week's Events.....Page 8, second and third columns
Fame for Listeners Reporting First Reception in their communities, Page 8, fourth column
Principal Foreign Stations, including calls, wave lengths, etc. .....Page 9

YOU MAY HEAR HER ACROSS SEA

Marjorie Hayward, famous English violinist, who is loved by the music lovers of her native land. It is hoped that the strains created by her genius will be wafted across the Atlantic to us, as she is expected to broadcast during the international tests.

GOLD AWARDS FOR WINNERS OF 1926 TESTS

Radio Digest Offers Six Prizes for Best Reception of Foreign Programs

Open to U. S. and Canada

Board of Nationally-Known Radio Leaders to Judge Reports of Listeners In

One hundred dollars in Gold for the best reports on reception of foreign stations during the International Radio Week tests! That is the offer the Radio Digest is making as a contribution to the skill of American and Canadians listeners in picking up programs of Europe and South America between the dates of January 24 and 28, inclusive.

In announcing the contest, the Radio Digest takes another step forward as leader in the art of broadcast reception The prizes are six in number: first, $50; second, $25; third, $10; fourth, fifth and sixth, each $5. In the event of tie, a prize identical in every respect with that tied for, will be awarded to each tying contestant.

The contest is open to every listener in Canada and the United States. There are no strings. The rules and basis of judging appear below.

Well-Known Judges Are Appointed

After carefully looking over the many possible candidates for judges in the Radio Digest International Reception contest, the following board of judges was appointed:

The Editor of Radio Digest, chairman, to represent the broadcast listeners of America and Canada; Hon. Frank W. Elliott, of Palmer School station, WOC, and president of the National Association of Broadcasters, who will represent the broadcasters; and Federal Supervisor of Radio, E. A. Beane, well-known in official Radio circles, to sit as judge and representative of the Radio section of the United States department of commerce.

This board of three judges will view all reports submitted in the contest and will select the winners.

Rules of Reception Contest

1. The contest opens Sunday, January 24, 1926 and will close at midnight of Thursday, February 4. All reports must be received by the Chicago offices of Radio Digest by that time to be considered. Reports received after that time will not be admitted to the contest, but will be confirmed as to their authenticity, however.

2. The reports will be judged upon four points: First, the fullest and most accurate description of programs received; second, the highest number of stations received; third, the greatest distance covered; fourth, the best and NEATEST report.

3. The report must include the name of the manufacturer and the style or type number of manufactured sets used by listeners. If a homemade or "kit" set is employed, the names of the manufacturers of the principal parts or the kit must be included. If headphones or loud speaker were used, the name of the maker must be given.

4. The final note to remember is that the reception contest is only for the first five nights of the tests, from Sunday to Thursday inclusive, and reception of European and South American stations ONLY are to be reported.

Other Contests Are Announced

Besides winning national recognition as successful in the International Radio Week contest conducted by the Radio Digest, the victors in the contest will be pictured in Radio Digest in future issues of this publication.

Several other contests and prizes have been announced by others interested in International Radio Week.

Prohibited Wave Lengths

In Germany amateurs are forbidden to transmit on the following wave lengths: 26, 32, 35, 43, 59 and 74, because these have been adopted for commercial purposes.

"Greetings, World!" Big Radio Test Starts

H. R. H. the Prince of Wales (center) has been asked to address President Coolidge via air on behalf of Great Britain.

One of the keenest wits of 2LO, is John Henry (below), scheduled to greet Americans during test week.

If Americans get any results at all during the International Test Week they will be sure to hear the Orpheans of the Savoy Hotel (below), one of the most famous Radio musical organizations in Great Britain. They have been heard over the air in the United States a number of times.

DX Fans Begin Logging All Nations Tomorrow Night. British Notables Shown Here Considered Among Those Most Likely to Be Heard. How Foreign Stations Can Be Recognized.

ALL SET for the big Derby! The great seven-day International Radio race starts tomorrow night. All DX colts are warned to be at the barrier when the clock strikes the hour set. Although the race is all inclusive, Americans will be most interested in tuning in European stations and probably European stations will be most concerned in trying to pick up the ether waves sent out from this hemisphere.

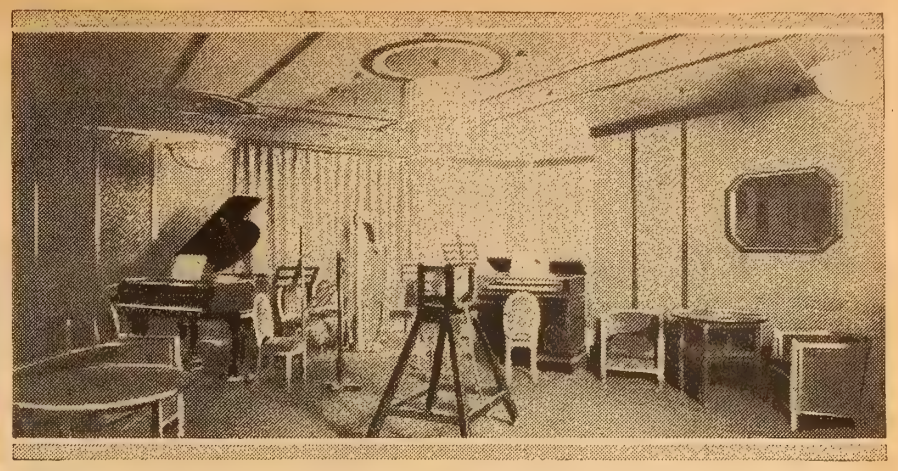
How is your set working, Mr. DX? Everything all tuned up and ready to tune in? Is every available tube in good working order and hitting 100 per cent? Do the batteries spark pretty and snappy? How about all those fussy connections that sometimes let the little weak waves, all tired out from their long run, perish before they can reach the ear? If you don't know how to do the doctoring yourself it will be worth while to let a regular Radio service man do the job.

There will be millions of entries in this great race. Old Boy Imagination may work some shabby tricks on well meaning listeners. Everybody expects something better than ever before in the way of reception. The experts seem to encourage that hope—better sets and better transmission. But there must be no bluffing by cribbing from the published programs and reporting that they were heard in full. No, no, no, can't do that this year. The arrangements committee has arranged a trick system of programs. Some of the numbers that will be published most conspicuously will not go on the air at all. So be dead sure that you actually heard what you think you heard before you go broadcasting your success to the neighbors. You may hear a funny little noise like kidding laughter it you're wrong.

Radio Digest, in this issue, aims to give every DX fan the utmost help. It has kept the cables humming for weeks in order to get the programs as much in detail as possible. On page 9, will be found an interesting table. This page should be in front of every amateur who hopes to catch a snatch of song or an announcement from across the water during the coming week.

ANALOGOUS waves between American and European stations are given. This will help you to find the European station you are seeking, provided it is within the limits of the American waves, that is from 200 to 545 meters. For example, you live in the middle west and you wish to find the London station, 2LO; you find that 2LO has a wave length of 365 meters. On your dials you find that the Kansas City station, WDAF, has 365.6 meters. A hair's difference and you will be tuned for the London station, if other conditions do not prevent. You will probably hear 2LO even at 365.6 meters.

In the same manner you may be able to get Barcelona (Radio-Catalana) on 460 meters which is close to WCAE, Pittsburgh, broadcasting at 461.3 meters. Or you might get Koenigsberg on 463, or FPPT, Paris, on 458 meters.



In the picture at left may be seen the wide-spread antenna of Station Radio-Belgique at Erussels, Belgium. This station is capable of generating six kilowatts but operates on one and one-half. The studio of Radio-Belgique is shown above. Note the wide floor space and peculiar arrangement of microphone in the center. Belgians will greet America over the air from this room with special concerts during International Test week.

Radio-Belgique Popular Abroad

RADIO-BELGIQUE of Brussels on a 263-meter wave length and operating with one and one-half kilowatts of power, is one of the European stations most counted upon for American reception during the International Test week. This point on the dials is near WMAK, Lockport, N. Y., 265.5 meters; or WBCN, Chicago, and KFNF, Shenandoah, Iowa, both on 266 meters. It is one of the liveliest and most enthusiastic of stations in spite of severe handicaps in the way of heavy taxes both for transmission and reception. Monsieurs Huber and Van Soust are the administrators who have made this station popular.

LINKOPING broadcasts on 467 meters, the same as KFI at Los Angeles. Americans who have logged WDWF, at Providence, R. I., on 440.9 meters will find themselves close to Radio-Toulouse, Paris, France, on 441 meters. Then again WEEI of Boston, at 348.6, will be close to "La Petit Parisien" of Paris, with a wave length of 348 or 345 meters.

Parle vous France, soldier?

Nobody needs to tell you, then, that if you hear "Allo! Allo! Allo!" calling through your loud speaker that some French announcer is on the air over there. That is the way the French stations sound off—or, rather, on when they start to broadcast. Just sit back in your chair and say again, "So, this is Paris!" It is, unless it should happen to be Belgium. The Brussels station also calls "Allo!"

However, if it should be the Little Parisian you will probably hear the announcer repeat the call in English. Or should it be the FPPT of Paris, you will hear the announcer say "Emissions de l'Ecole Superieure des Postes et Telegraphes." It has some official connection with the post office and telegraph, so that it has an exclusive advantage in using the telephone lines for distant pick-ups for broadcasting. These include sporting events, theatricals and public speeches.

In Spain the announcer comes on the air like a top sergeant drilling an awkward s q u a d—"Atencion!" (He pronounces it "Aw-tain-thee-own"). They have the call letters EAJ and it is a girl at the mike who announces more often than it is a man. Suppose you are trying to pick up Madrid say again, "So, this is Paris!" It is, unless

This gentleman (above) writes poetry but he doesn't have to depend on selling it for his living. No, indeed, for he is none other than Prince Wilhelm, the poet prince of Sweden. He has been invited to participate in the International Test and Americans may hear one of his poems via ether. Below is one of the 2LO "gangs" that may be heard next week. Robert Hale (extreme left) had just finished a broadcast in the airplane.

at 392 meters (just above WTAM at 389 meters) and everything goes right, you will hear the announcer say "Estacion Radio Iberica" (Ayss-tar-thion Raa-dee-oh Ee-bear-ee-ka). If the International Test could be arranged at an appropriate hour the sounds of a bullfight might be heard, as these affairs are frequently put on the air on a Sunday afternoon.

In Barcelona there are two stations, EAJ1 and EAJ13. The first is called Barcelona and the latter Radio-Catalana. In Bilbao are located EAJ9 and EAJ11. At Cadiz is EAJ3, which opens its hour on the air with the tick of a metronome (tic-tac para syntonizar). We may be fortunate enough to hear the velvety voiced lady who announces at San Sebastian, EAJ8. She clearly enunciates every syllable and frequently the identification is repeated in French and English.

German stations go on the air with a variety of signals. Hamburg, Breslau and Munster proclaim their aerial presence with gongs. These gongs are also rung between the various numbers on the programs. Munster sends out the letters MS in code. The announcers call "Achtung!" (Awk-tung!) or "Haa-low!" This is followed by the name of the town.

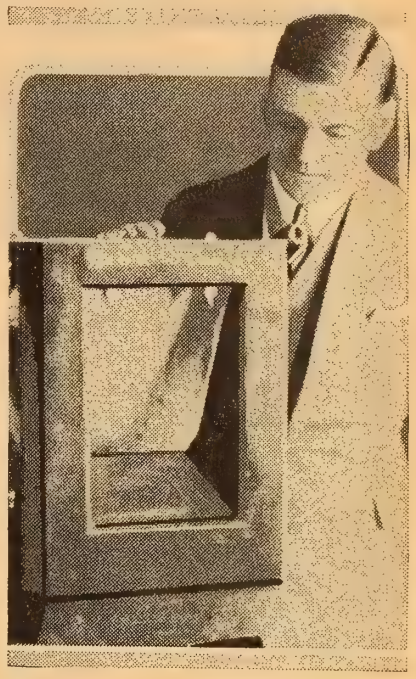
BERLIN can be picked up on three wave lengths—if your dial is big enough. The 505-meter length, however, is the one most likely to be heard by listeners in America. This is not far below KLX, Oakland, Calif., or WIP and WOO of Philadelphia, who are all on 508.2 meters. Koenigswusterhausen is claimed to be the first broadcasting station in the world. The date given for the first broadcast concert is June 19, 1920. The history of broadcast in America, disproves this claim, however, as there were two stations going here previous to 1920.

We have small hope of hearing anything from Austria as the Radio has not been developed there so extensively as it has in other European countries. The two principal stations are Vienna and Graz. The former comes on the air with the code signals for V (...— ...—) followed by the announcer's call "Hallo! Hallo! Hier Radio-Wien auf Welle 530 meters." Graz announces similarly except it uses the code for RV (.—. ...—).

There is very slight chance of the Czecho-Slovakian stations spanning the Atlantic. But if the elements are very kind the Prague-Strasnice may be distinguished by the announcement "Zde Radio-Journal Praha." The conclusion is indicated by the anthem, "Kde, domov muj" or "Pod Tatron se blyska."

If you are trying to get a red glow in your bulbs by tuning in Moscow, you may hear this, "Eto goboryt Moskowskaia Centralnaia Radiotelefonia stansia stantsia imeni Kominterna."

To take the Siberian shivers out of our spines let's turn the dials down to sunny



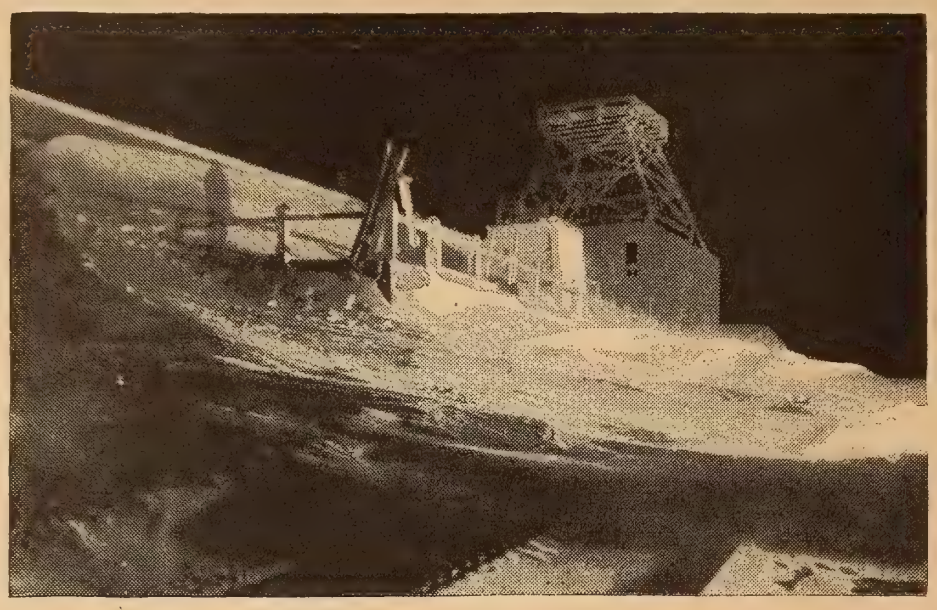
Close-up view of Marconi microphone (above) being demonstrated in Radio-Belgique studio by the literary director. Note the substantial proportions and sturdy support.

Italy. You will know you are there when you hear a sonorous, ringing feminine voice announcing, "Unione Radiofonica Italiana, Radio-Roma." This station transmits almost with the same strength as Barcelona, and it is quite probable that many American listeners will hear Rome, Italy, over the air during the test week. It also is possible we may hear Radio-Milan from Italy.

In Switzerland, we may possibly hear "Societe Romande" at Lausanne or "Radio-Geneve" from Geneva. Sweden calls "Hallo! Hallo! Radio-Stockholm." Oslo, announces in English. Hilversum is the principal broadcasting station in Holland, and you may hear it coming through the starlight thus: "Hier Het Hilversumsche Omroep. Radio Statie Hilversum." For the benefit of the English neighbors across the channel, the announcer generally adds "Hilversum station calling."

Incidentally DX trotters are advised to dig up some of the principal language dictionaries and concentrate on pronounciations. Yes, sir! International broadcasting is certainly destined to bring about a universal language. You'll agree, after hearing—that is, IF you hear—a couple of dozen European announcers describing the last and next numbers.

Brave Pikes Peak Snows to Thrill Listeners



THESE pictures show progress of Colorado adventurers as they started to climb up famous mountain New Year's Eve for Radio stunt. Lower—plodding up snow banks level with telegraph wires. Center—arrival at Summit House, top of Pikes Peak. At top—structural work where fireworks welcomed New Year—part of house buried in snow. Their experiences were broadcast to Radio listeners throughout nation.

Ten Dare Death to Reach 'Top of World'

For KFXF

By H. P. BROWN

ANOTHER thrill was furnished to Radio listeners last New Year's Eve when a party of ten men ascended the steep and rugged sides of Pikes Peak to set off flares and rockets that made the sober old peak look like Vesuvius on a spree. The scene was visible for 150 miles.

Details of the adventure and descriptions of the scenes were broadcast from the studio of the Pikes Peak Broadcasting company at Colorado Springs under the direction of W. D. Pyle, chief announcer and manager.

Making the cold brow of Pikes Peak before the winter snows have melted is no stroll through Peacock Alley as the writer may very well affirm through personal experience. These men of the Adaman club who climbed the 14,108 feet to the top toiled through the night and a stinging snow storm.

It takes reserve and persistence. Up one incline, a sharp turn and a plodding, dogged push to the next. There is no place to rest. Stand still and you perish for there are no dwellings after you get into the upper fringe of timberland.

Weird winds swirl and screech through the crags and boulders. Ghost trees stretch out forbidding arms all gnarled and twisted in their struggle for foothold on the naked flanks of rock. House high drifts bar the road to all vehicles. One must skirt the edges of these or crawl like a snake, dragging such supplies of food and blankets as may be needed.

Here the wind has swept the road bare of snow and the gravel craunches under the dragging web as the climber plods along gathering fresh breath for the next battle and the next thousand feet. Here's a short cut where the drift is a help rather than a hindrance. It slopes down covering scrub and topsy turvy rocks like a smooth and slippery gable to another treadway rooftreet 300 yards above.

* *

SLIP and you are due for a long roll. Remove your snowshoes and you sink out of sight in a soft, feathery cloud. But you squirm and drag along, pulling your load—for every man must carry his share of the necessary accessories and you come again to the telephone line with the snow up to the armpits of the poles and you know that once more you are on the regular road.

Suddenly you discover that the light is fading out of the sky. Soon it will be dark. Your cheeks, numb where they are exposed, and raw where the edges of the goggles have worn through the skin, remind you that they are still capable of sensibilities for the sleet comes dashing with the wind to bite and sting you to the quick.

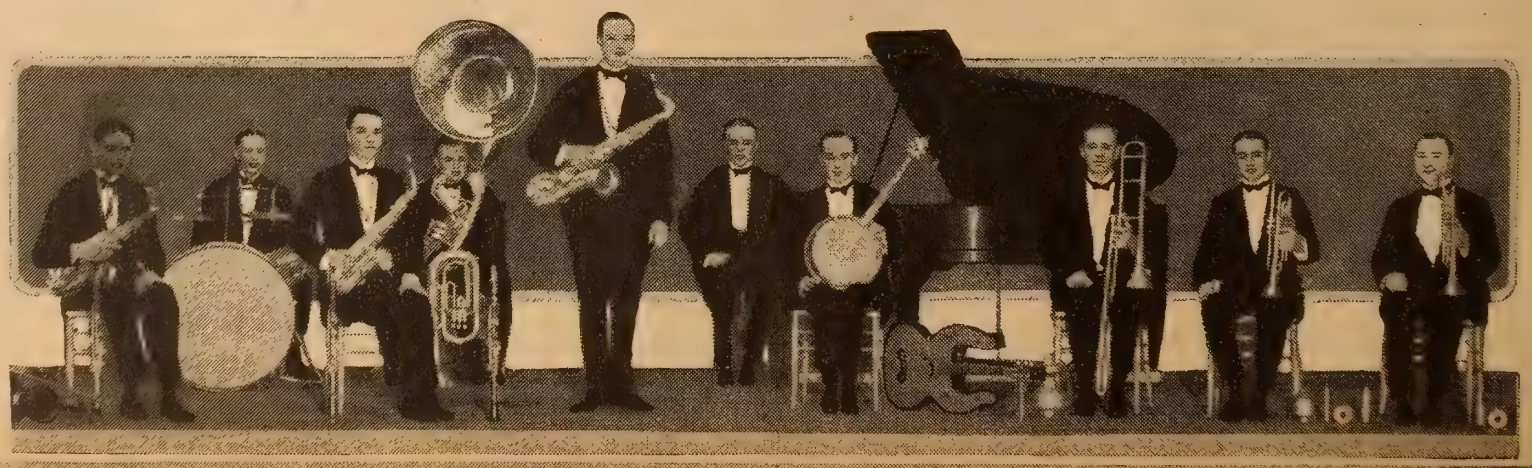
Darkness and a lowering snowstorm! Thank God for good, staunch companions or your heart would stand still. Death has come to others in these barren heights and it will come again for others—but not for you. You fill your lungs full but you do not relax—not yet. You must push on and upward. At the top there is a house. It will afford shelter and there is chopped wood beneath the drifts near the door.

Twilight settles down. The moon is now clearly defined and the stars are coming through the blue. The party is all together again. There will be no more straggling. But before the last lap you halt for a few minutes to sit on your packs and counsel with each other. The plans are decided. All has gone well. The guide is confident. Two hours—or possibly two and a half—and you will be at the top.

It is already dark beneath the clouds that have

(*Continued on page 29*)

While the reports came in from the ten mountain climbers and their progress on New Year's Eve at Station KFXF, Warner Stone's Columbians (below) furnished the music.



Radio Breaks Silence of Shepherd's Night

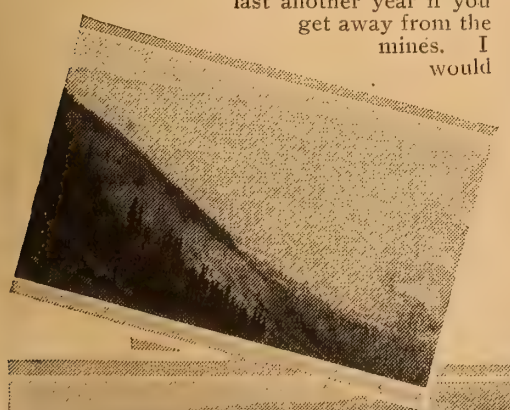
WORLD War Hero Leaves Mines to Fight White Plague, Wins, Then Conquers Loneliness of Sheep Camp in Montana Foothills

The "real guardeens of the flock," writes Zingaro of the two sheep dogs (above). Shep, the black one, has three coyote pelts to his credit. Babe, the pup, has the thrill of his first kill yet to come. "You have one year to live unless you leave the mines and get 12 hours of sunshine each day," said a Pennsylvania doctor to Zingaro (above, right).

SOMETIMES even a Radio listener can be the hero of an interesting story. This statement may be questioned and even scorned by a few of our very celebrated personalities who take the air night after night from the leading broadcasting studios of the nation. But we submit to the readers of Radio Digest the life story of the extraordinary listener, sheep herder and Radio fan in the desolate canyons of the Crazy mountains, Mr. "Zingaro of 636, Big Timber, Montana."

Zingaro came out of the world war the straggling shell of a human being. The murderous artillery and trench life had drained his vitality to the limit. But he sought again to take up the current of his interrupted existence in the coal mines of eastern Pennsylvania. He went down to the black pits to dig for his daily bread, but quickly found the guns and the gas had been too much for him. The dust choked him. His buddy helped him to the receiving ward where a white aproned doctor looked him over critically, wiped a blood fleck from his lips and thumped him on the chest.

"I think you will probably hold out for another year," said the medical man with a long finger slowly digging into the depths of his stubby beard. "You might last another year if you get away from the mines. I would prescribe about twelve hours of sunshine a day mixed with liberal doses of 100 per cent atmosphere."



"So far and no farther," said Shep to the committee of three sent forward to negotiate (above). "Mary had a little lamb," the bedtime story teller was saying at Omaha—so the lambs listened in (in circle). Barney, Zingaro's pony on narrow ledge. Flocks in Crazy Mountain foothills (below).

Disheartened and sick as he was, the vet had faced death too often to give up. So he liquidated his few assets and shook the coal dust of Pennsylvania from his old hobnailed brogans.

* * *

CONDUCTOR Flannagan had held the freight for a half hour on the siding at Big Timber waiting to the Northcoast Limited to pass. He was fingering the tissue paper orders when Tony, the head brakeman, jumped down from a gondola beside him.

"That lunger bozo in the box car got off," said Tony.

"You didn't make him, did you?" asked Flannagan.

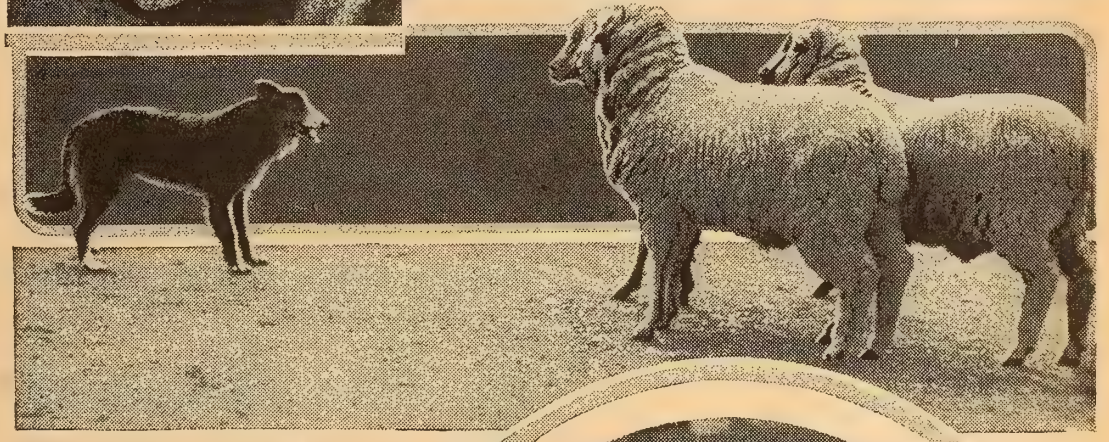
"No, he never knew we was wise to his being in the old box car. It's a shame ain't it, a guy all shot to pieces like that havin' to bum his way. Maybe he'll get his steam up again here. There comes Forty-nine, now."

Zingaro stumbled his way up the narrow street of the little Montana town. He leaned against a post in front of the drug store and looked off at a snow-capped mountain. The boss of the Hanan sheep ranch came along with a bunch of letters he had just received at the post office and stopped to give the stranger a curious appraising look.

"Excuse my being nosey, but you appear kinda glum, stranger. What's up?"

Zingaro said he was hungry and wanted a job. He'd take any kind of a job, so long as he could get twelve hours of sunshine a day and large doses of 100 per cent air.

"I got the job for you, so cheer up. You're goin' to 'tend sheep where you can get all the air and (*Continued on page 24*)



FAME AWAITS HE WHO GETS FOREIGN CALL

First to Get Stations Each Night to Be Nationally Known

Daily Reports to Press

Radio Digest Has Experts Scattered over Country to Provide Fans with Latest Information

Every minute of the International tests will be reviewed by a large staff of Radio Digest observers scattered over the country and listening in with the most sensitive types of receivers. The reports of these observers, who will not enter the contests because of their professional rating, will be available to American and Canadian fans who wish to obtain any information concerning the International broadcasts, etc.

Fans in the eastern half of the country are directed to write or telegraph PREPAID to the New York city offices of Radio Digest, located at 247 Park avenue, New York city. Fans in the Middle West and western states or western provinces of Canada are directed to write or telegraph PREPAID to the Chicago offices of Radio Digest, located at 510 North Dearborn street, Chicago, Ill.

No matter which office is communicated with, information will be telegraphed COLLECT, unless the inquiring listener-in makes it plain that the information is to come by mail. The latter method, however, is not recommended on account of the short span of time occupied by the tests.

First Reception Report

The fan who is sure he has received foreign stations FIRST in his locality, should immediately telegraph PREPAID to the closest Radio Digest office, New York or Chicago. The Radio Digest will release information to the press at large concerning these first receptions.

Telegrams must contain a short sketch of the program received, the call letters of the station heard, the local time received, the approximate meters wave length, and the address of the listener.

If satisfied that the sender of the telegram was first to receive a foreign station in his or her town or locality, after having checked the details against the bona fide data in the offices of the Radio Digest, this publication will make nationwide release of the information, giving credit to the successful listener.

Inasmuch as tens of thousands of listeners will no doubt take advantage of this means of receiving credit for their work, it is emphasized that telegrams must be sent PREPAID. No COLLECT telegrams will be received.

Who will get the credit in your community? Send the telegrams any one of the five foreign test nights (SUNDAY, MONDAY, TUESDAY, WEDNESDAY or THURSDAY). Press reports will be issued each night.

Official International Tests
CALENDAR OF EVENTS

THE following official calendar of events has been announced by the International Radio Week committee for the tests beginning on Sunday night, January 24, and ending on Saturday night, January 30:

Sunday to Thursday, inclusive: From 11 to 12 p. m. eastern time, 10 to 11 p. m. central time, 9 to 10 p. m. mountain time and 8 to 9 p. m. pacific time, silence will be observed by American, Canadian, Mexican and Cuban broadcasters. High power stations in England, Continental Europe and South America will be on the air. Details on page 8.

Friday: Beginning at 11 p. m. eastern, 10 p. m. central, 9 p. m. mountain and 8 p. m. pacific time, and continuing for the first quarter of the hour, broadcasters in the atlantic and eastern time bands will be on the air while others remain silent. The second quarter of the hour will be occupied by central time band stations while all others remain silent. The third quarter of the hour will be used for sending by mountain time band broadcasters while all others remain silent. The fourth and remaining quarter hour will be given over to broadcasts from stations in the pacific time band while all others remain silent.

Saturday: Beginning at 11 p. m. eastern, 10 p. m. central, 9 p. m. mountain and 8 p. m. pacific time, and continuing for the first quarter of the hour, Canadian broadcasters have the air. The second quarter of the hour broadcasters in northern United States will be on. The third quarter of the hour, southern United States stations broadcast. The fourth and remaining quarter hour will be given over to stations in Cuba and Mexico. Only one of the groups will be on the air during any one quarter hour.

British Notes

For an hour's broadcasting from 2LO, London, Chaliapin, the world-famous Russian basso, received a fee of $5,250, which is the highest fee ever paid a single artist for broadcasting, eclipsing the previous record of Mme. Tetrazzini by $250.

* *

As illustrating Radio's influence in Britain, a lecturer, broadcasting on architecture, expressed his willingness to describe Southwark cathedral at 11 o'clock on a certain day. One thousand people were there to meet him.

* *

One result of the British postmaster general's successful prosecution of an unlicensed listener has been the taking out of hundreds of Radio licenses throughout England in a brief time.

* *

The first step towards the installation of broadcasting facilities at Britain's universities has taken form in the opening of a new studio of the British Broadcasting company at Oxford. The Oxford studio can only transmit via 2LO, with which it is linked up by land line. There is no high power station at Oxford. For 5XX to broadcast the Oxford program necessitates a double relay, Oxford-London and London-Daventry.

Frankfort, Germany, Builds New High-Powered Station

FRANKFORT, Germany.—A new high power broadcasting station will be ready here in February. This station will operate with the same power capacity as Konigwusterhausen and Munich, 10 kilowatts, and will be a vast improvement on the present Frankfort station.

Frankfort has at present 65,000 listeners and the number is steadily increasing, the programs being constantly improved. Opera is broadcast once a week from the Opera House, and concerts are transmitted regularly from the Saalbau.

Wins $50 for KMA Slogan

SHENANDOAH, Iowa.—Walt Adams of Omaha, Nebraska, is the winner of a $50 prize for submitting the slogan, "Keeps Millions Advised," to station KMA, May Seed company here. The contest brought forth over 4,000 slogans. The second prize slogan was "The Nursery and Seed Station in the Heart of a Nation."

Station Changes

An additional call has been given WDWF, Cranston, R. I. When the Lincoln studios at Providence are used, the call letters WLSI will distinguish it from the original station. Anchorage, Alaska, has a new broadcaster, KFQD, 227 meters, 100 watts.

It is rumored that a new Florida station, WCOA, will open this month in Pensacola. This broadcaster will be called the City of Pensacola and will use 222 meters, 500 watts.

The following stations were deleted last month: KFRM, Fort Sill, Okla.; WCUW, Worcester, Mass.; KFUM, Colorado Springs, Colo; WEBT, Dayton, Ohio; WJD, Granville, Ohio; WTAT, Boston, Mass.; KFXE, Waterloo, Iowa; WCAH, Columbus, Ohio; KFBG, Tacoma, Wash.; WLAX, Greencastle, Ind.; KFUJ, Breckenridge, Minn.; KFJX, Cedar Falls, Iowa; WTG, Manhattan, Kan.; KFGC, Baton Rouge, La.; KFRY, State College, N. M.; WOAC, Lima, Ohio; KFWP, Brownsville, Tex.; WHBY, West DePere, Wis.; WHBR, Cincinnati, Ohio; KFVU, Eureka, Calif.; WGBQ, Menomonie, Wis.; KGB, Tacoma, Wash.; WOCG, Sycamore, Ill.; WPDQ, Buffalo, N. Y.; WHAG, Cincinnati, Ohio; WLB, Minneapolis, Minn.; KWUC, Lemars, Iowa; KDPM, Cleveland, Ohio; WCBG, Pascagoula, Miss.

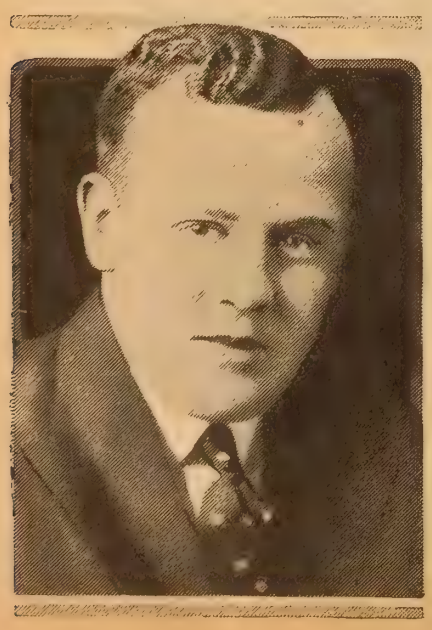
Two New Announcers Heard For First Time Over WEAF

NEW YORK.—The discerning listeners of WEAF have heard for the last few weeks the voices of two new announcers.

The first of these new announcers is Ralph Wentworth of Englewood, N. J., who is announcing for his first time. Mr. Wentworth is a native of the West, but upon being discharged from the army located in New York city, in order to further his musical education. He has played in musical comedies and on a leading vaudeville circuit in addition to frequent church, solo and recital appearances.

The second announcer who joined the WEAF organization recently is Archie Coates, of New York city. He also is announcing for the first time in his career. Previous to his connection with WEAF, Mr. Coates was assistant music critic of one of New York's leading daily papers. He is the author of a book of verse.

Europe's Jazz King



LONDON AIR FANS FAIL TO GET THRILLED

England and Continental Europe Refuse to Be Excited About Overseas Tests

Will Read About It Later

Although Stations Bending Every Effort to Make Trials Success, Listeners Retain Composure

By A. C. Blackall
(London Special Correspondence)

LONDON, England.—Despite the furore in America over the International Radio Week reception tests, London and Continental Europe refuse to get excited. In fact, London, Paris and Berlin still wonder what it's all about. The smaller cities in England and Europe haven't even started wondering.

Europe generally is far behind the United States and Canada in Radio interest. So the special international tests prove no exception.

American and Canadian stations attempting to send their programs to Europe during the test periods set aside for this, will find but a very small audience attempting to dial them in. In the first place, the fans would necessarily have to listen in between three and five oclock in the morning to hear the "special" programs. In the second place, English listeners expect their stations to do the listening for them. If the stations hear America or Canada loud enough to rebroadcast them, and do so, even that will not excite England or France.

Will Read About It Later

The fact is, English and other European Radio fans will be more than content to read the account of the reception and the possible rebroadcasts in their morning daily papers at breakfast time. But take it from one who knows the Englishman, the latter in reading his newspaper will be far more interested in news of Indian uprisings, Australian affairs of state, shipping and commerce items, and the latest status of the heart of David Windsor—His Royal Highness, the Prince of Wales.

English Radio is satisfactory without worrying about the bally programs from North America. The French have their attention on the Dreuses. The Germans are busy rebuilding their economic and moral structure. The Russian have all they need to worry over. Italy is kept busy watching King Victor Emmanuel and Mussolini.

Therefore, the international tests, as far as enthusiasm is concerned, are apt to be more or less lop-sided.

Europe Extends Complete Cooperation

Europe, however, is bending every effort to make the venture a success. As in the past two years, artists of the highest calibre are agreeing to make their appearance at the various studios at about the time the milkman is scheduled to deliver milk.

The best Europe has to offer will be on the air for Americans and Canadians to receive. Perhaps the artists may seem a little sleepy, but considering the fact that the broadcasting in Europe is being done around five and six oclock in the morning European time, North American listeners should have no cause for complaint.

The plans are laid. Everything is prepared. A wonderful week is in store for the American and Canadian distance-loving listeners. But Europe will not get the same thrill the other side of the Atlantic ocean experiences.

The photograph at the left is of no other than Jack Hylton, himself, who is considered the "Jazz King" of England and Europe. Below he is standing with his orchestra, one of the most famous outside of the United States. It is probable that they will be featured during the tests.

FOREIGN STATIONS MAKING TESTS

ENGLAND WILL HAVE FIVE BROADCASTERS SENDING PROGRAMS

America Should Get Some of Greatest Broadcasts Ever Placed on Air

Lend Talent for Event

British Broadcasting Company Giving Full Cooperation in Making Tests Greatest in History

LONDON.—Five of the great English broadcasting stations will participate in the international broadcasts to be held during the coming week, and America should be entertained with the greatest talent the British Isles can muster for the event. The British Broadcasting company has entered into the overseas tests with enthusiasm and have lent the fullest cooperation of which their great organization is capable.

The English stations which will endeavor to bridge the Atlantic through the ether are London 2LO, 365m.; Manchester 2LY, 377.5m; Newcastle 5NG, 326m; Daventry 5XX, 588m, and Cardiff, Wales, 5WA, 353m.

The British Broadcasting company has been working on the preparation of programs for the tests and will undoubtedly be heard in many sections of this country. It has been announced that the greatest number of recognized artists to take part in any one enterprise or endeavor in the history of the Islands will appear before the microphones of the five stations.

Harry Lauder Makes First Appearance at Microphone

LONDON.—Sir Harry Lauder, the world-famous Scottish comedian, has at last overcome his overpowering shyness to Radio audiences, and made his first broadcast before the "mike" at 2LO. For half an hour Sir Harry sang all the most popular songs in his repertoire, and although these pieces have been heard by millions, no one audience of such vast proportions has ever before listened to his voice.

Cuba Makes Plans

TUINUCA, Cuba.—Cuban broadcasting stations are making special plans for cooperation in the international Radio broadcasting tests, according to Frank H. Jones of Station 6KW, and chairman for Cuba of the International Radio Week committee.

Announcements will be in Spanish and English from practically every station on the air in these special tests, with increased power possible from a number of the more important broadcasters. Cuban stations will also observe the silent hour from 11 to 12 o'clock each night when all American and Canadian stations will be off the air.

Peru Has Great Program

LIMA, Peru.—Station OAX, here, is making one of the most pretentious preparations for the international test week exchange of programs of any of the broadcasters taking part. The station has just been overhauled for the experiments and an increase made in the power rating of the transmitter. During the tests it will broadcast on 380 meters.

2LO TO OPEN TESTS WITH ORGAN MUSIC

ALTHOUGH the detailed programs arranged by 2LO were mainly tentative at the time this issue of the Radio Digest went to press, it was practically definitely decided that the famous English station would open its participation in the international broadcast exchanges at 4 o'clock Monday morning (11 o'clock, eastern time, and 10 o'clock, central time) with a recital from Sheperd's Bush Empire London organ.

Programs of Paris Not So Varied as America's

Radio entertainment in lands beyond the sea is not near so varied as in most any large American city. As an illustration, here is an announcement of Radio programs for Paris:

"Eiffel Tower (Wave length 2,750 meters). 6:15 p. m. concert; weather reports and signals at the usual hour.

"Radio Paris (Wave length 1,750 meters). 12:30 p. m., concert; 1:45 and 1:50 p. m., news bulletin and exchange rates; 4:30 p. m., exchange rates; 4:45 p. m., concert; 5:45 p. m., news bulletins and exchange rates; 8:15 p. m., medical bulletin; 8:30 p. m. news bulletins and exchange rates; 8:45 p. m., Italian music festival.

"Ecole Superieure (Wave length 458 meters). 3 p. m., concert; 8 p. m., scientific bulletin; 8:30 p. m., Italian gala opera "Rigoletto" from the Grand theater, Geneva, performed in honor of the League of Nations.

"Petit Parisien (Wave length 345 meters). 9:15 p. m., popular scientific lecture, 'What is Life,' by Prof. R. Dubois."

New Ingenius Radio Device Records Talks Permanently

LONDON, Eng.—A remarkable new device for the permanent recording of all Radio messages, or of certain business messages only, has just been perfected here. It is known as the "Telegraphone."

The apparatus comprises a small, mica-faced box rather similar in appearance to the dictaphone. Upon making or receiving a Radio call a button is pressed when the ordinary receiver is taken up and the operator proceeds in the ordinary way. Upon concluding it is merely necessary to press another button, pick up a small pair of earphones, and listen to the complete conversation.

It is unnecessary for the machine to be near the reeciver at all, the actual apparatus, if necessary, being stored in a cupboard.

More German Listeners

The number of broadcast listeners is increasing in Germany at the rate of nearly 50,000 a month. The total figure is now well above a million and it is expected that the stimulus of the international tests will greatly increase this figure.

Radio Prevents Study

So much enthusiasm has been aroused in Tokio by broadcasting that school pupils have neglected their studies in order to listen, especially in the evenings when they ought to do their lessons. In view of this the authorities have decided to forbid them to listen during their evening studies.

LONDON.—The Dutch Hussars are conducting experiments to determine how far it is possible to make use of Radio in cavalry maneuvers. A set is attached to the pommel of the saddle, and with this the rider starts out.

To Publish Test Programs Later

NEW YORK.—At the last moment it was decided by the International Radio Week committee to withhold programs of the principal European stations participating in the international tests. It was decided to publish the test programs the day after their broadcast in the daily papers of the country. This plan puts all the listeners in on their metal and prevents false claims for reception. It was the consensus of opinion of the International Radio Week committee that the advance foreign schedule be published only after the test was made. Too many valuable prizes and too much honor is at stake to have reception reports unduly or accidentally influenced.

Radio Digest, in publishing a time table for foreign programs, is giving the listener in the tools to work with in pulling in the foreign stations. The wave length, kilocycles, frequency, location of station and their powers are furnished. The best way to be sure that you are going to hear is to tune in the desired station according to the information given in the table.

Reception can be verified by the confirmation programs that will be published in Radio Digest after the tests are concluded. To make your record official and beyond all doubt and credence, wire Radio Digest for official confirmation at the time of reception.

PRINCIPAL FOREIGN STATIONS

Wave Length Meters	(Approximate) Kilocycles Frequency	Call Letters (If Used) Location and Power Available

RADIO BILLS CAUSE OF OPEN CONFLICTS

LITTLE OPPOSITION RAISED IN HOUSE COMMITTEE

Senator Howell of Nebraska Charges Dill Control Measure Would Lead to Ether Monopoly

WASHINGTON, D. C.—Legislation with the purpose of controlling and developing the Radio industry in the United States is drawing more attention of the law makers in the senate and house of representatives this year than ever before. The White bill in the house and the Dill and Howell bills in the senate have become open controversies and the hearings that have already been held give indications that a bitter struggle will precipitate before final action is taken on the measure.

Trouble Is Expected

Although the house committee on merchant marine and fisheries hearings of the White bill brought but slight opposition and it is believed little trouble will be experienced in making the necessary changes to bring out a unanimous report, things are different in the senate. Up to this time the hearings have been punctuated by a series of questions by Senator Howell of Nebraska, which have evidently been supplied him by someone who has "an ax to grind." The questions lead to possibility of the monopoly of broadcasting stations.

Hoover Favors Bill

Secretary of Commerce Herbert Hoover, appearing before the house committee, gave his hearty endorsement to the White bill when he said, in part, "I consider it highly important to the development of Radio that legislative relief be given at the present session of congress. The Radio public is now numbered in millions and embraces every class in every section. When we consider legislation, we deal with matters which profoundly and intimately effect the daily lives of these millions of American citizens. They are entitled to a Radio service on the highest

European Tests for

ARBORPHONE OWNERS

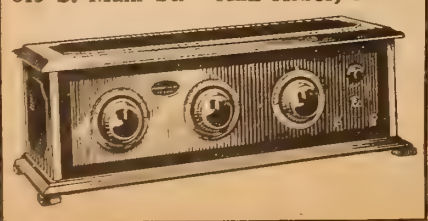
Thousands of Arborphone owners will hear European stations during the International Tests, January 24-30.

Valuable prizes will be awarded for longest verified distance and quality of reception with an Arborphone. The contest closes Feb. 6. Identical prizes will be awarded to any tying contestants.

For details see your dealer — or write Contest Committee at factory—immediately.

Machine Specialty Company

319 S. Main St. Ann Arbor, Mich.



TRAINED CROW DOES STUFF BEFORE MIKE

ONE of the most original Radio artists in the world was heard recently when Jocko, the trained crow who came to Milwaukee from the New York Hippodrome, strutted up to the microphone at WHAD, the Marquette University-Milwaukee Journal station, and cawed to piano accompaniment. Jocko is known in theatrical circles as the most entertaining bird actor on the American stage. The performance at WHAD was his first appearance before the microphone.

CKAC, La Presse, Vainly Attempts to Give Hockey

MONTREAL.—Hockey fans from all over Canada and the United States, who have written to CKAC here, requesting that the hockey games be broadcast from the rink, whenever American and Canadian teams cross sticks, will regret to learn that although Director Jacques Cartier, of the big "La Presse" station here, left no stone unturned in order to secure permission to install "mikes" in both the Forum and Montreal arenas, he has not been able to give listeners what they ask. Both Leo Dandurand, manager of the French team here, and H. Northey, managing director of the Forum, have refused point blank to allow any broadcasting of hockey.

Michigan Aggies' Net Contests Well 'Aired'

WREO and WKAR Divide Honors for Basketball Games

LANSING, Mich.—Both Station WREO of the Reo Motor Car company here and WKAR, located at Michigan State Agricultural college, East Lansing, will broadcast basketball games played at the college this winter, according to an arrangement just completed by the college and the Reo station. James B. Hasselman, known as the pioneer sports announcer, will announce the games which will be broadcast from 8 to 9:15 eastern time, or 7 to 8:15 p. m. central time. Both stations operate on a wave length of 285.5 meters.

WREO will broadcast the following games: Michigan Aggies vs. University of Detroit, Tuesday, February 2; Michigan Aggies vs. Marquette University, Thursday, February 11; Michigan Aggies vs. Notre Dame, Tuesday, February 16.

The remaining games to be broadcast by Station WKAR are: Michigan Aggies vs. Michigan State Normal, Friday, January 29; Michigan Aggies vs. Earlham College, Saturday, February 13; Michigan Aggies vs. Carnegie Tech, Friday, February 19; Michigan Aggies vs. Western State Normal, Friday, February 26.

Radio is being used for signalling between engine cab and caboose on the Virginian railroad.

Sport Broadcasts

Basketball
Saturday, January 23

KFKU (275m-1090kc) Kansas U.-Missouri, 7:30 p. m., central time.

Friday, January 29

KFMQ (299.8m-1000kc) U. of Arkansas-Centenary, 7:30 p. m., central time.

WOI (270m-1110kc) Kansas U.-Ames, 7:30 p. m., central time.

WKAR (285.5m-1050kc) Michigan State Normal-Michigan Aggies, 8-9:15 p. m., eastern time.

Hockey Game
Tuesday, January 26

WBZ (333.1m-900kc) Boston Bruins vs. Ottawas, 8 p. m., eastern time.

Wrestling Match
Saturday, January 23

WOI (270m-1110kc) Cornell College-Ames, 3 p. m., central time.

WFI Promotes Animal Welfare

PHILADELPHIA. — WFI, Strawbridge and Clothier station here, is concluding a series of educational talks designed to promote interest in animal pets and their proper care. Dr. R. S. Amadon, professor at the veterinary school of the University of Pennsylvania, will speak Monday, January 25, on "Physiology of Animal Care." Three similar talks have been delivered.

Earn $50 to $200 a Week *in* RADIO

You can! Hundreds of ambitious men are already earning thousands of dollars in this wonderful new industry—you, too, can get your share. Mail coupon below for Free Book which describes fully the amazing money-making opportunities in Radio and tells you how YOU can earn from $5,000 to over $10,000 a year.

THE astounding growth of Radio has created thousands of big money opportunities. Millions of dollars were spent during the past year on Radio, and thousands of young men are needed right now to meet the ever-increasing demand of work.

Men are needed to build, sell and install Radio sets—to design, test, repair—as Radio engineers and executives—as operators at land stations and on ships, traveling the world over—as operators at the hundreds of broadcasting stations. And these are just a few of the wonderful opportunities.

Easy to Learn Radio at Home in Spare Time

No matter if you know nothing about Radio now, you can quickly become a Radio Expert, by our marvelous new method of practical instruction—instruction which includes all the material for building the latest up-to-date Radio apparatus.

Scores of young men who have taken our course are already earning from $75 to $200 a week. Merle Wetzel of Chicago Heights, Ill., advanced from lineman to Radio Engineer, increasing his salary 100% **even while taking our course!** Emmett Welch, right after finishing his training, started earning $300 a month and expenses. Another graduate is now an operator of a broadcasting station—PWX of Havana, Cuba—and earns $250 a month. Still another graduate, only 16 years old, is averaging $70 a week in a Radio store.

Pay Increases Over $100 a Month

I am averaging anywhere from $75 to $150 a month more than I was making before enrolling with you. I would not consider $10,000 too much for the course.
(Signed) A. N. LONG, Greensburg, Pa.

Doubles Salary

I can very easily make double the amount of money now than before I enrolled with you. Your course has benefited me approximately $3,000 over and above what I would have earned had I not taken it.
T. WINDER, Grand Junction, Colo.

From $15 to $80 a Week

Before I enrolled with you I was making $15 a week on a farm. Now I earn from $2,080 to $4,420 a year, and the work is a hundred times easier than before. Since graduating a little over a year ago, I have earned almost $4,000, and I believe the course will be worth at least $100,000 to me.

(Signed) GEO. A. ADAMS. Tamaqua, Pa.

Wonderful Opportunities

Hardly a day goes by without our receiving urgent calls for our graduates. "We need the services of a competent Radio Engineer." "We want men with executive ability in addition to Radio knowledge to become our local managers." "We require the services of several resident demonstrators"—these are just a few small indications of the great variety of opportunities open to our graduates.

Take advantage of our practical training and the unusual conditions in Radio to step into a big paying position in this wonderful new field. Radio offers you more money than you probably ever dreamed possible—fascinating, easy work—a chance to travel and see the world if you care to, or to take any one of the many Radio positions all around you at home. And Radio offers you a glorious future!

The National Radio Institute is America's Pioneer Radio Home-Study School—established in 1914. Our course is an absolutely complete one which qualifies for a government first-class commercial license. It trains you for **bigger** paying jobs in Radio.

Send for FREE RADIO BOOK

Learn more about this tremendous new field and its remarkable opportunities. Learn how you can quickly become a Radio Expert and make big money in Radio.

We have just prepared a new 48-page book which gives a thorough outline of the field of Radio—and describes our amazing, practical training in detail. This Free Book, "Rich Rewards in Radio," will be sent to you without the slightest obligation. Mail coupon for it now!

For a short time we are offering a reduced rate to those who enroll at once. Act promptly and save money.

SIMPLE TO PREPARE MACARONI TO SERVE

IS FILLING AND NUTRITIOUS FOR ENTIRE HOUSEHOLD

Betty Crocker Tells How Dishes Should be Prepared to Retain Greatest Food Values

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WHT, WFI, KSD, KFI and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon investigations and work of herself and her assistants in model kitchens. —Editor's Note.

By Betty Crocker

THE question of what to have for luncheon or supper is sometimes a puzzling one. Breakfast and dinner menus do not vary a great deal from day to day, except in the kinds of foods served, but the luncheon or supper menu may be entirely different every day of the week. You can plan whatever suits your whim or mood.

However, in planning to suit your fancy, you should also take into consideration your stock in trade; that is the things in the refrigerator or cupboard, because there is no more convenient meal in which to use up left-overs than luncheon or supper. The most satisfactory luncheon or supper menu has one substantial main dish for the youngsters. Furthermore, it should be a dish that may be prepared quickly.

Because of the fact that it fulfills all of the above qualifications, I recommend macaroni and spaghetti. Macaroni and spaghetti are substantial and filling, are nutritious for each member of the family, and not too heavy or rich.

How to Cook Macaroni

In most cases where macaroni is unpopular I have discovered that the reason is either the use of an inferior macaroni, of poor cooking, or both. Here are the directions for boiling macaroni and spaghetti:

Use at least eight times as much water as macaroni and two teaspoons of salt for every quart of water. With these proportions you can prepare any amount, small or large. Add the salt to the water and have the water boiling rapidly when the macaroni is added. Keep the water boiling all during the cooking. Cook until tender when pierced with a fork, but not so long as to allow the macaroni to get soft and mushy.

Drain in a coarse strainer or colander so that all of the water is drained off. If the water is not boiling when the

(Continued on page 12)

WHAT FASHION WILL 1926 BRING?

Sally Dee

WHAT are we coming to? That is the question of pretty Sally Dee, fashion authority at Denver, who every week forecasts style trends over KOA for an intermountain audience of women and girls. Extremists, she suggests, hint that flapper skirts will go up a notch or two, while their opponents insist there will be no change.

"These are modish conjectures, of course," she points out. "So far as skirts are concerned, we are quite certain they will not be lengthened. It is admitted that milady seeks the bustle effect. This however, will be by means of draperies which is quite different than the bustle framework worn by our grandmothers.

"Straight lines are definitely under taboo. Everything will be flared, as the result of a natural revolution against the tight-fitting frock. Another thing, there is prevailing tendency for reptile skins in place of calves and kids for women's pumps and oxfords."

Miss Next Year will be a decidedly colorful girl in her two-piece dress with its marked feminine effects, according to Miss Dee, who is heard over the General Electric Denver station every Tuesday, Thursday and Friday afternoon.

SHORT WAVES

By Marcella

Pa will probably have the Radio set all labeled "hands off" this week, on account of the International Week tests, but we don't care if our listening is cramped a bit, for, what do you think? A mere man has dared to write us. He signs himself Cap'n Sparks, and says—oh well I'll let you read his letter:

"Why limit your offer to the girls? There's lots of we members of the bill-paying, battery-buying sex that would like to know about entertainers. F'rinstance, what became of the young lady who used to announce at WCAL, Northfield, Minn? She was the one and only pleasing feminine announcer, and she hasn't been heard for many months. Where is she? And why? Don't tell my wife I asked.

"And if you have any queries about WTAM or WEAR entertainers or staff that you'd like answered, ask me. I know 'em and will be glad to pass along any scandal I know. No charge."

Well, after recovering, from the shock, I can tell you, Cap, that the pleasing lady whose voice you adored was Miss Ella Hjertaacs, a fair Swedish beauty, who was a coed at St. Olaf's college, which college owns WCAL at Northfield, Minn. Miss Hjertaacs was graduated and so gave up the "mike" job. Maybe the registrar there could give her address.

I won't tell your wife you asked, because I think you haven't any—just trying to "spoof" me. Well, send along the WTAM-WEAR dirt, I'll disseminate it.

* *

That last one was a rather long wave for the style nowadays. But here's a short one. Someone wants to know if the Hired Hand is an announcer or an entertainer. To be perfectly frank, he is neither. "Substitute" announcer is his position, but I have found him both entertaining and good at announcing. Next?

* *

Glen Rice, of KFI, Los Angeles, is another nice looking chap. Is he married? Well, I'll have to find out. I do know that he smokes cigars, however, for a listening friend sent him a "permanent" cigar of real tobacco, claimed to be the longest in the world.

* *

Lambdin Kay, I reiterate, is a "hard-boiled"—confirmed, in other words—bachelor, Mrs. Tom, and Ernest Rogers, also of WSB, is a bachelor, but not so sure of himself. "Ernie" or "Willie the Weeper" is likewise the man behind "Old King Tut, the Radio Nut." Ernest intimates that he might get married soon, but whether or not he has picked the girl, I can't say.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls, and I'll do my best to answer it here. MARCELLA.

BALDWIN PIANO FOR WINNER OF CONTEST

Mrs. Pauline Dempsey, 3730 Vliet street, Milwaukee, who was pronounced the winner of the "Music in the Home" contest for the best paper submitted, and was awarded a Baldwin built piano by Kesselman O'Driscoll house of Malwaukee, through Station WKAF.

Women Voters' League Gives Political Series

Will Broadcast Weekly Talks on Governmental Problems

MINNEAPOLIS.—To stimulate a greater interest in the operations of governmental machinery and national problems, the Minneapolis League of Women Voters has arranged to broadcast a series of twenty weekly talks from the Gold Medal station, WCCO, Saint Paul-Minneapolis.

The eighth talk was given at 2 p. m., central time, Tuesday, January 19, by Mrs. Sumner T. McKnight, president of the league. The talks are being given at the same hour each Tuesday afternoon.

Each week the speaker devotes five minutes to answering questions which listeners have sent in. Among the subjects to be discussed are: "Is Woman Suffrage a Failure?"; "Why Vote?"; "How Can Women Help in Bringing Universal Peace?"; "How Does My Vote Affect the Home?"; "City Government"; "State Government"; "National Government"; "Women in Industry"; "Women in Professional Life"; "The Child at Play"; "The Child at School"; "The Child at Work"; "As a Farmer's Wife, How Can My Vote be Effective?"; "What Is Meant by State Rights?"; "What is the American Constitution?"; "Amending the Constitution."

Women's Benefit Association Sends Program from WAFD

PORT HURON, Mich.—Health talks for women, concerts and brief addresses on fraternal organization work, make up the early winter program arranged by the Woman's Benefit association, broadcasting from international headquarters through Station WAFD here.

WAFD has a power of 500 watts and uses a wave length of 275 meters.

TO BE BUXOM TYPE GET STATION WEAF

NEW YORK.—With the recent beauty contest pointing to the returning popularity of the buxom type of beauty, members of the fair sex who aspire to the 1926 crown of "Miss America" are advised to take the "Tower health exercises," given every morning through WEAF, WEEI and WCAP by Arthur Bagley from the tower of the metropolitan Life Insurance company. A letter recently received from a Boston woman describes how she gained many pounds by taking these morning setting-up exercises. "Boston is full of fat women and skinny men," she declares proudly. "Everyone tells me how fat I'm getting and that makes me so happy. I weigh 130 pounds now and I'm only 5 feet tall."

FOOLISH QUERIES ASKED BY VISITORS

It Takes a Wise Lady to Hold Job of Hostess and Answer Many Absurd Questions

LOS ANGELES.—It takes a wise lady to hold the job of station hostess. Margaret Cain, daytime hostess of KFI, finds she has to lie awake at night thinking up answers to questions that visiting listeners innocently fire at her. Try this selection on your think box. They are picked from a morning's taking:

"How much do your towers weigh?"

"How can I talk to my folks in Iowa?"

"On what numbers do you come in on my dials?"

"Just what is Radio?"

"Who listens to your station after midnight?"

"Can you hear New York on your broadcasting set?"

"How can I connect my telephone with KFI?"

"What does 'KFI' mean, and why? Whose initials are they?"

"What's the idea of running a broadcasting station, anyway?"

TO COOK MACARONI

(Continued from page 11)

macaroni is added and every minute during the cooking, the pieces will become soft and shapeless and some of the food value will be lost.

Some women have an idea that a macaroni dish requires a considerable time for preparation. Time yourself and you will find that this is not true. In the first place no time is required for preparation such as paring, scraping or shelling. Only fifteen or twenty minutes is required for cooking and it is then ready to serve in any number of ways.

You are sure to like Macaroni Mousse as it is one of our most popular recipes. It is often served at special luncheons, bridge parties and Sunday night suppers. You will find that it is quite nice enough for your most particular guests. However, I hope you will serve it occasionally to your family. Surprise your family some night with a special treat of Macaroni Mousse. Here is the recipe:

One cup uncooked macaroni, broken into inch pieces, one and one-half cups scalding milk, one cup soft bread crumbs, one-fourth cup butter, one red pepper or pimento chopped fine, one tablespoon chopped parsley, one teaspoon chopped onion, one teaspoon salt, one-half cup grated cheese, three eggs.

Method: Add four teaspoons salt to two quarts of water. When boiling rapidly, add macaroni. Boil until tender (15 or 20 minutes). Drain. Prepare sauce as follows: Pour scalding milk over bread crumbs. Add melted butter, pimento, grated cheese and seasonings. Lastly add well-beaten eggs. Pour over the macaroni. Place in buttered baking dish and set dish in pan of boiling water. Bake forty minutes in a moderate oven (350° Fahrenheit).

This may be served with a mushroom or a white sauce. Macaroni Mousse with head lettuce or any green vegetable salad, a beverage and fruit or an ice for dessert makes a delightful luncheon.

Women's Programs Again in Full Swing After Holidays

NEW YORK.—With the passing of the holidays, popular features which have characterized the women's programs of WEAF during the past few weeks are again in full swing. Among those who were heard during the first week and their topics were: Florence Smith Vincent, "Women in the News"; Dr. Hugh Grant Rowell of Columbia university, "The Care of Small Children"; Mrs. Rose Berry, "Review of Current Art Exhibitions"; Sumayeh Attiyeh, "Modern Conditions in Syria; Mrs. Julius Silberfeld, "The Jewish Child—Its Relation to the Home"; Dr. Kate Upson Clark, "Can Personality Be Acquired"; Miss Vera Megowen, "Mayfair Extension Talk"; Miss Margaret Hessler, "Fruit—Fresh, Canned or Dried"; Elizabeth Timlow, "The Worry Complex", and Miss Ida B Mellen, "Sea Birds at the Aquarium."

Schedule 'Woman's Hour' For Fair KYW Listeners

CHICAGO.—"Woman's Hour" a new Friday feature of Westinghouse Station KYW, here, was inaugurated recently from 4 to 5 p. m., central time, which hour its regular weekly broadcast will be made.

This particular one hour, to be devoted to the interest of women, is being conducted by Miss Mary Casey, program editor of KYW, who also acts as its announcer. On the opening program was found Mrs. Anna J. Peterson, a proper and fitting person, because of her wide acquaintanceship among lady fans.

Photogravures of Your Favorite Artists
GALLERY of RADIO STARS

Suitable for Framing or Placing in Your Album

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Money order or cash at your risk. Add 5 cents to checks for exchange.

WITH COUPONS Only 10c Each -- 3 for 25c To cover cost of mailing and postage

Size Eleven by Fourteen Inches

Select Your Favorites from the Gallery of Radio Stars

CHECK YOUR CHOICE

- ☐ Wendell Hall, king of ukulele ditties
- ☐ Graham McNamee, 1925 Gold Cup announcer
- ☐ Jack Little, popular wandering balladist
- ☐ Paul Small, who won fame through Radio
- ☐ Coon-Sanders' "Nighthawks" at KYW
- ☐ George Hay, 1924 Gold Cup announcer

The Hired Hand is not the only attraction at WBAP, Fort Worth. Betty Williams, above, is the staff pianist. She plays with unusual skill.

High Lights of the Week

AT 11 A. M. eastern time Saturday morning the children are to have their own concert from WJZ and WRC when the New York Philharmonic society gives a special juvenile program. The orchestra leader will make all of his selections interesting to the child.

The famous New York symphony orchestra, well known for the competent directing of Walter Damrosch, will be the gift of the Atwater Kent company Sunday from WEAF and chain. Mr. Damrosch will make brief explanatory remarks before the rendition of each number. Helen Jeffrey called the "Brunhilde of the Violin" is broadcasting a fine program from WBAL, Baltimore, this same evening. Miss Jeffrey has appeared as soloist with many of the largest orchestras in the country.

The week opens with an innovation at WRC, Washington, D. C. The eight directors of the concert orchestras will for one week beginning, Monday January 25, include in their programs only those new-old compositions seldom heard on the concert stage or on the air. Tune in if you are tried of popular and classical favorites. Or dial for WLW and spend the eveing being serenaded by the Times-Star orchestra, featuring "A Evening of Serenades."

The dramatic venture Tuesday of the WAMD Radio Stock company, will be the three-act play "Sun Up," by Lulu Vollmer. The cast includes A. H. Faust and Leone Faust, two veteran stock players.

This is the first year that the Chicago Little Symphony, which includes from forty to fifty members of the Chicago Symphony orchestra, has broadcast. The concerts are much appreciated by Chicago fans as well as people outside the city, because it is so difficult to procure seats to hear the symphony. WLS, is giving these on Wednesday nights. Madame Gizi Szanto, pianist, one of the most intelligent and talented of the younger Detroit artists, appears tonight with the WGHP Little symphony orchestra at WGHP, Detroit.

Between the announcement in fifteen different languages at WOC and the foreign speeches at various other stations it will not be surprising if many fans are deceived into thinking they are hearing foreign stations when they are listening to their home stations. Thursday, WIP will try for long distance reception and will have representatives of the different countries speak in their native tongues. Ben Stad and his WIP Little symphony orchestra will play French, English, German and Dutch selections.

WTIC, Hartford, will attempt to broadcast to the world at large for fifteen minutes beginning at 11 p. m. eastern time Friday. The program will be given by the Travelers male quartet. This station also celebrates the birthday of Robert Burns with a special Scotch program. The oldest and best known of the morality plays will make its debut this same evening when "Every Man" is given by the WGY players. This broadcast will be enjoyed especially by students studying the morality and mystery plays.

WOO, Philadelphia, Pa. (508.2m-590kc), 12:02 p. m., Golden's crystal tea room orchestra; 4:45, organ recital; 7:30, Hotel Adelphia French room orchestra, A. Candelori, director.

WOR, Newark, N. J. (405.2m-740kc), 3:15-4 p. m., Zit's Central Park Casino tea music; 6:15-6:17, "Words Often Mispronounced"; 6:17-6:30, sport talk, Bill Wathey; 6:30-7:30, Jacques Jacob's Hotel Shelton ensemble; 7:30-8:30, Van's Collegians; 11-12 m., Katinka orchestra.

WRC, Washington, D. C. (469m-640kc), 11 a. m., children's concert, WJZ; 12:15 p. m., organ recital, Homer L. Kitt studios; 1, Hamilton hotel orchestra, Daniel Chwalow, director; 6, Lee House trio, Sam Udrin, director; 6:45, agricultural reports; 7, Meyer Davis' Hotel Willard orchestra; 8, Bible talk; 8:15, musical program; 9, concert, U. S. Navy band, Lieut. Charles Benter, leader, WJZ and WGY; 10:30, Crandall's Saturday Nighters; 12 m.-1 a. m., Spanish Village orchestra.

WREO, Lansing, Mich. (285.5m-1050kc), 6-7 p. m., dinner concert, Speed-Wagon serenaders and Gold Standard ensemble; miscellaneous bulletins; 10-12 n., special dance program, WREO, Speed-Wagon serenaders, Carl Hall Dewey, director.

WTAG, Worcester, Mass. (268m-500kc), 10:30 a. m., musical selections; 12:05-2 p. m., noon day luncheon music, WTAG orchestra, Will Hardy, director; 3-5, Tea Dansant music, WTAG orchestra; 5:15, "Twinkle Twinkle" story teller.

WTAM, Cleveland, Ohio (389.4m-770kc), 12:15-1:15 p. m., Golden Pheasant orchestra; 6-7, Carl Rupp and his Hotel Hollenden orchestra; 8-8:45, Guy Lombardo and his Royal Canadians; 8:45-12, Ev Jones and Coo Coo club.

WLW, Cincinnati, Ohio (422.3m-710kc) 7:30 a. m., healthful exercises, William Stradtman; 8, morning devotions, auspices of Parkway Y. M. C. A.; 12:05 p. m., organ concert; 12:30, concert, Hotel Gibson orchestra, Robert Visconti, director.

WMAQ, Chicago, Ill. (447.5m-670kc), 12:25 p. m., Y. M. C. A. forum; 1, Radio farm school; 2, shut-in program; 4, talk on preschool child; 4:15, musical program; 4:30, "Foibles of the Moment," Mrs. Graham Aldis; 4:45, Child Life stories; 6, organ; 6:20, Family Altar league; 6:30, Wide-Awake club; 8, musical lecture, Mr. and Mrs. M. E. Oberndorfer; 8:30, Whitney trio; 9, lecture, U. of C.; 9:20, Elizabeth Stokes, soprano; 9:55, U. of Chicago chimes.

WMBB, Chicago, Ill. (250m-1200kc), 7-8 p. m., Trianon duo; Frank Bordner, baritone; Frank Chaplin, "The Old Virginia Colonel," semi-classical old home songs program; 9-10, Trianon orchestra, Dell Lampe; Woodlawn theater orchestra, Armin F. Hand; Babbe and Barr, harmony duo; Jack Armstrong, uke soloist; Eddie Matts and Billie Donovan, popular program.

WMC, Memphis, Tenn. (499.7m-600kc), 8:30 p. m., Cooper's Hawaiians.

WOAI, San Antonio, Texas (394.5m-760kc), 3 p. m., musical program, Kamma's Hawaiians; 8:30, Menger hotel trio.

WOAW, Omaha, Nebr. (526m-1000kc), 12:45 p. m., Sunshine Sunday dinner menu and recipe service; 1, Randall's Royal Fontenelle orchestra; 6, music review, Hester Bronson Copper; 6:50, Jaffy's string quintet of Brandeis tea room; 9, classical program.

WOC, Davenport, Ia. (483.6m-620kc), 12:15-12:25 p. m., Radio farm school; 3-3:30, Aunt Jane; 4-5, Crescent orchestra; 5:45-6, chimes; 9-10, musical program; 10:15-10:30, international selections in different languages, Harry Y. Mercer, tenor; Jeanette Brewbaker, soprano; Mrs. F. W. Elliot, organist.

WOI, Ames, Iowa (270m-1110kc), 12:30 p. m., college chimes; 12:15, Prof. C. L. Holmes, discussion relating to agricultural economics; 7:30, Kansas university vs. Ames, basketball game.

WOK, Chicago, Ill. (217.3m-1380kc), 4:30-7 p. m., Tearney's Town Club Twilight dansant; Capitol theater organ; studio program; 11-1:30 a. m., Tearney's Town club orchestra; Carl Lorrain's Pershing Palace orchestra; Husk O'Hare's Cocoanut Grove orchestra; Capitol theater program; studio program.

WORD, Batavia, Ill. (275m-1090kc), 7-7:45 p. m., musical program, North Shore line; 7:45-8, Uncle Dan; 9-10, studio recital, H. W. Barnard, tenor.

WOS, Jefferson City, Mo. (440.9m-680kc), 8 p. m., program, Missouri Farmers' association.

WQJ, Chicago, Ill. (447.5m-670kc), 11-12 m., Sunday dinner, Ted Wilmes; 3-4 p. m., "Third Radio lesson," Helen H. Downing; 7-8, Rainbo Gardens orchestra; Henrietta Nolan, violinist; Otis Pike Jester, soprano; Mary Thrash House pianist; "Rock of Ages," H. W. Bundy; 11-1, Rainbo Skylarks; Dr. H. Lucille Long, Eleanor Terry, Marie Pollette; Melodians; Dean Terrill, baritone; Mary Wade, soprano; 1-2, Ginger hour.

WRR, Dallas Texas (246m-500kc), 12-1 p. m., Ethel Smith, pianist; W. W. MacBeth, harmonica; Sheldon Leachman, tenor; 5:15, bedtime story; 6-7, dinner hour concert, Jack Gardner's orchestra; 8-9, program, Mabel Cranfill, directing, assisting artists; 11-12, organ recital, George Perfect, assisting artists, Phil Pierce studio.

WSB, Atlanta, Ga. (428.3m-700kc), 8 p. m.; West Point Route band.

WSM, Nashville, Tenn. (282.8m-1060kc), 6:30 p. m., concert, Francis Craig's orchestra; 7, bedtime story; 8, piano selections, Winkler music studios; 8:30, Christine Lamb, contralto.

WSOE, Milwaukee, Wis. (246m-1220kc), 5 p. m., news and sport reports, Badger Crier; 5:30, twilight musicale, Caroline Ramminger, soprano; Alga LaBelle, pianist; Agnes Roets, marimba-soloist; Aunt Julie, children's stories; 8:45, book review, M. S. Dudgeon; 9, "Candygram" review, staff orchestra and soloists; 10:15, international Radio test program; E. B.

"Bloopers" and Foreign Tests

THE eve of International Week is here. Transatlantic reception is in order. The way is paved for many thrills. On Friday night, when various sections of the country remain silent while other sections broadcast, many listeners will have their first taste of long distance reception. Everyone is going to have fun.

Providing—that the "bloopers" don't strain themselves to such a marked degree as to spoil every neighbor's reception.

Let us remark now, before the tests begin, that people who are operating receivers that bloop and know that their sets bloop, should have the spirit of cooperation at least on this occasion and, if necessary, turn off their sets for the silent hours.

Blooping can be stopped by proper neutralization of a neutrodyne, by operating tubes below the oscillating point, by using the Thatcher unit (described in December 5 and 12 issues of this publication) ahead of one's set, by using a loop—not an antenna system—on a super-heterodyne, and by many other ways.

We are afraid bloopers are going to spoil the transatlantic trials. Hence this note of warning appears. If you have a blooper nearby, get busy now and seek the owner's cooperation.

WEAF Chain Announcing

COMPLAINTS of announcers failing to give their station's call letters are many. We note that the complaining letters often name stations which are regular members of the WEAF chain.

As it happens, the chain features are usually long and so connected that it is practically impossible for the local member station to break in and tell from what source the program is being heard. It is likewise inadvisable for WEAF to break in every 15 minutes or so with the call signals of the entire chain handling the broadcast.

We have heard one chain station, WGN to be specific, break in at the proper moments with announcements of the station's call, together with a description of what was last heard and next to be given. If other chain stations would watch this point as carefully we feel that complaints regarding lack of announcements would not be so frequently arriving on the editor's desk.

The chain, let us pause to remark, has difficulties, however, which originating stations do not have to face. There is at least the semblance of an alibi for the linked stations, but not so for a score of other well-known broadcasters who are not and never have been included in the chain.

Here Is Another Angle

"IF CONGRESS passes a law providing for a set royality on each piece of copyrighted music broadcast my station will be paying much more than it does now."

Thus stated one of the few directors who did not favor the passage of a bill providing for relief from the Music Trust holdup. He went on to explain that his station featured orchestra numbers and that they played so many during the course of the year that an individual number tax would wreck their exchequer.

"Who sends you the numbers you broadcast?" we asked.

"Why, the publishers furnish the orchestra with professional copies for the most part," he answered.

"Do you charge them for broadcasting them?"

"No, our fans request us to play the numbers and we respond to the public taste."

"How do you know that a great many of the requests, especially those for new numbers, are not planted by the publishers themselves."

"Well, I guess some of them are, but how will the proposed single number tax relieve that?"

"This way," we answered. "Say there is a royalty fee of three cents put on each piece of music used. Tell the man who furnishes you with the copy he wants played that you will be glad to use the number if he will pay the three cents each time you play it. And then watch the song pluggers seek cover. They will be taking money out of one pocket and putting it in the other one."

RADIO INDI-GEST

A Little Prayer

A wisp of a prayer I sent today;
By a Radio wave it winged its way.
I sent it out into space unknown.

Some far-off star; some distant sphere
Might be in tune—its message hear.
Would there an answer come?

Whither or whence—I cannot know;
My spirit felt a sudden glow
Of happiness and peace.

Perhaps—who penetrates the veil?
Or who this dictum will assail?
Our prayers their answer be.

MAUDE M. WEEDE.

Hurting Our Feelings

YOW! Whadyumeen? A letter came to the Radio Digest office and the writer said, "Please give this material to the editor of the column 'Indi-Gest' if you find it unavailable for publication." Come on out and fight.

Zoologically Speaking

Dear Indi: I see where some bird sent in a list of 47 stations received at one set-in to get himself a membership in the D. T. club.

Now you know what them letters used to stand for—when our friend in white used to muster the ceremonies. Now I am informed that them letters now stands for "Dial Twisters" and all he wanted was to join up with the rest of the DX hunters.

He did not say how many hours that one set-in lasted—but he hasn't got a thing on me. I received 47 stations all at the same time last night on the bunch of haywire and tobacco cans that directions, "How to Build," said was a very selective receiver, and believe me it is, for it selects them from all over these United States and receives them all at the same time. Well, after you twist the dials on that contraption for one set-in you want to join up with the old-fashioned D. T. gang and a few pink elephants, boa constrictors or six-headed lizzerds would be a relief. OLD KING TUTT.

Then Duck

Dear Indi: My wife came home from the club the other night and said that the reason classic music won out at KOA was because not many of the jazz people knew how to read and write, so they couldn't vote.

L. E. PECK.

That's a dirty dig. Right there you should have told her you would be glad if none of them could, and then have reminded her you had to sign a marriage license.

The Main Reason

Isabel—Why is the purchase of a Radio set a good way of spending money?

Wasabel—Because it is a sound investment!

DINNERBELL.

Our Crystal Set

My wife and I are radio fans
In a small way as yet;
We can't afford a neutrodyne,
But have a crystal set.

Its restful when we're tired of work
To play cards ev'ry night;
For we like double solitaire,
'Tis wifey's one delight.

I take my head phones and adjust
Them firmly to each ear;
And wife puts o'er her neat bobbed hair
Her phones, good songs we hear.

And thus each night we play at cards
My dear old wife and I;
We listen o'er our crystal set,
And hear the songs roll by.

RHEA.

Oh! Luther Burbank, Lookut

Dear Indi: The fan who wrote to me for advice about his aerial pole which sprouted as an apple tree while in active service as part of his set, has a rival. "My aerial," writes the newcomer, "passes over what I thought was a pear tree, but chestnuts came on it." My theory is that they must have dropped off the aerial during some of the announcers' jokes.

PHIL O. SOPHER, LONDON.

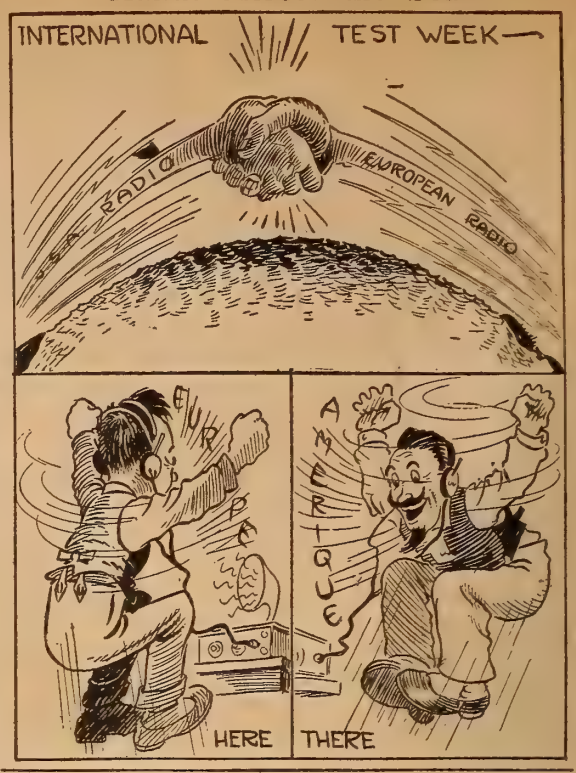
Uneasy Lies the Crown

Dere Indy:—Say-lissen bozo—whicht is the word crack riters like me uses, when thay wants tew tell editurs whicht thay try tew help out with wow coppie, when sucht editurs haint got ne better cents then tew tell other dudes whicht lay down on him, that hees sorrie, caus thay has tew read my stuff.

You better turn over a new leave an sent me a ingraved knockdown tew yer pet bootleggur, an publidch a apoligie soas maggie can read it, or eye will set tite an let your column go hi an dri, soas mabbe you wont have no customers leff tew read your stuft, onli you an the proof readers, whicht haint got no choist, an has tew read it er be expelled. You gotta remembur the old sain, whicht says—"Dew rite an fear no man—dont rite an fear no womun." KING.

We apologize, King, but not for the wise crack. We apologize, we started to say, for the fact that we publish your stuff. Pity the poor readers, "whicht aint got no larnin" and can't decipher your code.

Hands Across the Sea



Condensed

BY DIELECTRIC

When Station WJZ, New York, came on the air with a special New Year's Day program listeners in heard features of surpassing interest. Except for two breaks in the broadcasting, which of course were wholly unforseen, there was nothing to detract from the work of musical artists of fame, speeches by representatives of foreign countries, news of the minute gathered by Radio and dance tunes from Merrie Olde England. While the first concert in a series of Victor musicals was incorporated in the broadcasting no preferences are to be mentioned here.

Since a certain individual made his first appearance before a mike there have been many imitators but no equals. I refer to "The Red-Headed Music Maker," Wendell Hall. There are some who attempt the intimacy of his style of singing without success. No one else can be so red-headed. As we listened to his songs from Station WOK, Chicago, visions of a marriage ceremony performed in a broadcasting studio came to mind with Mr. Hall as an actor playing a leading role. Then, too, we recall with what feeling he sang of a girl in Chicago—now his wife.

Hail to the Liberty Bell! At least some merry makers paused long enough to hear its greeting to the year we enter. The suggestion was made in these columns two or three years ago that the sound of this great bell should reach every nook of these United States and, if possible, to people across the seas. So far as our own land is concerned it would be entirely possible with our present linking of broadcasting stations. Independence Day would take on a hallowed air were this feature given.

There is an organ in a theater in Omaha, Neb., familiar to a large part of the Radio audience through the combined efforts of station WOAW and Arthur Hayes, the latter organist for this "wonder organ." Mr. Hayes is complete master of the instrument and should bring pleasure to all lovers of this form of music. Mr. Craig was not putting it on too thick for Old Man Apple Sauce and Arthur Hayes when he said their programs were about the best in the country. Don't you think so?

An orchestra in the studio of Station WREO, Lansing, Mich., devoted an entire program to sacred and old-time songs, which they rendered in a pleasing manner. The vocal artists selected for the concert were entirely adequate and deserve to be heard again. The concluding number on the program, "The Star Spangled Banner," was quite in good taste since most of the familiar airs were of American origin.

Down in Florida—you've heard of that state—there is a powerful broadcasting station, WJAX, Jacksonville, and likely their programs are known to you, too. If not, try them out. Once in a while Radio listeners are privileged to hear cello solos of more than ordinary merit and one of those times was when WJAX (an old Cleveland call—remember?) had a performer of the instrument interspersed in a vocal program. Although the latter were worth listening to the cello numbers excelled.

Minstrels find a place on Radio entertainments every now and then with the hope that you enjoy them. Do you? Station WLW, Cincinnati, offered to its unseen audience recently the Crosley Burnt Corkers who included in their numbers a little sketch entitled "All Aboard," which had in it some humorous sidelights on a railway ticket agent's treatment of his customers, with Mr. Miller and Mr. Anderson providing the conversation. Singing by the entire ensemble of "darkies" followed.

ABC Radio Fundamentals for Everybody

Chapter III—How the Sound Waves are Put on the Air

By Milo Gurney

IN LAST week's article, it was pointed out that many of the colors produced electromagnetically, while invisible to the eye, were capable of being photographed. Radio waves also have color, but so far as known, it has been impossible to see or photograph them. It is this characteristic which has, in a measure, prevented its isolation toward a more definite explanation relative to its association with light.

The progressive steps up to the transmission of wireless intelligence has been shown through the explanations regarding both audio and wire telephony, each step being pointed out as requiring either the modulation of air currents, or of a continuous electrical direct current. Radio telephony is likewise very closely related to each as it requires not only a medium between the transmitting and receiving terminals, but also a means for the modulation, or moulding, of the current which is to travel this medium.

Microphone Old Idea

In Radio telephony, in place of an electrical direct current being used, advantage is taken of an alternating current, and it is this current which is modulated. This current is of a very high frequency, being quite beyond audibility. The purpose of the Radio receiver is to convert such received modulations into frequencies which are audible to the ear. Many of you have heard announcers refer to the word microphone, and have, no doubt, wondered whether it was another mystery word, coined only to make one's understanding of Radio more complex. Such, however, is not the case. A microphone is nothing more than a highly developed, supersensitive telephone transmitter, identical in the mechanics of its construction electrically, with the telephone transmitter which you use every day. Of added interest is the fact that the earliest of the telephone transmitters were called microphones, the word transmitter coming into use many years after the invention of the telephone.

Radio and Audio Frequencies

In order that my readers may not be confused, it seems expedient that both Radio and audio frequencies be defined, as from now on each of my discussions will carry many references to these terms.

Audio frequency may be defined as vibrations of any character which are audible or may be heard by the ear. Thus any sound, irrespective of character, which the ear can hear represents vibrations within the capacity of the ear drum to respond to and transfer to the auditory nerves. Conversely, radio frequency represents like vibrations which are of a speed or pitch beyond the ability of the ear to hear. Therefore, irrespective of their electrical source, if the created vibrations, or frequencies, remain outside of the possibility of hearing, they are termed radio frequencies, while those within such conception, are called audio frequencies. The question has often been asked regarding the range of vibrations audible to the ear. While this value varies in some degree, in accordance with one's sense of hearing, yet, in general, a frequency range of from 16 to 10,000 vibrations covers the total field audible to the average ear. These frequencies take in the lowest notes of the oboe as well as the highest notes of the violin. Hearing sounds above this register, usually results in pain as many of you may have experienced.

Modulation Is Essential

Modulation of the high frequencies as used in Radio is just as essential in order that we may understand their meaning after being converted when passing through our receivers, as is modulation of voice, or the direct current, used in telephony. In either case, each remain silent, or rather unintelligible until modulated. The whistling sound which is heard as one tunes in a broadcast station is but the tone of the carrier wave, or the unmodulated portion of it. As one tunes slightly sharper, his receiving circuit falls into synchronism, or step, with the modulated portion of the wave, and voice or music result. In all Radio receivers, it is of the utmost importance that both the radio and audio frequency components of the circuits contained must be kept very definitely within their respective pathways in order to insure the quality of reception which we desire.

My purpose, primarily, in emphasizing this point, is to caution the many constructors and designers of Radio receivers who blame all of the poor quality reception on the loud speaker which the owner uses.

While a voice transmitter is all that is required to modulate the direct current used in telephony, Radio transmitters, or microphones, as used in broadcast stations, require the addition of elaborate equipment for the modulation and amplifying of the voice or music energy emitted from the microphone. This energy is extremely small in comparison to the generated Radio wave. A descriptive explanation of such amplifying and modulating equipment is beyond the scope of these articles, it being sufficient to explain that their function is to momentarily add to, or subtract, wave energy from the circuit controlled by the microphone.

The amplifying equipment is not unlike that used in many receiving sets. It only differs in its almost unbelievable ability to magnify the original voice or music as it reaches this equipment, after

The Best Radio Affords!

$1.00 down!

FREE

Hydrometer and Voltmeter

As an *extra special* offer to those who hurry their order for the Radiotone Loud Speaker offered below, we shall include absolutely free a highest grade *Hydrometer* to test your "A" battery and a guaranteed accurate *Voltmeter* to test your "B" batteries. You need these two accessories if you want to keep your radio always at its best efficiency. A genuine $3.00 value—and given *free* on this special sale, while it lasts. So act quick!

Radiotone Loud Speaker

Only $1.00 with the coupon below brings this Genuine Radiotone loud speaker to your home on approval for 30 days! No radio is complete without a *good* loud speaker. Here's a first class loud speaker at an astounding rock-bottom price, direct—and on easy, monthly payments besides! Special now—Hydrometer and Voltmeter, $3.00 value, included FREE, if you send at once.

Makes Your Radio Complete

The Radiotone is super-sensitive, brings in distant stations with full volume so every one in the room can hear distinctly and easily. Wonderful clearness and absolute purity of tone. No distortion.

The Radiotone has a 14-inch horn made of Thorite in one piece without seam or joint, accoustically correct. This eliminates the metallic clang you often hear in other loud speakers. The reproducing unit is entirely enclosed at the base of the horn. The well balanced construction does away with all vibrations. The Radiotone has a graceful shape with a beautiful black florduline finish. It stands 23 inches high and weighs only 15 lbs. No extra batteries needed for the Radiotone—just plug it in as you do your head set. Nothing to wear out or get out of order. Sent complete with cord and plug.

30 Days Trial—$3.00 a Month

Straus & Schram, Dept. R-8411 Chicago, Ill.

Enclosed find $1. Ship special advertised Radiotone Loud Speaker. I am to have 30 days free trial. If I keep the Radiotone, I will pay you $3.00 monthly, total price $25. The Radiotone is to become my property as soon as you receive the final payment. If not satisfied, I am to return it within 30 days and you are to refund my money and any express charges I paid.

Radiotone Loud Speaker No. Y8726A—$25.00. Hydrometer and Voltmeter, FREE

If you have ever bought goods **on credit** by mail, tell us from whom. If there is anything else you wish to tell us about yourself, write on a piece of paper and enclose it with this coupon. But the coupon alone, fully filled out will do.

That's all we want to know and we're ready to ship the goods at once. No formalities. No C.O.D. We trust rich and poor alike when they merely show us that they are honest.

When the Radiotone comes, there's nothing to pay. Use it freely at our risk, on trial for 30 days. See how loud, clear and distinct the Radiotone brings in all stations—better than any other loud speaker that you have ever heard, giving you the best that is in your set. After 30 days trial if you think you can get along without the Radiotone, return it to us and we will refund your dollar plus all transportation charges. No red tape. The trial costs you not a cent. But if you decide to keep the Radiotone, pay only $3.00 a month until you have paid the total rock-bottom direct price—only $25.00. See if you can equal this offer anywhere on such amazingly liberal terms. You'll scarcely feel those small monthly payments.

Send Coupon NOW!

Only $1.00 with the coupon brings the Radiotone on 30 days' trial, satisfaction guaranteed, your dollar refunded if not satisfied. Send the coupon now while this special offer lasts. **Hydrometer and Voltmeter FREE, if you act quick.**

A B C'S OF RADIO SETS

(Continued from page 23)

having passed through the microphone, in a ratio comparable to a million to one. Imagine, if you will, the result of magnifying, or rather amplifying, music or voice a million times greater than its original volume, and you then have some idea of the great credit due the Radio engineering fraternity, the scientific minds which have made this possible. This accomplishment, rather than Radio itself, remains as the uncanny part of Radio to me. I have never been able to comprehend just what the tiny atomic electrons within a vacuum tube thought of themselves while performing this marvelous work. Possibly they are too busy to think, which is nearer the solution of my query.

In figure 7 is shown the essentials comprising a modern broadcast station. Contrary to the general impression one gains after viewing the multiplicity of tubes, switchboards and—what you have—figure 7 still remians a picture of what it was all about.

Parts of a Station

Each station comprises a high frequency oscillation generator, a microphone transmitter, a voice amplifying and modulating system, a ground and an antenna. Beyond this, all else that you may see is, as my friend Horle opines, nothing but scenery.

The function of the alternating high frequency generator is that of producing the alternating current, which is radiated, or started, from the antenna on its way to your receiver, and upon which the voice or music is carried. Both the amplifying and modulating factors, as well as the microphone or transmitter, have been explained as the producers and moulders of the sound which the carrier wave of the alternator is to deliver to you. The antenna consists of a combination of wires, supported upon towers, from which they are insulated, and which connects directly with the output system.

Antenna and Ground

The antenna consists of a multiple of copper bronze wires, supported but insulated, from steel towers, which are usually placed in close proximity to the broadcast station. This antenna is directly connected with the output circuits of the broadcast station, and function as the medium for the reception and radiation of the modulated and carrier wave.

The ground consists of either connecting wires, which are connected to the station and embedded in moist earth, or a network of wires also connected to the station, which are placed directly beneath the antenna, though some distance from it. Such a ground is known as a counterpoise. However, the function of either type of ground is to act as a return medium for the current radiated from the antenna, after having passed through your receiver.

Thus, as we hear ourselves speak, through the completion of a return circuit from air surges, as I pictured in complete loops or return circuits as used in wire telephony, likewise, a Radio transmitting station cannot transmit, nor can your Radio receiver accept such transmission, unless it be provided with some form of return circuit.

All writers are ever conscious that possibly sufficient detail is not given to make possible a clear understanding of his subject by the reader. In this feeble effort to clarify the interpretation between audio, wire and Radio telephony, I may be justly accused of such carelessness, though I hope that my explanations have been somewhat more correct than those of the southern darkey, who was explaining to some of his friends how a snapping turtle just missed being gobbled up by an alligator, through climbing a tree. When told that he should be more careful in his statement of facts, because it was well known that a turtle could not climb a tree, he said: "Well, I know that, but in this yere case, that turtle just didn't have no choice, he jess had to climb that tree."

(In his fourth article, next week, Mr. Gurney will explain the fundamentals of Radio receivers and how the sound waves are taken in and mastered for your entertainment.—Editor's Note.)

ZINGARO CONQUERS

(Continued from page 7)

sunshine you want. And the dogs and the pony will do most of the work. How about it?" The rancher jerked his head toward a flivver a few feet distant.

But he did not forget that Zingaro was hungry. They went into a small restaurant where a stout woman in blue checked gingham soon prepared ample rations of thick slices of fried ham and a garnish of eggs.

It was a twenty-two mile drive to the Hanan ranch. There Zingaro met Barney, his saddle pony, Shep, the black sheep dog, and her overgrown puppy, Babe. The next day he met the sheep at the mouth of a canyon where the walls ascended straight up for 1,500 feet on one side and 300 feet on the other. Here he was to experience all the loneliness that sometimes drives the sheep herder from an incoherent mumbler to stark madness.

But Zingaro kept his head level. Pessimistic at first, he soon felt the glow of returning health and returning optimism.

"I don't know just when the melancholy left," he wrote in his story to the Radio Digest, "but it may have been the day I climbed to the highest cliff above the timber line, 12,000 feet, looked down at the gorgeous landscape and felt that I was king over all."

Then came the terror of the "Great Alone," as he called it. Starlight coming down through the crags—no human being within many miles. The bleat of the little stray lamb. The sad cry of the withered ewe with no milk for her young. The quavering howl of the lurking coyote and the maddening yip of the starving wolf.

Zingaro built his fire and sat with his thoughts. He read poetry. Days, weeks and months passed—

* * *

HANS PEDERSON, arriving with the chuck wagon brought an express package from town which Zingaro had been anxiously awaiting.

"Think you know how to put it together?" asked Pederson, for the signs had stated the contents to be a Radio kit and he had been wondering about it all the way over from town. Now Zingaro was more used to a coal pick than he was to a screw driver and soldering irons and somehow he had not noticed those details in the magazine advertisement from which he had ordered the set. But you never saw a Pederson who couldn't handle tools. So Hans stayed over to put the thing together. He had never seen one but he had read about them and the directions were as explicit as if John G. Ryan himself had written them.

"I don't see how it's going to perform without a wire to the telephone line, but we can see how it looks with the parts together," said Hans.

While Hans was adjusting the more delicate parts, Zingaro stretched the aerial wire from the top of the corral gate post to the chuck wagon. Hans attached the lead to the set which was now properly adjusted with batteries and bulbs in order. A crowbar had been driven into the earth for the ground connection.

Then came the portentous moment of turning the dials.

Suddenly loud and clear came a woman's voice rippling a song from an unknown world! It was uncanny, weird, impossible!

Hans was so startled he fell backward over a bag of potatoes and sat down in a basket of onions. His imagination had been unable to stretch beyond the string that only went as far as the corral gate. Anyway it worked and life took on a rosier hue for Zingaro.

* * *

Everything was DX for the sheep herder and his new set. Every night was silent night so far as local interference was concerned. So he began to compile a log. He listed most of the larger calls from coast to coast.

"I have mentioned about fifty-five stations but do not think they are all," he stated in his story. "The nights in the foothills are generally frosty and I can pick up some very far distant stations. And again some of the little fellows that go rambling in and out among the high peaks fall off and come toppling down to my Radio that catches and gives them to me."

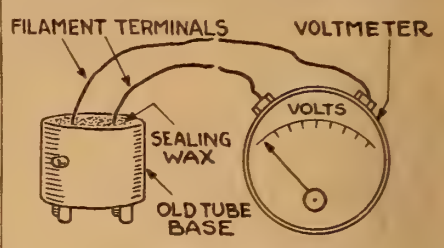
Thus the shackles of solitude that have harassed the sheep herder from the day Adam started working for himself were struck aside by this marvelous space annihilator, Radio. Music, comedy dialogue, university lectures, political speeches poured a copious stream into a word-hungry mind.

Surcharged with this flow, Zingaro felt the compelling urge to contribute his own expression of personality. He consulted his periodicals and answered other advertisements which brought him bulky packages of literature and finally a box with a portable typewriter. He toiled over the rules of preparing manuscript.

Finally came to the Radio Digest, a little story about himself in the third person. He was asked for more details and pictures and he replied with a second manuscript (from which this story was compiled) and seven pictures. We do not print Zingaro's story as he wrote it for his own sake. When he reads more and writes more he will be glad that we didn't. He has the spirit and soul of a real writer, but fate started him out in an unfavorable environment. Now he is hoping the "twelve hours of daily sunshine and 100 per cent air" that have brought him vigor and health may, with much listening, reading and study, help him to go back to the East a man of fame and letters.

Connections Tester

Most set builders do not like to put the tubes in a set they have just built as, in case of a short circuit, they would be blown. Take an old tube base, scrape it out and solder two number 18 rubber-covered wires to the filament terminals. Then fill the base with sealing wax and



fasten the other ends of the wires to the terminals of a cheap voltmeter. This saves bulbs and the voltmeter will register 22½, 45, 67 or 90, as the case may be, and show you which B circuit is shorted into the filament wiring if you have made a mistake.—Momo Hunter, Milwaukee, Wis.

Hydrometer Is Necessity

There are many fans who charge storage batteries without testing them with a hydrometer to see whether the batteries have been fully charged. Without the use of this instrument the fan cannot tell in what condition the battery is, and if it is not charged at certain intervals its life is materially decreased. A hydrometer is one of the best investments the B. C. L. can make.

A carefully installed indoor antenna will often give very nearly the same results as an outdoor aerial.

A crystal detector, as well as a vacuum tube detector, can be amplified to almost any degree.

This Aerial Gets Everything But Noise

DRAY RADIO LABORATORY
Precision Radio Apparatus Tests

KANE ANTENNAE COMPANY — 6 EAST LAKE ST., CHICAGO

Gentlemen: December 24, 1925

As you requested we are enclosing under separate cover a picture of the Kane Antennae you recently installed on the roof of our building, at Lake and State Street, Chicago. As you know, we have never here at the Laboratory been able to get clear reception from distant stations. As soon as we turned on enough power to bring in the DX we of course picked up the electric sign noises, the elevated noises, the telegraph office next door, the street cars, the elevators, etc. Loop sets with their strong pick-up of local noises were particularly bad. For the last couple of months we have been getting letters from our dealers telling us that if we could only figure out some way to install radio sets near power noises with some scheme of Antennae that would bring in the distant stations with less of the local noises, that they could sell more sets in difficult places where all makes of radios had proved too noisy for satisfaction. In many cases these dealers could not give decent demonstrations in their own stores. Finally we heard from Henry Stahl and Son, our dealer at Elkhart, Illinois, that they had eliminated the interurban and power line noises at their store by the use of a Kane Antennae. This was what led us to ask you to show what you could do for us at the Laboratory. Last night when we tested out your eighty foot transposed antennae and counterpoise, we were very much surprised. We had distant reception of very good quality. We checked back by using the usual type of ground and the ratio of power noises to music increased several hundred per cent, rendering the reception absolutely unsatisfactory. Then we would switch back again and get very excellent reception. We are enclosing a check in payment of your invoice. We are going to tell all of our dealers about our experience. After all the perfect schemes that we have wasted time in trying, we are glad to grant you the permission of publishing this letter if you care to.

Very truly yours,
DRAY RADIO LABORATORY, By W. R. Dray.

The KANE ANTENNAE entirely eliminates all power noises such as leaky Transformers, Generators, Motor hums, Delco Plants, etc. Power noises cause more trouble than all other forms of Radio interference. Get rid of them NOW by ordering a KANE ANTENNAE.

Get Facts NOW About The Kane Antennae

We will send you working drawing with instructions for erecting this wonderful Antennae for a dollar bill (a check will do). If, after looking over the drawing, you decide you would rather have a factory-built Antennae than build one yourself, we will take back the drawing and allow you full purchase price on an order for an Antennae.

The Special Kane Antennae for Radiola Super-Het's.....$10.00
The Regular Kane Antennae for all other sets that use a ground connection. 20.00
Working drawing with instructions for erecting..... 1.00

(Stamps not accepted)

Postpaid to any part of the United States or sent C.O.D. when 25 per cent of price accompanies order.

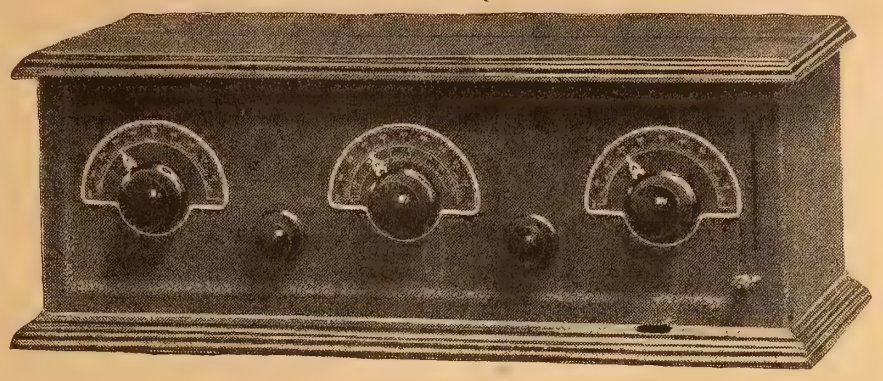
OPERATING AND TROUBLE SHOOTING

OPERATING and Trouble Shooting, is a Radio Digest feature, the purpose of which is to give practical information on the operation, care and cure of simple troubles in every kind of receiver. Standard Radio receivers of wide distribution and use are studied from the standpoint of instructions for installing and connecting, tuning and operating, and remedying little difficulties. The suggestions below, if executed faithfully, will make winter broadcast listening yield all there is to yield to the reader and give your set a fair chance to show its worth.

For the Owner of a Stewart-Warner Receiver



THIS is a most handsome outfit with mahogany crackle finish panel, a solid attractive cabinet and gold finished dial scales. That was what first struck the writer when Model 325 was hauled out of its heavy corrugated board packing. So many sets that are exceptional in results present such a poor appearance that to the feminine mind they are impossible in the parlor. This one is a delight to the eye.

The antenna lead-in wire and the connection to ground should be as short as is reasonably possible and should not be run together at any point. Many Radio set users bring these leads together at some point say five to ten feet from the set and then twist them together for the rest of the way. Do not do this under any circumstances. The wire from the aerial is to be brought into the set through a hole provided in the rear of the cabinet near the left end, directly behind a binding post identified with the word "aerial." About three inches to the left is a similar hole and binding post for the ground wire.

Two small jacks are provided for the cord tips on the speaker cable and it should be noted, in particular, that one of these is marked "—" while the other is marked "+." The terminals of the speaker cord are identical except that in one there will be found a red or blue tracer woven into the covering. This means that the phone tip on this wire goes in the "+" jack on the set, while the unmarked tip goes in the other small jack. The battery connections are taken care of by a five wire cable, the coverings of each wire being of a different color scheme. Thus you cannot well make a mistake in connecting the batteries with the consequent chance of burning out a tube or two.

Accessories Required

For operation this receiver requires one 6-volt storage battery, or its equivalent in a way of an "A Battery Eliminator," and two 45-volt B battery units, either dry cell or storage, or their equivalent in a "B Battery Eliminator." One of the storage battery terminals will be found to be marked POS. or + or with a dash of red paint. This is called the positive terminal and the other is the negative. That wire of the battery cable which is pure yellow in the color of its covering must be attached to the positive post of the battery. That which is black with a yellow tracer thread woven in, goes to the negative. Should a Philco, Gould or Cooper power unit for "A" supply be used, it will have these same two terminals, + and —.

We tried the set on both B batteries and B eliminators with equally good results, connections being as follows: One of the B batteries will be found to have a minus post to which you attach the black covered wire with red tracer thread. This B unit also has a plus 45 post to which the maroon covered lead is connected. The other B battery has a minus post and the short black wire soldered to the maroon lead by the manufacturer goes to this minus post on the second B battery. The bright red lead goes to the remaining plus 45 post of this second battery. In the case of the B eliminator, however, there will be found three binding posts, B—, B+45 and B+90. The black and red lead goes to B—, the maroon lead goes to B+45 and the short black connector is to be cut off. The bright red covered wire goes to B+90.

Aerial and Ground Connections

As to aerial, it may consist of a single wire between 50 and 100 feet in length, measured from the end furthest out, to the set. The writer would recommend the enamelled wire marketed by Belden for use as antenna, as it will not corrode and will never need replacing except in case of actual breakage. Use porcelain or Pyrex glass insulators at each end of the straightaway portion of the aerial and either extend the wire itself down to the set or use heavy rubber covered lead-in wire which is soldered to the straightaway close to one end just inside an insulator. In either case the lead-in portion should be kept clear of the building by insulators and kept from swinging, which would cause crackling noises and gradually tear off the insulation. Bring it into the room either through a porcelain tube or by one of the flat insulated strips on the market which go under the window sash.

The ground in most cases can be made to a cold water pipe. These instructions have been in print many hundreds of times before but for the benefit of the new owner of a set they will be briefly run over once more. Scrape the surface of the pipe for a length of about two inches, so you get through the corrosion, and the exposed metal is bright and shiny all the way around. Then put on a ground clamp such as can be purchased at any Radio or electrical store for this purpose and connect a wire from the ground post of the set, to this ground clamp. Remember, while it is not half as much trouble to install as the aerial, it is just as important and the set will not function properly without a good electrical connection to ground made in this way.

The country user of this, or any other set, can best get a ground by burying several large pieces of metal in a spot usually damp and soldering a connection from each one to the ground connection wire. Old wash boilers, pipe, edge-of-roof gutter, chicken wire and cylinder head shims are suggested. It is easier, if a pond or spring is close, to drive a length

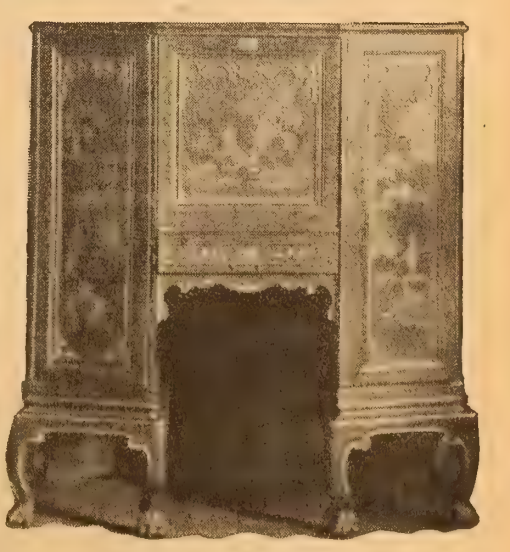
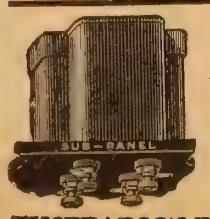
THORDARSON
Super
TRANSFORMERS
Standard on majority of quality sets

In sets priced as high as $2000 you'll find Thordarsons!



IS your radio set lacking in clearness and volume? To give it a *tone quality* comparable with that of the finest receiving instruments, replace the present audio frequency transformers with Thordarsons. Your dealer carries Thordarsons, *identical* with those used by nearly fifty leading manufacturers whose sets are priced as high as two thousand dollars each. Follow the lead of the leaders—amplify with Thordarsons. Write for interesting literature.



Types and Prices

Thordarson Super Audio Frequency Transformers, sub-panel or top mounting type: 2-1, $5; 3½-1, $4; 6-1, $4.50. Thordarson Power Amplifying Transformers, $13 pair. Thordarson Interstage Power Amplifying Transformers, $8 each. Thordarson Autoformers, $5 each. All Thordarsons are unconditionally guaranteed. If dealer cannot supply, order from us.

STEWART-WARNER SET

(Continued from page 25)

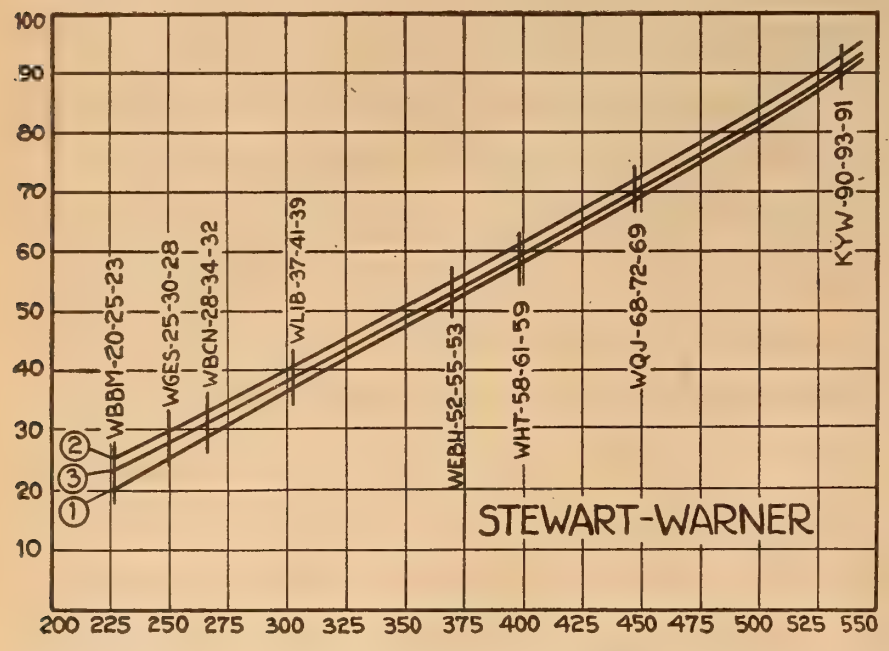
of rod into the ground in the wet soil and attach wire to this rod with a ground clamp.

The accessories having been connected we are ready to put the Stewart-Warner into operation. This receiver requires five tubes or bulbs, known to the Radio fraternity as "A" tubes, because the manufacturers identify them as UV-201A or C-301A or M-401A, etc. The majority of dealers today have a tube testing device of some kind and you should insist on your tubes being tested, not only for filament lighting, but for amplification. If any one of the five tubes is inefficient the results will be most unsatisfactory even though all tubes light. Turn the small switch knob in lower right corner to the left which is the "Off" position and insert the tubes in the five sockets. Now set "Volume Control" knob and "Battery Control" knob so each points upward and slightly to the right, a "2 o'clock position." The switch in lower left corner may, for this first test, be turned to the right.

Now turn switch at right, to the right, the "On" position, and the tubes should all light up. This will not be bright, as you would expect from an electric light bulb, as these filaments are not of the type to get that bright in normal use and the inner surface of the glass bulb is coated with metallic magnesium which prevents anything but a slight glow from getting out around the lower edge.

The dial numbers on the first and third pointers have no connection with the wave length on which a station may be transmitting but the center dial is provided with an auxiliary scale below the 0 to 100 scale, giving the approximate position of the pointer for settings by meters. The center pointer and that at the right (number 3) will run pretty close together in their settings for the various stations and the first pointer will not be far from them. It will, however, be somewhat different because the apparatus which it controls is influenced by the antenna and ground connections and these differ in every case.

As a starter, set all three dials at 39 which is in the section in which one finds such stations as KDKA, WLIB, WSMB and KTCL. Now place one hand on dial 1 and the other on dial 3 and move them slowly back and forth between 36 and 42 on their scales. If nothing is heard set dial 2 at 40 and repeat this operation.



If no results, turn the "Volume Control" knob a little further to the right and try again. It may be that the "Battery Control" knob should be turned further to the right also. A combination of settings of these two knobs and the dials will be found that will bring in programs. Once a station is tuned in, bring it to maximum strength with the dials, very carefully, and then turn "Battery Control" knob to right to the point where further turning does not help, and leave it. Then turn "Volume Control" to right until signals become a little distorted and leave just to left of this point.

This "Volume Control" is the key to long distance and clear volume. Its position will have to be altered slightly with each new setting of the large dials and in each case it will be found that it can be turned to the right just so far and a maximum of range and volume will be had before distortion shows. When a powerful local is tuned in and the volume causes distortion, due either to overloading of the last tube or rattle in the loud speaker, turn the small switch at left, to the left, which will reduce the volume and clear up the program. When looking for long distance stations, though, this switch should be at the right or "Full Volume" position as otherwise you might not hear the program at all. When through using set, simply turn switch at right to "Off" position.

(The Day-Fan five tube single control set will be discussed in the next issue.—Editor's Note.)

RADIO BILL PROGRESS

(Continued from page 10)

plane that inventive genius and mechanical progress will permit. The law in force today does not provide establishment of such a system."

The secretary said, in discussing the bill, that three facts are settled: first, that Radio legislation is absolutely and immediately essential if we wish to prevent a chaos in Radio communication, especially broadcasting; second, the bill now proposed has already received substantial approval; and third, the principles in this bill have received the approbation of both the Radio industry and the Radio public.

Davis Tells of Congestion

Judge Stephen B. Davis, solicitor of the department of commerce, went into the provisions of the bill in detail and outlined the increases in the Radio industry and the congestion that is filling the ether. He expressed himself as heartily in favor of the provision of the bill providing for an appeal committee to consider a decision of the department.

Representative S. H. Appleby and Representative E. R. Ackerman, both of New Jersey, appeared before the committee and filed protests at the high power used by the Radio Corporation superpower station at Bound Brook, New Jersey.

E. S. Wilson and W. E. Harkness, both of the American Telephone and Telegraph company, and S. Brown, of the Radio Corporation of America, appeared before the committee, endorsing the bill, and J. L. Nicholson, representing the U. S. Shipping board, appeared, asking for minor changes on behalf of the shipping board.

But One Opposes Bill

Other witnesses appearing before the committee included Paul B. Klugh, executive chairman of the National Association of Broadcasters; H. W. Smith, National Carbon company; Major J. O. Mauborgne, U. S. Army signal corps; Emil J. Simon, president of the Intercity Radio Telegraph company; Captain Ridley McLean, director of naval communications, U. S. Navy, and Lieut. E. M. Webster, U. S. Coast Guard. All of these witnesses appeared in favor of the bill except Mr. Simon, who said that the present law is good enough and he opposed additional restrictions as provided for in the new draft of the bill.

Howell Charges Monopoly

But in the senate, where Senator Howell has introduced a free ether bill, a real conflict is expected. Senator Howell stated that he has been informed that claims of vested rights in the ether are contemplated by some parties and that was his reason for trying to get action by congress declaring the ether free.

Judge Davis was also called to testify at the senate hearings of the Howell ether bill and the Dill Radio control bill. He outlined the development of the Radio industry up to the present time, including a full discussion of the present law under which the department operates and which was passed in 1912. In answer to questions of the committee, he said that in his opinion, none of the present broadcasters have a vested right or could claim a perpetual license.

The Radio licenses for broadcasting are divided about as follows, he told the committee: stores, including Radio stores, have 124 stations; colleges and schools, 94; churches, 43; publishers, 35; manufacturers, including Radio manufacturers, 30; states and municipalities, 15; banks, 15; hotels, 12; societies, 11; and scattering, 22.

United States Tax Free

Judge Davis also called attention to the fact that the United States and Canada are the only countries in which the listener in does not pay something in the way of a tax or license, which is paid largely to the broadcaster for his entertainment. (Editor's Note.—The judge is partly in error, for Canadian listeners in do pay an annual fee, but only in Manitoba does a part of this revenue go toward the maintenance of broadcasting.) He said also that at the present time there are more stations than there should be for good broadcasting results and that it would be unwise for congress to allow perpetual licenses to anyone and he strongly contended for a limited license.

In response to questioning by members of the committee, Judge Davis expressed the opinion that some of the provisions of the bill will provide for the killing of any monopoly of broadcasting stations; that the licensee gets a valuable property when he gets a wave length from the government that will increase as time goes on; that no person, or unified group of persons, should be allowed to own more than one station, and that more than 200,000 persons were employed in the Radio industry.

Educators Give Testimony

Dean J. H. Umberger, of the Kansas Agricultural college; C. W. Warburton, of the bureau of extension of the department of agriculture, and Prof. F. G. Helyar, Rutgers university, were also heard

The New Radio Book HOW TO

Operate Sets
Construct Parts
Improve Reception
Understand Radio
Assemble Circuits

The greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest, it supplies the demand for a book covering every phase of Radio. Starts at the beginning with simple explanation of Radio reception, with technical explanations of the different parts and leads right on to the more advanced instruction. A complete handbook serving as a ready reference in the Radio field. It gives suggestions on parts and sets which will prove to be a money saver. Blue prints and diagrams are essentially an important part of this book. Special chapter is devoted on "How to Operate," which gives detailed information on the operation of many well known sets.

A general information is vital to the knowledge of anyone interested in Radio. It gives a complete list of all broadcasting stations with a colored map showing their location. The workshop kinks will save you time and money. Now is the time to take advantage of this exceptional offer. **Mail coupon today!**

Unitrola: Single Dial Phonograph Receiver

Part II—Assembly of Apparatus

By Carl Patterson

PROBABLY to those who have built one or more receivers before, the assembly of Unitrola will present but little difficulty, but for those who may be tackling this outfit as their first experience at building a set I am going into all details. Even the more experienced may be reminded of one or two points they have been forgetting. To begin with, we have in figures 2 and 3 what are known as layout diagrams. Figure 2 includes also the detail for constructing the special brackets necessary and the binding post mounting strip. The main part of figure 2, however, is the layout of the front panel and this must be enlarged to full size for a drilling template. With a sheet of flat, unwrinkled paper a little larger than the panel size, a ruler and sharp pencil you can readily enlarge this drawing. Possibly the best way, to insure right angles, is to lay the front panel itself on the paper and draw closely around it.

Start at Left

You will find that practically all the holes fall on but two or three lines both vertically and horizontally. It is a good idea to start at the left and work across toward the right. Be especially careful of the placing of the holes in the upper center as the three condenser mounting holes and the shaft holes must be exact or there will be trouble. It is better, naturally, to have the other holes as exact as possible also but there will not be the consequent trouble if they are not. It should be noted that the upper center-group hole is for one make of dial only. If you use a Mar-co dial, for example, this hole above shaft would not be put in but there would be a hole ¾-inch below the shaft hole. If you use the non-vernier dial furnished, no special hole is needed.

A large, flat surface, preferably a bench top, or at least a breadboard or piece of plank, is now required. The 7"x12" panel is placed face upwards with the drilling template, cut to size, squarely on top of it. The template should either be clamped to the panel with small C clamps or pasted to it lightly with a touch of paste in each corner. A center punch and a hammer are next used and a light tap with the hammer, and the punch carefully placed at each cross, will put a little dent in the panel beneath. With all holes marked, the template is removed. In drilling, watch the sizes carefully as the holes cannot be made smaller once they are in. If you do not have every size called for, use the next smaller size drill you do have and ream to size. In connection with the 5/32 holes, it will be found that a 9/64 drill will do if the larger size is not in your collection. The drilling should be done with the panel flat on the surface mentioned and preferably clamped to it. Do not try drilling on an uneven surface as many of the holes will chip out on the underside.

Sub Base Panel Needs Care

The same procedure is then followed with the diagram of figure 3 and the large sub base panel. Greater care is necessary for exactness in placing here, as most of the holes are in pairs and it would require reaming later to get apparatus mounted. All holes in this sub base are 5/32 or 9/64. The binding post mounting strip can be prepared either by making a small template or marking directly on the bakelite with pencil or pointed tool. The aluminum brackets should present but little trouble as you probably either have or can borrow a pair of metal snips. The bracket layout of figure 2 can either be marked on the aluminum itself or a paper pattern made. Make two of these aluminum pieces, but when it comes to bending them remember to bend the flanges on one to the left and on the other to the right. To get a good, even bend, it might be a good idea to score one side lightly with a pointed instrument, along the lines indicated and then bend with heavy pliers. If you have the right place, another method is to clamp the bracket to the edge of a heavy bench with the scored line exactly on the sharp edge and bend the flange down with a hammer.

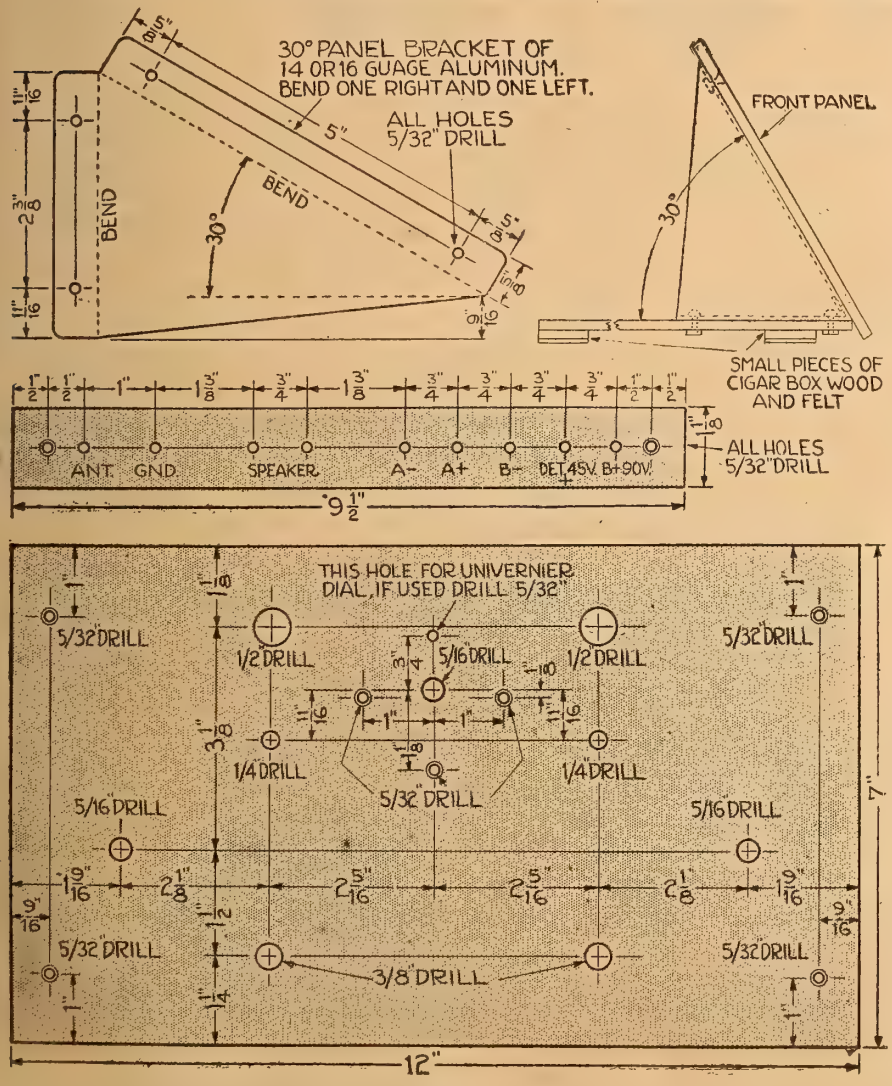

Figure 2

In mounting apparatus, follow the common-sense procedure of putting on the sturdier pieces first. Put the rheostats on the front panel first, the 15-ohm size going in left hole at the bottom. The 30-ohm is placed in the lower right hole. Then put the 200,000-ohm C-R-L unit in the left hole 2¾ inches from the bottom and the 500,000-ohm C-R-L unit in the right hole across the panel from the first. The condenser comes next and is mounted with stator plates downward. The compensator shafts project through the ¼-inch holes about 2 5/16 inches each side of center. If care has been used in punching and drilling, the three mounting screws and the shafts will all pass through their allotted holes without trouble. If the mounting holes do not quite match up, a little reaming, with pressure toward one side, will correct this enough to get the screws in. Always remember when putting on an instrument of this kind to just start the three screws and tighten up a little on each, going from one to another so that they all reach tightness at the same time.

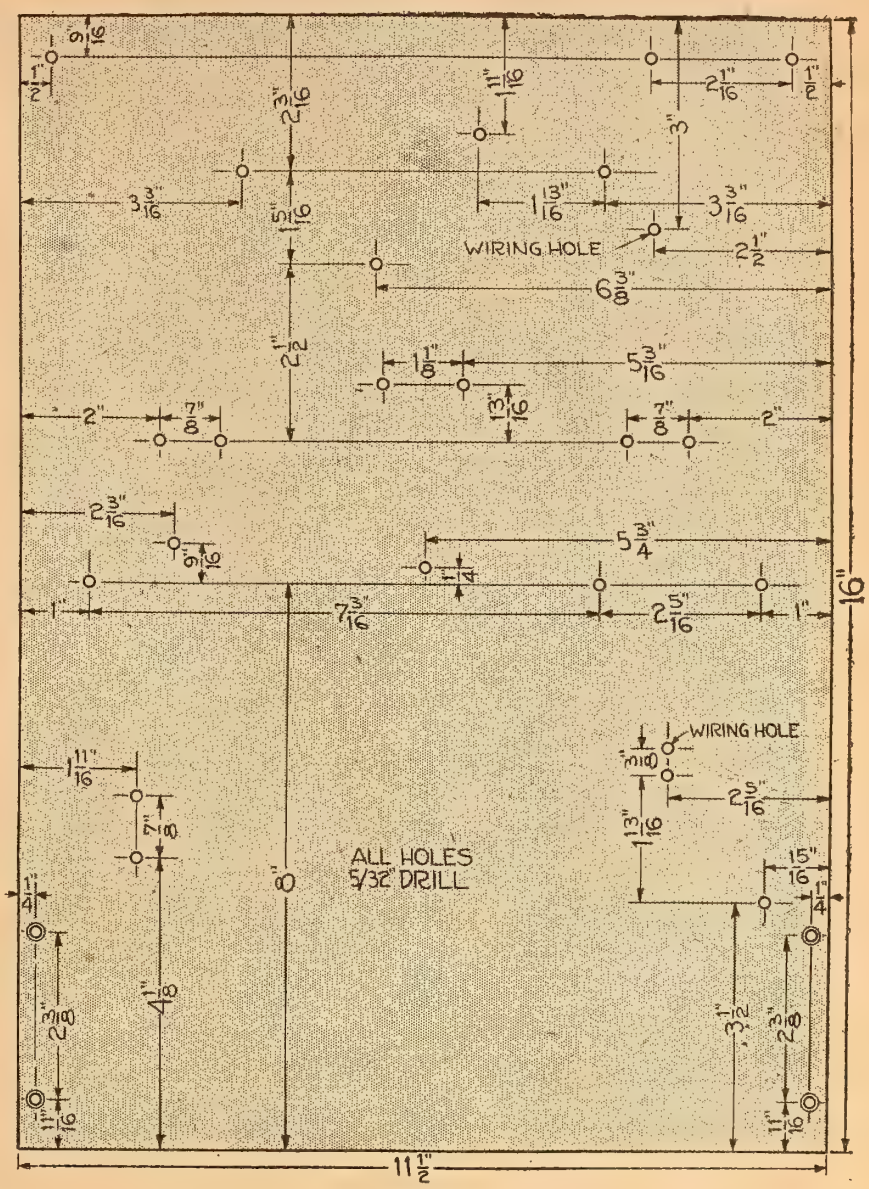

Figure 3

Mounting of Lights

The Dialite is mounted by a single ½-inch hole, the one to the left and above the condenser. This is to be tightened in place so that when the hood is turned toward the off position, the opening is upward and, when in the on position, the light will shine out across the dial. The pilot light goes, of course, in the right hole just above condenser. The dial comes last and, as most manufacturers of dials include very complete directions for their assembly and mounting, it will probably go on without complications.

Going now to the sub base, place the Amperite mounts in position first, their holes being just back of center, fore and aft, and slightly each side of center crosswise. Study of the photograph, figure 4, will make their positions clear. The Grid Gate mounting, Daven No. 50, is then placed on the hole 8 inches from front and 3 5/16 inches from right edge. A Sangamo .5-mfd. condenser is then secured in the rear right corner with the terminals forward and the right mounting lug used on the hole at rear right of sub base. The other .5-mfd. condenser is mounted with terminals to the right and the rear lug used, on the hole 8½ inches from front and 2⅛ inches from the left edge (refer to figure 4).

Sockets and Transformers

The five sockets are next. The one at the extreme left is mounted with P and

RADIO

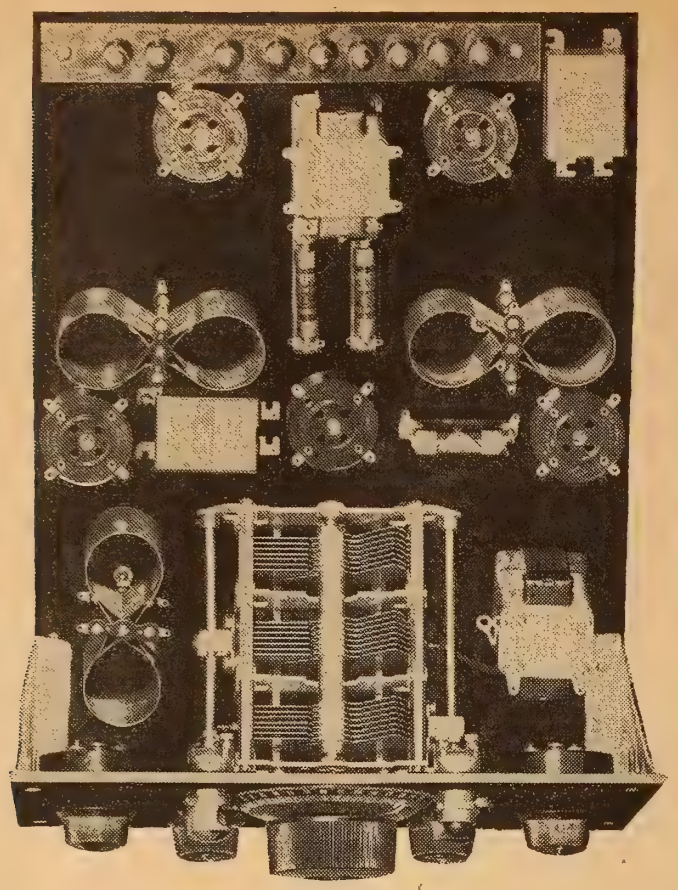

Figure 4

MAKING THE UNITROLA

(Continued from page 27)

G posts outward (to the left); that at the center is placed with P and G toward the rear; that at the right is secured with P and G outward (to the right). Going now to the audio frequency tube sockets at the rear, both are mounted with P and G toward the front. Place one of the audio transformers in the front right corner with Grid and Plate posts to the rear. The other transformer goes in the center to the rear and with its P and G terminals to the rear. The rear left and front right mounting holes are used on the first mentioned transformer while the front left and rear right holes are used on the second one.

The binding post mounting strip is placed across the rear edge and the two end holes used for mounting. I used two ¾-inch high, nickeled pillars for this purpose with a screw coming up through the bottom and another passing through the strip and downward into the pillar. Round head screws were used at all four points. If you do not have such pillars and cannot get them at your Radio store, long screws can be used and binding post terminals from old dry cells stacked up to about ¾ inch on them. Little square blocks of wood could also be used, measuring 1 inch square and ¾ inch high, with wood screws used at each end.

Placing of Coils

The coils come last and should be handled most carefully. The Twin-8, which goes in the left front corner, is placed with G and B terminals to the right, while the other two are placed with G and B toward the front. I used round head, 6-32 screws for securing the coils, transformers, condensers and Daven mounting, and flat head 6-32 screws for the sockets and the Amperites. The front panel and sub base can be secured together with the brackets and the 6-32 screws to be sure that all fit correctly but will have to be again separated for wiring, as much of it can best be done on the sub base alone.

On looking over the set once more I notice a couple of mounting points not quite covered above. The rheostats are placed with terminals inward, the C-R-L units with terminals downward. This cannot be clearly seen in the photograph and would not otherwise be clear. All sub base mounting machine screws are to be cut and filed off flush with the nuts on the under side.

(This completes the assembly of the parts and in next week's issue, Mr. Patterson will cover the wiring, wire by wire, so that no mistakes can be made—Editor's Note).

ADVANCE PROGRAMS

(Continued from page 21)

Erving, baritone; Louise Bohmrich, violinist; Prof. Edwin Franze, pianist; J. V. De Cimber, pianist-composer; talk, F. W. Vaugh, "Electricity."

WSUI, Iowa City, Iowa (483.6m-620kc), 12:30 p. m., duets, Mrs. Mildred B. Paddock, soprano; William G. Edmondson, Jr., tenor.

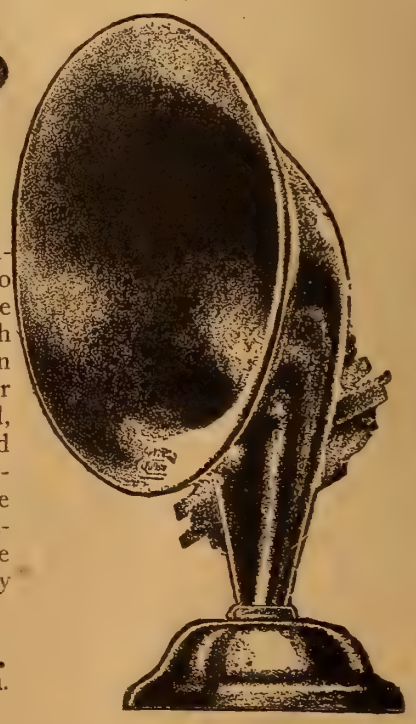
THE FORD of LOUD SPEAKERS
$6.50



Fultone Loud Speaker has conclusively proven to the radio world that a reproducer could be made and sold at $6.50 which would handle music or speech in volume as perfectly as any speaker at any price. The horn is solid, non-ringing and wide-throated enough to handle the powerful reproduction from super-heterodyne or reflex. The adjustable diaphragm permits matching Fultone to any receiver and "B" battery voltage.

Potentiometer Control for R.F. Stage

Kinkster Applies Part Across Filament Leads

I don't know whether this qualifies as a kink or not, but it saved considerable money for me and I doubt whether many of your readers are sufficiently engineers to straighten out a tricky tuned radio frequency stage. In my case I had built a four tube set with a method of compensating for the capacity of the tube in the first socket but the compensation method did not work out and I had a really good looking, carefully made outfit that wouldn't behave. The insertion of a potentiometer across the filament wires and with its center terminal attached to the grid return of the first tube now gives me good control of oscillation in the tuned radio frequency stage.

From Milo Gurney's articles, and others you have published, I presume this would tend to broaden tuning but I seem to have comparatively little difficulty separating stations and I did not have to junk this set. Maybe some other beginner is in this same difficulty with tuned radio frequency stages and does not know of this sure-fire solution.–Charles Windsor, Joplin, Mo.

WORKSHOP KINKS EARN A DOLLAR—

THERE are many little kinks worked out at home that would aid your fellow Radio worker if only he knew about them. There are new hook-ups, new ways of making parts and various unique ways of operating sets that are discovered every day. Radio Digest is very much interested in obtaining such material. Send them in with full details, including stamped envelope, so rejected copy may be returned. The work must be entirely original, not copied.

RADIO KINKS DEPARTMENT
Radio Digest
510 North Dearborn St., Chicago

CONQUER PIKES PEAK

(Continued from page 6)

drifted down from the towering domes. Friends are speculating as to your location. Listeners, tuned in on KFXF, have been hearing of your progress until you disappeared beyond the reach of all observation glasses. They are waiting for the signal from the top of the world as it appears in Colorado.

* * *

LEG weary and ready to drop you feel some relief because the snowstorm has swept its way from under your feet. The light of the moon and the stars reflected by the pure white snow has made the night clear and wonderful. You are in a world apart from all that you have ever known. It puts new elixir into your blood. And you thrill with a sense of victory as the man ahead gives a yell and points upward. There against the sky is a long, man-made ridge terminating in a skeleton tower—the goal!

It is almost a race to be first at the door. Aching shoulders are relieved of their burdens. Each one has a work to perform. A report is telephoned to the KFXF studio. Wood is brought in and a fire built in the range. Snow is melted for coffee. Provisions are unpacked. Food is prepared. Fireworks are inspected and put in order. All preparations are made for the big flare at the hour of 12, midnight.

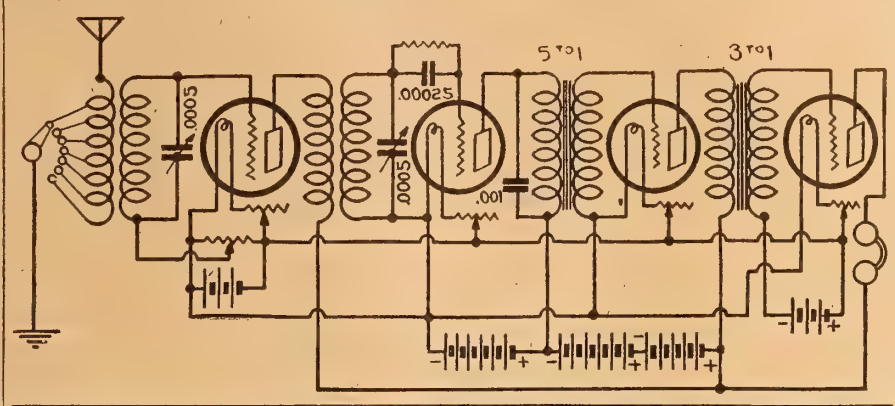
You never knew what hunger was before. In all your life you never enjoyed food as you do this New Year's Eve on top of the world. You are exhilarated and happy. The meal is over and the arrangements completed for the firing of the rockets and the lighting of the 50,000 candle power flares.

* * *

A hundred thousand pairs of eyes are straining through the night. The clock strikes 12. The top of the famous old mountain seems to burst into flame. Red and green flames shoot upward in a towering cataract. Rockets fountain their floating balls of fire that seem to come from the stars themselves. A new year has been welcomed in from the highest point of old Pikes Peak.

For those who are unable to see the spectacle direct a most vivid description is given by the announcer at the microphone below and the work of the ten men who have plodded their weary way to this lofty point has made the event a national celebration. As a musical setting to the whole plan there comes an accompaniment by the Warner Stone Columbian orchestra in the KFXF studio.

HOOK-UP LESSENS OSCILLATION



RADIO BILL HEARINGS

(Continued from page 26)

by the commitee, telling of the magnitude of their broadcasting and the favorable educational work they are doing; of the unlimited possibilities of Radio for the furtherance of knowledge among the people denied higher education; and the obstacles, in some cases, they have had to overcome to do their work.

Although nothing has been done that would point to any definite advancement toward congressional action, the members of the house and senate committees are at least receiving a lot of information on a subject they seem to little understand, and there is a hope that the knowledge they have been given on the deplorable condition of the ether channels may lead to the clearance and regulation of Radio at further hearings to be held in the future, for which no dates have been set.

The Reader's View

Opera in English

This is the day of voting contests. Why not get a vote from the public on whether they prefer their grand opera in a foreign language or in our own English? The schools and societies all cry, "Better English." Why not make unpopular this singing in a foreign tongue? Boost America. —Mrs. B. S. W., Galesburg, Ill.

Leaving What?

Adoring jazz, especially saxophonic, to death, I freely give my great discovery to the world.

Finding two stations heterodyning jazz, noting improvement, had to research. Caught three heterodyning same. Wait till you hear them! Suggest all jazz and all saxophone selections be transmitted on 530 kilocycles, regardless of station's assigned frequency. Eliminates hunting for 'em, vastly improves quality and increases volume.

The highbrows preferring musical instruments to saxophones must then dial there for their stuff.

If not asking too much, when you accomplish this, give a little variety to above by assigning to 520 kilocycles fresh and breezy announcing, saw solos, Ford Fiddling, infant prodigy stuff and the rest of the high class rural entertainment so freely offered.—E. I. S. Butler, Pa.

Attention "Brass Pounders"

I have read of the proposed tests, January 24-30, of the international exchange of programs and that all American stations will stand by at certain times, one hour.

What about the "brass pounders"? Last year at the time of the tests, we could get the stations all right but the everlasting dit, dah, dit, dat, made it miserable. Of course, we understand there is no law to control them, but we think they should be willing to lay off for a few hours at least.

We have been hearing some code every night for over a month at all hours (7 to 10). Isn't 10 o'clock the time set for them to come on the air?—W. A. A., Richmond, Ky.

All Right, Canadians, Write!

I would like to see more letters on the readers' page from Canadian listeners about Radio conditions in Canada.

In particular I would like to see comments on the Canadian method of licensing Radio equipment. The license fee of one dollar per year is said to be used in controlling and eliminating interference.

Come on you Canadian fans and let us hear from you. This is a topic on which we are all more or less interested.—R. F. Sperling, Manitoba, Can.

Who Were the Artists?

Please ask the announcers to let us know occasionally who we are listening to. I have listened for more than an hour without a station announcement. I enjoyed the violin and piano selections on a recent program, but would liked to have known who they were.—A. C., Durham, N. C.

ELIMINATE STATIC!

Enjoy perfect reception regardless of weather conditions. The Static Eliminator—the newest and most startling thing in Radio—cuts out practically all static without loss of volume!

And in addition it will help increase selectivity, tune out local stations, sharpen signals, remove noises, lessen interference and prevent re-radiation!

Use it with any receiving set — simply hook up to your aerial lead-in and enjoy perfect reception unmarred by static.

Nightingale
THE UTMOST IN RADIO

DISTANCE, volume, purity of tone—all are at your command in unstinted measure when you make the Nightingale Six, the companion of your evening hours.

With the golden tube contacts, straight line wave condensers and other special features of the Guthrie Songbird Line, the Nightingale Six represents supreme radio value housed in cabinets of strikingly rich and appropriate design and finish.

Two stages of tuned radio frequency amplification, detector and three stages of transformer coupled audio frequency amplification afford a volume three times greater than can be secured with a five tube set.

Complete manufacture in our own shops give us control over every feature that is vital to your satisfaction. See the Nightingale dealer for any one of our several cabinet models or write to

Questions and Answers

Direction of Battery Current Flow
EMA, Cherryvale, Kans.

Would appreciate an answer to the following question. What is the direction of the flow of electricity in electrical batteries? Am enclosing fifty cents for reply.

A.—We are quite interested in your inquiry, as this brings up a question which has resulted in more incorrect answers than possibly any question in Radio.

One but has to recall that irrespective of type, class or other considerations. Positives attract, negatives repel, which electrically means that the positive pole of an electric generator, battery or magnet, is the attracting pole. Hence, when a medium is connected between the two poles, viz, of a battery, in order that current may flow, its direction must of necessity be from negative to positive.

Many answers have included the above but their replies have also stated that the current within the battery reverses itself and flows from negative to positive, quite forgetting, that internally a battery merely comprises the elements making possible the generation or establishment of negative and positive polarities. One could, by an extreme stretch of the imagination, conceive the flow internally as from negative to positive, but could not do so without breaking all of the laws of attraction and repulsion.

Cleaning Storage Battery Terminals
HAH, Neola, Iowa.

The terminals upon my A battery corrode very easily, and, while I try to keep them clean through keeping them wiped thoroughly and scraping the accumulation off, yet in a few days it is as bad as ever.

If you can tell me what I can do to stop this, I will greatly appreciate it and send you whatever charges there are for the information.

A.—The corrosion you speak of is what is known as "creeping" and is the result of a portion of the acid content of your battery reaching the terminal through capillary attraction.

The remedy is found in making a solution of two teaspoonsful of ordinary baking soda dissolved in two ounces of water. Apply this to the terminals with a cloth. Baking soda is a neutralizing agent for this acid condition, and you will be surprised to learn how rapidly it will clean them. Upon its application a bubling, accompanied by a low hissing or frying noise, will be heard. This indicates that the cleansing process is working. When the bubbles cease, wipe the terminals dry. Then smear them with a light coating of common vaseline, which will prevent the recurrence of the annoying accumulation.

B-T Counterphase Filament Control
HHS, Cheyenne, Wyo.

I would like to know why a filament control jack is not used in the second audio in the Bremer-Tully Counterphase circuit appearing in recent issues of the Digest. According to the wiring diagram of the circuit there is no separate control for the filament of the sixth tube, which is the tube for the second audio. In consequence of this the tube would burn at all times the set is in use, even though the plug should be in the first audio jack.

I am building a set along the lines of your circuit, and have wired in a filament control jack, but if there is any reason that it should not be used I will replace it with a single circuit jack.

A.—We had a very definite purpose in not using a filament control jack in the last audio stage of the Bremer-Tully Counterphase.

You will notice that all of the tubes are controlled with one rheostat, therefore, should we have placed a control jack in the last stage, then, when the last audio tube was out through the plug being in the first stage, a rise in filament voltage would occur, necessitating a readjustment of the rheostat.

However, if desired, there is no objection to your adding another rheostat to control the last tube or to adopt the use of an Amperite for automatic control of this stage. If either are used they should be independent of the control upon the remaining tubes.

Thatcher on Het-Duo-Gen
LHS, Salt Lake City, Utah.

Can the Thatcher unit hook-up be used on a Het-Duo-Gen to cure the squeal and howl when using the last stage?

I can't do a thing with it when getting distance, although it works fine on local stations.

A.—We do not believe that the Thatcher hook-up would help you toward eliminating the howl in the last stage of your receiver, but rather that the howl is occasioned because of several other reasons. The most important lies in burning the tubes at too high a temperature and thus overloading them. Another is the employment of audio transformers whose ratio is too high, or the lack of grounding the cores of these transformers. The employment of a C battery in the grid return of the audio transformers will help you. If you will adopt remedies to comply with the above suggestions and install transformers with ratios not exceeding 3 to 1, you no doubt will be well pleased with the DX results.

Priess Straight-8 Receiver
CBR, Louisiana, Mo.

There is a set made called the Priess Straight-8. Is this a practical set and will it do all claimed for it? Is it a regenerative, a neutrodyne or a super-het? Does it use wet or dry batteries? If you were going to buy a high class Radio would you consider the Priess?

A.—Radio Digest cannot approve or comment against any make of receiver, and obviously so, as our judgment would be based upon the conditions prevailing at the point where test was made, which would be unfair to the manufacturers. Every locality varies. Our understanding is that it is a tuned radio frequency receiver operating from storage batteries and using 8 tubes. We can say to you in all fairness that it is designed by a recognized engineer whom the writer knows personally and the set should perform pretty close to claims in an average location.

DIRECTIONS FOR REQUESTING INFORMATION

The Questions and Answers department offers service to Radio Digest subscribers without charge and, to those not subscribers, the same service with a charge of 50c for each letter requiring up to three answers or diagrams. We feel that this policy is necessary for the protection and best interests of our regular readers, as the volume of correspondence to this department has increased to such an extent that it is almost impossible to give our subscribers' letters adequate attention nor a complete answer. To those who have long been newsstand readers this may, at first, seem an injustice but a little thought on the matter will show that this is the only possible solution of what has been, to the technical department, a very perplexing and difficult problem. We ask that the following suggestions be read carefully before writing:

1—Search carefully the back issues which you have, as the point in question has probably been covered several times before.

2—No comparative statements on advertised apparatus will be given except as to efficiency in some particular circuit.

3—Drawing diagrams on a separate sheet of paper will save time and enable us to give all questions more attention.

4—Write each question as a separate paragraph.

5—We want to be of assistance to you in your difficulties, but are sometimes limited because of the length and time required for the proper consideration of the questions asked. Therefore, please make your letters brief.

Any Dealer Can Supply

Carter Radio Co.
300 S. Racine Ave. Chicago

RADIO EXPERTS NEEDED
NO EXPERIENCE REQUIRED

Practical radio came like a bolt out of the sky. But the big growth is just ahead. The world is short of real radio experts. Thousands of excellent positions are open to those who qualify as radio sales engineers, factory set designers, as testers, repairmen, operators on ships, broadcasting station experts, etc., here and abroad. A lifetime opportunity to get in on the ground floor of a new profession in its infancy and whose miraculous growth will be the marvel of all ages. Those with vision now will reap rich rewards.

THE PROFESSION OF ROMANCE, FORTUNE

An unusual proposition is offered to anyone who wants to get into this romantic profession of fabulous fortunes. Who can tell how many Henry Fords radio will turn out? This is the age of progress—radio—electricity—invention. Once you qualify as a radio expert, you are master of the greatest science of all the world. Opportunity is knocking. Don't you let it go by unheeded. Write today for free book, "Millions Untouched." It tells how you can master radio at home in spare time. Gives the facts about the greatest system yet devised

FREE RADIO SUPERDON E X T offered to those who enroll now. Write me personally. There's no obligation. Mail letter or postal today and learn how to make $50-$200 a week. J. E. Mendella

AMERICAN RADIO ENGINEERS

PLAN BRINGS FARM STATISTICS TO LIFE

AGRICULTURISTS TO BENEFIT BY RADIO SERVICE

Government Will Shortly Conceive "Uncle Bert" and "Fifty Farm Flashes" for Broadcasters' Use

WASHINGTON.—The vast fund of popular and scientific agricultural information that originates on the farms and in the laboratories of the United States department of agriculture will soon be tapped in a new place.

This is the announcement made by Sam Pickard, chief of the newly created Radio service in the department. Steps will be taken immediately, he said, to furnish a variety of agricultural program material to commercial broadcasting stations serving farmer audiences.

Much of the material furnished by the Radio service will be prepared for presentation in a radically different manner than the present almost universal practice of reading manuscripts. Broadcasting stations cooperating will be asked to provide personalities who have unmistakable qualifications to voice the information and material which in most cases will be presented in popular style and in the form of dialogue or questions and answers.

"Uncle Bert" Is New Feature

"Uncle Bert," the garden expert, one of Mr. Pickard's phantom characters, will entertain and instruct the boys and girls of the "Radio Order of Junior Gardeners" with nature-study information. Some of the juniors themselves will be heard over the microphone as they ask questions of Uncle Bert.

"Fifty Farm Flashes" will soon be offered as a regular feature on the air. The "flashes" will consist of interesting current information sought by farmers through several thousand letters received each week by the department.

Other special feature programs are under consideration, among which are the "Housekeeper's Half Hour" and the "National Farm School." In the latter the farm will be considered as the student's laboratory. Timely lecture courses which dovetail with the daily farm work will be developed, and laboratory assignments will be made which necessitate putting into practice the subject matter taught. These will be supplemented with a file of bulletins dealing with the subject matter broadcast.

FORT WORTH ADOPTS DALLAS SILENT NIGHT

New Arrangement Will Aid Texas Fans to Hunt Distance

FORT WORTH, Texas.—In order that the North Texas listeners could enjoy one silent night each week, WBAP, the Star-Telegram and Record-Telegram station here, and WFAA, the Dallas News and Dallas Journal station, have adopted a schedule whereby neither of these broadcasters are on the air after 6:30 p. m., Central time, Wednesday nights. Previous to this arrangement, WBAP was silent on Saturday night and Wednesday was WFAA's silent period. The Star-Telegram and Record-Telegram station is now operating Saturday night on its regular schedule and Sunday from 9:30 to 11 p. m.

Under the new arrangement, the Texas hotel orchestra, which was formerly heard each Wednesday night over WBAP from 7:30 to 11 p. m. Central time, is now on the air at the same time Sunday night, and the "Sunflower Girl," the headliner of the station, who used to thrill the Radio audience on Wednesday evenings between 11 and 12 o'clock, now entertains Saturday night from 9:30 to 11 o'clock. Under the new schedule, the Truth society meets at 10 o'clock on Saturday, Sunday and Monday evenings.

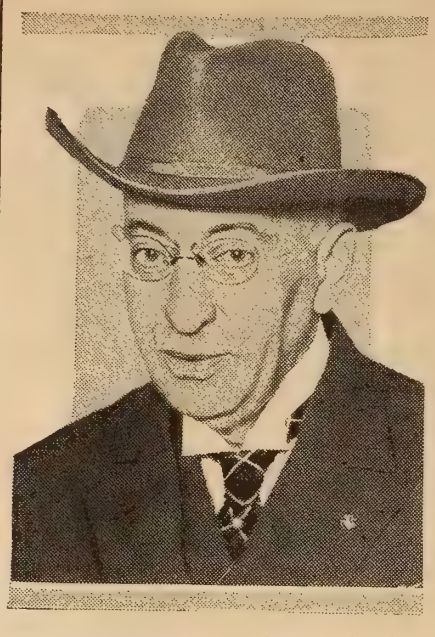
Gets Clicquot Club Sleigh Bells, Then Looks for Snow

NEW YORK.—The realistic sleigh bells which have announced the arrival of the "Clicquot Club Eskimos" at WEAF each week recently sent a New Jersey listener bounding out of the house to witness the snowfall which had so suddenly come. Sleigh bells to the contrary notwithstanding, the street was as clear as on a July evening and the mystery was not solved until the close of the "Eskimos" program, when the sleigh bells were heard again.

Give Lighthouses Receivers

PARIS.—As the result of an article in the Paris daily "Matin," a sum of money has been raised by public subscription for presenting lonely lighthouses along the wild coast of Britanny with Radio receiving sets.

CLAIMS RADIO WILL USE POWER OF SUN



Dr. Henry Marcuse, professor of astronomy and applied forces at the University of Berlin, predicts that the day is coming when airplanes will carry passengers any distance by means of power received by Radio from great sun machines. Dr. Marcuse is now in this country after a trip through Japan.

MISS EDNA HOPPER IS OUR COVER GIRL

ON the cover of Radio Digest this week is Miss Edna Hopper, the original "Matinee Girl" whose voice was heard over Radio Station, WOR, New York.

The picture tells the story. Miss Hopper is one of those kind of girls that men always wish they knew better. After they have seen her picture they make a mental date with her—to see her on the stage from some place near the "bald-headed" row. It is the same way if they hear her through the microphone.

"Now we want a girl who is a regular man's girl," said the picture editor, when it came to selecting a girl for a winning cover for this issue. "We want a girl with a flash in her eye and smile on her lips."

He pounced on this picture of Edna Hopper the moment he saw it. Was he satisfied? He was.

KYW's Hawaiian Swede Is Back with New Repertoire

CHICAGO.—Cy Berg, the "Hawaiian Swede" and president of the I. O. O. S. Y. S. L. I. is back at KYW, to exploit a lot of new things to the Radio fans, who tune in the Congress carnivals at midnight each Saturday.

For those who are not acquainted with the long string of symbols above mentioned, it all means "International Order of Sky Yumpers, Snuse Chewers and Lutefisk Inhalers."

Looking Ahead

When he told the Londoners it wasn't "Gonna Rain No Mo'," Wendell Hall, American Radio artist and composer of the song with that theme, struck fire. Some wrote him it was the most terrible crime ever committed against the English language, but the most of them like it. Mr. Hall tells about it in the next issue of the Radio Digest.

Wilda Wilson Church, dean of the Radio play directors at KGO, San Francisco, tells interesting incidents and some of the problems peculiar to Radio play production in the next issue of Radio Digest. She had always wanted to be an actress but did not find her real forte until she took hold of the art of making audible but invisible players entertaining.

"I come from a little town called Newport, N. H., where the sun shines on both sides of the street," says Billy B. Van to Radio audiences throughout the country, to whom he is known as the "Sunshine Man." He relates some of his humorous and scintilating philosophy in the next Radio Digest.

Flowers are blooming and birds are singing; all is summertime at WGHB, Clearwater, Florida. This new station is helping to voice the praises of the rediscovered "Flowerland," where is located the oldest city in the United States. All about WGHB in the next issue of the Radio Digest.

The Fundamental Principles of the Detector and how it functions will be described by Milo Gurney in next week's issue of the Radio Digest.

The Erla Circloid Five Will Be the Receiver Reviewed in next week's operating and trouble shooting article and will provide many geneal hints that will help the average listener in.

George Walters, Who Opens a New Series on the construction of B current power supplies in this issue, will next week describe the chemical rectifier type.

NEWS BRIEFS FROM THE BROADCASTERS

MERRY GANG OF PAUL ASH INVADES STUDIO OF WLS

WBAL Broadcasts New Baltimore Organ—Learn How to Write Short Story at KGO

Paul Ash and his merry, music-mad gang invaded the studio of WLS, Chicago, recently, took the microphone out of the hands of the announcer, put all the staff artists out of the station and between 11 and 12 midnight played havoc with the ether. They were so enthusiastically received that the musical director, despite their rough tactics, has invited them to come again.

* *

The mammoth organ recently installed in the concert hall of the Peabody Conservatory of Music at Baltimore by the munificent bequest of the late James Wilson Leakin, may now be enjoyed by Radio fans through WBAL. Every Monday and Thursday between 7:30 and 8 p. m. Eastern time well-known organists of the city will play this fine instrument.

* *

How to write a short story will be explained briefly over KGO, Oakland, Monday night, February 1, at 9:30 p. m. Pacific time, by Rebecca N. Porter, extension division, University of California expert. She will be heard on the regular educational program of the station. Four other speakers will also appear before the microphone.

* *

The old-fashioned flute came into prominence recently when James A. Biggs broadcast a program of flute solos from station WJZ. Mr. Biggs is well known in New York city through his afternoon concerts last year in Old Trinity church.

* *

On Thursday evening, February 4, at 11 p. m. Eastern time, the closing hour of dance music which nightly features the program of WEAF will be furnished by Vincent Lopez and his orchestra direct from the Casa Lopez, New York city. The Radio audience of WEAF was treated to a rare surprise a few weeks ago when Lopez and his orchestra rendered a special arrangement of Tschaikowsky's "1812 Overture."

* *

The Syracuse university provides the 7:45 p. m. Eastern time program at WGY, Schenectady, every Thursday evening. WGY and WFBL, Syracuse, have a special hook-up for this purpose.

Sport Broadcasts

Basketball

Saturday, January 30

KFMQ (299.8m-1000kc) University of Kansas-Centenary college, 7:30 p. m., Central time.

Monday, February 1

Boxing

Friday, February 5

WOI (270m-1110kc) Notre Dame-Ames, 7:30 p. m., Central time.

Wrestling

Thursday, February 4

WOI (270m-1110kc) Oklahoma-Ames, 7:15 p. m., Central time.

Hockey

Tuesday, February 2

WBZ (333.1m-900kc) Boston Bruins-St. Patricks, 8 p. m., Eastern time.

Station Changes

KFQA, St. Louis, formerly operating on 50 watts, will now cooperate with the "Voice of St. Louis" and broadcast through KMOX, although still using its own call. KMOX has shifted wave lengths so that both KFQA and KMOX will now use 280 meters.

The Walla Walla broadcaster has increased from 50 to 500 watts. While still retaining the old wave of 256 meters, it will use the new call KOWW.

KFNF, Shenandoah, will use a new wave of 263 meters. The old wave of this station was 266.

A California station has moved, but not to Florida, however. KFWC, Upland, is now in San Bernardino, Calif.

CONFIRMATION FREE TO ALL FANS

STILL TIME TO WIN OVERSEAS CONTEST

GOLD AWARDS AND FAME FOR BEST RECEPTION

Radio Digest to Give $100.00 to Fans Most Successful in Getting Foreign Stations

CHICAGO.—From all evidence, Radio fans throughout the United States and Canada, are vieing for the $100 in Gold Awards and the national fame that will be given by the Radio Digest to those persons who are most successful in receiving European and South American programs during the International tests between January 24 to 30. Hundred of letters are being received by this magazine asking for further information concerning the awards.

No strings Attached

There are no strings attached to rules governing the Gold Award contest or the gaining of country-wide prominence through the publishing of the names and pictures of the listeners getting the best daily results. But for those who have not been informed, or those who do not understand the stipulations of the Radio Digest International test week contests, we are again giving the rules under which they will be conducted.

In the Gold Award contest the prizes are six in number: first, $50; second, $25; third, $10; fourth, fifth and sixth, each, $5. In the event of ties, a prize identical in every respect with that tied for will be awarded each tying contestant. The contest is open to every listener in the United States and Canada.

The editor of the Radio Digest, Hon. Frank W. Elliott, president of the National Association of Broadcasters, and E. A. Beane, federal supervisor of Radio, will act as judges of the reports and select the winner.

Rules of Reception Contest

1. The contest opened Sunday, January 24, 1926 and will close at midnight of Thursday, February 4. All reports must be received by the Chicago offices of Radio Digest by that time to be considered.

2. The reports will be judged upon four points: First, the fullest and most accurate description of programs received; second, the highest number of stations received; third, the greatest distance covered; fourth, the best and NEATEST report.

3. The report must include the name of the manufacturer and the style or type number of manufactured sets used by listeners. If a homemade or "kit" set is employed, the names of the manufacturers of the principal parts or the kit must be included. If headphones or loud speaker were used, the name of the maker must be given.

4. The finale note to remember is that the reception contest is only for the first five nights of the tests, from Sunday to Thursday inclusive, and reception of European and South American stations ONLY are to be reported.

Not Too Late to Try

As this issue of the Radio Digest will be on the newsstands and in the homes of the subscribers before the tests are completed, it is not too late for the ether fans to participate in the contests. A large staff of Radio Digest observers scattered over the country with most sensitive receivers are reviewing the tests, but because of their professional ratings will not participate in the contests. Their reports will make complete information available to fans regardless of locality.

To those listeners who get the best reception reports and notify the Radio Digest, will go national recognition. This magazine will release information daily to the press at large on the results of the overseas trials. Besides the newspaper publicity the successful fans will be given, the victors in the contests will be pictured in future issues of the Radio Digest.

What to Telegraph

Fans living in the Eastern sections of the continent are directed to write or telegraph PREPAID to the New York city offices of Radio Digest, located at 247 Park avenue. Those in the Middle west and western states or western provinces of Canada, should write or telegraph PREPAID to the Chicago offices at 510 North Dearborn street. Information will be telegraphed COLLECT, unless the inquiring listener makes it plain that the information is to come by mail.

In order that the name of a listener be given to the press of the country as a successful receiver, the telegram must contain a short sketch of the program received, the call letters of the station heard, the local time received, the approximate meter wave length, and the address of the listener.

Send telegrams any one of the five foreign test nights (Sunday to Thursday, inclusive) and you may bring national credit to your community.

TO WINNERS OF OVERSEAS TESTS

No, no, not the girl, F'evvens sake. If it was, crystal sets would be reporting Koenigwusterhausen and Radio-Paris. But Miss Dorothy Knapp, famous American beauty, now featured in Earl Carroll's Vanities, is holding the two silver trophies to be awarded in the Freed-Eisemann Radio corporation international reception contests.

INTERNATIONAL RECEPTION CONFIRMATION BLANK

The following blank may be used by readers of Radio Digest to report Foreign station reception. Confirmation will be made by Radio Digest when these blanks are accompanied by self-addressed and stamped return envelope.

Exact Time Heard	Brief Description of What Was Heard. Confine to Few Words	Call Letters If Heard	Meters or Kilocycles

If insufficient space is provided in above blank for your log (or you do not wish to mutilate your copy of Radio Digest), give this same information, in a similar form, on any paper available.

EXPERTS WILL AID CHECK OF FOREIGN CALL

Furnish Blank for Use

Listening Outposts and Correspondents Preparing Accurate Programs to Verify Reports

What foreign stations have you heard? What ones will you hear before the International Radio Week tests are concluded? Are you sure you heard foreign stations? How do you know?

In order to assist in confirming foreign station receptions, the Radio Digest is presenting this issue a confirmation blank (at bottom of this page) for the use of listeners in getting actual certified endorsement of their achievements.

The blank need not be clipped from Radio Digest. All that is necessary is to present the same information as requested on the blank. However, arrangement of the information similar to the blank will assist in checking the receptions.

Trained Listeners Check Europe

As this issue goes to press, a score of trained listeners, every one of them an expert, is checking the programs broadcast by the European and South American stations. The reports of these expert listeners, not the pre-arranged programs, which so far have proven inaccurate in many points, will be the basis for making confirmations. Radio Digest's foreign staff is also busying itself in collecting data on the actual programs broadcast. The data of the foreign correspondents, together with the reports of the special listening outposts, will make an absolutely correct set of programs, by which every suspected reception, submitted by fans, can be checked.

The confirmation service of Radio Digest is separate and distinct from the Gold Award contest, details of which are given in column one on this page.

How Fans Can Verify

Rough checking of programs can be made on the basis of wave length to which dials were set, together with the table presented last week showing the wave lengths of the principal foreign stations. Not all of these are participating. Definitely, with the reports of stations so far received and the announcement of the Radio week committee to judge from, the following stations are on the air:

Wave Length	Station and Power
1600	5XX, Daventry, Eng., 25,000 watts
496	2BD, Aberdeen, Scot., 1,500 watts
485	Munich, Ger., 4,000 watts
461	OTW, "Radio-Wein," Vienna, Aus., 5,000 watts
446	Stuttgart, Ger., 4,000 watts
410	MS, Munster, Ger., 1,500 watts
392½	HA, Hamburg, Ger., 4,000 watts
386	6BM, Bournemouth, Eng., 1,500 watts
380	OAX, Lima, Peru, 1,500 watts
375	LOX, Buenos Aires, Arg., 1,500 watts
373	EAJ7, Madrid, Spain, 6,000 watts
368	Prague, Czecho-Sla., 5,000 watts
363½	2LO, London, Eng., 3,000 watts
352½	5WA, Cardiff, Wales, 1,500 watts
300	LOW, Buenos Aires, Arg., 1,500 watts
263	SBR, Brussels, Belg., 1,500 watts

Listeners wishing further to identify stations where a foreign language is spoken should refer to last week's issue of the Radio Digest, pages 4 and 5. Here was told how various foreign stations announce themselves.

Minnesota Legionaires Put On Spectacular Radio Revue

MINNEAPOLIS, Minn.—"Back to Paris," a spectacular Radio revue, was presented by the Minnesota department of the American Legion and Legion Auxiliary from WCCO, the Gold Medal station, January 22, for which both the St. Paul and Minneapolis studios were used.

The revue was the most pretentious Legion program ever broadcast and the number of persons required for the cast necessitated the facilities of both studios. The spectacle depicted the trip of the Minnesotta Legionnaires and their families to Paris for the Legion convention which will be held in 1927.

DeRubertis Began Career with "Ghost Viol"

REAL Mystery Crept in Through Little Door Beneath Stage of Old San Carlos Theater, Naples, and Haunted Orchestra Pit. Phantom Fiddle Wailed Accompaniment to Bass Viol Until Leader Investigated and Removed the Mask, All of Which Led to the Successful Career of N. DeRubertis, Leader of Little Symphony Orchestra, Kansas City, Heard Over WDAF.

By H. P. BROWN

THERE was a mystery in the orchestra pit of the San Carlos theater at Naples, and everybody knows that the proper place for mysteries in a theater is on the stage above the pit. The tip of the left ear of the august director trembled as it positively detected the vibration of a bass viol when he saw with his own eyes that the professor in charge of the only bass viol in the pit had removed his bow and was silently sawing the air ready for the next slash at the strings.

But the director was not the only one who had heard the weird tone coming from the ghost fiddle. Other members of the orchestra spoke about it and so the director knew that his ears were not playing tricks. One day during a rehearsal when the presence of the unseen viol was particularly noticeable the director suddenly halted the music and began a determined investigation.

A small boy was discovered crouching in the tiny doorway that led under the stage. Here was the motive force but where was the instrument, for it must have taken a big one—too big to conceal—to produce the note of the big bass viol? When the boy found he was neither to be scolded nor punished he confessed that he was the player of the ghost fiddle and his fiddle was the door panel against which he had rubbed his rosined fingers. The friction produced sounds which the boy had practiced until he was able to faithfully mimic the notes of the bass viol behind which he had hidden. It seemed incredible but the boy proved his statement by demonstrating how he had made the ghost fiddle groan.

The director was overwhelmed with astonishment and when he learned that the boy had, through the assistance of a brother who played in the orchestra, spent his hours listening and watching the musicians he declared that such pluck and ambition should be fittingly rewarded.

Thus it happened that the little, dark door beneath the old San Carlos theater in Naples opened up to a golden path for the little black-eyed Neapolitan who later became famous as the conductor of the Kansas City Little Symphony orchestra—Mr. N. De Rubertis. The boy was taken under the personal tutelage of the director and proved that he was a "natural born musician." When it came time for him to try his wings and leave the home nest he sailed for America.

When the Kansas City Little Symphony orchestra was called upon to broadcast from Radio Station WDAF it became a matter of careful study and testing on the part of the conductor, N. De Rubertis (left) and the concert master, Luigi Bussolari, to select music best suited for the microphone. The resultant concert on January 8 proved that they had chosen wisely. Mr. De Rubertis is shown in single portrait above. Other concerts from this orchestra will be heard for months to come from WDAF.

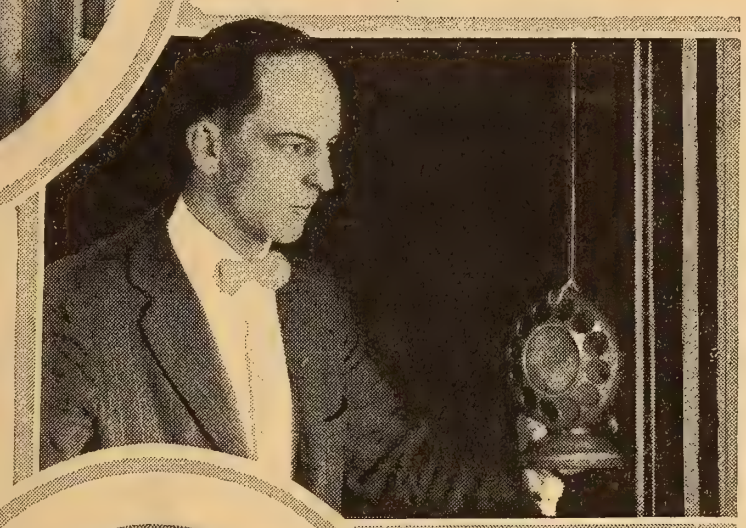
* *

AND, strangely, the haunting melodies from the deep-throated bass viol charmed him most of all the instruments in the orchestra. He soon was established in his favorite place behind the big viol in the Manhattan Opera orchestra. From there he found an opportunity to open a studio in Montreal where his fame continued to grow. Eight years ago there was a new impulse toward musical culture in Kansas City and De Rubertis was called to that progressive city to aid in the movement.

About him there assembled a small group of musicians who specialized in chamber music. They played for the love of playing, meeting at various times in the respective homes of the members. A little social hour and then they would unbox their instruments and the young De Rubertis would marshal them through the sonatas, operatic selections, classics of the masters and sometimes a patriotic selection. The better families considered it a privilege to be invited to these musical soirees. The group added one artist after (*Continued on page 26*

WKAR Broadcasts Farm Science to Nation

MICHIGAN State College Presents Regular Courses for Benefit of Farmers in Every State. Credits Allowed for Listeners. Sports and Dance Programs Are Also Furnished to Michigan Fans.



Lecture room (left) where farm study courses are broadcast. James B. Hasselman (below) general announcer and supervisor of Station WKAR. Sometimes Miss Margaret Foote (in circle) furnishes song as interlude between lectures. James Gamble (right) is the program director and prevents the professors from monopolizing the mike at the Michigan "Aggie" Radio station.

MORTIMER C. NICHOLS is one of the hardest working men in the state of Michigan. From the time of the first spring plowing until the last of the season's crops are garnered he is on the jump. He has three farms in the vicinity of Hastings in the middle western section of the state. He is up before daylight every day and off in his battered old flivver from the town home to the farm that needs him most for the day.

Mr. Nichols' course in engineering at the state university in Ann Arbor did not make a farmer of him. The farm idea came after he had given the engineering business a thorough try-out with the Illinois Central in Chicago. The monotony of office hours, confinement indoors, a stated salary income, regardless of effort, irked him. He hungered for acres. So he bought a farm near the old homestead.

It was hard sledding at first. Somehow the stock did not do well and the weather failed him with crops and then he found that agriculture nowadays is a science, requiring a scientific education as a specialized line.

He was married, had children and he had to keep going. He didn't have time to attend the very excellent agricultural college established by the state at the capital in Lansing—"East Lansing," as it has been more recently called.

So the state saw the predicament of Mr. Nichols. It may not have seen Mr. Nichols, personally, but saw his case as it existed in many thousands of other instances not only in Michigan but in neighboring states. It saw the need of extending its sphere of the agricultural college. And Radio Station WKAR went on the air.

* * *

IT TOOK the agricultural science to Mr. Nichols' home and the homes of the countless other farmers who were plunged head over heels in the business of making a living out of their lands in the face of unexpected difficulties. WKAR became the "Farm School of the Air." Lecture courses were arranged for broadcasting. Actual, practical problems that had been analyzed in the college laboratories by the experts were presented and answered according to established rules. Stock breeding, feeding and economic marketing were—and continue to be—subjects of lectures similar to the lectures given to the young bucks taking the courses on the campus. Soil conditions for most appropriate planting were described.

Farmers throughout the region are now gaining their college educations at their own firesides. Questions have been received from practically every state in the union from farmers with their own individual problems.

One individual sends a letter with a pertinent question on a prevalent disease affecting cows, sheep or pigs. The whole countryside hears the answer by one of the most skilled veterinarians in the land. Another wants to know about the kinds of poultry to raise most profitably. The professor of the poultry department gives his expert advice to the farmer who is tuning in near the cross-roads five miles from the nearest town. Study credits are allowed listeners who follow lectures with formal correspondence.

Seely's Pastime Players (above) are the pep manufacturers for this 1,000-watt Michigan station.

A wintertime glimpse at the towers of WKAR on the campus of the Michigan State College at East Lansing.

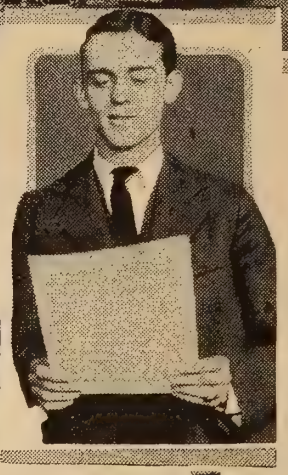
But WKAR also has its lighter programs. In the broadcasting of sport events it has won a warm place in the hearts of followers of college athletics. James B. "Jimmie" Hasselman, chairman of the Radio advisory board of WKAR, is one of the first announcers in the country ever to broadcast a running account of a basketball game direct from the gymnasium in which it was played.

At the start of the game Hasselman climbs into a sound-proof booth in the balcony of the college gymnasium. There, with his eyes on the playing floor, he tells his unseen audience just how each play was made, who made it and how (*Continued on page 12*)

Baltimore Waited Long to Join Air Chorus

Max Rosenstein, celebrated WBAL violinist (below).

Below are members of the WBAL directing staff, left to right: John Wilbourn, assistant studio manager, tenor; George Bolek, program supervisor; Stanley W. Barnett, studio manager and announcer; Gustav Klemm, conductor of WBAL concert orchestra; Frederick R. Huber, broadcasting director, and James Wilkenson, announcer.



F. R. Huber (right), WBAL station director. Gustav Klemm (at piano, circle) and John Wilbourn, tenor. James Wilkenson, (left), baritone. Lower left, Jules Sims, cellist, and Mr. Klemm. All are WBAL artists.

MAYOR Jackson Thought the Maryland Port Never Would Get a Real Big Broadcasting Station When Along Came WBAL with 5,000 Watts

FOR SOME unknown reason when young Radio went leaping about the country establishing new broadcasting stations here, hither and yon it seemed to hop right over Baltimore, Maryland. There was a great deal of talk about it among the responsible people of the town. Some of the city fathers approached Mayor Jackson with the intimation that it might be a good idea to establish a municipal station if none of the private concerns seemed inclined to take it up.

Mayor Jackson spent several sleepless nights pondering over what official attitude he should take in the matter. The people were buying receiving sets by the carload. All the other big cities along the Atlantic seaboard had broadcasting stations. Back in the "hinterland" they were introducing themselves in a glowing way that certainly must be stirring up a mighty curiosity among listeners to come, see the sights, hear the music and spend their money in the shops.

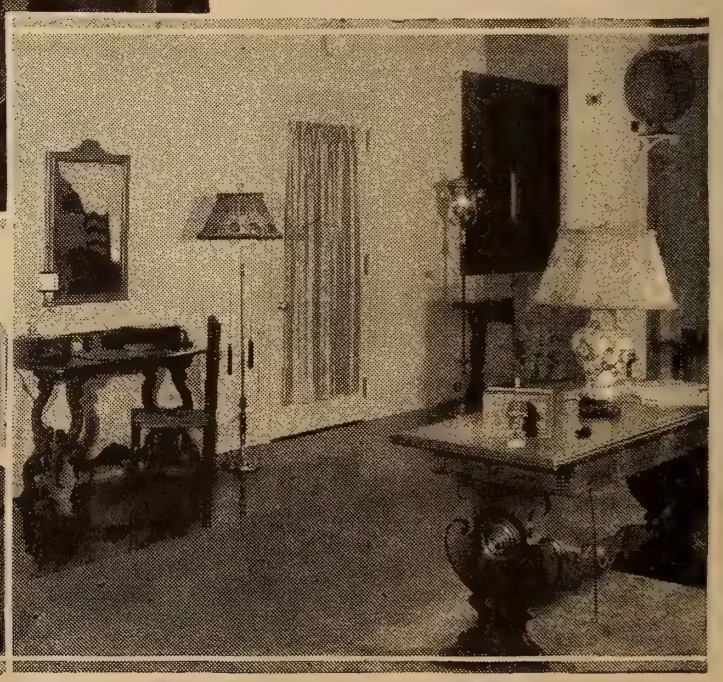
But, what about Baltimore? Only a dark, unremitting silence answered the ether query of the dials all the way back to California's golden shores. However, the seed was there and November last as the world well knows, Baltimore's clarion voice flashed into space, full chested and man-sized, ringing and surging its way down the aerials of the nation. A million pencils throughout the land welcomed the announcement of WBAL, Baltimore, on the air and jotted the meter wave length, 375, opposite the figures of the tuning point on the dial gauge.

So Baltimore is on the air—and making up for lost time. Mayor Jackson and Governor Ritchie both helped at the christening and congratulated the proud parents, the Consolidated Gas, Electric Light and Power Company of Baltimore, represented by the president, Herbert A. Wagner.

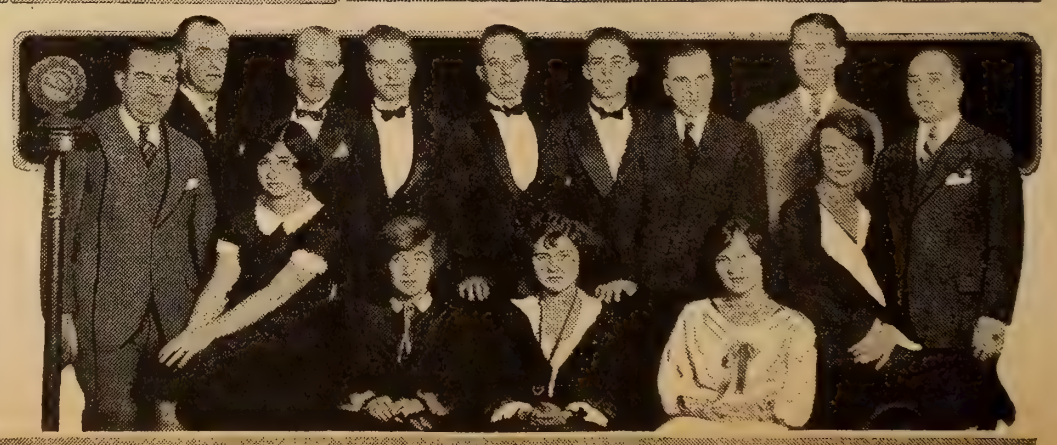
Mr. Wagner promptly dedicated the child to the city of Baltimore with these words:

"THE public utility which I represent has taken upon itself, as a public servant, the duty and privilege of providing a superpower broadcasting station for the service of Baltimore and the State of Maryland. Up to this time Baltimore and Maryland have not enjoyed (*Continued on page 24*)

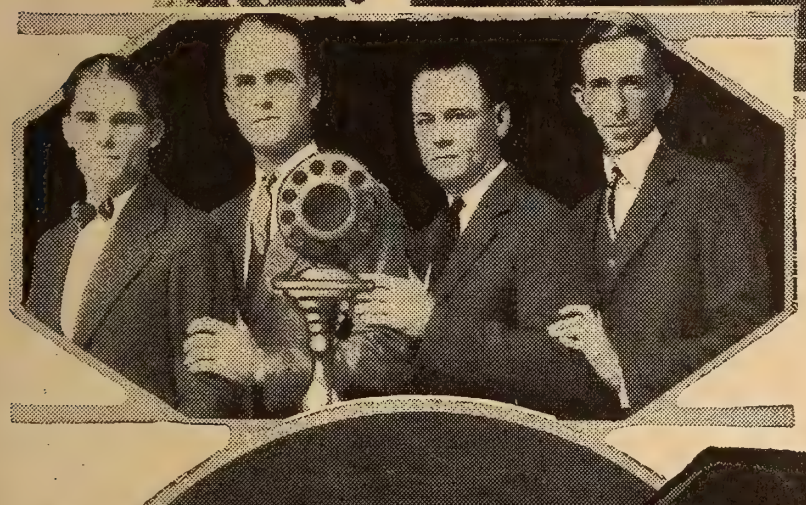
At right are James Wilkenson (standing) and Stanley Barnett, the announcing team at WBAL, Baltimore. George Bolek, (below) pianist and assistant program director.



Among the feminine artists are those seated in the group at the right, left to right: Florence Frantz, Audrey Cordero, Vivian Cordero-Friz, Elizabeth Stidman and Charlotte Rodda. After Walter Linthicum, baritone, (left) the first six men are staff artists pictured above. Then come Conner Turner, baritone, and Edward Jandrek, tenor. A glimpse of reception room for artists in picture above group.



All Aboard with "Tootsie" via KFDM Line



MAGNOLIA Mike Takes Radio Listeners Over Accomodation Air Route to Beaumont. Fast Time by Caster Oil Clarence. Farmer Perkins Almost Wrecked.

Miss Lillian Richards (upper left) soprano. Magnolia Refinery Band (top). Mrs. Harvey Gilbert (above) soprano. The Scrap Iron quartet (left) and at the piano, Miss Allie Huitte. All among the passengers who help to make the "Tootsie" trip on KFDM a merry one, for they're a merry lot!

"TOOT! TOOT! Here comes Tootsie" the iron horse of KFDM all the way from Beaumont, Texas, the land of the glorious Magnolians. Clear the dials and flag 'em on Ether Track No. 306.

Radio listeners who never yet have boarded this famous special have a treat coming. All abroad! Castor Oil Clarence is at the throttle and Magnolia Mike is the conductor in charge of the train. Hold on to your hats and don't stand up!

Folks down Texas way are always flagging "Tootsie" because they like to hear the passengers, the crew and the animals perform. Everybody is classified. The Flappers occupy the front seats in the accommodation coach so they can be handy to the Butch with his melodious song about his wares. They buy gum just to induce him to sing about its mysterious transition when it is placed on one side of the bed on retiring and is found on the opposite side in the morning. They also do a little singing on their own account and dance to the water cooler for "Just a Little Drink."

Then there is Pete the Passenger who knows all the telephone poles by their first names as "Tootsie" whistles and whizzes past them on the Radio route to Beaumont, Tex. Pete the Passenger keeps up a rattling conversation with Farmer Perkins who can't resist letting his attention wander across the aisle to the nifty young bathing beauties taking a trip to the beach. It is obvious that Pete is carrying the heavy side of the dialogue although Farmer Perkins makes his presence unmistakably known. (*Continued on page 26*)

Below is that galaxy of Magnolian stars which make KFDM such a merry station. Note "Oink" and "Heehawhaw" at extreme left. Magnolia Pete, hiding behind billboard, and his gang swarming over "Tootsie," the iron horse.

There's a sob and a throb when the Mozartists (above) put their hearts in their violins and all start playing at the same time for the Radio audience of KFDM. They are announced as the "Mozart Violin Choir." Miss Gladys Harned is director. Dick Haynes (right) doesn't expose his tonsils like this all the time. He was caught singing but the mike doesn't happen to show. It's a very modest "Mike."

WJAZ RAILS HOOVER WITH 'PIRATE' WAVE

U. S. SEEKS WAY TO SHUT DOWN ZENITH STATION

E. F. McDonald, Jr., "Takes" Canadian Wave While Amused Public Watches Peculiar Controversy

CHICAGO.—Who owns the air, and if the United States owns the ether and can control it, by what official act are American wave lengths reserved for Canadian stations? Why should one station be allowed 166 hours a week on a certain wave length, and then the department of commerce specify that another station use that wave length for but the remaining two hours?

WJAZ, the broadcasting station here, of the Zenith Radio corporation, will soon settle the questions listed above, for WJAZ has gone on the air and "taken" the wave length of 329.5 meters, a wave length unused in the United States. In Canada it is used by seven stations, nearly every one of them remote from this city and outside the sphere of interference.

And the "taking" has not been authorized by the department of commerce, either. The latter, according to Secretary of Commerce Hoover, will show WJAZ what's what in short order.

But Will the Department?

But will the department of commerce be able to do what it says it will? There is no Radio law with the exception of that passed in 1922, and that law has many defects now. Wise heads are inclined to believe that the WJAZ controversy has several angles, and that E. F. McDonald, Jr., president of the Zenith Radio corporation, may have much in his favor.

The last dispatches state that the government has launched its litigation against WJAZ for "piracy" of a wave length, first by filing papers demanding forfeiture of the station's license and seizure of its equipment, and second by bringing the Zenith organization into court to show cause why it should not be punished for usurpation of an unauthorized wave length.

Mr. McDonald has laid his cards on the table. He asks for a test case. He is willing to abide by the decisions of that case.

McDonald Attacks Hoover Efficiency

Mr. McDonald added further fury to the scorching test case by broadcasting—on 329.5 meters—an attack on the secretary of commerce. The prominent Radio manufacturer claimed that Mr. Hoover had grossly abused his discretionary powers in the regulation of broadcasting.

His point was well taken, for people ask, if Mr. Hoover really has the power claimed since the test case was inaugurated, why did he allow the broadcasting channels to become so congested? Why, asks Mr. McDonald, are there twenty-seven stations broadcasting on one wave length, and on several other wave lengths, but one station on each?

WJAZ, when formerly located on the Edgewater Beach hotel, of Chicago, got off the air when it was found that interference from this station was disturbing public reception. The transmitter was sold but the call letters were retained. WEBH is the old WJAZ set, rebuilt and remodeled.

WJAZ and its fore-running experimental stations, belonging to the Chicago Radio Laboratory, a subsidiary of the Zenith company, are Radio pioneers that have blazed the trail for many broadcasters of today.

Can the U. S. Do Anything?

The case, summed up, is simple. Mr. Hoover, although solicited ever since the sale of WJAZ's old set, has not seen fit to give WJAZ a new wave length, or at least one that is acceptable. Therefore, WJAZ has taken one that is not claimed by the United States. Can the United States prosecute WJAZ or its owners?

Being a broadcasting station without a country, what can be done about it?

If Hoover can do anything, the question arises, then why doesn't he close up certain other stations which are known to merely clog up the air with their interfering broadcasts, over-modulated transmitters, rank programs, and obsolete type sets?

The stage is set for much amusement for the Radio public.

Station WSAI on Air More Than 1,000 Hours Last Year

CINCINNATI.—A check of the programs broadcast by WSAI, here, during 1925 shows that the station was on the air more than 300 days for a total of more than 1,000 broadcasting hours.

WSAI is on the air six nights a week, its average program lasting three hours. Included in the total of broadcasting hours was a 24-hour anniversary and dedication program.

McDONALD ANSWERS CHARGES OF PIRACY

ANSWERING the charges made by the department of commerce and the public press, E. F. McDonald, Jr., president of the Zenith Radio corporation, of Chicago, herewith gives his statement of the whole affair:

E. F. McDonald, Jr.

"My attention has been called to articles appearing in the public press, from which it appears that the United States government is about to institute some sort of legal proceedings against Zenith Radio corporation, of which I am president, with the idea of punishing the corporation or certain of its employees for operating its broadcasting station, WHAZ, for more than two hours per week, the time allotted to it by the secretary of commerce.

"If the government does take some action it will not be a surprise to us as we notified the government authorities that we intended to go on the air for the purpose of making a test case in order to determine whether or not there is such thing as freedom of the air.

Hoover Abuses Discretionary Powers

"Before doing this we made every effort to obtain from the secretary of commerce some fair and reasonable division of time. I spent weeks in Washington with my attorney, Irving Herriott, pointing out the various channels that were open. All our efforts met with failure.

The department even arbitrarily refused to permit us to use a wave length that another station enjoyed and offered to us. We feel that not only we, one of the pioneers in Radio broadcasting, but scores of other stations have been discriminated against.

"The secretary of commerce claims to have wide discretionary powers in the division of time between the broadcasting stations. I question whether or not he has such discretion, but if he has, I wish to state that in my opinion he is abusing this discretionary power, not only in our case, but in many others, to the detriment to the public and the Radio industry.

"The present chaos and congestion in the air which makes it almost impossible for the listener with the average Radio set of limited selectivity to separate one broadcasting station from the other, is not due to the great number of broadcasting stations in the United States, but is the result of the abuse of the discretionary power which the secretary of commerce claims to have in the division of wave lengths and operating time, and in spite of this chaotic condition for which the secretary of commerce is responsible, he is today asking congress to pass legislation which will confer upon him even broader powers of discretion than those which he now claims to have.

Recites Mismanagement of Department

"As a further indication of the extent of this abuse of this alleged discretionary power, I want to point out the fact that the secretary of commerce has licensed twenty-seven broadcasting stations on one particular wave length, yet permits other stations to enjoy an exclusive wave length, with no time limit. It is obvious that twenty-seven stations cannot operate simultaneously, on one wave length, and be heard.

"In our own particular case he has licensed us to operate only two hours each week and has licensed another station to operate on our wave length the remaining 166 hours each week, and even our little two hours is subject to cancellation at the request of the General Electric company.

"The public is justly complaining about the congestion, yet if there were an equal division of time and wave bands, and no favoritism shown, all could be heard and the public would receive real service without interference.

Who Shall Have Monopoly?

"In the litigation, which, according to newspaper accounts, the government is about to institute, there will be involved necessarily the right of citizens of this country to use the air and have a fair division of it, but there will also be presented the question, (if the government has this right) shall it regulate in favor of monopoly and against the independent interests and the public generally?

"The Radio public today is fully aware of the fact that certain interests now claim to have what virtually amounts to a monopoly of many exclusive wave bands. In my opinion any institution other than one whose business is to disseminate news should have nothing which approaches an exclusive right to any wave band. News agencies are in the nature of public utilities, and their use of the air is of vital interest to the public generally. Such broadcasting should necessarily be given preference over music and other entertainment, but I say that none other than such should be given preference.

Fights for Principle, Not Gain

"With the idea of settling one of the greatest questions presented by the development of modern science, the Zenith Radio corporation intends to litigate in every way possible the questions involved. We naturally desire a reasonable division of time for our own broadcasting station, but if we can by litigation settle the question of the freedom of the air and a fair and equitable division of time in the interests of the public and the broadcasters is obtained, Zenith will consider its efforts well worth the sacrifice, even though it might itself be unsuccessful in obtaining a reasonable share of the time for its own use.

"Our action has been referred to in the press as 'Piracy of a wave band not in use by any broadcasting station in the United States.' With reference to this I am reminded of the statement by one of the most eminent leaders in England's politics, when, in discussing the land laws of his country, he said, 'What finger wrote the law that made us trespassers in the land of our birth?'

"With apologies to the Honorable David Lloyd George, I say, what finger wrote the law that makes us pirates in the free air of America?

"In conclusion I wish to state that our position is that we fight for principle rather than for personal gain.

"Old Hickory" New Whistle Of George Hay at Nashville

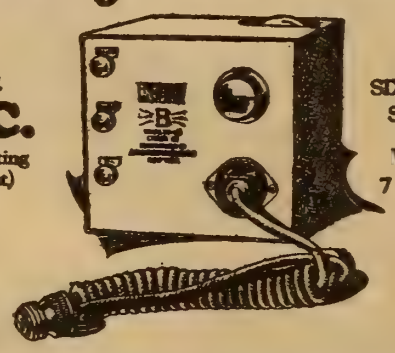
NASHVILLE, Tenn.—And now comes "Old Hickory." George Hay has a new steamboat whistle which is heard regularly from Station WSM, here. The new whistle has been named after Andrew Jackson, whose home town was Nashville. It is properly known as the "Cumberland River Steamboat, Old Hickory."

Thousands of the Radio fans will remember Mr. Hay's first whistle, "Hushpuckiny," heard from Station WMC, Memphis, when Mr. Hay was announcer there, and also his "WLS Unlimited Train" whistle he used to give from the Sears-Roebuck station at Chicago.

Latvia Has One Station

RIGA, Latvia.—The little Baltic republic of Latvia has one broadcasting station of which it is very proud, at Riga. News is the principal broadcast feature.

YOU don't need "B" Batteries if you use the FRESHMAN MASTER "B" Battery Eliminator



FOR A. C. (Alternating Current)

SIX INCHES SQUARE

WEIGHS 7 POUNDS

This marvelous device absolutely eliminates "B" batteries

With the Freshman Master "B" Eliminator your set will always be supplied with constant and uniform power. Noiseless in operation; your reception will not be marred by the snap and crackle due to chemical action in "B" batteries.

The list price of the A. C. Model Freshman Master "B" Eliminator is $20.00. However, a tube is required to rectify the alternating current into the required direct current for radio operation. And, as we desire to furnish the best rectifying tube that is obtainable, in our opinion, Freshman Master "B" Eliminators for alternating current are now furnished with R. C. A. Rectron UX-216-B Tubes.

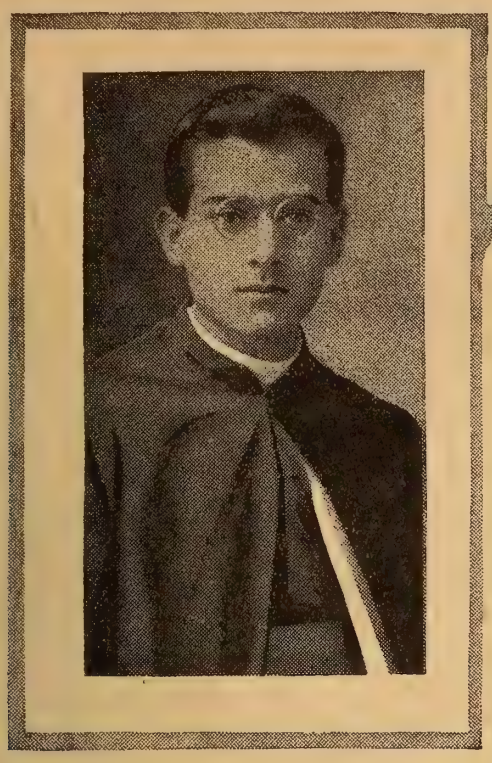
FRESHMAN MASTER "B" ELIMINATOR, R.C.A. Rectron UX-216-B Tube $27.50

Sold by Authorized FRESHMAN Dealers Only

Write for 24-page illustrated booklet, full of useful information for all radio fans.

CHAS. FRESHMAN CO., INC. Freshman Building, New York 2626 W. Washington Blvd., Chicago

OAX, Lima, Peru, Presents Best Programs



Much credit for the exceptional international test program from Peru is due to the Rev. Father Paulo Chavez Aguilar (above), master of the Metropolitan Basilica and author of many religious works. One of the brightest stars of the Philharmonic Society of Lima, Peru, was Senorita Arrospide de la Flor (center). Antonio Garland was the supervising director of the special program arranged for the week.

"Chiquilla" (little) Elvira Sanchez, 12-year-old Indian girl (above), whose clear childish voice was heard in many homes over the North American continent, sang from OAX, Lima, Peru.

WHILE the ears of the North American continent have been straining toward eastern shores during the great international test week, many aerials have been picking up a very pleasing wave from the south.

The particular one referred to is OAX of Lima, Peru, South America, which is on a line almost directly south of Montreal and Philadelphia and about 3,800 miles south of the latter city, approximately the same distance as it is to Edinburgh.

It is doubtful if any station of any country took more elaborate pains to prepare such a universally pleasing series of programs. A spirit of most earnest cooperation was manifest in the letters and cables sent to the supervising committee by Gerald A. Slater, general manager of the Peruvian Broadcasting company at Lima.

Notwithstanding that part of the series will have been already rendered by the time this issue of Radio Digest is on the street, the complete series is published as an example and model of thorough and thoughtful consideration of an important event not only in the history of Radio but in the history of world relationships.

Sunday, January 24

Himno Nacional del Peru, Banda del Regimiento Guardia Republicana; Palabras de saludo a los oyentes de Estados Unidos, Sr. Andres Dasso, Alcalde de Lima; Himno Nacional de los Estados Unidos, Banda del Ragimiento Guardia Republica; Speack de S. STATION KOA TO WIRE PROGRAM OVER DIVIDE

Special Patrol Checking Up 300 Miles of Telephone Line

GRAND JUNCTION, Colo.—Few of the thousands of listeners who tune in this city via Station KOA, Denver, on the night of February 5 would care to make the long, hard journey over the main range of the Rockies in midwinter by ski and snowshoe which broadcasting of the Grand Junction program will make necessary.

So that good telephone service from here to the station in Denver will be assured, the telephone company is sending a special patrol along the 300 miles of wire to check up on its insulation. The line is in canyons and mountains practically the entire distance. The patrol will be hazardous on Fremont and Mosquito passes where the wires cross the continental divide at an elevation above 12,000 feet.

This will be the first time a Radio program has been sent across the continental divide by telephone.

Navy Makes New Record

WASHINGTON.—New distance records are constantly being established by the United States naval laboratory at Bellevue, Md., in its experimental high frequency work. Recently two-way direct communication was established between the Bellevue laboratory and the naval vessel Scorpion in the Mediterranean sea. A 71-meter wave was used.

Station WGY to Send Special Tests Jan. 30

Will Use 50,000 Watts of Power in Trials for Distance

SCHENECTADY, N. Y.—From 11 to 11:15 p. m. Eastern time on Friday, January 29, and 11:15 to 11:30 p. m. Saturday, January 30, WGY, General Electric station here, will put on special programs for the benefit of American listeners.

Every night of International Radio Week has been dedicated to special transmission stunts in accordance with the spirit of the week. On Saturday and Sunday nights, January 30 and 31, the superstation of WGY using 50,000 watts of power will be on the air. This transmitter has been idle for some weeks pending the completion of several changes in the outfit. It has never had a real test for distance, because on previous occasions when it was used, atmospheric conditions were not favorable for distant reception.

WOC Used Many Languages In International Exchanges

With students drawn from all corners of the earth, The Palmer School of Chiropractic, Davenport, Iowa, was able to broadcast announcements from its own Radio Station WOC, in many foreign languages during international test week. In all about fifteen languages were used.

Vocal selections broadcast from the powerful Davenport station were also representative of various European countries.

STATION WLW GIVES BIRTHDAY PROGRAM

CELEBRATION MADE PART INTERNATIONAL TESTS

Powel Crosley, Jr., Gives Address on Broadcasting Development and First Stars Are Heard

CINCINNATI, O.—In addition to its regular schedule of features for the week, the Crosley Radio corporation, arranged a 23-hour program for the international tests to celebrate its fourth anniversary of broadcasting through its WLW station, Wednesday, January 27.

The dedication of the first-remotely-controlled superpower broadcasting station took place last year and it was through that same station that the Radio audience was provided the lengthy program. This station is the fifth one to be owned and operated by Powel Crosley, Jr., who addressed the listeners on the development of the broadcasting art. He spoke at the conclusion of the first part of the concert by the Syrian Temple Shrine band, under the direction of Henry Fillmore.

WLW's Ten-Thousandth Hour

At the time Mr. Crosley began his talk, it marked the beginning of the ten-thousandth hour of broadcasting through the WLW station. Many innovations were introduced to the air audience during this period and several surprises are in store for future broadcasting programs.

"A radario" was presented by Robert Stayman, who was the first announcer of the Crosley station. It depicted the early days of the studio when it was necessary to quit broadcasting until the whistle of a passing locomotive had finished its piercing screams as the station was located alongside of a railroad track. Artists who were booked on the early programs took part in this review.

Hear Hand Saw Pioneer

Robert Alter, the first musician to introduce the playing of a Vox Ferro or hand-saw to the Radio audience, played that instrument on this program. In addition, there was a trio, consisting of saw, violin and piano.

The large pipe-organ in the WLW studio was played by several artists during the program. Many orchestral effects were obtained in utilizing the various stops.

William Charles Stoess, studio director, and Louis John Johen, program director, contributed to the program, through the former's violin solo work and the latter's baritone solos. Rosemary Stoess accompanied the artists.

SECRETS OF SOUPS ARE TOLD BY BETTY

MISS CROCKER DESCRIBES PRINCIPLES OF COOKING

Food Value High—Mineral Content Good For Body—How to Prepare Soup Stock

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

IN THE older European countries, food has never been found in abundance as in America. The peasants have had to struggle long hours at back-breaking tasks for a tiny bit of black bread and soup. Food has been so scarce that it is almost sacred to them. They look upon it with a sort of reverence and hoard every bit with great care. And so they make deliciously nourishing soups out of scraps that we would throw away.

An American cook carelessly throws together some meat and a few vegetables and seasonings, gives little thought to the preparation of it, and then explains that her family does not care for soup. The same family dining in a foreign country or at a dinner prepared by a good chef will exclaim at the very delicious soup.

They might be quite surprised to know that the ingredients in that soup differ very little from those in the soup they dislike so much at home. It is true that soup may be made out of odds and ends of food, but these ingredients should be so carefully handled and the whole dish so carefully prepared that the result will be a work of art.

Food Value of Soups

Soup has an important place at the beginning of the meal because it stimulates the appetite. The more substantial soups may well be made the main dish for luncheon and supper. Because of the large proportion of water the amount of food value in any soup is not high if we count it in calories.

However, most soups contain valuable minerals and vitamins, especially if vegetable pulp and stock are used in it. Then too, because of the heat alone the soup is stimulating and leaves one with the feeling of being well fed, especially in cold weather. The addition of milk makes any soup more nourishing and milk soups are always convenient because they are quickly and easily made. They are especially good for children. It is substantial enough to use as the main dish for luncheon or supper when you do not care to serve meat.

Vegetable Chowders

I wonder if you are familiar with the vegetable chowders. The only difference between a chowder and a creamed soup is that the chowder contains cubes of meat and vegetables. Here is the recipe for a very good corn chowder:

Two cups milk, one-half teaspoon salt, one-eighth teaspoon pepper, one tablespoon minced onion, one tablespoon butter, one tablespoon Gold Medal flour, one cup canned corn, three tablespoons chopped bacon.

Method: Fry onion and bacon in butter until brown. Add flour and cook two minutes. Add corn, potatoes, salt, pepper and milk. Let simmer fifteen minutes. This amount will serve six people.

Creamed Vegetable Soups

You do not need a separate recipe for each kind of creamed vegetable soup as the general proportions are very much the same in every case. The foundation of the vegetable soup is a thin white sauce made by adding two tablespoons of fat and two tablespoons of flour to one pint or two cups of milk. Combine two cups of vegetables with this white sauce and the water in which they were cooked and season to taste. That is, you should have two cups including the cubed vegetables, or pulp, and the stock. You will note that gives you equal parts of the vegetables and white sauce; one pint or two cups of white sauce and one pint or two cups of vegetables and stock. If you want a smooth soup, press the cooked vegetables through a sieve before combining with the white sauce.

Cream soup like any other creamed dish forms a scum on standing. Beating the creamed soup with a Dover beater just before it is served will break up this ugly scum and leave the soup foamy on the top. Never remove the scum as it is a valuable part of the soup.

Very often we have use for a soup without milk and without meat stock. Tomato is a favorite and should be used often in the winter when other vegetables are rather scarce. This is one of my favorite recipes for tomato soup:

Four cups cooked tomatoes, two cups water, four whole cloves, bit of bay leaf, two teaspoons sugar, one and one-half teaspoons salt, two tablespoons butter, three tablespoons Gold Medal flour, one tablespoon minced onion, one-eighth teaspoon pepper.

Method: Combine tomatoes with water, sugar, bay leaf, cloves and onion. Simmer slowly twenty minutes. Add salt and pepper and strain. Make a smooth paste of the butter and flour. Pour the strained tomato into the paste. Cook five minutes or until it thickens, stirring constantly.

Of course it does take some time to cook together the tomato and seasonings, but that can be done while you are setting the table.

AVOID DYSPEPSIA BY DOING OWN COOKING

CINCINNATI.—Men are just as interested in the culinary art as women, says Mrs. Ralph H. Auch, dietician in charge of cooking hints and recipes broadcast every Wednesday afternoon from Crosley WLW superstation here. "Ah," replies the wise one, "the men have to be careful what their wives cook. As it is, look how many get dyspepsia!" Mrs. Auch reports that almost as many men as women write her about her WLW cooking lessons. Which goes to prove men could get along without the ladies.

Heart-Broken Mother Seeks Wandering Son

KOA Broadcasts Do Not Locate Grant Fox

DENVER.—"I will look for a letter every day until it comes!"

Thus reads a letter to KOA, General Electric station here, from a heart-broken mother of Parker, S. D., who is praying that the miracle of Radio will bring back her wandering 16-year old son, Grant.

In her pathetic message, this mother, Mrs. R. B. Fox, asked that her plea for the early return of her boy be read into the air in full.

"My darling boy," she began, "please write to me. You were always kind to mother, so I know you won't refuse to write. We are going to Arizona or California soon, so don't wait to write. We have news that you must know. I've already spent two months on the coast searching for you. If you don't get this message, there is not much use to try longer. Oh, please write to your heart-broken mother."

No trace of the missing youth has yet been found.

Appeal by Radio Brings Son To Bedside of Dying Mother

TORONTO, Ont.—Radio has been instrumental in bringing a son to the bedside of a dying mother in this city. The mother, Mrs. Woods, had been crying out for days for the son. A daughter decided to send out an appeal by Radio, as she had no idea where he was. Down at Laurel, Md., H. G. Bedwell, owner of the Bedwell racing stable, picked up the message and, recognizing the name as that of one of his employees, then in Miami, Fla., sent a message to the lad that he was wanted home at once by his mother. The son, Frank, left Miami for Toronto immediately.

Eight Hours for Women at WCCO

Special Periods Three Mornings and Five Afternoons Are for Fairer Sex

MINNEAPOLIS.—Special periods three mornings and five afternoons each week are devoted to broadcasts exclusively for women by the Gold Medal station, Saint Paul-Minneapolis, WCCO.

The greatest response from women listeners is received from the talks by Betty Crocker, home economics specialist, who addresses her audience at 10:45 a. m. Central time on Mondays, Wednesdays and Fridays. Miss Crocker not only offers recipes and culinary suggestions, but gives health talks, suggestions on home management and entertaining.

The Gold Medal station is the home station of Betty Crocker, she having made her debut over the air from there last year. This year, however, her talks are going out at the same time from twelve of the larger broadcasting stations from the Atlantic to the Pacific coast.

Women's Organizations Have Hour

At two o'clock every afternoon, except Saturdays and Sundays, a special hour's program for women is sent out by WCCO. This period is occupied by speakers provided by the League of Women Voters, the Women's Republican club of Saint Paul, the Saint Paul League of Women Voters, Mrs. E. F. Barnett, in charge of the Fine Arts department of Saint Paul public library, the Garden club, the Council of Social Agencies, and various other organizations whose work is of particular interest to women.

At 3:05 p. m. every Tuesday, H. A. Bellows, director of WCCO, gives a talk, "The World of Books," which, though not exclusively for women, has a large number of feminine listeners, as has his talk at 2 p. m. Thursdays entitled "Among the Musicians."

Besides these regular features for women, the Minnesota Federation of Women's clubs is broadcasting a series of programs at 4:30 p. m. the second Thursday of each month.

"Things Talked About" to Be Discontinued for Month

WASHINGTON, D. C.—Mrs. Nina Reed, whose book reviews and discussions of "Things Talked About" from Station WRC, at Washington, will take a holiday from the microphone during the month of February. During that time, the talks on "Things Talked About" will be temporarily discontinued, but the book reviews will be presented on Friday afternoon as usual by prominent club women of the capital so the thousands of fans may still enjoy this feature.

Ida Bailey Allen Aids Nation's Housewives

Ida Bailey Allen, above, "The Nation's Home-Builder," in the picture at the right is shown supervising the making of a choice tid-bit in the cozy kitchen in her offices. A "Set-Up" for a king, upper right, is one of the meals and table decorations broadcast over WMCA.

"We can live without music or books,
But civilized man cannot live without cooks."

By J. G. Forrest

IDA BAILEY ALLEN, known as the Nation's Home-Maker, was found in her sunshiny and electrically equipped kitchen testing a recipe for Scotch soda scones, which was sent in by a member of her National Home-Makers club, which she organized last June, and of which she is now president. Each of her members are on their toes submitting their recipes in hopes of winning the monthly prize she offers for the best recipe.

This kitchen, located on the fifteenth floor of an office building overlooking the Hudson river, is quite thrilling. Oh, so compact, and yet it contains the necessities so dear to a woman's heart, such as an electric ice making machine, electric stove, colored dishes, tan kitchen table and chairs, glistening pots and pans, with dainty curtains completing the picture.

The writer was taken into Mrs. Allen's office, a place where her personality is reflected. Cretonne drapes, flowers, a soft rug, a few pictures, books, a few comfortable chairs and a purring cat. Mrs. Allen, who is an attractive looking woman, has created a niche for herself in this busy and hustling world.

Mother Encouraged Her

When asked what prompted her to become a cooking expert, the mantle of years seemed to drop from her and once again she was a child. Pausing to think of those very happy days, she said, "My mother is to blame for my success. When I was small, it was my delight to dress as a grown-up and parade around in the kitchen, as mother said that eight years was not too young to learn to cook.

"She was everlastingly patient with me. Always encouraging and never fussy if I made a mess out of the kitchen—something I could do very easily. Then, the big event of the week was the night I was allowed to prepare the evening meal and could invite a girl friend for dinner. When I grew older, I preferred to invite the boys, as I was flattered by their praises. I became more absorbed in cooking problems and finally decided to take domestic science courses at college."

"What do you do with your spare time, if you have any?" asked the interviewer.

Has Little Spare Time

"I have so little spare time," she laughingly replied, "that I must crowd everything into a few hours. I am a real housekeeper and personally direct the education of my two children, Ruth Elizabeth, six years old, and Tom, twelve years old. The three of us are great pals and always together.

"At the present time we are studying French and have plenty of fun conversing in the French language. As I am very fond of singing, Tom, who plays the piano quite well, accompanies me while I practice. We go to the opera and take long walks together. After the children go to bed, I read and listen to my Radio."

We then discussed broadcasting, a subject that she was very much interested in. Mrs. Allen broadcasts every Tuesday morning at 11 o'clock from Station WMCA, and has an invisible audience of over 10,000 people. She has gained so many friends during the last six months, they come to her with their problems. And what problems! Who should discipline the children, the mother or father? How to make ends meet on the husband's small salary? A couple are considering getting a divorce. Are they right in doing so? Those are just a few of the many with which she is confronted each week.

Thus Radio finds another use in the home. The little social call had come to an end, as many recipes had to be tested, and the day is far too short for this food authority. Placing one of her cook books in my hand, I departed while she went back to the kitchen and her recipes.

HIGH SOPRANO NOTE SPLITS BIG WINDOW

MR. and Mrs. Joady Rhodes of Falls City, Oregon, were listening to a KFI program 1,000 miles from Los Angeles, when a large glass window twelve feet from the loud speaker split flawlessly from top to bottom, just as one of the well known Clark Sisters took a high "C." The window was set loosely in the frame, so the settling of the house could not account for the happening. Although the KFI engineers pointed out the fall of the walls of Jericho at the sound of trumpets as a similar case, Mr. Rhodes believes that some settlement should be made, nevertheless.

Get Gerhardt Cake Recipe for Asking

Thousands of Housewives Who Have Followed WTIC Instructions for Dessert Write in Praise

HARTFORD, Conn.—To those who write to Station WTIC, here, a recipe for making the famous Elena Gerhardt cake will be sent. Already thousands of housewives have made the delicious dessert, following instructions broadcast through the station, and letters are pouring in in its praise.

Housewives listening to WTIC each Tuesday and Friday noon from 11 a. m. to 12 m, Eastern time have heard a new voice recently, that of Miss Beatrice Bangs, a member of the staff. Miss Bangs has taken charge of the announcing and introducing of all of the participants in the Travelers station daytime programs, which include fashion talks, lessons in professional candy-making, and WTIC's Housewives' Forum.

"Betsy Ross" Brought Up To Date, Is KPO Feature

SAN FRANCISCO, Cal.—"Betsy Ross" brought up to date, is a regular feature broadcast by Station KPO, here. She appears before the microphone each Wednesday morning with a short sewing lesson. Her work is being followed by thousands of feminine Radio fans throughout northern California. Choosing of colors, materials, styles and other subjects are covered.

SHORT WAVES

By Marcella

"Will you please tell me where 'Little' Jack Little will be next week?" seems to be an awfully popular question these days. Last I heard of him, he traveled from the midwest over to New York for two weeks, thence to Buffalo. Then I lost him. However, watch "Headliners Today" in the advance program section and if Radio Digest can locate him, he'll be listed. He's listed this week.

* *

Yes ma'am, Mr. E. L. Tyson of WWJ is just as nice as his pleasing voice would indicate. Have I heard him? My stars, girl friend, that's my business to hear 'em all. Of course I've heard him. In fact I've been to a cabaret with him. Dances nicely, too. Well, he said he wasn't married, and I don't think he is. He's VERY bashful and unassuming, and if I'm not mistaken some brave girl will have to take him by the hand and lead him to the altar.

* *

Now one for the boy friends who WILL write for data. WEAF's "Winnie," otherwise known to listeners as Winifred T. Barr, is off the matrimonial list. Howard Hunter, of the engineering force of the American Telephone and Telegraph company, is the lucky man who bought the diamond.

* *

Emily wants to know if Al Carney, the popular organist at WHT, is married, how many children to his credit, how old he is, how tall and how thin. That's quite an order, but I found out. He is a smiling, jovial bachelor, weighing 195 pounds, but well able to do so. His height is less than six feet but not much. He's just 25 years old and lives all by himself in a cozy corner. He remarks that he is just getting his Hudson car all fixed for the spring. There's a wonderful opportunity for somebody.

* *

Much ado about this Hired Hand fellow of the Star-Telegram superstation, WBAP, at Fort Worth, Texas. Now one of my correspondents wants to know if he came from Houston, and what he does over the air. Well, the H. H. is an honest-to-goodness entertaining announcer with original wit. I know of none that can compare with this Texan. He does his turn as "substitute" announcer on Saturday, Sunday and Monday evenings. Speaking of his home city, have heard it unofficially that he escaped from the Indian reservation in Oklahoma, and that his wife is as jealous of him as he is of the rattlesnake skin hat band he wears on his sombrero. Sure, I like him.

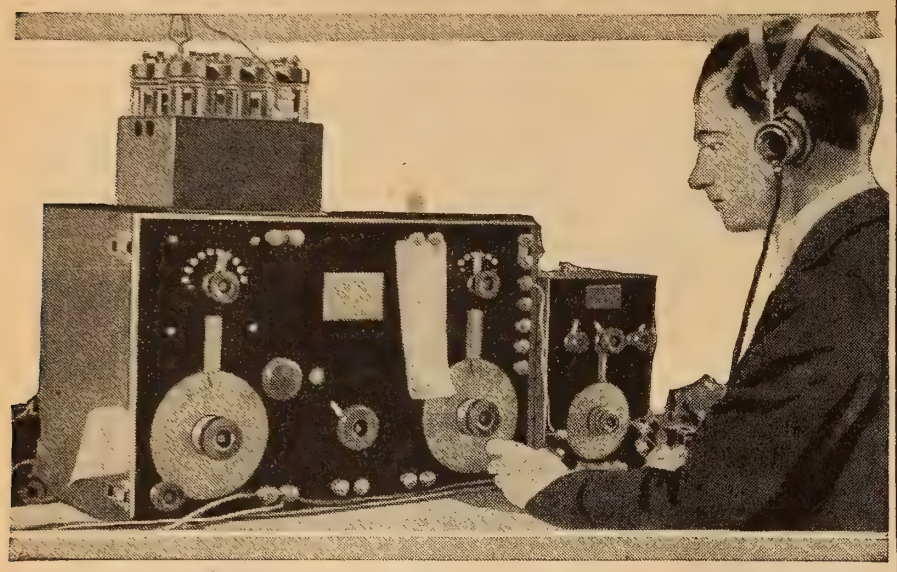
* *

Leslie Joy, be it here noted, has returned to the microphone of WEAF, where he is in charge of auditions, announces frequently, and is heard in frequent vocal solos. "Let Joy be unconfined," say I, for he certainly was drawn many scented letters written in purely feminine hands.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls, and I'll do by best to answer here. MARCELLA.

HE'S OFFICIAL WORLD TIMEKEEPER



Paul Sollenberger, an astronomer at the U. S. naval observatory in Washington, D. C., is known as the official timekeeper of the world. When the chronograph shows that the standard clock registers 11:55 a. m., he turns a switch, cutting in the transmitting clock which gives the signal for noon, thereby setting the clocks of the world.

GENE ROUSE LEAVES WOAW MICROPHONE

TWO AND ONE-HALF YEARS WITH OMAHA STATION

Announcer Who Made Expression, "Yes-Sah" Famous on Air, Will Not Forsake Radio Work

By Ned E. Williams

"Yes-sah!"

Listeners of WOAW, the station operated by the Woodmen of the World Insurance company at Omaha, Nebr., will miss this familiar little expression, which has become a by-word in the vocabularies of hundreds of Radio fans through its use at the close of each musical number by Gene Rouse, known as "G. R." to his Radio audience.

That is, unless his successor chooses to adopt it, and Gene swears he is going to copyright the expression, if it is possible.

Because he says he realizes that WOAW could offer him no further advancement in the field of Radio than he has received at its hands, Rouse has resigned his position as chief announcer, which he has held since the inauguration of the station in April, 1923.

No Definite Plans for Future

He has announced no definite plans for his future, except that he is determined to not forsake Radio work and that he aspires to a post in a superpower station.

Seven years on the stage and eight years in newspaper work equipped "G. R." well for his place as Radio announcer, since nearly all authorities agree that theatrical and journalistic fields are best for the development of Radio workers.

Gene was born in Boulder, Colo., and was educated in the public schools of Denver, where his parents still reside. His first taste of fame followed his offer to bind himself as a slave for a year to anyone who would produce "The Scoop," a playlet written by him.

The production was taken in hand by a New York concern, which refused his offer of a year's servitude, however, stating that the playlet would stand upon its own merits. Which it did.

Rouse Began Career at WNAL

Rouse began his career as announcer in 1922 at WNAL, the pioneer Radio station of Omaha, which was established and operated by the Omaha Daily News. It was abandoned a year later, soon after "G. R." went to WOAW.

He landed in third place in the 1925 Radio Digest contest for the most popular announcer, has visited all Radio shows within a 500-mile radius of Omaha and last year spent seven weeks in a 3,000-mile tour of Radio stations in several states.

"I'll be on the air again soon; I have not left it," is the assurance of "G. R." to thousands of his admirers who know him as "the announcer with the heavenly voice," a description coined by Henry Field, now owner of a Radio station at Shenandoah, Iowa.

Paraguay Wants Station

WASHINGTON.—Erection of a broadcasting station has been proposed in Paraguay, according to a report made public by the department of commerce. The southern republic is displaying great interest in Radio, and the ministry of war and marine has decided to purchase the necessary equipment for a station.

WIRES NOT NEEDED TO PICK UP CHIMES

MEMPHIS, Tenn.—Curiosity recently caused the staff of WMC, station of The Commercial Appeal, Memphis, "Down in Dixie," to place a microphone outside the studio window while memorial chimes were being played several hundred yards away.

Response was almost immediate, for messages of congratulation started pouring in, stating that the reception was excellent. And that, too, in spite of the fact that there were many noises from the street four stories below the microphone.

The simple test was made after several letters had been received by WMC stating that the chimes had been dimly heard during regular programs when the studio was supposedly soundproof.

Results of the test seem so good that WMC is seriously considering making the chimes a feature of the regular broadcasting.

WKAR, LANSING, MICH.

(Continued from page 5)

much of an advantage it gained. Between halves of the game he holds his listeners with a rapid story of the crowds, the bands and other details.

"Jimmie" also goes on the air whenever State college has a home football game. For those events he moves his booth and apparatus to the outdoor stadium press box where he has a clear view of the field.

Dance programs by student orchestras are broadcast Monday, Tuesday, Wednesday and Thursday nights from 8 to 9 o'clock. Other musical programs, including vocal and instrumental numbers, are also presented during the school year.

Two separate broadcasting schools make up the Radio school terms. The first, opening November 2, continues until December 18 and the other is from January 11 to April 2. A new feature added this year is the broadcasting each Monday evening of "Farmerkin" bedtime stories by Mrs. Dora Stockman, editor, and member of the state board of agriculture. Mrs. Stockman's program is given each Monday evening from 7 to 7:15 o'clock, Eastern time. Her stories are especially designed for farm children.

At the same time on the other four broadcasting nights of the week, members of the State college faculty present nature study lectures. From 8 to 9 o'clock Friday evenings an educational program is presented.

The regular Radio school lectures for farmers, held Monday, Tuesday, Wednesday, Thursday and Friday evenings, start at 7:15 o'clock, Eastern time, and continue until 8 o'clock. Five college departments offer instruction in the course which is for a period of twelve weeks.

Enrollment slips are mailed out to listeners and at the end of twelve weeks those "students" are asked to write papers on what they have learned.

EAST LANSING, Mich.—Radio Station WKAR, Michigan State college, has compiled its first formal Radio program made up in magazine form. The new program gives in detail the farm Radio courses which will be broadcast from January 11 to April 2 and which will cover a great variety of subjects. The courses listed are in home economics, animal husbandry, poultry and veterinary medicine, horticulture and gardening, dairy husbandry and farm crops.

The popular team below, Correll at the piano and Gosden with the ukulele, may be discovered regularly at WGN, Chicago. They sing modern songs with their own interpretations and, as you can see, with a mischievous flare.

G. C. Arnoux of KTHS, Hot Springs National Park recently discovered a new Radio entertainer, Mrs. B. D. Rigsbee, above.

High Lights of the Week

THE FASTEST program ever put on the air will take place Saturday, January 30, when details of the three-hundred-mile Carl G. Fisher cup race at Miami, Florida, speed through the ether from WGBU. The new A. A. A. Speedway at Fulford, has just been completed and promises to be one of the best automobile race tracks in the world. Barney Oldfield will be the starter and all the well-known drivers will take part in the race. One-thirty p. m. Eastern time the race begins. Tune in on 278 meters. The University club of New Haven and the Hartford choral club will give a joint recital from WTIC, Hartford, Saturday evening, at 8:15 p. m. Eastern time.

Madame Ernestine Schumann-Heink, whose singing has been appreciated for the last thirty years, will appear before her largest audience Sunday evening when she reaches millions of Radio fans through the WEAF chain. Mabel Garrison, soprano, whose voice was heard recently during the Atwater Kent hour at WEAF and chain, will sing under the auspices of the Atwater Kent company at WDAF, Sunday afternoon. The program she will give is included in the program for WDAF for this day.

Voice culture is the latest educational addition to the Monday programs of KOA, Denver. Americans of the future will doubtless be as naturally a singing nation as Italy is today. Lessons will include only the fundamentals of correct singing and will in no way compete with personal vocal instruction. John C. Wilcox is directing the course.

The Wampas Stars of 1926! To be one of the thirteen lucky ones is the dream of every extra girl in Hollywood. The thirteen loveliest and most talented of the younger motion picture actresses are chosen each year for the Wampus club. These beautiful young women, will make their Radio debut from KNX, Hollywood, Tuesday night.

It seems as if all the popular wondering minstrels of the air have migrated to WSAI, Cincinnati, this week. At midnight Wednesday appear Jack Little, Wendell Hall, and the Ray-O-Vac Twins. Here is a headliner program for any fan who enjoys the merry songs of these artists.

The South claims an artist whose lovely lines have immortalized the old-time southern chivalry, Sidney Lanier. A memorial program will be given Thursday at WBAL for this famous poet. The Philharmonic trio and Madame Tosi will make the 9 p. m. Eastern time program of WBZ, Springfield, an unusually fine one.

"Just Folks," is the title of the comedy of American life given by the WGY players. This is one of those homely comedies which contains many laughs and yet manages to touch the heart of the listener. At WCCO is the annual mid-winter concert of the Apollo club of Minneapolis. The assisting soloist will be Oscar Seagle, New York baritone.

Mountain Time Stations

KOA, Denver, Colo. (322.4m-930kc), 10:30 a. m., Immaculate Conception cathedral mass and sermon, Rev. J. Henry Tihen, celebrant; Malcolm C. Marks, organist; 3 p. m., music; organ recital, M. C. Marks; 7:45, Immaculate Conception cathedral service.

Congress Stages Comedy

OUR Washington correspondent writes that two important facts have been established by the hearings in congress on the Dill and White bills which would give the secretary of commerce additional authority to properly regulate Radio. One is that the Radio industry, the broadcasters, and the general public all favor the general principles of the regulatory measures proposed.

The second fact emphasized is that George M. Cohan has a new and serious rival in the comedy producing field—congress. The hearings have brought out, together with many laughs, the fact that the average congressman does not know enough about Radio to discuss it intelligently, much less legislate toward its regulation.

But we can't expect our senators and representatives to have considerable knowledge concerning such a highly technical subject. And the congressmen admit they haven't, so everyone is happy.

Major Maubourgne, of the U. S. signal corps, at one of the house hearings, was asked a question by Rep. Frank Reed, of Illinois. The major did not understand the question, which was queer and hardly coherent insofar as Radio technicalities are concerned. He informed Representative Reed he did not understand the question.

"Well, you haven't got anything on me," nonchalantly retorted Mr. Reed. "I don't understand it either."

At the senate hearings, Judge Stephen Davis, acting secretary of commerce and Herbert Hoover's right-hand aide on the subject of Radio, was forced to spend one whole morning explaining the difference between a wave length and a band of wave lengths. Then he had another hard one when he told the senators the difference between wave length in meters and frequency in kilocycles.

At the conclusion of one of the hearings in the senate interstate commerce committee, which was discussing the Dill Radio bill, one of the experts representing a Radio company, telegraphed an associate as follows:

"Come to Washington immediately. You are missing one of the best comedies I have seen in a long time." The lack of Radio knowledge on the part of the congressmen, as we have noted, is excusable, but if these same congressmen take it into their heads that the situation calls for large doses of the amendment medicine which they so dearly love to apply to most measures, the Radio bills, badly mutilated and full of holes, may emerge in such a form as to be wholly unacceptable and actually harmful.

Write your senators and representatives to "never mind what it's all about," but vote for the Radio bills as proposed by Senator Dill and Representative White. They are what is wanted by everybody, immediately, not next year.

Does WIR Spoil Your Reception?

TOO late received to be included as a hint for International Radio Week, comes a communication from a reader who is bothered by interference from a commercial station, WIR, at New Brunswick, N. J.

This plant is a 20,000-watt experimental telegraph station operated on 74 meters, supposedly, by the Radio Corporation of America. The interference from this source is so strong that it spreads clear over the broadcast wave bands, from 200 to 545 meters.

The complaining listener lives in Pittsburgh, a good distance away, but says the interference is still terrible. Even local reception is badly mutilated. Complaints from Ohio also report WIR as interfering.

Interference of this kind is hardly a good thing for the Radio industry. If one must experiment, let the experimental station be so located and so designed as to create a minimum of trouble for the broadcast listeners. Perhaps the experiments could be scheduled at such an hour in the morning as to disturb no one.

Cannot something be done to prevent WIR from crashing all over the ether? If not, it should be closed down. The public must be served. The attention of Supervisor of Radio Batchelor, of the second district, is remanded to this nuisance.

Stop it, Mr. Batchelor!

RADIO INDI-GEST

Listenin In

Daddy called me down the cellar
When Mama was away.
"Now be sure that you don't tell her
A single word I say,
Because I'm not wantin' her to know,
Or she'll get mad as sin—
Sh-h-h-h- gonter get a Radio
An' you can listen in."

My mama's mind runs most to clothes,
The fashions and the style,
But when it comes to Radios
She says they ain't worth while.
When daddy gets the thing set up,
An' some speaker wags 'er chin,
I'll bet a doughnut to a pup
Ma's first to listen in.

Barney Lee

Hirsute Harmony

"Trade" and "Mark," the famous "Smith Brothers" are singing every week over WEAF. The program is sponsered by the Smith Brothers Cough Drop company. This feature should be broadcast over KOA, Denver, or KFXF, Colorado Springs.

Dear Little Mother

"When her only daughter reached the mature age of three, she found her offspring had inherited her mother's talent."—From story in WOR Studio News.

The Third Alarm

When I wake up and stretch, and slowly yawn,
And marvel at the fleetness of the night
So quickly overtaken by the dawn,
I wonder what impetus had their flight.

"There surely must be some mistake," I moan,
"Why should I be so tired and rum-dumb?"
Then suddenly I'm mindful I am prone
To stay up late when programs start to come.

The Night Herd

Helen Maria!

Dear Indi: Since the institution of microphones in the House of Lords it has been discovered that the most intimate conversations are broadcast through the chamber. Recently the Archbishop of Canterbury (a peer by right of his office) heard another peer speak of him to a neighbor member as, "What a fool this old fossil is." Unless the installation can be tuned down, it is said the peers will demand the removal of the instruments. They insist on their rights to swear in privacy.

FOG.

'S funny, Fog. Really, old topper, m'lord should be elected, doncher know. F'rinstance like our senators. By the time he went though a few campaigns, a good cussing, exquisitely frilled, would fail to jar his monocle. He might not even bluster if he was threatened with becoming the groundwork for a fossil.

Symphony in Minors

Slim and Red and Spud and me
Built us a reg'lar station,
We're gonna broadcast music, too,
And Slim's school-day oration.

We built it up in Red's hayloft,
With a seive for mikrofone,
And padded up the place with quilts
To pertect our music's tone.

We use a clothesline for the thing
To send the waves a-bouncin',
And we're all set to thrill the world,
With Spud to do the 'nouncin'.

Slim got his mother's roastin' pan
An' I swiped our wash basin,
And Red an' Spud each got a pail—
Tune in and get our station.

Will O. Wisp

For Peruvian Sheiks

We noticed in the program from OAX, Lima, Peru, that a camel-trot was included. And right away Blooper piped up and wanted to know why they had that in Peru, as they don't have to go eight dances without a drink. But anyway, we hope the graceful dancers we saw in Lima several years ago are not humping over now like our American Charlestoners.

Gotta Blame "Blooper"

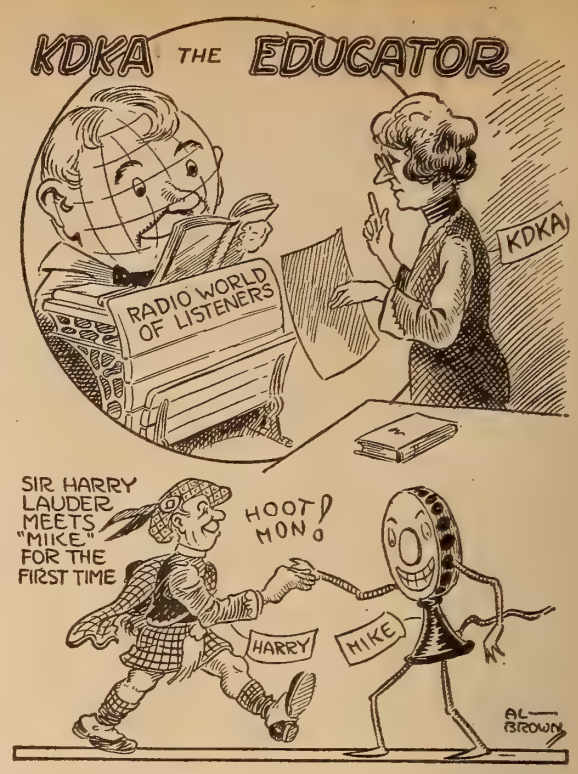
I KNOW OF AN ANNOUNCER
WHO'S A PEST UPON THE AIR—
IF I CAN GET A BOUNCER
. . . . . .

Say Folks, there's a little freckled-faced kid here that does everything from pester us in the morning to pester us at night. He's a good kid, but he'd meddle in H. R. H. Davie Windsor's love affairs or any other trifling matter, if he could, so we have nicknamed him "Blooper." He wanted to help Indi for this issue by writing a poem. He handed the above in and said there were so many things he would do to a pesty announcer he couldn't get them all in one line. Indi wants the worst thing that could be done put in that line. Can you help him out with a suggestion? An autographed heterodyne squeal with a rubber string attached will be sent to the one who submits the best line.

Your Program's Coming In Fine

Will one of the chain gangs please sing "The Prisoner's Song?"

The News of the Week



Condensed

BY DIELECTRIC

Fortunately for Radio listeners one did not have to be a resident of Allentown, Pa., to hear a beautiful number, "Ecstasy," rendered by a string quintet. This number presented through Station WSB, Atlanta, was a feature in the Lion and King program and dedicated to someone in the town mentioned above. Whether the piano was misplaced with reference to the mike, or just played too loud, the result was a prominence which tended to upset an otherwise excellent ensemble. A later feature of considerable interest was provided by carrying listeners about from one to another theater in the city, thereby introducing a variety of acts and musical selections.

That quiet, southern-accented voice of Wendall Hall, set off by his engaging chuckle, has a very competent pair of wings attached—or so it would seem. Not so long ago, he has perfectly at home before a mike in Chicago and more recently we heard him from the studio of KOA, Denver. By the time he reached the latter city several new jokes had come to his mind which he unhesitatingly proffered for our benediction. Some of them received anything but that, while others would make even the stern lines on Bernard Shaw's face relax. Everybody likes his uke-ing.

Let's see how many of the broadcasting stations we can commend for omitting undesired material in their announcing or including such things as the Radio audience deems essential to satisfactory reception. The station to be mentioned at this time is WTAM, operated by the Willard Battery company, Cleveland. Throughout the playing of a dance program at this station there was announced between each number merely the station call, city and selection to follow, amounting to the least interruption one might wish for. There are others to note.

Just as Station WJJD, Mooseheart, Ill., reached that part of an evening program where a native Eskimo was presented, our dials tuned them in. This gentleman of the far north country has succeeded in mastering pianoforte execution in a manner thought improbable for one of his birthplace. The recital was given from the Palmer House, Chicago, and was consistently interesting. Yet the playing of this pianist stood out prominently, due to skill in execution and expression.

Should you hear the Boswell Sisters, from Station WSMB, New Orleans, you will readily understand why they have been retained on the broadcast programs of that station ever since its inception. They are clever performers on their chosen instruments and might fittingly be included in the galaxy of artists' likenesses appearing in this paper. Another observation should be made, which is to the effect that announcing is done slowly, distinctly and pleasantly.

Station WPG, Atlantic City, developed an anniversary program of merit including awarding of prizes to listeners—a customary proceeding—and switching by remote control from the new Elks home at that seashore resort to other points in the city where entertainment was available. Both the participants and listeners spent a lively evening together.

There is one group of songs to which music lovers never tire of listening—the Indian love lyrics. A tenor with good vocal equipment rendered one of these songs before the mike of KFI, Los Angeles. Another feature worthy of comment was the violin playing of Samuel Gardner.

ABC Radio Fundamentals for Everybody

Chapter IV—How Sound Waves Are Received

By Milo Gurney

IT IS obvious that if we are to intercept the Radio waves, which have been thrown into space, a substance must be provided in a form which has a marked affinity for such waves. In addition, there must be a means for converting them into audible frequencies, together with a mechanical arrangement which will make the output understandable.

To meet the first requirement, an antenna, which may be either in the form of an elevated copper wire, or in the

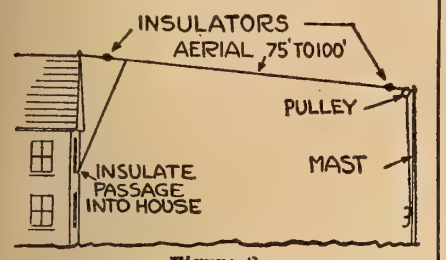


Figure 8

shape of a coil or loop is used (see figures 8, 9 and 10). Each type has its advantages, but coil or loop antennas do not supply nearly as strong signals as do the single wire antennas, placed 30 or 40 feet above earth, and well away from objects which might act as a counterpoise. A counterpoise acts practically the same as a ground, and when antenna is not correctly installed, consists usually of metal roofs or like objects. This result holds true, even though the loop possesses an equal length and size of wire.

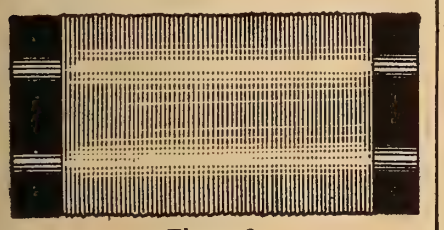

Figure 9

To furnish a definite reason for such varying signal strength would carry my discussion well into the mathematics of Radio, assuredly an angle which would not be of general interest to my readers. It is, however, quite easily proven that within certain limits the distance from the earth at which either type of antenna is placed has a marked influence upon its efficiency as an energy collector, insofar as signal strength is concerned.

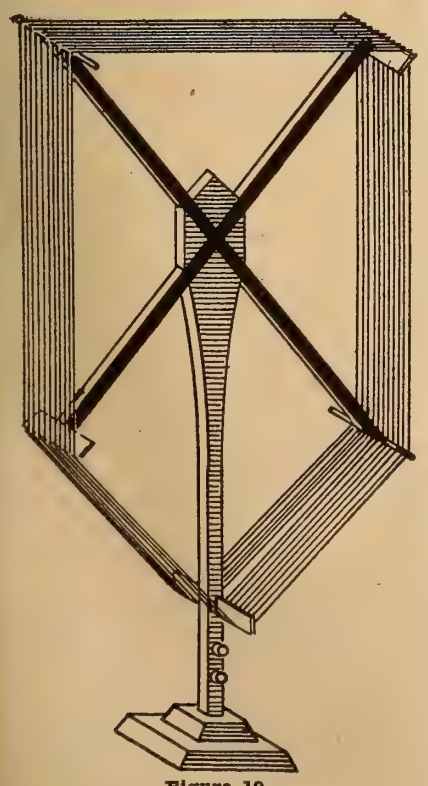

Figure 10

If signal strength was our only concern, then a single wire antenna, or a multiple of such wires, placed in a horizontal plane would undoubtedly be preferred. But very often, because of its directional characteristics, the use of a loop is advisable, if not imperative. In order to compensate for its lack of signal strength, an additional tube is employed in the receiver, or advantage is taken of a wiring process, or circuit arrangement, which is termed reflexing. This circuit or process is such that the tube, or tubes is so connected as to do double duty.

In order that the waves may be converted into audible frequencies after interception they must be passed on from the antenna to a tuner, whose function is that of making possible the selection of the station whose program we may desire to listen to and from this tuner on to a detector, or converter, which is a better word. The part taken by the detector is to convert the waves which have reached it in the form of radio frequency to that of audible frequency. As explained in a previous article, they are converted to a frequency which is within the capability of the human ear to hear. As both the tuner and the detector are of more than casual interest and, further, as their method of operation is distinctly novel, each will be given their deserved attention through separate treatment.

The tuner, or station selector, as used in Radio receivers, is not the complex mechanism that many would have you believe.. Rather it borders upon the ridiculously simple when viewed as the complete unit. Persons knowing little about the principles involved regarding the design of a tuner, have brought to the gullible purchaser a multiplicity of them, some worthy but most of them an object of pity. Yet each is backed with a promise that included everything which the maker felt would answer your questions and attract another dollar from your pay envelope. Out of this maze of maybe's, three distinct types stand out as being fundamental in conception, and in general use today. They are known as single (figure 11), double (figure 12) and three-circuit (figure 13) as pictured in the drawings shown. Of the three, the double or two-circuit tuner is the type most preferred, and while the three-circuit tuner passed through a wave of popularity in the early days of Radio, it slowly declined until its name was seldom mentioned in polite Radio circles. Of late, with the advent of a great many circuits using what is known as a stage of radio frequency preceeding regeneration, the three-circuit tuner is once more coming to the front, even if it does not now hold a very strong position in the field.

Later on in this series, the advantages of each will be explained, while for the present I shall only use the single-circuit type without variations in order that the layman may not be confused.

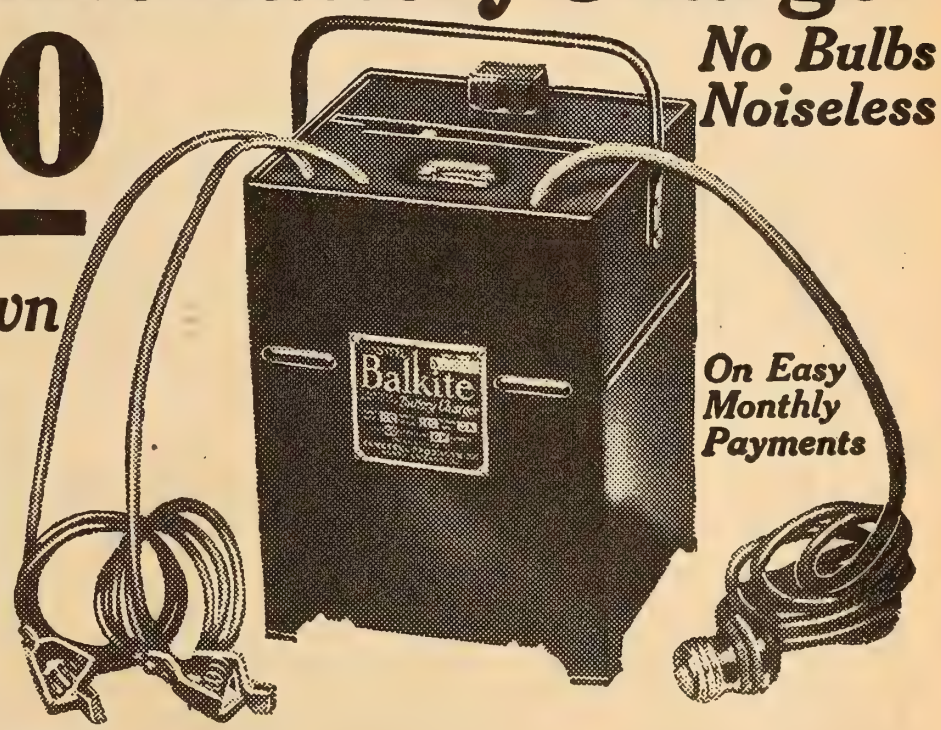
Using figure 11 as our example, the Radio waves from all stations which are powerful enough to reach your antenna are passed on and down through a wire from this antenna to a coil within the receiver, and through it to earth. As the transmitting station is also connected to earth, the electrical circuit is thereby completed. Connected to this coil is a

(Continued on page 24)

Genuine Fansteel Balkite Battery Charger

No Bulbs Noiseless

Only $1.00 Down



On Easy Monthly Payments

Radio Fans! Auto Owners, too! You may now own a Genuine Fansteel Balkite Battery Charger on a most amazing, easy payment offer. The famous Balkite is acknowledged the most efficient, the most fool-proof and trouble proof storage battery charger on the market. No tubes, no bulbs and no noise. Will charge your battery while using your radio. To get the most efficiency and greatest enjoyment out of your radio, you need the Balkite Battery Charger in your home. And, on this offer, we'll send it to you for only $1.00 with the coupon on

30 Days Trial

The Balkite comes to you completely wired, ready to attach to your light socket and battery. No extras to buy. Use it whenever necessary for 30 days. See how much it adds to the convenience and enjoyment of your radio. See how much it *saves* in battery charging cost. See how simple and easy to use. After 30 days trial, if you're not convinced that you *need* the Balkite Battery Charger, send it back at our expense and we'll refund your $1 plus transportation charges.

$2.50 a Month

If you decide to keep the charger, start making the small payments of only $2.50 a month until you've paid the total price of only $19.50. That's the price others ask for spot cash. We give you the lowest cash price on easy monthly payments you'll never feel. The money you save in charging your battery at home will almost take care of the payments on this offer.

For Radio and Automobile Batteries

The Balkite Battery Charger is based on a new principle, the use of "Balkite" a rare metal developed for this purpose. It will charge the ordinary 6 volt radio "A" battery or automobile battery from 110-120 AC, 60-cycle current. It will also charge radio "B" batteries of the lead type without added attachments in multiples of 6 cells.

No Bulbs—Noiseless The "Balkite" metal changes the AC current, commonly used for lighting, to the DC current necessary for charging batteries, without the use of fragile bulbs or vibrators. This makes operation practically devoid of any disturbing hum or noise of any sort.

Easy to Operate The Balkite delivers a taper charge and cannot damage the battery by overcharging. Cannot discharge or short circuit the battery. It will charge even a completely discharged battery. It cannot fail to operate when properly connected to the battery and line current. Is unaffected by temperature or fluctuations in the line current. It is simple, efficient and indestructible. Has no contact points, bulbs, vibrators or moving parts. Cannot deteriorate through use or disuse. Requires no attention other than filling with distilled water. Has nothing to adjust, break or get out of order.

Operates While Using Radio The Balkite can be used while the radio set is in use without affecting the set or its operation and without disturbing noises. Its operation does not create disturbances either in your set or your neighbor's.

Charger comes completely wired, ready to attach to your electric light socket and battery. No extras to buy—no fuss, no delay. Measures 8 inches high, 6 inches wide, 6½ inches deep. Shipping weight about 22 lbs.

Order by No. Y8306NA, $1.00 with coupon; $2.50 a month; total price, $19.50

Send Coupon NOW

Don't miss this opportunity to get the famous Balkite Battery Charger at the rock bottom cash price on small monthly payments. Send only $1.00 with the coupon now, while this offer lasts. No risk. No obligation; 30 days' trial, then decide. And you are always protected with Straus and Schram's money-back guarantee of satisfaction. Send now.

Straus & Schram, Dept. R9411 Chicago

STRAUS & SCHRAM, Dept. R9411 Chicago

Enclosed find $1.00. Ship special advertised Balkite Battery Charger. I am to have 30 days free trial. If I keep the charger, I will pay you $2.50 monthly If not satisfied, I am to return the charger within 30 days and you are to refund my money and any express charges I paid.

A B C'S OF RADIO SETS

(Continued from page 23)

mechanical and electrical device which is termed a condenser, shown in figure 11 as that portion of the drawing containing the arrow. It is the shaft of this condenser which passes through the front panel of your receiver and to which the tuning dials are fastened.

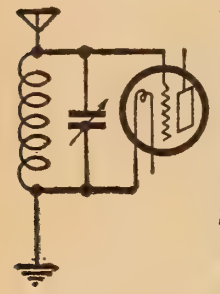

Figure 11

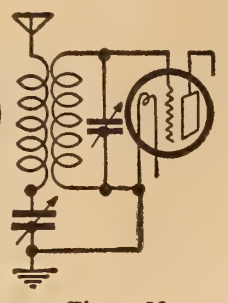

Figure 12

The purpose of this condenser is to so vary its electrical characteristics, by turning the dial, as to allow only the station to which we desire to listen to pass through it and on to the detector or converter. An apt analogy may be cited if we but consider this condenser as an adjustable sieve through which all of the several wave lengths are clamoring to pass through, but which are retarded because the openings have been adjusted by the operator to a degree wherein only the wave suitable to our pleasure can pass. The question may arise in your mind at this point as to why it is that very often, in addition to the waves of the desired station passing through, apparently others also pass, because we can hear other stations, though with a lesser signal strength? As an explanation concerning the cause of this is worthy of a separate article, it shall be deferred until later in this series.

It is then of interest to remember that as both the antenna and the tuning coil within your receiver have an affinity for the interception of Radio waves, and as they are conductively connected, they are therefore not, in their service to you, unlike the electrical current in your home, which is ever a service to the lamps and only awaiting one to turn them on.

Tuning, wherein a loop is used rather than an outside antenna, is identical in the electrical and mechanical means employed. A condenser is also required, and attached to a coil. An exception is that in place of an antenna being used, the collector agency is represented as a loop, and unless such a loop is converted to a form of antenna, no connection to earth is made.

While this series of articles is directed primarily to those interested in the learning of the Why's and Wherefore's of Radio, my correspondence for a considerable period has indicated that altogether too few experimenters understand how a loop functions as an energy collector. I cannot, therefore, pass the subject without clarifying this much mooted question. Later on the construction of an efficient loop will be outlined together with the reason why.

As a loop receptor has no connection to earth, it is obvious that it does not pass an electrical circuit to earth which returns to the transmitting station. Hence it must rely upon another means. In

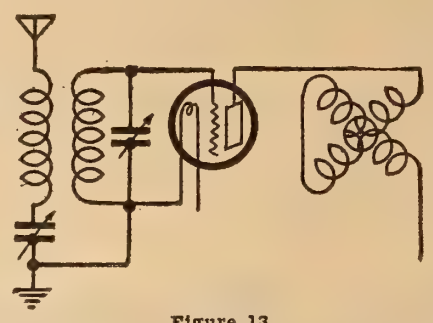

Figure 13

this instance a loop is influenced through being within the field of the electro-magnetic waves which are transmitted, and which permeate the atmosphere. If we should change the electro-magnetic waves to heat, and assume that such heat is being radiated from a radiator, then objects placed near the heat will absorb a portion of it, in direct ratio as the square of the distance and its area. A loop therefore, when placed in the electro-magnetic field of a transmitting station, functions also as an absorber of electro-magnetic waves, which induce a replica of the modulated waves within it.

(In next week's article, Mr. Gurney will explain the fundamentals of the detector, or convertor, and how it functions.—Editor's Note.)

BALTIMORE HAS VOICE

(Continued from page 6)

the advantage of a powerful Radio station and a voice in the Radio assembly of cities and states commensurate with its standing as the home of a great university, the Johns Hopkins, ... its patronage of the arts, especially music; its rapidly growing importance as a great sea port; the industrial center of the Atlantic coast—the Port of Opportunity and as the newest of the old cities of our great country."

And to prove his sincerity Mr. Wagner added, "It is my privilege to dedicate this new Radio station to Baltimore and Maryland and to the service of their people in such ways as may be found most useful to them. The station is to be known as Baltimore. It will be so designated and referred to in our future announcing and operation. After tonight, the name of the company will not be heard in the announcements of this station, nor is it proposed to commercialize its operation."

The governor and the mayor responded, heartily thanking Mr. Wagner and his company for their generous contribution to the commonwealth.

"Many times since I have been mayor of Baltimore," said Mayor Jackson, "have I been importuned to establish a municipal broadcasting station, and little did I think that when I postponed these matters from time to time that the initiative would be taken by the Consolidated Gas, Electric Light and Power Company of this city."

There are two studios, one large and one small, the larger one being capable of handling a full symphony orchestra. In the reception room there is a loud speaker for the benefit of those visiting the studio.

WBAL is located about 20 miles from the center of Baltimore on a knoll 700 feet above Baltimore mean tide level, and connected by cable to the studio in the Lexington building in Baltimore's business center. It is operating at present at 1,000 watts on a wave length of 375 meters and will so continue until otherwise ordered by the United States department of commerce.

Frederick R. Huber, a distinguished figure in the musical life of Baltimore, is director of broadcasting. Mr. Huber has been manager of the Baltimore symphony orchestra ever since its inception ten years ago, in addition to which he is also managing director of the Lyric theater, Baltimore's largest music hall, and municipal director of music. These various activities have given him a wide experience in musical affairs and make him one of the most highly qualified of broadcasting directors.

The studio manager is Stanley W. Barnett, who was called to WBAL from WOC, at Davenport, Ia., where he served in a similar capacity. Mr. Barnett has had considerable Radio experience, being familiar with every detail of its operation.

George Bolek, pianist, and Gustav Klemm, composer, are program supervisors. Mr. Bolek is a well-known figure on the concert stage, where he has appeared with many distinguished artists. Mr. Klemm is conductor of the WBAL orchestra which broadcasts twilight concerts every Sunday evening from 6:30 to 7:30 o'clock. Vocalists also are to be included on these orchestral programs.

Of importance in connection with the work of this station is the operation on a weekly schedule. Mr. Huber has provided that lovers of novelty and music of a lighter character may have their place on the programs each week. Friday has been set aside as "novelty" night and from 9 to 10 o'clock unusual features that will have a distinct appeal to all will be broadcast.

Monday and Thursday nights will be "concert nights". The programs will run from 8 to 10 o'clock; the program from 9 to 10 o'clock Thursday evening will feature members of the WBAL staff. Tuesday will be "ensemble night" when vocal and instrumental quartets, trios and duets will be heard. Sunday, between 6:30 and 7:30 o'clock, there will be "twilight" concerts featuring well-known vocalists and the WBAL orchestra, of which Gustav Klemm is director.

Wednesday and Saturday nights are silent.

Headphones Are Delicate

Head phones, when well made, are delicate instruments, and should be handled just as carefully as a fine watch. One should never let them drop, or handle them roughly, any more than one would willingly let a glass tumbler fall on the floor. Though head phones will often stand considerable rough treatment without serious damage, strict adherance to the rules of care outlined here is the best assurance of good reception.

Fading experienced by Radio fans has been traced frequently to sagging aerials that were being swung back and forth by the wind. When the slack was taken up the fading was eliminated.

RAYTHEON

The new rectifier that perfects the B-battery eliminator

PURE, resonant, clear tone—reserve power—freedom from worries of all kinds—aren't these the things you have always looked for in a B-eliminator? The things you have never been able to realize?

Here, then, is a tube that makes all these possible—that has immeasurably long life, uniform quality, ample power to run a ten-tube set. The RAYTHEON Rectifier is the result of prolonged experimentation and scientific research. It is the last word in the perfection of the B-battery eliminator, developed by an organization that is in the forefront of the engineering field, and sponsored by radio editors and leading manufacturers.

Complete B-eliminators or parts, specially designed for use with RAYTHEON tubes, are manufactured and sold by:

Acme Apparatus Co., Cambridge, Mass.
All-American Radio Corp., Chicago, Ill.
Dongan Electric Mfg. Co., Detroit, Mich.
General Radio Co., Cambridge, Mass.
Jefferson Electric Mfg. Co., Chicago, Ill.
Mayolian Radio Mfg. Co., New York, N. Y.
Modern Electric Mfg. Co., Toledo, O.,
Thordarson Elec. Mfg. Co., Chicago, Ill.
Tobe Deutschman Co., Boston, Mass.
Webster Company, Chicago, Ill.

You can buy these B-eliminators, parts, and RAYTHEON Rectifying Tubes at your dealer's. Price of tube, $6.

TONE

Full, sweet, mellow and natural, without the slightest indication of distortion, is another achievement that is making the APEX SUPER FIVE the most popular of all receiving sets.

VOLUME

That supplies dance music or entertainment without any loss, is a feature for which the APEX SUPER FIVE is world famed.

DISTANCE

Lends added enjoyment to radio with an indescribable fascination of tuning-in far away stations, which is always possible with the APEX SUPER FIVE.

Ask your dealer for a demonstration. Your eyes and your ears will tell you that APEX stands at the high point of perfection in both performance and appearance. $80 —without accessories.

OPERATING AND TROUBLE SHOOTING

OPERATING and Trouble Shooting, is a Radio Digest feature, the purpose of which is to give practical information on the operation, care and cure of simple troubles in every kind of receiver. Standard Radio receivers of wide distribution and use are studied from the standpoint of instructions for installing and connecting, tuning and operating, and remedying little difficulties. The suggestions below, if executed faithfully, will make winter broadcast listening yield all there is to yield to the reader and give your set a fair chance to show its worth.

For the Owner of a Day-Fan Five Receiver

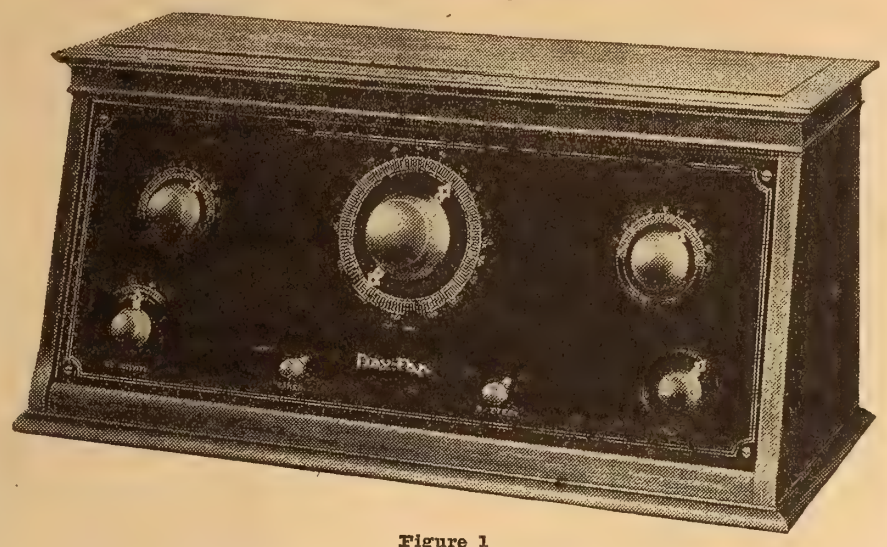

Figure 1

MANY have tried, but few have succeeded, as have the designers of the Day-Fan 5, in producing a Radio receiver of such remarkable simplicity.

Its semi-sloping panel in black and gold, relieved by a housing of hand-rubbed mahogany, in effect accentuates the one dial major tuning control, which is this receiver's outstanding feature. Through slowly turning this dial, and an occasional slight adjustment of the small vernier dials at either side of the major one, we were able to not only separate each of the Chicago stations, but receive satisfactory reception from outside stations, which speaks well for the selectivity of any make of receiver.

In addition to the controls mentioned, two additional controls are provided at the opposite lower corners of the panel, which function as aids for additional selectivity, and the regulation of volume. This completes the panel assembly with the exception of a centrally located battery switch of neat design, which is used to either turn on or off the set.

The interior assembly of parts, together with the evidence of careful workmanship, is in keeping with that which one expects from manufacturers of repute, the total receiver expressing the thought of keeping well abreast of Radio's rapid advancement.

Antenna and Ground

As the construction of an efficient antenna and ground are of vital importance, our experience with the Day-Fan indicated that the antenna should be number 14 single strand copper wire, from 80 to 100 feet in length, and placed as high above ground as possible. Care should be taken to insure it being well insulated from, and not touching, any surrounding objects. The lead-in wire from the antenna to the receiver should be number 18 rubber covered wire and securely soldered.

If this is impossible, your next choice may be an equal length of rubber covered number 18 copper wire, strung along the picture moulding of an upstairs room, or located in an attic.

The ground connection should be as short as possible, the size of wire used to be the same as for the antenna, while it need not be insulated. Run this wire from the receiver as direct as possible to a cold water pipe, to which it should be fastened by means of a ground clamp, purchasable in all electric or Radio supply stores. If such a clamp is not available, it is then permissible to file or scrape a portion of the pipe and to wrap approximately two feet of the bare ground wire tightly around the cleaned portion of the pipe. When completed cover this wrapping well with ordinary tin foil, and over it and the wire fastened to the pipe place a wrapping of tape.

Should no cold water pipe be available, a galvanized iron pipe about six feet long, to which the ground wire has been secured in the same manner as outlined for fastening to a cold water pipe, may be used. This should be driven its full length into moist earth.

As no receiver is any better than its weakest link, it is of importance that only proven accessories should be used. Look well then to the quality of the tubes, batteries and loud speaker which you purchase. Price is not a criterion of goodness, while reputation is.

Accessories

You will require five 201-A or 301-A type tubes, two 45-volt B dry batteries, the heavy duty type being preferred, and one 6-volt wet storage A battery, for this receiver. In addition a suitable loud speaker will, no doubt, be required.

In purchasing the A wet battery, as well

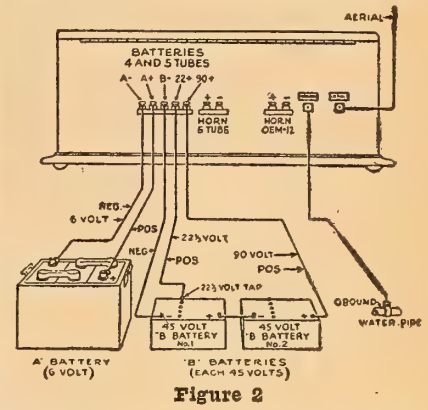

Figure 2

as the B dry batteries, secure your dealer's assurance that they are fresh and fully charged. A fully charged wet storage battery should indicate a hydrometer reading between 1275 and 1300, while a 45-volt dry B battery should test with a reliable voltmeter 38 volts or better, in order to be of value.

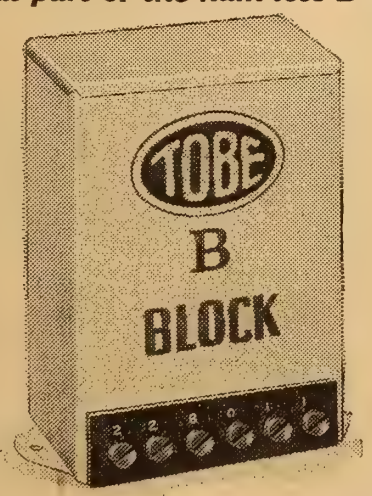
Connecting the Receiver

Before attempting to connect the batteries and antenna and ground, carefully read the instructions which come with the receiver. The actual making of these connections has been made extremely easy as a 5-wire cable for making the connections to the batteries is furnished and properly connected with the terminals of the receiver. One then has but to place

(Continued on page 26)

The TOBE "B" BLOCK

An essential part of the hum-less B-eliminator



Price $11.00

CONTAINS in one compact silvered metal case the three filter and two by-pass condensers required for the Raytheon "B" Eliminator;—one 8 mfd., two 2 mfd., two 1 mfd. Saves $2.50 in cost of parts—saves space—saves wiring. Approved by the Raytheon Mfg. Company for use with its Raytheon tube. See pages 27 and 28, this issue of RADIO DIGEST.

Ask Your Dealer for "The Better Condensers"

A new TOBE "B" Block is also available with one 8 mfd. and two 2 mfd. condensers for filters in power amplifiers and other types of plate supply work.

Price, $9.50

THE TOBE DEUTSCHMANN HIGH-VOLTAGE BI-PASS CONDENSERS ARE NOW AVAILABLE

Prices:

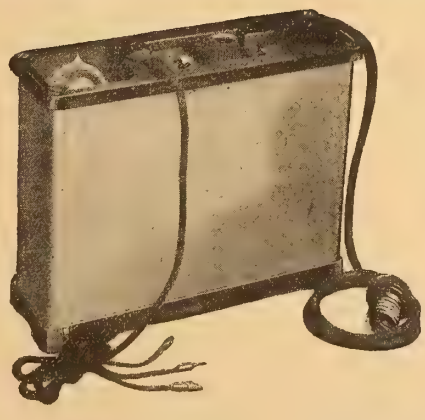
0.1 mfd., $0.60 0.5 mfd., $0.75
0.25 mfd., .70 1.0 mfd., .90
2.0 mfd., $1.75

These condensers are mounted in the standard TOBE shielded metal cases, with silvered finish and are designed for all usual radio by-pass uses and for ordinary "B" eliminators.

The TOBE model high-voltage filter condenser is also announced at our former prices. Each of these is individually tested and stamped with date of test. Accuracy guaranteed within 5 percent of rating. For use where the very best parts are desired, as in power amplifiers and "B" eliminators, for power tubes and for experimental work.

Write us for circuit diagrams of all types of "B" battery eliminators

TOBE DEUTSCHMANN COMPANY
Cornhill, Boston, Mass., U. S. A.



The Acme B-Eliminator, shown to left, is made in two types:

Type E-1, (110 volts 60 cycle), $50
(Type E-1 uses Raytheon Tube)
Type E-2, (110 volts, D. C.), $20

For those who want to make their own:

Acme B-4 Transformer.....$7
Acme B-2 30 henry Choke...$5

Acme B-Eliminator gives—

Greater Distance, Greater Volume and Better Quality With no noise—no hum—no distortion

THE big job in finding a method of hooking up house electric current to replace "B" batteries in radio sets has not been to eliminate the hum. That was easy. The problem was to discover a way of overcoming the distortion.

Now, after two years of experimental and research work, we have won. The Acme B-Eliminator has no noise, no hum, no distortion.

You can guess the result. No "B" batteries to quit cold when you need them most. You get permanent reception, better reception, and higher voltage that is constant.

There is nothing to wear out. The first cost is the last—and the current consumed is trifling.

The new Acme B-Eliminator is highly effective on any set from 2 to 10 tubes. Detector voltage is 0 to 70. See it at authorized Acme dealers.

Those who prefer to assemble the Acme B-Eliminator themselves can easily do so by following a few simple instructions. Send 25 cents with the coupon below and we will furnish you with an actual size wiring diagram together with a copy of our booklet, "Amplification without Distortion" which contains all necessary instructions.

OPERATING DAY-FAN 5

(Continued from page 25)

the set well away from radiators or metal objects, which have contacts with the earth, and attach the free ends of the cable to the batteries as indicated in figure 2. The plus, or positive, terminal of the A battery is marked + or painted red.

Place the 6-volt storage battery as close to the receiver as is possible, yet convenient for charging if you have a battery charger. Rubber covered wire for the connecting of this battery to the receiver should not be smaller than number 16 if the battery location does not exceed six feet from the receiver. If of greater distance, up to ten feet, then a number 14 wire should be used.

It is also advisable to place the dry B batteries convenient to the receiver and at no greater distance than that of the A battery. The connecting wires from the B battery must also be well insulated, although the size may be smaller, though not less than number 18 gauge.

A booklet is included with the Day-Fan 5, in which is a wave length calibration chart, which enables the operator to instantly locate the station desired. This is arranged so that the indicating numerals coincide with the dial reading, and presents a most helpful aid to the novice.

After connecting the receiver, insert the tubes in their sockets, and turn on the battery or loud speaker switch, then proceed as follows:

1. Set the pointers marked "Selectivity" and "Volume" so that they are vertical.
2. Turn the center dial all the way to the left and then all the way to the right, which will line up the tuning condensers.
3. Set the large center dial at the number shown on the wave length calibration chart, sent with the receiver, for the station which you desire to hear.
4. Turn the speaker switch to the loud position.
5. Turn the selectivity dial from right to left until maximum volume is secured.

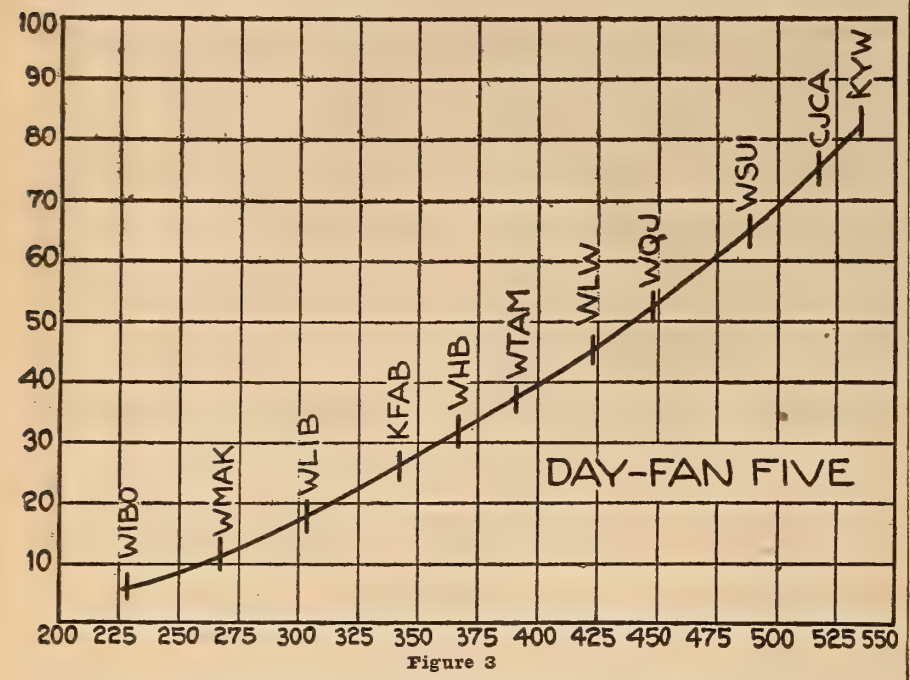

Figure 3

6. Turn the volume control well over to the right and then slowly back to the left until the tone and volume is such as to please you.
7. If the volume is still too loud, turn the speaker switch from loud to soft.
8. Once a station is tuned in, slight adjustments of the dials to the right and left of the large dial will clear up the signal.
9. Slight adjustments of the "Selectivity" dial will materially assist in the tuning in of stations which are otherwise hard to separate from interfering ones.

Tuning Chart

As an additional assistance in operating this receiver, and also as indicating our method of checking the claim of the manufacturer relative to one being able to set the main control dial in accordance with their wave length calibration chart, we produce in figure 3 a graph chart of wave lengths against dial settings.

The check was made covering the reception of twelve typical stations which were broadcasting from 244 to 536 meters, and it is surprising to note from this chart how closely it adheres to the manufacturer's claim.

KFDM "TOOTSIE LINE"

(Continued from page 7)

Suddenly the loud speaker trembles and almost falls off the stand. What's the matter? Gracious sakes! Can it be a wreck?

"Oink! Waugheee-er-oof!" Tootsie rears back on her haunches, such as they are. Lubricating Luke and the Claim Agent make a dash for the door. A general medley, amounting almost to a melee follows. Farmer Perkins and the Bathing Beauties get all mixed up and the Flappers and Pete the Passenger tumble out of the Accommodation coach. Just as they are about to emerge on what is expected to be a gory scene a resounding "Hee! Haw! Haw!" comes chortling through the circuit.

WHERE HAVE you heard that voice before? A Missouri mockingbird! Yes sir! No, maybe 'bout it either! And the first strange sound you heard which started all the commotion and stopped the locomotion was kerzactly what you thought you heard—a real live porker!

And don't you ever think "Tootsie" is a fake either. Magnolia Mike sent us an actual photograph of everybody that takes this trip, only there wasn't quite room enough to include "Mrs. Tootsie," as Pete the Passenger called the Accommodation car. Some listeners have written into the station differing with Pete on the precedence of this relationship, whether the Accommodation or "Tootsie" was the "Mrs." You say "There she comes" when you see her coming 'round the curve, meaning the engine. But then, again, suppose it is a mail train, argues Pete.

However, "Tootsie," and all on board finally steam into Beaumont and find the Magnolious Refinery band waiting at the station wearing their starch collars and gold cuff links in their dresser drawers, which is home and has no reference to underwear. And the band with its "squeaky shoes" and all that plays a welcome fit for Old Home Week. They clamber aboard, being accompanied by three lady passengers and five other men.

Magnolia Mike then gives Castor Oil Clarence the high ball and "Tootsie" is away again. Four of the five new passengers are discovered to be the Scrap Iron Quartet and they begin to call the stations in a way that makes all the passengers want to keep on riding.

Miss Allie Mae Huitte, one of the accompanying passengers, then unpacks a baby grand from her vanity case and with sweet winged notes assists Miss Richards to waft her voice down to the South American coast. Mrs. Harvey Gilbert also sings to prove that "Tootsie" can carry more than one great singer at a time. While Magnolia Mike is clearing his throat for further announcements, Dick Haynes (for 'tis none other) suddenly bursts forth in song and "Tootsie" rumbles along with scarcely a sound from her iron shod heels clicking against the rail ends. The grand finale of this very enjoyable trip comes with a classical thrill from the ten violins of the "Mozart Violin Choir" under the direction of Miss Gladys Harned.

Here we are, at the end of the line—Magnolia Refining Station. Everybody out. Do not forget your parcels.

GHOST VIOL WINS FAME

(Continued from page 4)

another and soon the musicians' club became known as the "Kansas City Little Symphony Orchestra."

Their fame spread to other cities and other states. They traveled and the municipality recognized their importance to the fame and acclaim of Kansas City. They were adopted as a city institution. Their numbers increased until, when occasion requires, there are sixty members now in the ensemble.

Two weeks ago they began a series of concerts for Radio listeners through Station WDAF of the Kansas City Star. The orchestra seems to speak the personality of its leader and with Luigi Bussolari, the concert master, these two sons of a land of song and sunshine have come together to bring the happiness of their inheritance directly into the homes of hundreds of thousands of this new land of opportunity.

Prest-O-Lite

There are many improvements in the new Prest-O-Lite Battery

IN THIS new battery you'll find all the good points and high quality that have made Prest-O-Lite an unfailing aid to better radio. And in addition there are many important refinements and improvements that make it the most attractive, most convenient battery you can buy.

This new battery has a beautiful stippled finish hard rubber case that blends with any furnishings. The case is molded in one piece, giving sturdy, leak-proof strength.

To make the battery convenient to carry, the handle has been given a comfortable rubber grip.

The oversize terminal nuts on the binding posts are easy to turn and insure perfect contacts.

Novel rubber insulators completely cover the tops and sides of the cell connectors, preserving the original fine finished appearance at all times and giving protection against accidental short circuits.

No effort has been spared to make this a battery you will be proud to own. Yet, like the rest of the Prest-O-Lite line, it is priced to offer you the biggest value of the day. Ask your dealer to show you this battery and the Prest-O-Lite Chart that helps you select the right battery for your set. Or write Indianapolis for a copy of our interesting handbook on radio storage batteries and how to charge them.

Construction of B Current Power Supplies

Part I—The Acme-Raytheon Type

By George Walters

WHEN the vacuum tube first came into use for Radio work through the inventive genius of Dr. De Forest it was but natural that flashlight cells should be the source of plate current as the current drain was small and the cells were compact. It was but natural also that the makers of flashlight cells would, sooner or later, combine the rows and rows of cells required into compact units such as the Eveready 766. These are familiar to every Radio fan boasting more than a crystal set and have been in use for a number of years. Almost equally familiar is the storage B battery with its rows of small glass jars and quiet operation. Both of these energy sources is technically just about perfect for the purpose of supplying the plates of vacuum tubes. The current is pure direct current, without hum or ripple, and fairly constant in the matter of pressure or voltage. The only objection to the battery supply from the fan's point of view is that, in the case of the dry cell type, there must be occasional renewal and, in the case of storage cells, the necessity of recharging at frequent intervals.

The Radio public has long desired some means of obtaining current for A power, B power, and even C power, from the lighting system. Civilization has brought us so many conveniences, so many devices to relieve us of responsibility and work. that even the slight task of replacing batteries, or charging them, seems objectionable. Neither is very hard work, nor very difficult, but the phonograph needs no such responsibility, nor does the mechanical refrigerator. Realizing the demand for a power unit to supply these voltages in pure direct current form, engineers by the hundred have been seeking the solution. The result is that we suddenly have scores of B battery eliminators, a few A battery eliminators and even one or two C battery power supplies.

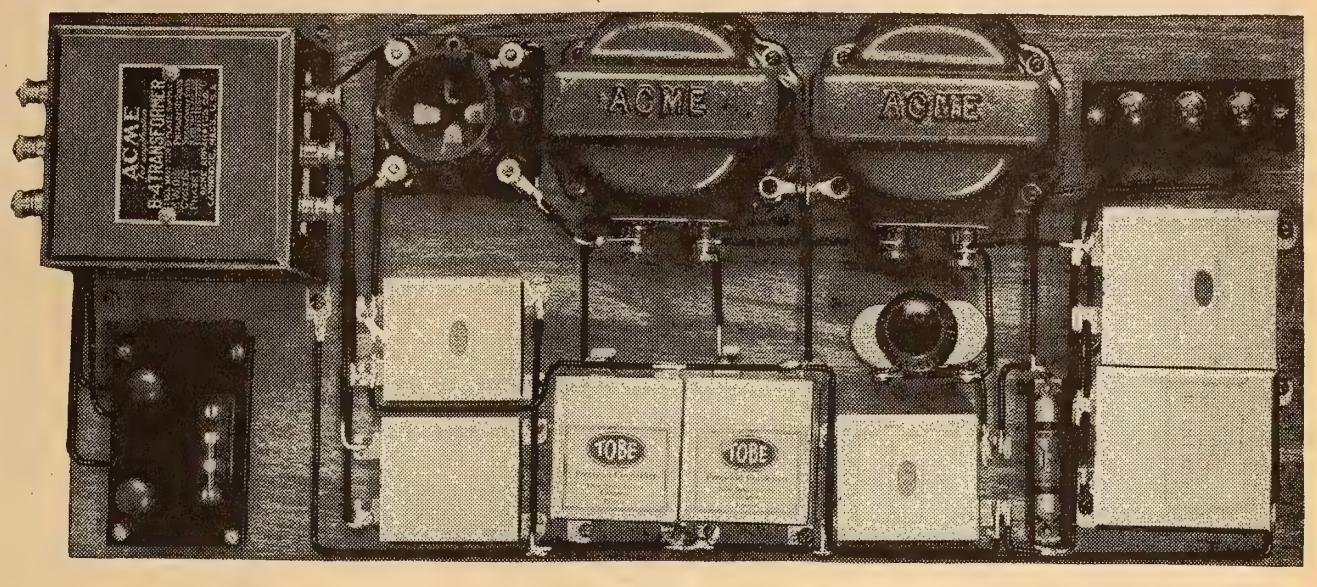

Figure 1

The Problem and Its Solution

The problem to be solved, and some of the difficulties encountered, can be run over briefly so that the reader will understand, to some extent, the solutions to be presented here. In the first place, about 90% of the country having electric light current available receives what is known as alternating current at 60 cycles. This means that the current in the wires changes its direction of travel 120 times per second. It flows first toward one end, then toward the other, completing one cycle, then repeats this performance at the rate of 60 times each second. Now a Radio set requires current traveling in one direction only, without variation or change of quantity.

It is not particularly hard to change alternating current into direct current. This process is known as rectification and it is used as one of the two duties of the detector in your Radio. The chief difficulty has been to find a device that would be low in cost yet capable of supplying sufficient current for a set of seven to nine tubes. As the current comes out of any of the several devices finally found it has what is called "ripple." This is present in the form of surges occurring at the rate of 120 per second or one for each alternation of the original lighting current.

The second big problem was the elimination of this ripple, just as bad for a Radio set as the original "hum" of alternating current. The collection of apparatus required to take this out is called a "filter" and it comprises one or more large coils of wire on iron cores and several large fixed condensers able to hold up under high voltages. The action of the large coils is to choke back any sudden changes of voltage and make everything come through evenly, hence their name of "chokes." The condensers tend to momentarily store the choked back surge and release the excess during the following lull. Between the two of them they accomplish this and the output

RAYTHEON ELIMINATOR
(Continued from page 27)

is close enough to perfectly pure unvarying direct current for practical use.

There are at this time four feasible types of rectifying devices, the chemical type, the heated filament tube, the no-filament tube and the Tungar bulb. Several different B current power supply units will be presented in these articles and that which is shown in this article is the one containing the no-filament tube. This rectifier is called the Raytheon tube; it is at present the most popular variety, and it will supply plenty of current for sets up to at least ten tubes, at any required voltages up to 180 volts.

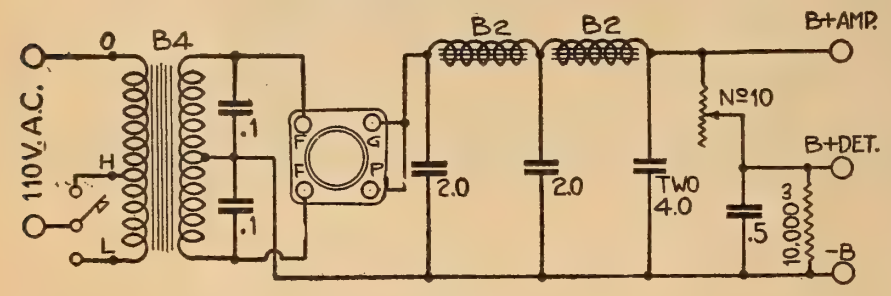

Figure 2

Choice of Parts

For use with the Raytheon tube, the Acme Apparatus company has developed a transformer to raise the voltage sufficiently to give 180 volts at the output after deducting some for slight losses in the apparatus, and a choke, of which two are needed, which is rated at 30 henries inductance. These are sturdily built power units in strong protecting cases and clearly marked. On the primary winding there is a tap so that either the tap or the end terminal may be used to give either the higher output voltage of 150 to 180 or the lower voltage of 90. By means of the S. P. D. T. switch, either voltage may be readily had, but ordinarily this will be set once for the particular set it is used with, and left.

Tobe Deutschmann has developed a set of high voltage condensers of comparatively high capacity for use in B eliminators which are, by now, rather well distributed. If you cannot get them locally, write direct to the manufacturer at Cornhill, Boston, Mass. In the Allen-Bradley line of resistances, both fixed and variable, we find two items exactly suited to use in this unit, the number 10 Bradleyohm which is variable from 10,000 to 100,000 ohms and the Bradleyunit which is a cartridge of the value of 10,000 ohms. resistance. When getting the Eby Ensign binding posts, choose two plain ones for connection to the electric light "twisted pair" and one minus B, one plus B 45 and one plus 90.

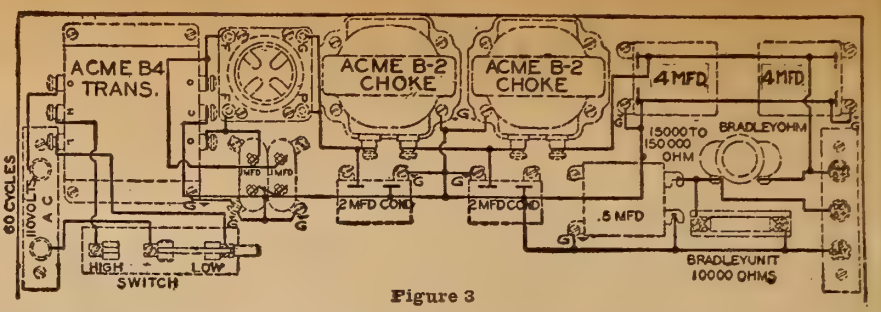

Figure 3

With the photograph, the schematic, and the picture wiring diagram you cannot go wrong. The baseboard has been made 17½ inches long so that you can put the whole thing in an 18-inch cabinet if you prefer to. An 18-inch panel can easily be screwed to the front edge of the baseboard; the edge close to which we have placed the transformer, socket and chokes is considered the rear. Should you place this device in a cabinet, you can put the three output binding posts, the S. P. D. T. switch and the Bradleyohm on the panel and bring the 110-volt cord in through a hole in the back of cabinet to the binding posts shown.

The small pieces of bakelite are held up away from the baseboard with short pillars about ¾ inch in height but if these are not handy, you can build up pillars from old dry cell terminal nuts slipped over the long wood screws. In operating this device there are a couple of points to remember. When adusting the Bradleyohm for best detector voltage keep the hand well away from all wiring as this unit has a most unpleasant kick if you get a shock. If you want to throw the switch it would be much better to turn off the current at the light socket, although the switch can be thrown to either high, low or off position if a little care is used.

The New Radio Book HOW TO -

Operate Sets
Construct Parts
Improve Reception
Understand Radio
Assemble Circuits

The greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest, it supplies the demand for a book covering every phase of Radio. Starts at the beginning with simple explanation of Radio reception, with technical explanations of the different parts and leads right on to the more advanced instruction. A complete handbook serving as a ready reference in the Radio field. It gives suggestions on parts and sets which will prove to be a money saver. Blue prints and diagrams are essentially an important part of this book. Special chapter is devoted on "How to Operate," which gives detailed information on the operation of many well known sets.

A general information is vital to the knowledge of anyone interested in Radio. It gives a complete list of all broadcasting stations with a colored map showing their location. The workshop kinks will save you time and money. Now is the time to take advantage of this exceptional offer. **Mail coupon today!**

For EVERY Radio Set

THE PRECISE SYNCRODENSER will improve your receiver, and we call the attention of the SET BUILDERS to the following reasons found only in PRECISE Super-efficient condensers.

Rugged brass frame, nickel plated and polished, one piece Bakelite insulation placed outside the electrostatic field. Both rotor and stator plates are made from brass and gold plated, special clock bearings and two bronze contacts are used. Condensers are designed for mounting on panel or sub panel. Each instrument is matched within limits previously unheard of for commercial condensers.

The straight-line frequency characteristics from 0 to 50 on the dial assures remarkable efficiency in reducing interference between low wave length stations. And the straight-line capacity from 50 to 100 on the dial leave the high wave length stations at their actual separation, thus eliminating the congestion on the upper end of the dial readings encountered when using S.L.F. characteristics throughout.

PRECISE SYNCRODENSERS were the original. INSIST on PRECISE and accept no substitute.

.0005 mfd.—only $4.50
.00035 mfd.—only $4.00

Unitrola: Single Dial Phonograph Receiver

Part III—Complete Wiring Instructions

By Carl Patterson

THE WIRING of Unitrola must be handled a little differently than is usually the case, due to its peculiar design and the slope of the panel. Front panel and baseboard are handled separately for part of the wiring and then the two are secured together for the last few connections. We will take up the front panel first.

1. Connect the upper terminals of both rheostats together and continue the wire up around the variable condenser to the right to the number 2 terminal on the Pilot Switch.

2. Connect the number 3 terminal on Pilot Switch to the number 1 terminal on the Dialite.

3. Connect the number 2 terminal on Pilot Switch to the number 2 terminal on the Dialite.

4. Attach a 4-inch piece of flexible wire to number 3 post on C-R-L unit at right. Attach a 3-inch piece to the number 1 terminal and a 13-inch piece to the number 2 terminal.

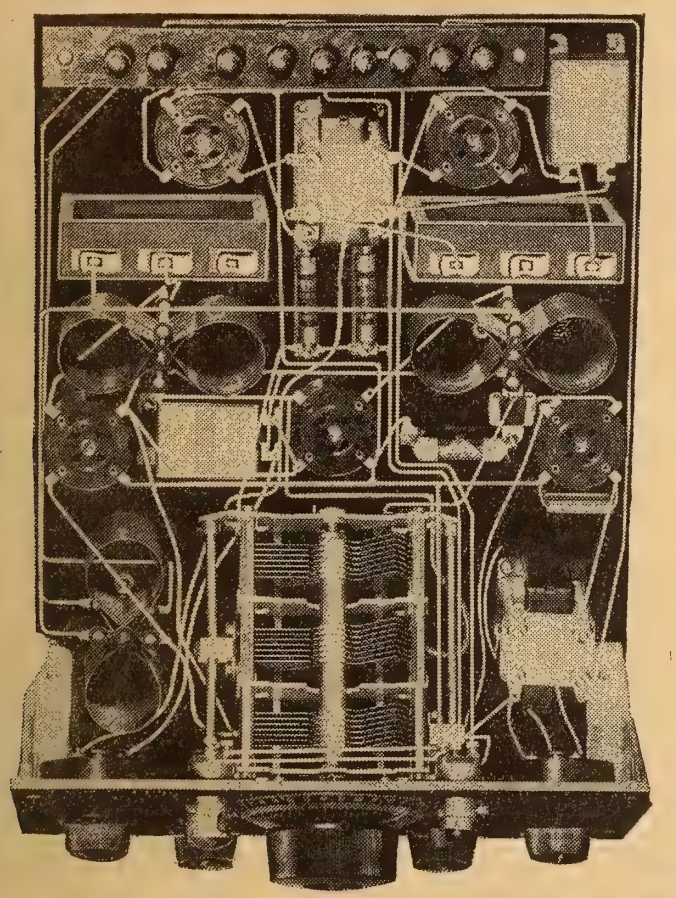

Figure 5

5. Going now to the C-R-L unit at left of panel, attach a 14-inch piece of flexible wire to the left terminal and an 8-inch piece to right terminal.

6. Connect one end of a 10-inch piece of flexible wire to lower post on each rheostat.

7. Considering the socket at left edge of baseboard as number 1, that in center as 2, that at right edge as 3, that in rear left corner as 4 and that at rear right corner as 5, we can proceed to wire baseboard assembly. Connect F plus post on 3 with F minus of 1.

8. Connect F minus of 5 with F plus of 4. From this last wire, another runs straight forward just to left of rear audio transformer and Amperites, then to right to F plus post on socket 2. F plus post on 2 is then connected by ½-inch wire to wire put in previously under operation 7.

9. Now connect F minus on socket 2 with F plus on socket 1. A short wire is then put in from F minus on socket 2 to rear lug on .5 condenser.

10. A long wire is now put in from POS B post on audio transformer in front right corner, back along edge of baseboard to rear edge, then to left to B DET plus binding post on strip.

14. The fixed condenser of .00025 mfd. capacity is then connected between G post on Bodine coil behind socket 3 and the right end of Daven mounting.

15. The B terminal of Bodine coil behind socket 1 is now connected to B terminal of coil behind socket 3. A short lead is run straight forward from this wire to the front connecting lug on .5 bypass condenser between sockets 1 and 2.

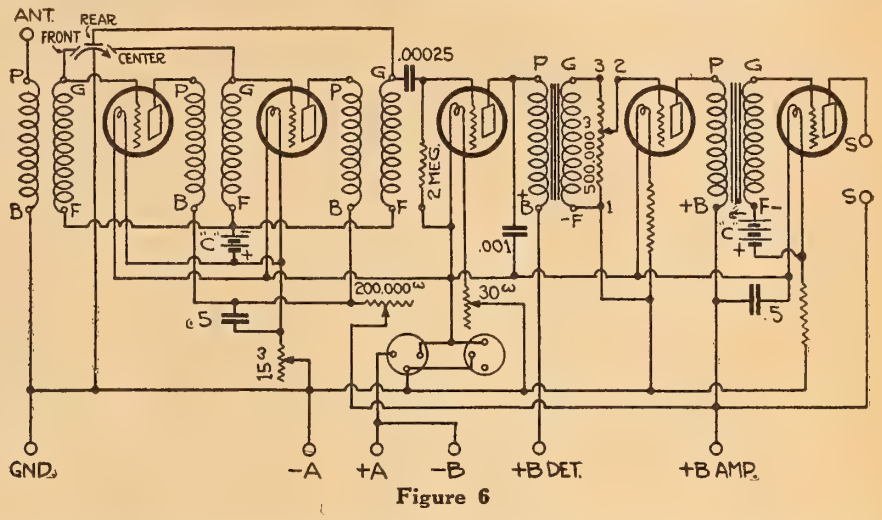

Figure 6

11. The Plate terminal on that same audio transformer is now connected to P post on socket 3. The fixed condenser of .001 mfd. capacity is then connected from the P post on that socket to the F plus post on the same socket (see photograph).

12. Connect G terminal of socket 3 to right end of Daven mounting to its left.

13. Then connect left end of Daven mounting to F plus post on socket 2.

16. Now connect P post on socket 1 with P lug on Bodine coil behind it. Then connect P post socket 2 with P lug on Bodine coil behind socket 3.

17. Considering now the Bodine coil in front left corner of baseboard, connect its B lug to GND binding post on rear strip. This wire will pass to left under coil, then along left edge of baseboard. The P lug

TUBE SERVICE

Your set is no better than your poorest tube. They must be uniform

A good tube must have:
1. Good Tone Quality.
2. Impedance not too high
3. Low filament consumption.
4. Long life.

Pingree Tube Characteristics
Plate impedance 8500 — 10,000 ohms.
Amplification factor 8-9.
Filament consumption .25 amp.
Filament voltage 5.0 volts.
Plate voltage 16v-90v.

A—TYPE $2.00

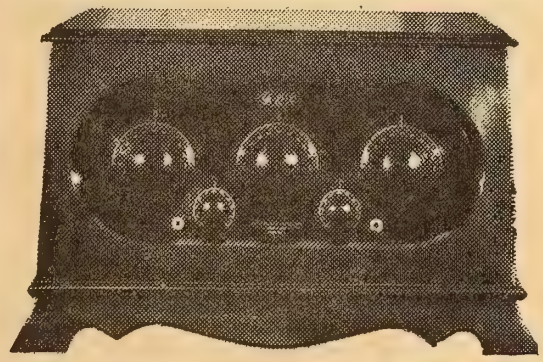
PROTECTION

Each tube is tested rigidly on a Superradio Dynometer before shipment.

TRIAL OFFER

Try these tubes 10 days at our expense. If they are not what we claim, we will gladly refund your money.

PINGREE RADIO SERVICE, Inc.
170 Summer Street Boston, Mass.
DEALER INQUIRIES SOLICITED



Operates direct from light socket on A. C. or D. C. house current.

Old Tubes Made Good As New

THIS latest Laboratory product will recondition any old, run-down, even worthless tubes, as long as the filament still lights. Makes them as good as new in a few minutes' time. Costs but few cents more than new tubes! Simple, efficient, practical. Big money-saver. Operates on either A. C. or D. C.—110-120 Volts. Model No. 20 for UV-201A (C-301A, etc.) and all similar types. Model No. 10 for UV-199 (C-299, etc.) and all similar types. (Model No. 5, a combination of the other two models, handling both types, large or small tubes, $5.50.) Bound to do the work on our

Money-Back Guarantee

Money cheerfully refunded if desired results fail. But we are sure you will find the Mack Reconditioner pays for itself **in one evening.** Many making good money restoring friends' and neighbors' old tubes. You cannot lose! Act quick on this special short-time introductory price. Sent Postpaid with full directions on receipt of $3.65 ($3.85 in Canada and foreign countries). Model No. 5, $5.50 ($5.75 in Canada and foreign countries). Be sure to state Model No. wanted. Our guarantee refund price protects you. Send **now.**

$3.65

Why Pay More?

For fine tone quality, volume, and distance, your tubes MUST be in perfect condition.

718 Cass St. **MACK LABORATORIES** Chicago, Ill.

MACK RECONDITIONER
"THE CURE FOR RUN-DOWN TUBES"

RAYTHEON ELIMINATOR

(Continued from page 28)

Grounding all cases is a most important part of the construction. You will note by study of the picture diagram that the negative B, or point of lowest potential, is connected to every condenser case, to the choke cases and to the transformer case. In grounding this last named unit, scrape a little of the paint away from around the mounting screw hole in the front right corner so that wire and screw make contact. While the picture diagram and the photographic layout are not identical, the picture diagram had to be made this way to show everything clearly. The front post of the switch is connected to the L or low terminal of transformer primary. If there is a very slight hum or whisper noticeable when not tuned to a station, check over the receiver to see that one terminal of the A battery is grounded.

(In the next issue Mr. Walters will tell how to construct an eliminator of the chemical rectifier type which is even smaller in size than this and uses a liquid that is harmless to hands or clothing.—Editor's Note.)

MAKING THE UNITROLA

(Continued from page 29)

on this coil is connected by another long wire kept about ½ inch above the first, back to the ANT binding post on strip.

18. Now connect the front terminals of the Amperite mountings together. Connect rear terminal on right Amperite to F plus lug on socket 5 and rear terminal on left Amperite to F minus on socket 4.

19. A wire is then put in from POS B post on rear audio transformer to right lug on the .5 mfd. bypass condenser in rear right corner. The left lug on this condenser is then connected to F minus lug on socket 5.

20. The Plate post on this audio transformer is connected to P lug on socket 5. Its G post is connected to G lug on socket 4.

21. Under binding post strip connect minus B with plus A. Connect GND post with minus A post. There are two blank posts for speaker; connect right one with B plus AMP binding post. Drop a wire from POS B post on rear audio transformer almost to baseboard, then back to wire connecting speaker post and P plus AMP post.

22. Connect P lug on socket 4 with the left speaker binding post on strip.

23. Connect G lug on socket 1 with G lug on Bodine coil in front left corner. Connect G post on socket 2 with G lug on Bodine coil behind socket 1.

24. A long wire is then put in connecting the F lug on Bodine coil behind socket 3 with the F lug on Bodine coil behind socket 1, then forward along left edge of baseboard but at height of coils to F lug on Bodine coil in front left corner.

25. The front panel can now be secured to the baseboard. The long flexible lead attached to number 2 terminal of right C-R-L unit goes down through hole behind front audio transformer, straight back and up through hole by G lug on socket 5 to that lug.

26. The flexible wire on terminal 1 of C-R-L unit goes up to NEG FIL post on front audio transformer. The wire from number 3 terminal of C-R-L unit goes to GRID post on front audio transformer. Run a wire up from NEG FIL post on transformer to number 2 post on Pilot Switch.

27. The flexible wire on lower post of right rheostat goes to F minus lug on socket 3. The lead from lower post of left rheostat goes to F plus lug on socket 1.

28. Taking up now the C-R-L unit at left, the long lead goes back, under .5 condenser lugs, between the Amperites, to the POS B post on rear audio transformer. The shorter lead from the C-R-L unit goes back to front connecting lug on .5 mfd. condenser between sockets 1 and 2.

29. From G terminal of socket 2 bend a wire to go forward almost to condenser, then to right and forward so it will pass through hole in rear plate of condenser and go through without touching. Cut off about ½ inch in front of rear plate and connect to it the flexible lead from center stator of multiple condenser. Be sure this joint does not come in contact with any parts of condenser.

30. Connect flexible lead from front stator to G post on Bodine coil in front left corner.

31. The stator of rear condenser has two soldering lugs. Bend up or remove that at left side as it will not be used. From the one at right, put in wire passing about 2 inches to right, then up to level of top of Bodine coils, then back over right end of Daven mounting to G post on Bodine coil behind socket 3.

32. Connect soldering lug at upper left corner of rear end plate on condenser to front end of left Amperite.

33. We now come to the three wires running down from the Pilot Switch and paralleling the slant of the condenser. The first of these runs down and back from number 1 post of Pilot Switch to minus B binding post on rear strip. The number 2 post on switch connects to minus A binding post on strip and, as it passes front terminal of right Amperite, is connected to that terminal. The third wire goes from number 3 post on switch to the wire connecting F minus of socket 1 with F plus of socket 3.

34. Place the two C batteries in position with plus terminal to right in both cases. Connect plus terminal of that at right with F plus terminal of socket 5. Connect minus 4½ of this C battery to NEG FIL of rear audio.

35. Put in a wire from F plus post on socket 1, passing under Bodine coil to rear and up beside left C battery to minus 3 clip on it. Put in a wire from plus clip on this left C battery down to the wire connecting the F terminals of the three Bodine coils.

The finishing touch is to take four small pieces of cigar box wood about 1 inch wide and 2 inches long and cover one surface of each with a piece of felt. Then glue the pieces in the four corners of the baseboard on the underside to lift up baseboard so the screws projecting on underside will not scratch bottom of record compartment of the phonograph as unit is slid in or out.

(This completes the wiring and set is ready for use. In the next issue, Mr. Patterson gives some connecting and operating instructions that will prove most helpful to the beginner, although the experienced Radio set builder can probably proceed with this work himself.—Editor's Note.)

ADVANCE PROGRAMS

(Continued from page 21)

lude; 8, program, Mrs. Henry O. Fulton and associate artists; 10, Scarritt college student program.

WSUI, Iowa City, Ia. (483.6m-620kc), 12:30 p. m., Mrs. Mildred Paddock, mezzo-soprano.

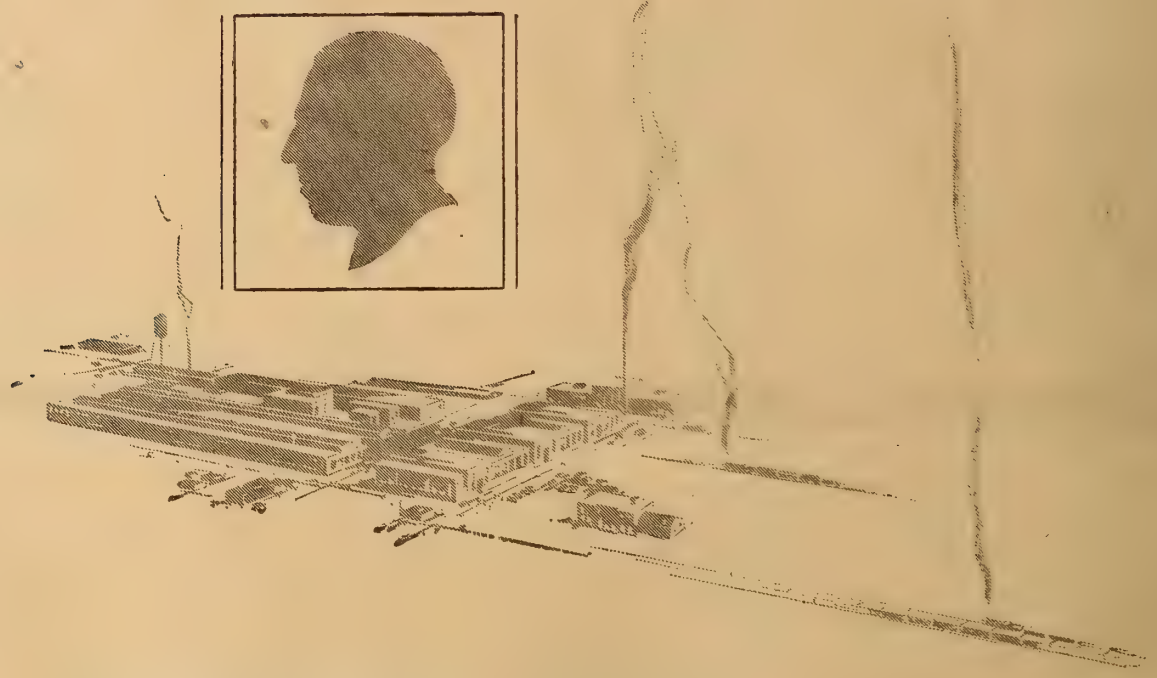
POWEL CROSLEY JR.



INDUSTRIALIST
Pioneer Radio Builder

At a time when products of his manufacturing genius were already known to millions, Powel Crosley, Jr., boldly diverted his energies to the development of radio reception, then scarcely known beyond the laboratory walls.

Pioneering both in engineering trends and manufacturing practices, Mr. Crosley has been a vital factor in making radio and broadcasting as much a part of American life as motion pictures and the motor car.

There is scarcely a milestone in the development of popular radio on which his shadow has not been the first to fall. And his announcement of December 26th concerned a milestone that dwarfed all others in its importance—*four entirely new radio receiving sets:*

The Crosley 4-29 (4-tube)	$29.00
The Crosley 5-38 (5-tube)	38.00
The Crosley R.F.L.-60 (5-tube)	60.00
The Crosley R.F.L.-75 (5-tube)	75.00

These are now being demonstrated by Crosley dealers and will be completely described in a forthcoming issue.

SUB-COMMITTEE NOW MOOTING RADIO BILL

HOUSE WANTS ACTION ON MEASURE EXPEDIATED

Majority of Witnesses Endorse Proposed Bill at Hearings—Senate Delays on Dill Measure

WASHINGTON.—Hearings have been concluded by the committee on merchant marine and fisheries of the house of representatives on the White Radio bill, designed to secure legislative control of the Radio industry, and the measure has been referred to a subcommittee with instructions to expediate its action and report the measure back at the earliest possible date. Representative White of Maine, framer of the bill, is chairman of the subcommittee. It is believed that the full committee realizes the necessity and soundness of the White bill and will report it to the house at no distant date.

Majority Favor Bill

In the majority of instances, the witnesses brought before the committee have endorsed the bill and it is considered quite possible the committee will accept the testimony of Radio experts in regard to the bill and will present it to the house with but few recommendations for major changes.

David Sarnoff, manager of the Radio corporation, told the committee that his organization feels that Radio needs proper legislation, and the White bill is satisfactory to it. He expressed himself as certain the bill would benefit both the industry and the listener.

Master Radio Bill

Charles H. Stewart, representing the American Radio Relay league, and Herman Levinsky of Station WNJ, Newark, N. J., both held the White bill as a masterpiece among proposed Radio measures.

Judge Stephen Davis, solicitor of the department of commerce, expressed the opinion that the small station would be afforded more protection under the proposed bill than they now have, stating that a commission of technical men with a general knowledge of the whole Radio situation should be appointed.

Endorsed by Fessenden

Sherman L. Whipple appeared before the committee on behalf of Prof. R. A. Fessenden, who has a damage suit for $60,000,000 against the Radio corporation. Mr. Whipple told the committee that he endorses the White bill and that he considers it well adapted to regulate Radio.

Boyd B. Jones, also a representative of Prof Fessenden, suggested that a commission or the secretary of commerce should say whether a corporation is a monopoly or not, if there is any doubt, before issuing a license.

Senate Bill Lags

Senator Watson of Indiana, chairman of the senate committee on interstate commerce, is of the opinion that it will probably be several weeks before his committee will continue the hearings on the Dill and Howell Radio bills, which also provide for legislative control of the industry.

Station Changes

Florida announces a new 1,000-watt station at Miami, Fla. The station is owned by Charles G. Fisher, Inc., and will operate on 247.8 meters or 1,210 kilocycles.

Two stations announce changes in call letters. WAAM, Newark, N. J., a pioneer station, will now be known by the call, WBPI. WEBK, Grand Rapids, Mich., has the call, WOOD.

Since the fourth national Radio conference there has been a big increase in applications for increased power among stations. The policy of the department in dealing with these applications is to grant an increase of power when it would be beneficial to the public and not result in interference. In large cities where there are a number of stations of high power already in operation, the power increase is not likely to receive favorable consideration unless experiments definitely prove that interference would not result.

License Evaders Fined

LONDON.—The first batch of summonses under the new Radio Telegraphy act were heard in court here recently. Counsel for the postmaster-general declared each of the defendants had installed crystal sets and worked them without a license.

One evader's defense was that although he had installed the set he was unable to make it function, but he intended to get a license when he got results. The judge decided not to confiscate his set, but fined him $2.50.

GEORGE KUHNS DIES; BUILT STATION WHO

DES MOINES, Iowa.—George Kuhns, known nationally as the president of the Bankers Life Insurance company of this city, owners of Station WHO, passed away here recently after a brief illness.

Mr. Kuhns, whose counsel in Radio matters will be sorely missed, was father of the Corn Sugar movement and was the starter of the campaign to better conditions for the farmer.

As a mark of respect for the deceased, WOC, at Davenport, the B. J. Palmer station, observed a one-minute silence period on the day of Mr. Kuhn's death. The Davenport announcer, in his remarks, paid a high tribute to the WHO founder.

Mr. Kuhns was one of the world's greatest fishermen and had a wonderfully complete exhibit of fish and sea creatures on display in one of the Des Moines hotels.

Station Dedicates One Hour Every Week for Its Artists

NEW YORK.—Station WBPI, Warner's theater here, has recently inaugurated a form of Radio presentation as a means of honoring artists who appear before its microphone. An hour's program each week is dedicated to various prominent artists for their own use. The hour is known under the name of the artist, who assembles his or her own talent for the special program.

The first to be honored was Joseph Turin, tenor. His hour was Friday night, January 15.

MARIE PREVOST IS OUR COVER BEAUTY

THAT the beach costume is not alone responsible for the charm of a bathing beauty is manifest by the face enshrouded in ostrich feathers on the Radio Digest cover this week. The face belongs to Miss Marie Prevost who graduated from the role of a bathing beauty to a cinema star with the Warner Brothers studio in Hollywood. Her voice frequenty is heard over Radio Station KFWB.

KYW's Hawaiian Swede Is Back with New Repertoire

CHICAGO.—Cy Berg, the "Hawaiian Swede" and president of the I. O. O. S. Y. S. L. I. is back at KYW, to exploit a lot of new things to the Radio fans, who tune in the Congress carnivals at midnight each Saturday.

For those who are not acquainted with the long string of symbols above mentioned, it all means "International Order of Sky Yumpers, Snuse Chewers and Lutefisk Inhalers."

Looking Ahead

Whose Voice Was First to Cross the Atlantic Ocean? Harold Robinson, New Jersey Boy Scout, presents evidence that indicates his amateur phone transmission was heard in Scotland at a date previous to the time accepted by Radio authorities as official. Hints are made that recognized tests were unfair. Details and evidence is the next issue of Radio Digest.

Henry Ford's Old Fashion Dance Orchestra has aroused a national interest in the fiddlers who were in the height of their glory forty or fifty years ago. A score of challengers have questioned the championship of Mellie Dunham of Maine. A survey of old-time fiddlers as they are today in coming Radio Digest.

Did You Ever Tune in Station WKAQ? A corking DX thrill is promised to those who have not yet logged this station of the Antilles—San Juan, Porto Rico. Mr. Agusty, WKAQ announcer, has written an interesting story to appear in one of the early releases of Radio Digest. There'll be pictures, too, of course.

Globe Trotting with Vincent H. Percy, organist at WEAR, Cleveland, has been one of the favorite pastimes with his listeners. Mr. Percy organized a world series which he called a "Trip Around the World" by organ music, which consisted of native classics from the various countries around the well-known earth. Other details of interest about this Ohio station in a near issue of Radio Digest.

The Most Unusual Thompson Minuet Receiver is scheduled to appear soon in the Operating and Trouble Shooting series. This neutrodyne looks nothing like the ordinary receiver, and has a built-in loud speaker of the cone type.

A Power Supply Using the UX-213 Tube will be presented in the next issue as the third of the series being described by Mr. George Walters. These tubes can be obtained anywhere and now a transformer is available which lights the filament and supplies high voltage, both windings being center tapped.

M. Gurney's Series for Beginners Arrives, with his next installment, at a discussion of the grid leak and the grid condenser, their functions and how to get the most out of them. Unless you understand their purpose thoroughly you cannot expect to adjust them for maximum efficiency.

NEWS BRIEFS FROM THE BROADCASTERS

"HILL BILLIES" COME BACK TO WRC, WASHINGTON

Arctic Talk at WJAZ—Boston Tech. Dramatic Club at WTIC—Helen MacKellar at WOR

A return engagement of the "Hill Billies," whose program of hill country music was broadcast by Stations WRC and WJZ early in January, is being arranged for the middle of February. Included in the ranks of the "Hill Billies" are Charlie Bowman, champion fiddler of East Tennessee; Elvis Alderman, widely-known fiddler; John Rector, North Carolina banjoist, and the Hopkins Brothers, Al, John, Joe and Elmer, who hail from the Blue Ridge mountains of Virginia.

* * *

When Commander Donald B. MacMillan gave an Arctic talk at WJAZ, Chicago, recently, he told the story of Admiral Peary's discovery of the North Pole. Many people who have questioned Peary's discovery of the Pole, were convinced by this talk that he was successful.

* *

Popular songs from "Too Many Brothers," the new show being presented by the members of the Dramatic club of the Massachusetts Institute of Technology, were broadcast by members of the company from WTIC, Hartford, last Monday.

* *

At eight o'clock Helen MacKellar, star of "Open House," now playing in New York city, was talking before the microphone of WOR to millions of Radio fans. At 8:30 p. m., she was ready for the curtain to rise at the theater. Miss MacKellar was compelled to rush from studio to stage. Gilbert Miller and E. Ray Goetz, two leading Broadway theatrical managers, were listening in at the Ritz hotel, London, for her talk.

* *

The American Lady quartet, recently returned from an Alaskan tour, is the new feature at WBBM, Chicago. Every Friday between the hours of 8 and 10 p. m. Central time the quartet will sing.

* *

Three popular dance orchestras, Broadmoor Rhythm Rustler, Harmony Peerless orchestra, and Scheuerman's Colorado orchestra, are vieing for popularity at KOA, Denver. Everything from symphonic jazz to blues and rapid-fire syncopation is played by these three orchestras.

* *

"Stung" is the name of the comedy to be broadcast by the KGO players, Thursday night, February 11, at 8 p. m. Mountain time. The piece was written for the stage by Lydia Le Baron Walker, and adapted to Radio by Wilda Wilson Church, director of audio players.

* *

The Yale band, familiar to football fans, will take part in the anniversary program which is being broadcast by WTIC on February 10. All the songs of old Eli and many other college tunes will be heard by Radio fans on that evening.

* *

In the search for new music at WRC, Washington, D. C., the director of the U. S. Marine band orchestra discovered a new concerto for the violin composed by Robert Cary Stearns, a well-known Washington musician. The violinist will be William F. Santelmann, son of the marine band orchestra leader. This concert of the U. S. Marine band symphony orchestra will also be broadcast by WJZ, WGY.

* *

Frederick D. Weaver, one of the foremost organists in the East, has been appointed staff organist of WBAL, Baltimore. He will give bi-weekly recitals from the new James Wilson Leakin organ which has recently been added to the broadcasting attractions of this station.

* *

Clarence Dickinson, director of the Friday noon programs at WJZ, New York, will present each week an unusual sequence of music of the nations which first colonized America—England, Belgium, Holland, France and Spain. One country will be featured each Friday. Noted soloists have been secured to participate in these programs.

* *

Beasley Smith and his orchestra will give a special frolic of popular dance tunes every Tuesday night from 10 to 12 o'clock, Central time, for WSM, Nashville, Tenn. WSM has added this frolic to the regular schedule. Heretofore the station has been silent on Tuesday night. Lovers of the Charleston will have their wishes for the dance gratified at that time.

* *

The Apollo club with fifty-four years of public appearances behind it has arranged a series of programs to be given by members of the club at WLS, Chicago.

WAR AGAINST "BLOOPING" BEGINS

CLAIMS SUCCESS IN STATIC ELIMINATION

PROF. DANA DEMOREST IS INVENTOR OF DEVICE

Ohio State University Scientist Has Applied for Patent—Large Manufacturer Reported Interested

By M. M. Carothers

COLUMBUS, Ohio.—Another promise has been made to solve the greatest problem of the Radio listener in. What may turn out to be a real static eliminator is claimed to have been invented by Prof. Dana Demorest of the department of metallurgy, Ohio State university here. If Professor Demorest's claims are true, and his device is simple enough for attachment to all receiving sets in use today, one of Radio's greatest stumbling blocks, atmospheric electrical disturbances, have been conquered.

Prof. D. Demorest

Professor Demorest has had the device in the national patent office for more than a year and since the word of his invention has spread, Radio manufacturers throughout the country have become interested. No public demonstrations have been made, pending the issue of a patent, but negotiations are now being made to exhibit the ability of the device to one large manufacturer.

No Outside Current

"The eliminator operates solely on impulses coming in over the antenna, requiring no outside current," Demorest said. "We do know that it greatly cuts down the static in reception and makes it far sweeter and clearer. We also believe it very practical since it can be made cheaply and attached to any set. Static is not grounded, as may be the popular belief. It merely is intercepted and carried into discard before the interference can reach the head phones or loud speaker. The principle is the same as that of a farmer's threshing machine, which separates the chaff from the grain. In Radio, clear reception is the grain and my invention is the machine that bears off the chaff."

Inventor Static Expert

Although Professor Demorest has worked with collaboration of others, whose names he would not state, he has been experimenting with static elimination since Radio was introduced. He has a very high standing locally, and comes from a family of scientists. He has done original and successful research work along other lines, and although he admits his extensive knowledge of metals and minerals helped him in making the discovery, rare or unusual metals are not employed.

Your correspondent has investigated the device but has not witnessed a demonstration.

The first "static eliminator or drain" was perfected at the army headquarters in Pershing road three years ago by Major General Squier and Major Mauboygne. So far as is known the device has not been commercially perfected.

WBZ (333.1m-900kc) Boston Bruins-New York, 8 p. m., Eastern time.

STRIKING OF CLOCK HINDERS RECEPTION

NEW YORK.—The next prohibitory amendment will probably be directed against striking clocks. WEAF recently received a letter from a New Hampshire listener which requested with considerable fervor that programs start at some other time than on the hour, because the striking of the clock interfered with the announcer's introductory remarks ushering in a new program.

HUSBAND AND WIFE BEHIND WKAF

Robert F. Hall and his wife, Anita DeWitt Hall are the two motive forces behind WKAF, the Kesselman-O'Driscoll-Hotel Antlers station at Milwaukee. He announces and directs. She is hostess and accompanist. The two are very pleasing and both have good theatrical background.

Newcastle Celebrates Birthday

LONDON.—The third anniversary of the opening of the Newcastle station of the British Broadcasting company (5NO) has just been celebrated by the opening, by the Lord Mayor, in the presence of Lord Gainford, chairman on the B. B. C., of the station's new premises, formerly a hospital. The transmitter, to which they are connected by the post-office land line, will remain in the old site. Some months ago 2LO moved its aerial but maintained its premises in the same location.

RADIO DIGEST ASKS PLEDGES TO HELP PREVENT RADIATION

Broadcasters and Public Asked to Cooperate and End Unnecessary Noises Which Contributed to Failure of International Week Tests

Warfare against bloopers is declared! With the terrific demonstration of blooping fresh in the minds of all listeners who attempted to receive foreign stations during the International Radio Week tests just concluded, the campaign against radiating receivers thus announced by the Radio Digest should meet with instant success.

The method to be used by Radio Digest in its war to clear the ether for decent broadcast reception will depend chiefly upon pledge cards issued to listeners and filled in by them. It is the duty of every Radio listener to pledge himself, first of all, to operate his receiver to reduce radiation or blooping to a minimum. If his set will not operate without blooping, it is his duty to pledge himself to so arrange it so it will not bloop, or as an alternative, replace the receiver with one that will not broadcast squeals and howls into the already crowded ether.

Situation Now Intolerable

The silence periods of International Radio Week afforded an ample opportunity for listeners to recognize the situation as one that needs immediate correction. Everywhere reports were heard that radiating receivers spoiled the foreign tests.

If a listener turned his dials anywhere near the settings at which the overseas stations were supposed to be heard, an ear-splitting series of whistles, screeches and howls greeted his ears. Foreign reception was almost hopeless for anyone not living in the country or in a sparsely populated area.

American, Canadian and Mexican broadcasters were off the air. A few cases of these stations not observing the silence period were reported, but these were accidental for the most part. On the whole the air was clear—for reception of foreign stations and bloopers.

The result was that radiating receivers of every kind and description filled the air. In the larger cities practically no foreign reception was to be had. Poorly operated receivers were largely responsible. Regenerative sets were not alone to blame. Regenerative sets are easy to make bloop, but other sets are likewise offenders when not handled properly by the owner.

Stations to Aid Warfare

It is the earnest desire of Radio Digest to secure as many pledges as possible from its readers and all other Radio listeners. These pledges will be distributed by broadcasting stations and published in Radio Digest. The principal broadcasting stations of the country are being enlisted in the campaign to clear the air of radiation.

It is believed that entirely too often interfering "carrier waves of neighboring stations" are simply oscillating receivers of neighboring listeners. The broadcasters are blamed, regardless of the underlying cause for the interference.

Progress Is Chief Hope

If every listener earnestly pledges whole-hearted cooperation in the Radio Digest war to clear the ether of radiation

(Continued on page 30)

Fessenden Charges Not Clear, Say Defendants

Corporations Assert Damages Are Not Outlined in Suit Action

NEW YORK.—Defendants in the $60,000,000 suit for damages filed by Reginald Fessenden, Newton inventor of Radio appliances, asserted in demurrers filed in the federal court here recently that neither the way in which Mr. Fessenden had been damaged nor to what extent had not been made clear in his action.

The inventor charged eight corporations with infringement of patent rights, mostly on Radio devices. The defendants filing demurrers included the Radio Corporation of America, the American Telephone and Telegraph company, Western Electric company, United Fruit company, Wireless Safety Apparatus company, Westinghouse Manufacturing company, and the International Radio and Telegraph company.

PLEDGE CARD Radio Digest Illustrated PROGRAMS I WON'T BLOOP CLUB

Wendell Hall Reflects on 2LO

CANTERBURY Boy Whistling in the Rain Gives Red-Headed Music Maker Greatest Thrill on European Trip. American Singer Breaks Through British Barriers. "Aint Gonna Rain," Called "Bad English" by Irritated Letter Writer

WENDELL HALL, the Red-Headed Music Maker, dropped in the office the other day before continuing his itinerary westward to fill a series of bookings in some of our best known broadcasting stations beyond the Mississippi.

It was the first time he had been in since his return from Europe. He stood in the doorway for a moment, his blue eyes sparkling with that peculiar Scotch twinkle that somehow finds its way into the songs he sings to Radio listeners. A long coonskin coat hung regally from his broad shoulders. I inquired as to his ramblings amidst the heather and whether he had uncovered any moss-grown tombstones with Hall marks that he could claim.

"Yeh," he said dropping into an armchair and draping one of his spindling legs over the other. "Yep, and I met Johnny Walker, himself. He was not of my clan but I got a thrill from him."

"Was that your greatest thrill, abroad?"

"No, the greatest thrill happened in a little English town, the old town of Canterbury. It was just a skinny, little kid in the rain—"

A SUDDEN earnestness came over the face of the Red-Headed Music Maker as he leaned forward. He had forgotten Scotland with the recollection of his greatest thrill and was back in England waiting for the slow unwinding of British red tape before he could do his stuff at the famous 2LO, London. He had neglected the little detail of registering at the English consul's office in New York with the declaration that he was going to London to broadcast. This he related in preface to the story he told of his greatest thrill.

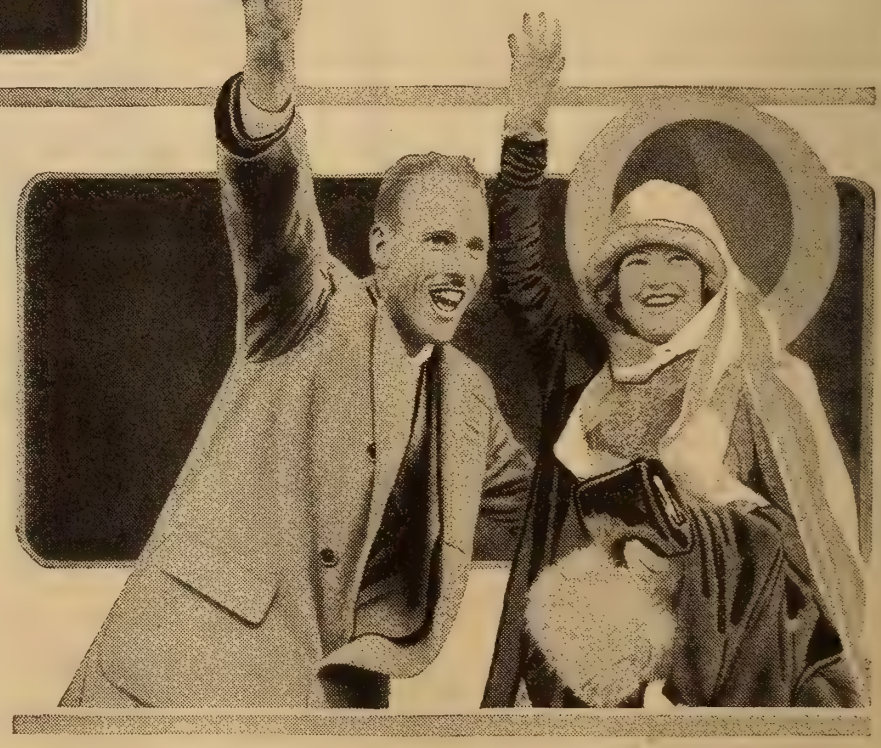
"So Marion and I started out for short junkets about the old town while waiting for Captain Eckersley to find a way of hurdling that troublesome oversight," (Marion, it may be explained, is the bride of the famous singer). "We were in historic Canterbury. The rain was pouring a deluge. I was sloshing down a by-street when I met a boy, a weazened little fellow, sauntering along under the fragment of a wind-torn umbrella. He seemed utterly unmindful of the weather. His soggy clothes clung to his body but he whistled a tune. The tune that he whistled was 'It Aint Gonna Rain No Mo'.'

"You know that meant more to me than all the applause of the London crowds and the fan letters and the cheers of the blase Frenchmen. Here was a poor little fellow in a back street of the old town of Canterbury whistling a tune that I had written far away across the Atlantic, in the heart of America. It had swept on the tides of the air all this way and was coming back to me in this wee corner of the world on the lips of this rain-soaked little boy. I tell you, that sure did give me a kick I'll never forget."

Wendell Hall wrote "It Aint Gonna Rain No Mo'" four years ago and first sang it over KYW, Chicago, where he began as a staff artist at $25 a week. Over a million copies of that song have been sold and it is still going strong. Mr. Hall can well afford "million dollar" coonskin coats for he has also produced other songs that have been almost as successful.

Upper picture shows Wendell Hall, serenading his bride aboard ship as they sailed for Europe on their honeymoon. Mr. Hall is playing his famous tar-epatch ukulele. Below the Bridal pair are shown waving farewell to friends ashore.

At left Mr. Hall is playing into the Marconi microphone in famous 2LO station, London England.



"BUT how did you get around that obstinate British rule?" I asked.

"Obstinate is right," answered the Red-Headed Music Maker with a wry smile. "It's like going through stone walls, utterly unlike anything in America. We registered at the Savoy and after we had our things straightened out and had written a few post cards for folks back home I thought I would stroll around to the British Broadcasting company and see Captain P. P. Eckersley with whom I had corresponded before leaving the states.

"It was all understood by Captain Eckersley, with whom I had corres-organization, that I was to come and sing from 2LO. I never imagined there would be anything to it than just to walk in and say 'Hello.' But they don't do things that way in England.

"First I had to give my name and pedigree to a doorman who had the dignity and bearing of a man in command of an army. He regarded me with cold skepticism and finally condescended to take my card, memoranda, miscellaneous information and other matters pertaining to my family history to his superior. After a half hour I was taken to see this important individual to whom I verified all that I had told the doorman and he condescendingly decided to lay the matter before one of the secretaries of the 'on high.' Then I took another degree and finally reached the secretary of Captain Eckersley who seemed to understand things much better and in a few minutes more I was ushered into the inner sanctum of Captain Eckersley who greeted me cordially.

"HE HAD a good laugh when I related my experiences in getting to his office. 'You should have called up from your hotel first,' he said. And he was right. But he soon fixed things nice for me by writing an order on the back of his card. Afterward I found this card a magic sesame to every door connected with the British Broadcasting company throughout the entire system.

"Then we took up the proposition of my not signing up before leaving the states. It seems this is a very rigid rule. Captain Eckersley, one of the most powerful authorities on broadcasting in Great Britain, went to see everybody that could possibly have any influence to make an exception in my behalf. But nobody would take the responsibility of breaking the rule.

"At last he found a way. It was quite formal and involved fine technical decisions, I suppose. The inside of it is as much of a mystery as ever, so far as I know. Anyway I discovered that I had been enrolled as an employe of the British government and one of the functions of my office was to be present in the 2LO studio and while there I was to test the reactions of the British public to Negro folk songs from the American Southland.

"Broadcasting is a tremendously serious performance over there. No matter how experienced you are before the microphone you have to rehearse before the directors before you are finally passed upon and dated for a performance. I entered the rehearsal room and while there saw a troop of chorus girls in theatrical costumes rehearsing their songs before going on the air.

"I TOOK my turn at the rehearsal and apparently gave satisfaction as I was promptly booked for a feature for the following week. In the meantime I was asked to go up to Daventry and try out locally from that station.

"The rain song seemed to be especially popular over there so I sang that. It brought a quick reply and apparently there were a great many persons who had never heard it before. One man wrote a very indignant letter in 100 per cent pure English. He was terribly shocked that I had managed to get before a microphone at all as he supposed that the dialect in the song 'It Ain't Gonna Rain No Mo'' was my best understanding of the English language. He said it was the most terrible crime against the mother tongue he had ever heard.

"That gave me a hint what to do when I got to London again. I prepared a brief announcement of my own in which I explained what the dialect of the song was and after that the letters were very gratifying and there were many thousands of them during the three weeks which I appeared on the Wednesday program of the 2LO chain."

The English are more prone to write than are the Americans, Mr. Hall explained. The letters are characteristic for their analysis and comment in regard to details. He said his letter responses ranked third in the record of the London station.

Mrs. Hall, formerly was Marion Martin of the Chicago Tribune. Her father was a very well-known editor before his death some years ago. The honeymoon trip of the Hall's across the Atlantic was the occasion of considerable newspaper notice. Mrs. Hall now arranges Wendell's business engagements.

Billy B. Van Beams Sunshine

OLD SOL Gets Plenty of Puff From This Humorous Philosopher and There's a Reason. It Saved His Life When He Was In a Tight Pinch.

By JACK FORREST

GOD'S GREATEST gift to the human race is sunshine! If you don't believe it, tune in some night to Station WHN, New York, and listen to Billy B. Van. His name may not be familiar, but the name that he is given by thousands of people may perhaps identify him. He is called "The Sunshine Man." As the apostle of good cheer he has established a growing doctrine of faith that has become almost a religion to thousands who have followed his precepts.

"Good evening, ladies and gentlemen,' is his opening greeting. "Lovely weather we're having. Regardless of the nature of the weather we get, it is good weather. When it is stormy and rainy, the umbrella and raincoat manufacturers are happy. Look at the world—everything is for the best.

"People want to know where I came from and why I believe in sunshine. I came from a little town called Newport, N. H., where the sun shines on both sides of the street at the same time. It's a little town of about 6,000 inhabitants, and everybody is happy. There is no poor district, for everybody works.

"We have four banks in the town and everyone owns their own home. There are no labor troubles. It is the biggest little town in the world."

GOING back a little, an insight into the trials that beset Billy B. Van in his earlier days may give you an insight into why he is so cheerful today.

Some years ago, the doctors told him that he would have to make a trip to Arizona and die there, as he had weak lungs. Having about twenty-four dollars to his name, he decided that if he was going to die, he wouldn't starve to death. A thing that he would do if he went to Arizona. He made a trip into New England and came to the little town of Newport, N. H. After a few years sleeping outdoors among the fragrant odor of the pine trees, he recovered his health, and opened a dairy.

"For years," he said, "I supplied the town with milk. And I contend to this day that the cow is the foster-mother of the world. When I see the crowds on Broadway pushing, rushing and scrambling, they remind me of a can of worms I carry when I go fishing. Each one pushing and shoving, yet none of them getting anywhere.

"Then I think of a contented cow, peacefully chewing it's cud who is responsible for those crowds. For without milk, 75 per cent of them would not be there. That is why I say a cow is the foster-mother to the world. With more people coming into the world all the time, it is necessary to produce more milk. But how?

"IN ORDER to produce more finished products through machines or human energy, the machine must be well oiled and the humans must be contented and happy.

"To give more milk, a cow is likable to a human being. It must be contented and happy. That is why I have a sign up in my barn in New Hampshire reading: 'Speak to a cow as you would to a lady.' In order that cows can be contented and happy, I have invented a system whereby the cow receives a slight electrical treatment, the same as is applied to a human being. It is so slight that the cow doesn't notice it, but it soothes its nerves and makes her contented—thus making her give more milk.

"The sunshine that God has given us is a reflection of his goodness. It makes things grow; the flowers beautiful. Without sunshine, the trees and flowers would die; we could have no grain; no growth from which we get food, and in fact, our entire existence.

"It is up to us to reflect what sunshine comes to us and give it to others. That's why I am known as the 'Sunshine Man.' I have asked numerous people to contribute towards helping spread sunshine, and I have received 100 per cent cooperation.

"THERE are 110,000,000 people in this country. If you talk to them right, they are 110,000,000 good fellows. Daily I receive hundreds of letters all calling me the 'Sunshine Man.' They tell me I bring happiness and sunshine into their homes and lives. If what they say is right—and I believe them—I would rather be who I am, than who the Kaiser thought he was.

"My one great wish before I leave this earth is to be able to open a broadcasting station in the mountains of New Hampshire. I would call it the 'Sunshine Station' and its only object would be to spread sunshine and happiness to everybody."

Billy B. Van is on the air every Tuesday and Thursday at 6:40 p. m., Eastern Standard time, from Station WHN. Tune in and you will readily see why they call him the "Sunshine Man."

When "Gay Paree" hit Broadway, Billy B. Van gleamed forth as the leading comedian. This afforded him the opportunity to present his sunshine talks in New York as he had previously done in Boston.

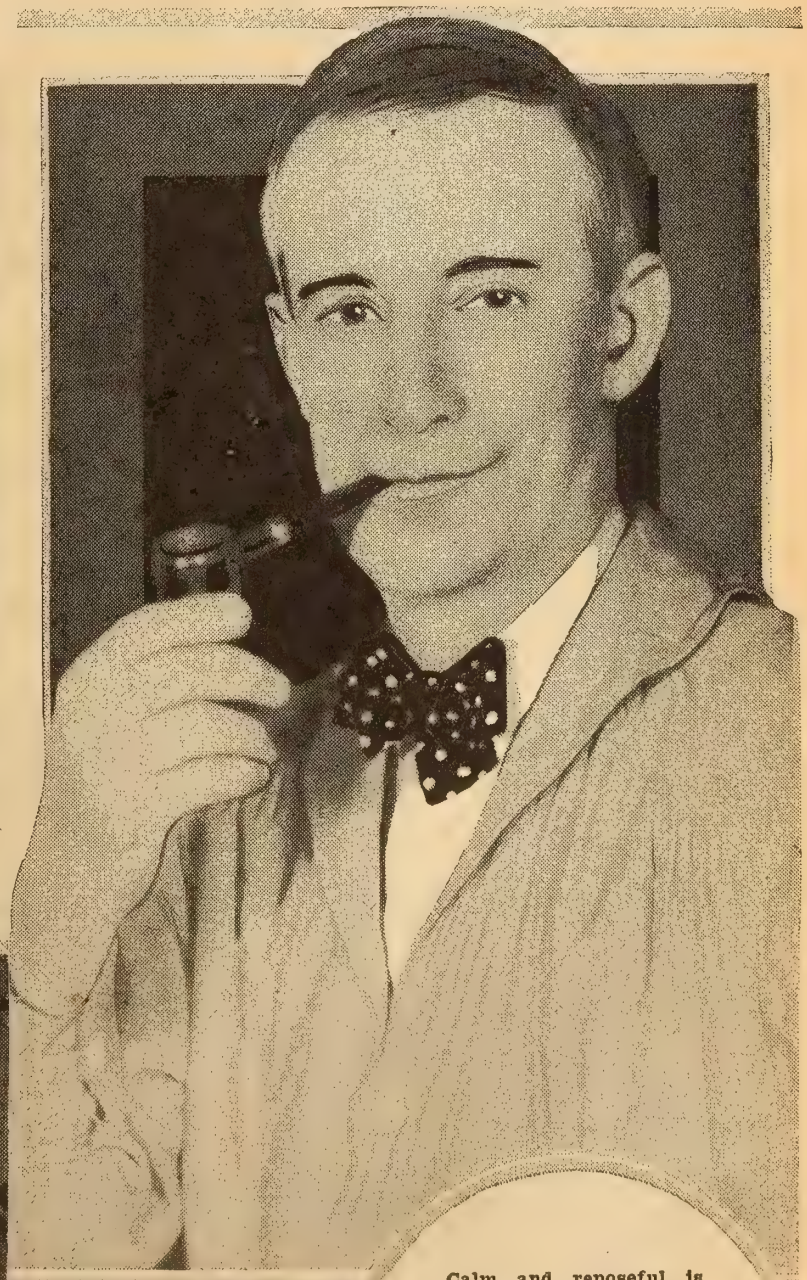
"And in Boston he was just wonderful," said Miss Jean Sargent, announcer at WNAC when Billy appeared there at that time. "He aroused tremendous enthusiasm, appealing first to the children and then to the older folks with his limerick contest.

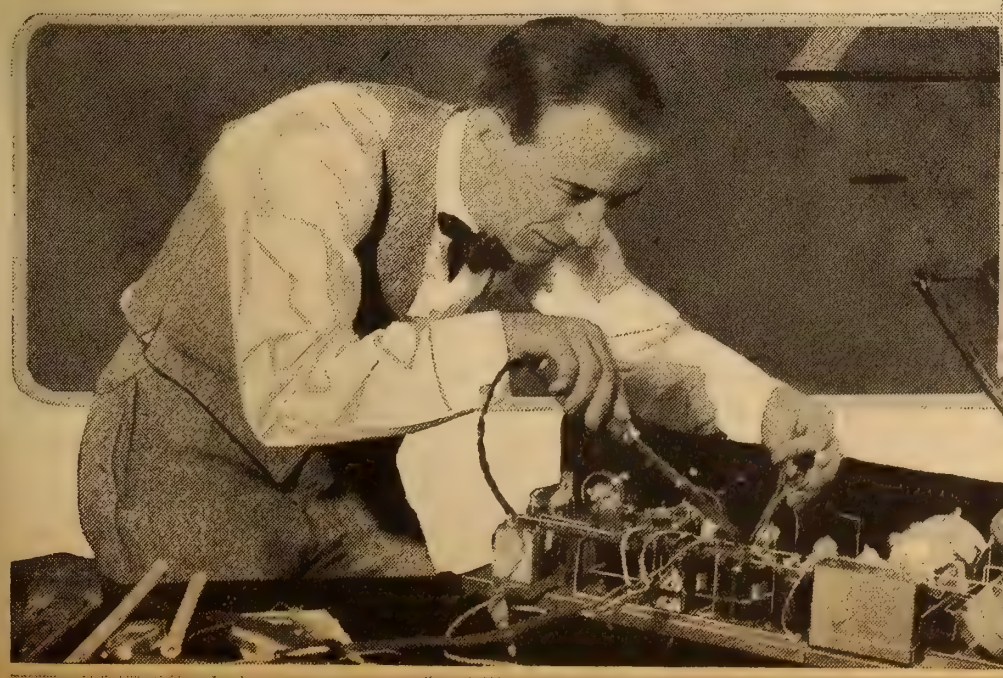
"I should say he received 50,000 letters during his series of talks at our station. These letters included answers to the contest and messages of appreciation for what he had to say.

"All that he did was so innocent and wholesome and you could see that he was really sincere in his great idea of sunshine. It was more than just a pose. He actually lived it."

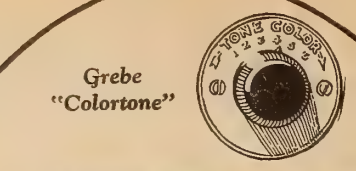
Tools and a workbench, where he assembles Radio sets, afford him recreation. The sets are given to hospitals and orphan asylums.

Virtue may be its own reward, but there are other compensations when real goodness is genuine and altruistic. Billy may have had a lean pocketbook when he started out to regain health through a more intimate acquaintance with Old Sol, but it isn't lean now. He cast his bread on the waters and it came back to him in carloads. The more he gave away the more it seemed to come back and today he is ranked as one of the wealthiest in the actor's profession.

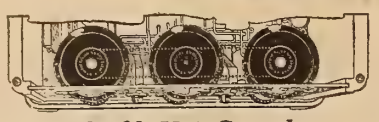




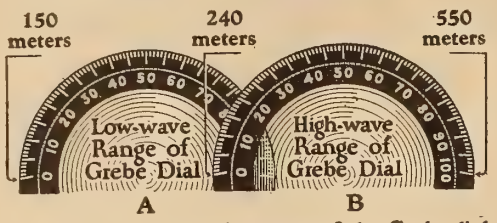
Calm and reposeful is this typical expression of Billy B. Van (above), the Sunshine Man, as he appears before the microphone in New York. Billy's favorite text is the Golden Rule, and he practices what he preaches by building Radio receiving sets (left) which he afterward presents to the invalids in hospitals. He is an adept workman.



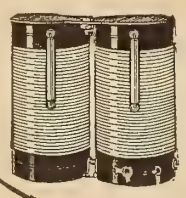
Grebe "Colortone"



Flexible Unit Control



The high-wave reception range of the Grebe dial (B)—from 550 down to 240 meters—equals the practical tuning range of the usual receiver. The low-wave range of the Grebe dial (A) provides additional reception down to 150 meters.



Grebe Binocular Coils Reg. U. S. Pat. Off. *and Low-wave Extension Circuits*

Always Well in Advance

THE Synchrophase, as usual, is fully a year in advance of other receivers. This is due to those Grebe developments which have contributed so much to the improvement of radio reception. As past experience will show, these advances may be adopted, perhaps next year, on sets of other manufacturers.

So, in buying a Synchrophase *now*, you are assured of a receiver well in advance of others, and a quality of reception which they will take some time in equaling, if ever.

A demonstration by your dealer will convince you.

A. H. Grebe & Co., Inc., 109 West 57th St., N. Y.

Factory: Richmond Hill, N. Y.

Western Branch: 443 So. San Pedro St., Los Angeles, Cal.

This company owns and operates stations WAHG and WBOQ: also low-wave rebroadcasting stations, mobile WGMU and marine WRMU.

It is written:
"It is foolish to try to graft a bamboo shoot on a cherry tree." The adding of Grebe developments to other receivers does not put Synchrophase quality into them. Only Grebe can do that.

Doctor Thy

Florida *to* Bering Sea *via* WGHB

TISON Follows His "Baby" to Clearwater and Puts It Over with a Wow, Pleases G. H. Bowles and Brings Alaskan's Praise

FIGURE it out in miles and it's a long hop from Clearwater, Florida, to the Bering sea. Yes, yes indeed, it's SOME step from the land of alligators and humming birds to the habitat of the polar bear and the walrus! But to a little 266 meter Radio wave, traveling at the rate of 186,000 miles a second, it is nothing—almost less than nothing.

On a fisherman's island off the icy coast of Alaska, in the Bering sea, is the home of Dr. George H. Lescher. And when winter comes on St. Paul island 'tis a very dreary place. Evening divertisements consist of melting holes through the frost on the tiny window panes to see whether the drifts are over the roof. Sometimes the doctor must burrow a tunnel through the snow to call on his nearest neighbor. The nights are long. You blow out the light in the morning and before the chimney is cold you must light it again. Social amusements are impossible. Only the slinky polar bear and the water creatures ramble about. Home fires grow monotonous. At least they WERE that way until, until—

BUT this story has little to do with St. Paul island. It pertains particularly to the new Radio station, WGHB, located on the Fenway hotel, Clearwater, Florida. They brought it down from Atlanta last November and set it up here among the palms and orange trees.

Mr. George W. Bowles is the sole owner and proprietor of Radio Station WGHB and—you guessed it, of course—he's a real estater (speaking broadly, although the letter head calls it "Developments"). Florida real estate dealers think nothing of buying and installing a mere Radio broadcasting station. In the course of a motor jaunt over the shell roads that traverse the world's greatest subdivision from the oldest city to the keyes, Mr. Bowles ran across the new Biltmore where workmen were erecting the towers of a Radio station.

He pulled up beside the road and gazed at the proceedings earnestly. Brushing through a row of young palmettos, he approached the engineer in charge and announced himself. Clearwater never had a Radio station. Where might one be obtained?

"Well, I don't know," said the engineer, looking up from a torn blueprint that he held in his gloved hands. "They are going to put in a thousand watter at WSB, the Atlanta Journal, and you might buy the 500 watt transmitter they are taking out—"

The young palmettos swished in the trail of Mr. Bowles, making fast return tracks to his speedster. It took but a few minutes for him to reach the nearest telegraph station and a wire burned a brief, compelling inquiry into the office of the Atlanta Journal a few moments later.

MR. W. WALTER TISON, engineer at WSB, felt no thrill as he watched the slow dismantling of his "'baby" to make room for the "big boy" in the Atlanta station. He had played with that little 500 watter until he knew its every whim, every resource and he had faith in it that transcended any new born expectations for the device that jumped to a thousand watts. He had been with the "baby" for four years, lived with it and loved it. Now it was OUT, and shoved aside!

In the midst of his gloomy reflections, he was summoned to a conference over a hot wire just received from Clearwater, Florida. Would he go down and see this man, Bowles? He was on the next train.

"Do you think that 500 watts will get anywhere?" asked Mr. Bowles, doubtfully.

"Say, don't worry," smiled Mr. Tison, with a confident nod of his head. "We'll have it up in time to invite Santa Claus down from the North Pole to help celebrate Christmas at the Fenway hotel."

FREIGHT jams, embargoes, tie-ups, "preferred cargoes" and all the traffic rules melted away before the powerful influence of Mr. Bowles, and, true to his promise, Mr. Tison had his station ready for the first formal announcement the night of December 5. It had been assigned to call letters "WGHB," which was quite gratifying to Mr. G. H. Bowles.

Miss Caroline Lee, known to WSB listeners as the "Virginia Girl," had come down for the occasion of the opening and signed up to remain as a staff artist to play her Spanish guitar and the big grand piano, in the spacious new studio on the Fenway hotel. She could sit on the veranda and watch the pelicans flopping awkwardly their lazy way along the gulf coast line—and that helped to make it inviting. Mr. Tison had arranged for the Radio Ramblers orchestra to help make the nights merry and then there were many other pleasing program features.

"I think everything is just about perfect for one of the sweetest little broadcasting stations in the country. And I'm sure you'll be proud of it," said Mr. Tison to Mr. Bowles, in the course of the afternoon. "I wouldn't be surprised if some of our (*Continued on page 12*)

Below may be seen the luxurious studio of WGHB, located on the Fenway hotel, Clearwater, Florida; W. Walter Tison, director-announcer, at the desk and Caroline Lee, at the piano. Miss Lee, who was known to WSB listeners as the "Virginia Girl," at right with her Spanish guitar.

POWEL CROSLEY JR.

Industrialist—Pioneer Radio Builder—Master of Mass Production

Four Entirely New 4 and 5-tube Radio Sets—Also the Crescendon

Never before has Crosley engineering and manufacturing genius been so brilliantly demonstrated as in this group of new Crosley sets.

Here, at prices so low as to be literally revolutionary, are three 5-tube sets and one 4-tube set—entirely new in principle, design, circuit, and appearance—entirely unique in the results they give on distant and local stations—entirely unprecedented in the values they now introduce.

On two of these sets is offered the Crescendon, a new and exclusive Crosley feature—an extra volume control by which average incoming signals can be built up or modified in a manner nothing short of amazing. Introduced on the new 4-29 and 5-38, the Crescendon principle makes its first appearance in the low price field, its use having hitherto been restricted to one set costing several times as much.

Particular emphasis is directed to the new Crosley RFL receiving sets that utilize an entirely new and patented circuit which provides true cascade amplification and closely approaches the theoretical maximum of efficiency per tube. Non-oscillating at any frequency and absolutely non-radiating, the RFL Crosleys are specifically recommended for use in congested areas and for satisfactory performance in the hands of inexperienced operators.

In addition to their truly marvelous selectivity, sensitivity, and purity of tone, these new Crosleys have been given a new order of beauty that cannot help but win the highest admiration.

We do more than urge you to go to the nearest Crosley dealer for a demonstration! We ask you to go prepared for the most startling revelation in radio ever announced in the entire history of the industry—and predict that your expectations will be more than satisfied!

Crosley manufactures radio receiving sets which are licensed under Armstrong U. S. Patent No. 1,113,149, or under patent applications of Radio Frequency Laboratories, Inc.

Here Are 1926 Wampas Stars—Like Them?

Motion picture fans will know many of the above girls, who have been picked as the 1926 Wampas stars. As this issue speeds to press, the plans for the annual Wampas ball and frolic, scheduled for February 4, will have been completed. In fact, the ball will be over before many readers see this picture. KNX, Hollywood, had the girls before its microphone on Tuesday, February 2. The thirteen new screen favorites are, left to right, Dolores Costello, Vera Reynolds, Mary Astor, Marcelline Day, Edna Marion, Mary Brian, Fay Wray, Janet Gaynor, Sally Long, Joyce Compton, Dolores del Rio, Sally O'Neill and Joan Crawford.

By G. L. King

THE Wampas Stars of 1926! To be one of the thirteen lucky ones is the dream of every extra girl in Hollywood, the hope of every girl who is not yet an extra.

Every year, just about Christmas time, The Wampas club (which officially is known as the Western Association of Motion Picture Advertisers, and whose membership embraces practically every press agent and advertising man connected with the movie industry in the West), holds an election in its California bungalow clubhouse at the corner of Las Palmas and Sunset boulevard in Hollywood. The result of it all is that the club as a whole pledges its efforts for the following year to the advancement of thirteen young women of the screen.

After the votes have been counted by the chaplain of the Wampas and the results announced to the anxious candidates, plans are launched for the most spectacular annual event in moviedom—the Wampas frolic and ball.

Producers Bid for Stars

This year the frolic was held in the new Al Malikah Shrine Temple in Los Angeles, one of the most magnificent buildings of its kind anywhere, and as usual the house was packed.

The selection of stars by the Wampas is an event. In years past, producers have entered into spirited bidding contests for the winners, as experience has shown that the Wampas make few mistakes and practically all of their selections have risen to real stardom. To enumerate a list of Wampas stars in the past, now stars in their own right, would be to list a great many of the leading feminine players of the screen.

KNX Official Wampas Station

Radio, of course, plays its part in Wampas proceedings, for what publicity man does not recognize the value of broadcasts in connection with the promotion of popularity of a screen player? The Wampas club for the past two years has been on the air one hour a week over KFI. More recently it has switched over to the Los Angeles Express station, KNX, which is located right in the heart of Hollywood and more suited to movie studio convenience.

The Wampas club programs are now on KNX every Tuesday between the hours of 10 and 11 p. m., Pacific time. On their last Radio program before the big annual ball, all of the thirteen lucky Wampas stars were presented to the audience of the air. Most of them had been on the air before and all of them undoubtedly will appear at Los Angeles and Hollywood microphones many times during 1926.

Dolores Costello Knows "Mike"

Some of them, Dolores Costello for instance, are microphone-broke and enjoy appearing on the air. Dolores Costello is a Warner Brothers player who, although short of experience, has already appeared in the picture, "The Sea Beast," with John Barrymore. She has appeared over the Warner Brothers station, KFWB, many times, acting as guest announcer for the Warner frolics.

So, when you pick up a Los Angeles or Hollywood station on your set next time listen for the voice of one or more of the pretty girls pictured above.

CANADA CAR SQUAD WILL AID TORONTO

EXPERTS TO INVESTIGATE POWER INTERFERENCE

Apparatus Has Been Taken 4,000 Miles Over Dominion Improving Conditions for Good Reception

By A. H. Munday

TORONTO.—The Radio branch of the department of marine and fisheries has detailed a Radio inductive interference squad for the city of Toronto and district, and the staff and the car reached Toronto a few days ago.

For the past two years the Radio branch has been carrying on considerable research work of ways and means of dealing with this particular type of interference and as a result has developed special apparatus for its location and suppression.

This car has recently completed a 4,000-mile tour of eastern and central Ontario investigating and clearing up many cases of interference in about ninety towns and villages. During the trip the squad has been successful in eliminating seventy-five per cent of the cases investigated, and it is hoped that many of the remaining twenty-five per cent of the cases investigated will be shortly eliminated as a result of the experiments which are now in hand.

Listeners' Licenses Provide Funds

From the preliminary survey of the situation in Toronto recently made by the inductive interference section, it is found that the question is very much more involved here than in smaller towns, largely owing to the multiplicity of power lines and the great amount of electrical apparatus in use.

Inductive interference, which originates generally in some fault in electrical apparatus, whether in the power house or the consumer's premises, will travel along the power lines in the form of an electric surge, and will then radiate therefrom, causing interference to all Radio receivers in a district, possibly for a distance of two or three miles from the source.

This work of clearing the air is being carried on by the Canadian Radio branch from the funds available from the sale of Radio listeners' licenses, and it is the intention to extend this work according to the increase of the number of licenses sold.

Dallas Station Will Receive Reports on Sports in Studio

DALLAS, Tex.—Station WRR, here, "The City of Achievement," has adopted a system that will enable this station to receive returns direct from football and baseball games by wire on the telegraph ticker and broadcast play by play at a great saving of time, giving the results as received without losing time for copying reports in a different room.

A noiseless telegraph ticker has been equipped and installed in the same room with the microphone, and the operator will use head pieces for receiving and a noiseless typewriter. The announcer stands back of the operator and announces the results word by word as the news flashes over the wire.

ONE TUBE STAR GETS POLICE DOG

Otto Glasser, Jr., (right) of San Antonio, Texas, is one young member of the R. O. T. C. who knows how to tune in the stations on a one tube set. "Nigger," the dog, is the prize Otto received for winning first place in the first month of the Crosley Radio corporation one tube set receiving contest. "Miss Nigger," however, we should call her ladyship, for she is the charming daughter of two famous German shepherd dogs of very fine pedigree.

INLAND EMPIRE HAS GROUP TO AID RADIO

NON-PROFIT, NON-BUSINESS ORGANIZATION FORMED

To Assist Financially and Otherwise in Maintaining Station KFCF at Walla Walla, Wash.

SPOKANE, Wash.—Articles of incorporation were forwarded recently to Olympia by the Blue Mountain Radio association, a non-profit, non-business organization, formed to promote more widespread interest in Radio and particularly to help Station KFCF at Walla Walla, Wash.

Objects of corporation include: To assist, financially and otherwise, in maintaining and operating a Radio broadcasting station in Walla Walla, and in establishing, maintaining and operating broadcasting stations elsewhere within the Inland Empire.

To obtain material for broadcasting programs and to promote and encourage improvement of Radio programs and the use of Radio in exploiting communities and community advantage, and to organize Radio patrons in the Inland Empire, are also announced as objectives.

Membership certificates are to be issued to chambers of commerce, business firms and individuals. There will be no capital stock and no shares will be issued. Trustees for the first six months are Benjamin J. Stone, M. L. McMurtry, H. L. Bendix, John Cameron, L. R. Hoagland, R. E. Allen and J. D. Moore.

PRIEST, RABBI AND MINISTER AT MIKE

Three Religionists Attend Brooklyn Dinner and Speak on Same Subject Over WAHG

BROOKLYN.—Monsignor John H. Bo ford and Rabbi Alexander Lyons and the Rev. Dr. F. Parkes Cadman recently faced the microphone at WAHG, the Grebe station, Richmond Hill, broadcasting a dinner by the Parents' and Preachers' association of the Adelphi Academy, Brooklyn.

Station WAHG carried the speeches on three wave lengths, 316, 236 and 63. Reports have been received that France, Peru and Alaska heard the three prelates tell about religious instruction in the home. A consensus of opinion of the three religionists seemed to be that a home is a home, whether it is a Catholic, Jewish or Protestant home, and that the latent desire of all is that the fatherhood of God and the brotherhood of man are of the greatest importance.

While the three prelates were seated at the dinner, a battery of lamps blazed in their faces while photographers from all of the big news services of New York were present to make pictures of a priest, a rabbi and a protestant minister breaking bread together. The scene seemed to be too much for the "juice" of the Hotel Bossert, for a fuse blew out and left the big hotel in total darkness. Repairs were made, however, and the pictures were completed.

COST OF ECONOMIES MAY BE PROHIBITIVE

CHECK YOUR THRIFT, SAYS NOTED KITCHEN EXPERT

Betty Crocker Outlines Principle of Determining False Savings—Suggests Taking Inventory

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

"NOW is the time," the walrus said, "to talk of many things," and among the many things the question of economy bobs up repeatedly. In discussing the big subject of economy, there are indeed many things to talk about. Pet economies are funny things. A real economy in one family or one community may be sheer extravagance in another. What is your pet economy? Is it a real economy or does it cost more than it is worth?

Every housekeeper should do a little detective work and investigate the character of her economies. For example, do you economize by buying a large quantity of food and then serve it so often that your husband not only refuses that food, but demands more expensive food by way of reaction? Do you economize by using eggless recipes and buying less milk and then pay high-priced specialists to tell you why your little boy is underweight and your little girl so pale?

Use of Cheap Meat

Do you buy a cheap cut of meat and then pound it and chop it and add quantities of vegetables and butter and use a great deal of time and fuel trying to make it palatable? Figure the cost of the finished product, and see if a more tender cut would not be just as cheap in the end.

On the other hand, do you "buy a few chops for dinner" at 30 cents a pound without realizing that these same chops will cost all the way from 53 cents to 85 cents a pound by the time they are ready to serve—and the bone (at 30 cents a pound) is reposing in the garbage can?

Air Your Pet Economies

It might be worth while to bring some of your pet economies out into good light to look them in the face. Find out whether they are real economies, or only luxuries in disguise.

A woman on our street orders a sack of flour from the grocer without stating what brand she wants. I often hear her say, "I can't understand what happened to my Devil's Food cake this morning." Her Devil's Food cake is her prize recipe, and she is always surprised when it turns out to be a failure. A kitchen-tested flour, guaranteed to always act the same way in the oven, would not only be a real economy to this woman, but also a very great satisfaction.

A woman once told me that for years and years she had spent her precious strength and had worn out clothes by rubbing them to pieces in order to save soap—common, every-day soap. What is soap compared to a woman's strength and happiness?

Question of Quantity and Quality

Economies can never be measured by those of your next door neighbor, because no two families have the same need. It is extravagance for one family to buy all the expensive out-of-season fruits and vegetables, but it may be a real economy to the mother whose big task is to tempt the appetite of her anaemic child.

Buying in large quantities may be the best plan in a family of seven with a large basement store room, but it would be most absurd for a family of two living in a small apartment.

A mother from a small town was visiting her daughter in the city and thinking she would help. She made a gorgeous bread pudding to use up the stale bread, scolding her daughter all the while for her extravagance. Her daughter carefully figured the cost of the eggs, milk, sugar and gas used for the pudding as compared with the cost of the simple fruit gelatine that seemed so expensive to her mother.

Reclassify Your "Economies"

If eggs are cheap a bread pudding may be very inexpensive, but at city prices in the winter it is apt to be a luxury. There is no set formula or rule by which economy may be judged. It is an individual problem to be solved by each one of you. It will require some figuring and a whole lot of common sense to decide just what is the best plan for spending your money and time and energy in such a way that your family can secure the greatest returns in health and happiness. I am neither posing as a teacher nor as a wise

(Continued on page 30)

SHE TELLS MOTORISTS HOW TO GO

Motor touring has taken on a new aspect of safety and surety since broadcasting stations became the vogue. Many of these are now giving road conditions and directions for best routes for their automobile owning listeners. One of the best of such services is conducted via WBBM by the Stewart-Warner company, and the young lady above, Miss Nina Baker, is the voice behind the service.

SHORT WAVES

By Marcella

Talk about the male microphone stars getting mash notes! I, Marcella, received one myself last week. Clifford, I won't divulge, his last name, wrote me a beautiful poem about my beautiful eyes. Clifford, I fear you are a naughty, naughty boy and entirely too curious. Alas, my eyes must continue to remain a mystery to you. This column is reserved for Radio artists only. Poor Marcella must remain just an obscure little writer, unseen by the wicked world.

* *

"I'll bet the answer men in the movie magazines don't get any more mail than the Radio stars," says Mary L., in requesting facts about "The Merry Old Chief," Leo Fitzpatrick. She continues, "though you are disillusioned sometimes when you see what they really look like." But Mary might as well write Mr. Fitzpatrick off the date book, for Leo is very much married to a most charming young lady. His looks? Well, he is handsome, judging from the average standard of masculinity, is heavily built but not fat, and is of average height.

* *

G. W. S. of WOAW, or just "Gus," is pretty new to me. I have his picture, and answering May's question, I think (from the picture) that he is married. Of course, I may be wrong. Gene Rouse is no longer there, but why be interested in Gene—he has a "cover-girl" wife that is so good looking that when the two stand side by side, all of Gene's homeliness, if I can be so brutal as to call it that, stands out. And they have a baby, too.

* *

Pat Barnes, of "Your Hour" and WHT fame, is certainly a question producer. My, my, but we girls must admire him! He is a handsome fellow, brunette, 32 years old, six feet tall, not fat, not thin—168 pounds exactly. Why shouldn't we admire him? His eyes are brown and he is SINGLE.

* *

That deep-voiced chap you've been hearing over WJAZ lately is E. F. McDonald, Jr., who owns the broadcaster. He's a peach and has a wonderful personality. Somebody'll get him if you don't, for he is a wealthy bachelor. Get out the postage stamps and writing paper!

* *

Gladyce liked our first reply to her note and therefore sends another. Replying punctually, according to our boss' order, we hereby reply that Fred Jeske is free and footloose, 26 years young, a ladies' man, and that he steps out every Monday night (silent night for WBBM). He happens to be very handsome and is one of the Two Jays. Charlie Garland, likewise of WBBM, ad-

Who Wins the Gold Award for Foreign Tests?

AS THIS issue goes to press the reports of foreign reception are being submitted to Radio Digest for entry in the $100.00 Gold Award competition. The communications must be in the judges' hands not later than Thursday midnight, February 4. Watch the next few issues of the Radio Digest for announcements of the winners of this unique contest. Confirmation programs for all foreign stations will be given next week.

1,200 VOICES WILL SING ON PROGRAM

WEAF to Broadcast the Third Annual Concert of the Associated Glee Clubs

NEW YORK.—On Saturday, February 6, WEAF will broadcast direct from the Seventy-first Regimental Armory, Thirty-fourth street and Park avenue, this city, at 8:30 p. m., Eastern time, the third annual concert of the Associated Glee clubs which will be held under the direction of Walter Damrosch, the famous conductor of the New York Symphony orchestra. The concert will last two hours.

The glee club concert has been broadcast from New York city and several other nearby cities with a combined membership of 1,200 voices, all of whom will take part.

The soloist of the occasion will be Miss Annie Fitziu of the Metropolitan and Chicago Opera companies. Several of the selections which will be rendered by this mammoth male chorus will be Baldwin's "Hymn Before Action," a special arrangement of Handel's "Where'er You Walk," Speaks-Gaines' "Sylvia" and Mark Andrews' "The Clock."

Boston Symphony to Be Broadcast Over WEEI

Winfield S. Quinby Gives $1,000 for Each of Twelve Concerts

BOSTON.—For the first time in its history, and after a long series of attempts to secure permission, concerts of the Boston Symphony orchestra are to be broadcast from Station WEEI through the generosity of a Boston business man, Winfield S. Quinby. Mr. Quinby has given $1,000 for each of the twelve concerts to pay for the privilege of having them broadcast from the regular Saturday afternoon programs of the orchestra at Symphony hall. The first two concerts were broadcast January 23 and 30, and one thereafter will be given each Saturday for ten additional weeks.

It is possible that the concerts will be relayed to other stations in New England, particularly WTAG, Worcester, and QCSH, Portland, Me. This feature is dependent upon the arrangements that WEEI officials can make with other stations and with the telephone company.

Arthur F. Edes of the WEEI announcing staff, known to listeners as EFA., is to have charge of the microphone at all the twelve concerts.

KSL Broadcasts Education

SALT LAKE CITY, Utah.—The University of Utah has announced the beginning of a series of lectures over Station KSL. They are of an educational nature and deal with health subjects, literature, science, history, etc.

To Hunt Cause of Static This Week

National Tests Will Be Made by 4,000 Observation Stations; Will Aid in Survey

CHICAGO.—Dates for the national tests of Radio reception to determine the causes of static and fading have been announced after 4,000 of the 4,500 designated observation stations had expressed a willingness to take part in the survey, which is being conducted by the Stewart-Warner Speedometer corporation here, in cooperation with the Northwestern university.

The first test will be held on Tuesday night, February 9, from 8 to 11 o'clock, Central time. The second and third tests will be on the two succeeding nights at the same hours. Subsequent trials will be held throughout the winter, should the data obtained indicate that real progress in a search for the causes of these two major Radio annoyances is being made.

Most of the observations will be made by broadcast listeners using standard receiving sets and depending for the accuracy of their reports upon their own ears. To insure the scientific accuracy of the result, however, twenty control stations equipped with electrical measuring devices and automatic recorders have been placed in strategic points about the country.

FLORIDA TO BERING SEA

(Continued from page 7)

frostbitten Canadian friends would be listening in when WGHB goes on the air tonight."

Mr. Bowles looked hopeful, but the merest shadow of a doubt still lingered.

It was a clear night and Clearwater never had been clearer. There was narry a thing to go amiss. The little 500 watter did her stuff to Mr. Tison's entire satisfaction. Telegrams and phone calls came in with a flood that fairly deluged Mr. Bowles.

But the best message did not get in until the next day. And this is what it said:

"Congratulations, new station. Songs, orchestra whole program came through loud speaker like next room. What power do you use?—Dr. George H. Lescher, St. Paul Island, Alaska.

Gus Swanson Is Member of WOAW's Announcing Staff

OMAHA.—Station WOAW has recently added to their announcing staff Mr. Gus Swanson, possessor of a deep bass voice, with unusually clear enunciation. Already he has become very popular with the Radio audience. Mr. Swanson is well known in the musical circles of Omaha and is a leader in choral and community singing. He is a bass soloist at the Kountze Memorial Lutheran church and an active club worker.

This pretty young lady proves that Louisville has at least one beauty. Her name is Myrtle G. Stinger and her sweet voice has been heard countless times from WHAS.

High Lights of the Week

CHICAGO fans were denied the privilege of hearing the Chicago Civic Opera company during its season in this city, but Boston listeners will hear the entire company give "Il Trovatore." Among the artists appearing are, Claudia Muzio, Augusta Lenska, Antonio Cortis and Richard Bonelli. Another headliner Saturday, is a speech by Vice-President Dawes from WIP, Philadelphia. He is the guest of the Manufacturers' club. If you have not had an old-fashioned sleigh ride this year, you will tune in for CNRO, Ottawa, this same evening and leave for the annual sleigh drive at 8:45 p. m. Eastern time. Stop-overs for old-time square dances will be enjoyed by all.

The opera star featured at WEAF this Sunday, is Charles Hackett, tenor. Fans may hear him at 9:15 p. m. Eastern time on the WEAF chain. The assisting artist with the Copley Plaza orchestra at WBZ, Springfield, is Theresa Sprague.

A traffic squad recruited by Earle Buell is the new feature at WAMD. No word has been received as to what this squad will do, but it is expected that the air will have no squeals nor howls on Monday evenings at 6:30 p. m. Central time, when this group is on the air. Troy Elks expect to meet in the studio of WHAZ between 8 and 9 p. m. Eastern time, for their regular Elks club frolic, Monday.

The Provincetown players are well known in New York for their selections of unusual plays of literary value. They will appear before the microphone of WGBS Tuesday night in "The Dream Play" by August Strindberg. A gay program is scheduled for KOIL, Council Bluffs, Ia., when the Nautical dance orchestra "Seamen without a Ship" embark on the air.

From 6:30 p. m. to 1 a. m. Eastern time Wednesday, a gala program will travel etherways from WTIC, Hartford. Among the special features are the Yale band, the New York Philharmonic ensemble, Arthur Middleton, baritone, and Jeanne Laval, contralto. For those who prefer lighter music, the midnight frolic presents Sherman and Ryan and three young ladies called the Harmony entertainers.

A piano recital of Chopin compositions and a talk "Chopin and His Works" by J. Austin Springer from WGY Thursday, will give Radio fans a better idea of this composer's skill. "Stung" is the amusing title of the dramatic offering of KGO for this same evening. Eight of the famous KGO players will appear before the microphone.

The fifteenth great artist organ recital will be given Friday evening from WAHG. William Edward Zeuch is the artist this week. Lincoln programs are popular for this evening. The Department of English at the U. of Pittsburgh will officiate at KDKA with the KDKA Little symphony orchestra playing civil war melodies. Drinkwater's famous play "Lincoln" will be given by the WMAQ players.

VICE PRESIDENT TO SPEAK AT WIP

Cincinnati fans have known and loved Waldene Johnson for the past two years. She will be the soloist of the Cincinnati community program Monday at WSAI. To the right is a young comedian, who between law classes at the University of Oklahoma, entertains with Scotch jokes of one kind and another at WNAD, the college station. Meet W. H. Thompson, baritone.
